EXECUTIVE MAYOR'S FOREWORD

Honorable Cllr: Jesta Sidell

I am pleased to present this third IDP 2024/25 review to you, our valuable stakeholder in service delivery. We continue to indicate that this third review is striving to achieve, amongst other things, a high standard of clean governance and administration and improve the quality-of-service delivery to our communities. Our Council has been bestowed with leading the Ehlanzeni District Municipality and its locals, we

have been given a mandate by our people to address, amongst others, the persistent service delivery challenges and bottlenecks that are prevalent in our district communities. While in the main, the triple challenge still tops the list of our priorities, as this government, we are on the roll in implementing the approved District One Plan (DDM) popularly known as the DDM. The high impact of the catalytic projects that are contained in the District One Plan has a potential to address some of the current challenges. It is pleasing to report that a couple of these projects have already been completed and just to mention a few of both bulk water and road projects; Hoxane Bulk Water Scheme, Sibange Bulk Water Scheme and Karino Bulk Water Scheme, Karino Road and Bridge Interchange and Elandshoek Bridge and Road Interchange to mention a few. On the same breath, we equally remain concerned with the slow pace in huge projects like the Construction of the Mountain View Dam to augment the current supply and demand of water around the City of Mbombela and surroundings, Nkomazi Special Economic Zone, and the Makhonjwa World Heritage Site.

The government of the day has also prioritized over and above the Medium-Term Strategic Priorities, the four integrated strategic interventions: Keeping the lights on, Provision of decent water and sanitation, patching of the potholes and the Letsema Clean Up Campaign Programmes. Significant strides have already been made in this regard and hopefully all social partners and the private sector will also continue to support and augment government work. History is showing us that if we work together as one Team, we can achieve more within a short space of time. It is against this spirit of the District Development Model that we urge all stakeholders to collaborate with the government to improve the quality and standard of life of our people.

With the recent statistics (Census 2022), It is clear that on access to basic services, we are chasing a moving target and there are those who believe that households and population numbers registered on our data hubs are accurate. It is suggested that the population is quite big as most of the households are not accounted for due to high influx rates and migration patterns occurring in our borderlines. We have made a commitment to the masses of people that we will leave no stone unturned in favour of delivering quality and standard services. Amongst other focus areas are land invasion, re-settling households located within flood lines and wetlands zones and alongside riverbanks, theft, and vandalism of electrical and water infrastructure, especially in the City of Mbombela, Thaba Chweu and Nkomazi Local Municipalities. Other socio-economic ills also that are

“A District Municipality that provides Impactful service delivery to its communities.”

rising to shocking statistics include Gender Based Violence and Femicides syndicates, high unemployment, poverty, inequalities, and random murders.

The district and local municipalities have made commitments to procure diesel generators to augment energy source and supply especially to the water and wastewater works to prevent disturbances to the operations and rendition of services during loadshedding periods. Some of the local municipalities are exploring the installation of solar powered systems to augment the current availability of power on our grid lines.

The participation in the DBSA Adopt a District Programme (Partner with the District Programme) which has placed the district at an advantage of receiving portion of the R5 Billion Grant and technical support that will focus on 4 strategic areas for development has already started. All the preliminary phases of the project have been completed and currently, the Team is identifying high impact projects which are to be submitted for funding by the DBSA. This process has been aligned to the IDP process and we are hopefully that once approved with the IDP, the programme implementation may commence as early as July 2025.

All the above interventions and proposals for development form the crux of our priorities contained in detail on this final IDP 2024/25.

To this end, I would like to present to you all, our valued stakeholders, and partners, Ehlanzeni district municipality’s final IDP and Budget 2024/25.

.....

Honorable Cllr: Jesta Sidell

Executive Mayor

OVERVIEW OF THE MUNICIPAL MANAGER

I am honoured to be afforded this opportunity to present this final review IDP and Budget 2024/25 to our valued stakeholders and social partners. We hope that we have considered all the pressing matters that remain priorities for the upcoming financial year.

According to Section 34 of the Local Government Municipal Systems Act, No. 32 of 2000, it stipulates that after the development of the 5-year IDP, each municipal council must undertake an exercise to review its strategy in line with the changes of circumstances and the assessment of its performance

measurements in relation the municipal targets outlined in Section 41 of the same Act. Indeed, as Ehlanzeni District Municipality, we have complied with this prerogative of this legislative prescript. After thorough consultations with stakeholders during IDP and Budget Representative Forums and Strategic Planning Lekgotla and using reference sources such as the State of the Nation Address (2024), State of the Province Address (SOPA -2024) and the Local Government Manifesto, the following priorities emerge as major focus areas for 2024/25 and beyond. In no particular order the list includes and not limited to the following:

- Barberton rebuilding Program
- Installation of integrated camera systems to safeguards municipal assets
- Roll out cleaning campaign (Letsema Program)
- Keeping the lights on (Street lights and high mast lights)
- The maintenance of roads and storm water drainage systems due to the recent rains that has damaged the hardcore infrastructure;
- Explore installation of alternative sources of energies to curb the impact of the load shedding that has a negative impact to the economy of the country;
- The implementation and monitoring of the Flagship Programmes (Cleaning of streets, streetlights fixing, patching of potholes and GBVF programmes);
- The focus will also be on the implementation of the District One Plan through the partnership with Public Private Growth Initiative (PPGI), private sectors and other stakeholders who are members of the Work streams and Focus Groups;
- Improve access to sustainable basic services (Water, Sanitation, Energy, Refuse Removal, Roads and Storm water drainage systems);
- Implement the economic recovery strategies in order to increase Economic Transformation and Job Creation in pursuit of curbing downward the escalating unemployment rate currently sitting at 42.5%;

“A District Municipality that provides Impactful service delivery to its communities.”

- Improve systems and strategies to avoid illegal land grabs and Invasion syndicates;
- The district is prioritizing the development of the climate change and crisis adaptation strategy
- Prioritizing the creation of job opportunities through the internship program in collaboration with LGSETA
- Provision of decent human settlement and relocating households from flood lines points to safer environments;
- Upscaling the efforts to reduce adverse climatic weather patterns whilst putting in place mitigation and adaptation strategies.

Whilst the list cannot be exhausted, the above-mentioned priorities are the pressure points emanating from these engagements and reference documents. These priorities are also included as part of the long-term planning in the form of the recently Approved Revised District One Plan. The introduction of the District Development Model (DDM) was aimed at improving cooperative governance to build a capable, ethical and developmental state and as EDM we are on course to realize this vision through the implementation of the Plan with the support of our social partners, also in the main execution of the Memorandum of Agreement signed with PPGI.

It is against this background that I hereby present the final 2024/2025 FY IDP and Budget in line with Chapter 4 of the Local Government: Municipal System Act, No 32 of 2000.

Thank you.

.....
Dr. N.P Mahlalela
Municipal Manager

CHAPTER 1

1. INTRODUCTION

“Failing to plan is planning fail”

Planning is the single most important task of management and leadership of an organisation. Strategic planning determines where an organisation is moving to over the next (5) five years. It is a systematic process through which an organisation agrees on and builds commitment to priorities that are essential to its mission and responsive to operating the environment.

The Integrated development plan (IDP) process is a process through which municipalities prepare strategic development plans for a five-year period. An IDP is a principal document for Local Government, used to guide the development agenda and municipal budgets, land use development, management and promotion of local economic development and institutional transformation in a consultative and systematic manner.

Strategic alignment of all key processes with the strategic plan is a requirement for successful implementation of the municipal strategy. In the context of local government, the strategic plan is the Integrated Development Plan (IDP) of the municipality. The budget is the provision of resources for the implementation of the strategy (IDP), whilst the Service Delivery and Budget Implementation Plan (SDBIP) is the implementation plan for the strategy. Quarterly Performance review processes provides for the monitoring of the implementation of the SDBIP. Performance agreements signed by the Municipal Manager and the Section 56 Managers, as well as the annual performance appraisal process is used for rewarding performance on implementation of the strategy.

The alignment of the IDP processes between different spheres of government are critical in making sure that service delivery is attained and thus planning becomes critical for the district and its local municipalities. The district framework must ensure that planning and IDP processes are not in contrast but rather complementary and aligned with key documents for development in local government. The district framework gives direction in which municipalities’ IDP should follow and drive integrated development planning within the district’s area of jurisdiction.

The plan must identify the plans and planning requirements in terms of national and provincial legislation on the district.

The council of the district municipality will undertake the development process of the 2022/2027 FY IDP and Budget.

Ehlanzeni District Municipality has over the past years achieved responsive, credible sets of Integrated development plans “hereinafter referred to as IDP’s” in the province and thus intends to pursue and maintain the excellent status quo.

This document sets our Ehlanzeni district municipality’s five-year integrated plan for the financial years 2022/23 to 2026/27, containing the key municipal goals and priorities within a 5year implementation cycle.

The IDP is a strategic document of municipal council and guides all planning and development in the district municipality. Preparation of the IDP followed an approved process plan that incorporated extensive stakeholder consultation.

Purpose and process of Integrated Development Planning

The centre piece of developmental local government is the integrated development plan (IDP). IDP's provide long term visions for the Municipality, detail the priorities of an of an elected council; link and coordinate sector plans and strategies; align financial and human resources with implementation needs; strengthen the focus of environmental sustainability; and provide the basis for annual and medium-term budgeting.

Integrated development plans intend to give effect to the constitutionally prescribed role of Local Government of promoting economic and social development.

Legal Mandate

The Local Government: Municipal Systems Act, No 32 of 2000

1.1. Executive Summary

This IDP is structured into 11 chapters:

- **Chapter 1:** Introduction
- **Chapter 2:** Contains the summary of the district framework, being the main guiding document for aligning the planning process between local municipalities and the relevant district municipality.
- **Chapter 3:** Contains the situational analysis, location of the district, demographics, the district economic profile and rural development
- **Chapter 4:** EDMs Organisational Structure
- **Chapter 5:** An overview of the performance of the district municipality for the last audited financial year
- **Chapter 6:** Contains the district's wide spatial development framework which provides the basic guidelines for the application of principles that will render the following benefits:
 - Sustainability;
 - Accurate planning
 - Integrated social and environmental activities; and
 - Ensure that spatial priorities are strategically implemented
- **Chapter 7:** Contains the district financial plan that is guided by Section 263 (h) of the Local Government Municipal Systems Act, 2000 (Act No. 32 of 2000)
- **Chapter 8:** Contains the Municipal councils 5 -year strategic objectives
- **Chapter 9:** Contains the projects of the district and provincial sector departments
- **Chapter 10:** Contains district wide summary of the sector plans, policies and strategies
- **Chapter 11:** Constitutes the long-term planning development strategy to address the challenges facing the people of Ehlanzeni District

“A District Municipality that provides Impactful service delivery to its communities.”

1.2. Ehlanzeni Strategic Direction For 2023 – 2027

Vision

“A District Municipality that provides Impactful service delivery to its communities”

Mission

“Ehlanzeni shall be the Socio-Economic centre of coordination, development planning and sustainable delivery of services”

Core Values

Ehlanzeni is guided by the following values in conducting its business:

- Transparency
- High Quality service delivery
- Accountability
- Service communities with integrity
- Efficiency
- Professionalism
- Value for humanity
- Outcomes based delivery approach

District Strategic Goals

EDM derives its mandate and goals from Section 863 (3) of the Local Government: Municipal Structures Act of 1998, which states that a district municipality must seek to achieve the integrated, sustainable and equitable social and economic development of its area as a whole by:

- Ensuring integrated development for the district as a whole
- Promoting bulk infrastructural development services for the district as a whole
- Building the capacity of local municipalities in its area to perform their functions and exercise their powers where such capacity is lacking; and
- Promoting the equitable distribution of resources between the local municipalities in its area to ensure appropriate levels of municipal services within the area.

1.4. Macro, Micro Policy and Planning

IDP alignment with strategic planning instruments

The following submission aims to illustrate the extent at which Ehlanzeni district municipality for 2022/2023 has been consulted and aligned with other key strategic planning tools like the Millennium development goals, the national spatial development perspective and principles, the outcomes-based planning approach and the vision 2030 National development plan. Consideration has been given to the United Nations Millennium Development goals and the declaration thereof.

The National spatial development perspective

The National spatial development perspective is a guiding tool in ensuring proper alignment with the planning space and dimensions the country intends achieving in the near future. It is a five-part document which looks in detail at the following:

PART 1: This part is a preamble which sets out the background leading to the call for proper alignment on the spatial rationale in the country. It addresses all historical challenges leading to the disparities and segregated settlements we find ourselves in today. It gives clear objectives and outlines the content of the document as a planning tool

PART 2: The document provides for an overview in a narrative form of the changing spatial economy and its impact on governments commitment on social reconstruction, sustainable economic growth, social and environmental justice. Consideration is given to the global spatial trends and infrastructure investment and development spending

PART 3: The third part of the tool is an interpretation of the spatial narrative form to indicate the hard choices that government has to make in reconciling all its objectives towards a developmental state.

PART 4: This part is an implementation guideline and procedures towards the effective delivery of the set objectives in terms of the spatial framework in the country. This procedure seeks to bring together planning and policy co-ordination among the three spheres of government. In doing so, government will be ensuring that people in different localities have greater possibilities of achieving their potential.

PART 5: The last part of the instrument gives a comparative view with other national and transnational spatial planning exercises with an aim of ensuring alignment with the ones that are already ahead of us and at the same time allows for best practice models and information sharing on our record achievements.

The planning processes leading to the formulation of Ehlanzeni District municipality's IDP did not lose sight of this vital planning tool, all its principles and objects thereof were highly adhered to.

THE NATIONAL DEVELOPMENT PLAN (VISION 2030)

It was soon after the promulgation of the Outcomes Based Planning Approach, the State President restructured his cabinet to conform to the set standards. A Planning Commission which reports directly to the Presidency was one of the structures that were established. Its terms of reference were to give planning support and guidelines to all government institutions.

The Commission embarked on a diagnostic process in an effort to establish the planning data and realities on the ground. About eight issues all revolving around poverty and inequality were raised during this stage and they are: Poor education, High Disease rate, Exclusive Planning, corruption, Aging infrastructure, Poor job opportunities, Resource intensive economy, Public Services uneven and divided communities.

In a means to address these challenges, the Commission drew up a plan called the 2030 Plan for South Africa which is looking at a total attainment of a prosperous and equity state by the year 2030. This plan proposes a number of issues that need to be considered when doing our planning if we are indeed to realize the 2030 vision. These areas were all given an honest consideration during the developmental stages of our IDP to ensure proper alignment. A one-day session was conducted with the Commission in a quest to customize the issues with the regional realities. These planning considerations areas are as follows:

- Creation of Jobs
- Expanding Infrastructure
- Transition to a low-carbon economy
- Transformation of urban and rural spaces
- Education and Training
- Provision of quality Health Care
- Building a capable State
- Fighting corruption, and
- Transformation and Unity

CHAPTER 2

2 THE INTEGRATED DEVELOPMENT PLANNING PROCESS

2.1. The IDP Framework and Process Plan

Each municipality council must, within a prescribed period after the start of its elected term adopt a single, inclusive strategic plan for the development of the municipality which-

- a) Links, integrates and coordinates plans and takes into account proposals for the development of the municipality;
- b) Aligns the resources and capacity of the municipality with the implementation of the plan;
- c) Forms the policy framework and general basis on which annual budgets must be based;
- d) Complies with the provision of this chapter; and
- e) Is compatible with the national and provincial development plans and planning requirements, binding the municipality in terms of legislation

In terms of the department of corporative governance and traditional affairs, the IDP evaluation framework plan is explicitly designed to improve the quality of IDP's, the overall objective of the IDP assessment session is to:

- Improve the delivery of services
- Support and improve the content of the MEC commenting process so as to ensure we move towards sustainable environmental; and
- Influence good governance and the municipal planning processes so that communities are at the centre of municipal planning

The IDP & Budget Review process of the 2024/2025 was undertaken in terms of Section 34 (1) (a) and (b) of the Local Government: Municipal Systems Act 32 of 2000. Provisions of this section requires that each municipal council must, review its integrated development plan annually in accordance with an assessment of its performance measurement in terms of section:41; and to the extent that changing circumstances demand; and may amend its integrated development plan in accordance with a prescribed process.

2.2. Structures of The IDP

Table 2: Structures of the IDP

STRUCTURE	FUNCTIONS/ROLES & RESPONSIBILITIES
IDP Representative Forum	The IDP Representative Forum is composed on interest groups, communities and organizations. It has the following functions: • Represent interests on relevant planning activities and their outcomes; • Analysis issues, discuss, negotiate and reach consensus (through decision-making process); and • Participates in the designing of project proposals
IDP Managers Forum	The IDP Managers Forum is composed of the district IDP Manager and IDP Managers/Coordinators from local municipalities in the district: - • Facilitates and coordinates IDP activities in the district • Ensures horizontal alignment between the district, municipality and local municipalities; and • Ensures vertical alignment between municipalities in the district
IDP Cluster Forums	IDP Cluster Forums are composed of departmental heads and senior managers of the district and the local
(Technical, Economic Growth, Governance & Administration, Community Services, Finance, Environmental Planning & Spatial Development Forums)	municipalities. IDP Cluster Forums have the following functions: • Provide technical input to the district IDP process; • Promotes the alignment of strategies in the district; and • Contributes to the prioritization of district priorities
Traditional Leaders Forum	The district family of municipalities engage with the local house of Traditional leaders periodically to discuss and incorporate developmental issues as proposed by the Traditional Leaders

2.3 THE IDP DEVELOPMENT PROCESS

Figure 1: IDP Development Process

Figure 2: IDP, Budget & Performance Alignment

Figure 3: IDP Phases

Section 27 of LG: Municipal Systems Act requires the district municipality to consult with its local municipalities on matters of integrated development planning in order to ensure alignment of the plans between district and local municipalities. The Framework adopted by the district Council provides the basis for achieving alignment of the plans between district and local municipalities.

2.3.1. Analysis Phase

This phase focused on the review of the current state of development, the contribution made by the district and local municipalities in terms of service delivery as prescribed in section 26(b) of the Local Government Municipal Systems Act (32 of 2000). A key aspect of this phase was the consultation process which was undertaken from July 2023– October 2023 using the IDP Representative Forum, Council meetings, community outreach, community-based planning development, IDP technical committee, cluster meetings, Media and EDM Lekgotla approach, involving all local municipalities, provincial departments, Traditional leaders, communities and parastatals. This was critical in guiding the development and prioritization process, and the context in which the district strategy was formulated. It was through consultation with local municipalities that district priority issues were identified. All relevant documentation, as a secondary source of information, was reviewed in compiling priority problem statements and the state of development in the district.

2.3.2. Strategy Phase

Workshops were held with local municipalities, management and all departments in the district in formulating the strategy. However, consultation with stakeholders will be an ongoing process as part of the district priority to ensure optimum stakeholder participation and involvement in the IDP process through their public participation strategy. This aims to ensure that the IDP is refined and meets acceptable level of credibility. The council development strategic objectives and key performance indicators, confirmation of situational analysis (High level SWOT analysis), Vision, Mission, strategic objectives and projects for the 2024/25 financial year (fy) and project prioritization to guide preliminary budget allocation. Strategic planning sessions were conducted with the departments from November 2023 to January 2024 and the organizational strategic planning session was held on 14 March 2023.

The mandate as encapsulated in Section (83) (3) of the Municipal Structures Act, 1998 was equally and formed the basis of developing the district strategy and corporate Balanced Scorecard. The balance scorecard will be adopted by the district as a strategic performance management system which will be used in translating the strategy into operational terms. The scorecard indicates district priority initiatives, goals, strategic objectives, performance measures, and targets. The organizational balance scorecards will be escalated to individual scorecards i.e., individual performance.

2.3.3. Project Phase

During Ehlanzeni District municipality’s planning sessions key MTRF projects were identified and linked to the district objective, National Development Plan (Vision 2030) and the Manifesto to ensure alignment and service delivery. Departmental meetings were held to appraise the projects in line with the macro and micro policies. The most important output of this phase is the Service Delivery and Budget implementation plan (SDBIP). Projects must be reflected in the SDBIP, this phase thus provides projects that have been budgeted for by the district in line with the priority initiatives emanating from the strategy. Projects funded by stakeholders or other implementing agencies that will have a major impact on the district have also been included in the IDP.

The district municipality will be putting more emphasis to ensure that all projects designed and planned for implementation by stakeholders and role players are informed by district priority needs. It is during the analysis and project phase where integration and alignment of priority needs or service delivery programmes in the province can be achieved.

2.3.4. Integration

The projects that have been identified by the district are in line with the priority initiatives and objectives and comply with the resource framework as required by the legislative prescripts. The integration phase should provide an opportunity for the municipality and all its stakeholders to harmonize the projects in terms of contents, location and timing for the consolidation and integration of district, provincial and national programmes take place. The district will continue to refine its operational strategy, and make sure that they meet the needs of its beneficiaries. This will include a review of all integrated sector plans such as the spatial development framework, performance management policy, disaster management plan, local economic development strategy, multi-year financial plan, and programmes on HIV, gender equity and poverty alleviation.

2.3.5. Approval Phase

The district 2024/2025 final IDP & Budget was noted and approved by council on 15 May 2024 under resolution number A36/2024 and A37/2024

2.4 EHLANZENI DISTRICT DEVELOPMENT MODEL (DDM)

2.4.1. Legislative Requirement

The implementation in Ehlanzeni District has followed the policy guide emanating from the National sphere of Government. The “DDM” is a developmental State approach harnessing the following:

- A common vision for development of the country which is collectively generated and broken down into and according to needs and opportunities of each district and metropolitan geographical area (IGR impact Zone);
- The identification of commonly agreed spatial and development priorities within these impact areas;
- A vision and priorities which are supported by well researched, credible and technically sound long-term, implementation and operational plans, backed by appropriate capital investments, adequate project preparation, and impactful financing as well as implementation;
- Prioritized spatial and integrated development outcome logics which transcend narrow, sectoral and personal interests or biases;
- Multi-year long-term and predictable objectives, targets and resource commitments to agreed programs and projects extending beyond electoral cycles;
- A society wide accountability framework and responsibilities for tracking and reporting on implementation and actions withing government and to stakeholders and the broader public;
- Reinforce an outcome-based IGR system where there is a systematic IGR programme and process associated with the formulation and implementation of a single government plan; and
- Root development withing communities as key actors in what government and stakeholders do.

The policy suite therefore guiding the implementation of Ehlanzeni’s District Development Model is informed by the following policy documents, namely;

- (i) District development model, concept note. September 2019;
- (ii) District development model, draft Guidelines, 17 March 2020;
- (iii) Circular number 1 of 2020, National department of Cooperative Governance and Traditional Affairs;
- (iv) District development model, implementation Framework. Annexure 1: One Plan Process Guideline, October 2020;
- (v) DDM Implementation Framework Annexure 2: Establishment of DDM Hubs. October 2020; and
- (vi) DDM Implementation Framework. Annexure 3: One Plan content guide. October 2020

Essentially, the policy documents listed above have been essential in arriving at a product for the District of Ehlanzeni which represents the national agenda of arriving at one plan for the district.

(Ehlanzeni District Development Model 2021 has been attached as an annexure)

2.4.2. Objectives of the DDM One plan

The objectives of Ehlanzeni District One Plan are to:

- Address the misalignment caused by a "silo" approach at a horizontal and vertical relationship level between all spheres of government;
- Maximize impact and align plans and resources through the development of a One Plan, enabling the vision of "One District, One Plan and One Budget";
- Narrow the distance between people and government by strengthening the coordination role and capacities at a district and local level;

- Ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of the people and communities at a local level;
- Build government capacity to support municipalities;
- Strengthen monitoring and evaluation at a district and local level;
- Implement a balanced approach towards development between urban and rural areas, and;
- Ensure sustainable development whilst accelerating initiatives to promote poverty eradication, employment and equality.

The DDM is an all-of-government approach to improve integrated planning and delivery across the three spheres of government with district and metropolitan spaces as focal points of government and private sector investment. The DDM is aimed at facilitating integrated planning, delivery and monitoring of Government's development programs through the concept of a joint “One Plan” in relation to 52 development spaces / impactzones through the establishment of national technical capacity as well as district hubs that will drive implementation of the programs. This approach will not only accelerate local economic development, urbanization, economic activities but also the provision of basic services.

The DDM embodies an approach by which the three spheres of government and state entities work in unison with other development partners in an impact-oriented way and where there is higher performance and accountability for coherent service delivery and development outcomes. It influences spatialization and reprioritization of government planning, budgeting, implementation and reporting in relation to jointly agreed outcomes and commitments in the 52 districts and metropolitan spaces. This is facilitated through and anchored around the ‘One Plan’, ‘One Budget’, ‘One District’.

The Ehlanzeni District One Plan is based on the DDM Theory of Change which postulates six transformations to move from the current problematic situation to a desired better future. Whilst existing plans across government seek to align to the NDP and to each other, there is no clear single line of sight and logical rationale or relations in terms of commonly agreed priorities and joint and coherent way of addressing them within the socio-economic and inclusive and integrated placemaking dynamics within specified spaces.

2.4.3. DDM one plan catalytic projects

These catalytic projects have been linked to the situational analysis of the District Municipality and its Locals. The situational analysis is indicating that, bulk supply of water is a biggest challenge in the district especially in areas like Nkomazi and Bushbuckridge and City of Mbombela. Ehlanzeni DM has been appointed by Dept of Water and Sanitation (DWS) to implement the two bulk schemes in Nkomazi Local Municipality, the Sibange and Driekoppies Bulk Water Scheme to supply water for the Southern Eastern part of the Municipality. In Bushbuckridge LM, primary bulk infrastructure was completed in 2015/16 financial and since then, the municipality is busy with secondary bulk and reservoirs construction. Most recently, the municipality has prioritized reticulation projects.

The second challenge as per the situational analysis is the high unemployment rate which is slightly above 34%, a number of projects have been lined up for implementation through the District One Plan, the completed and already operational Mkhuhlu Agrihub in Bushbuckridge Local Municipality, the Mpumalanga International Fresh Produce Market (MIFP) is almost complete pending its operationalization will also contribute more job opportunities and linking emerging agricultural SMMEs to the main stream markets. From the far North towards

Mozambique in Komatipoort, DARDLEA and MEGA are implementing the Special Economic Zone (SEZ) earmarked to be worth R43 Billion which will also create over and above 100 000 jobs.

The District One Plan also emphasizes some projects are to boost the economic drivers of the Province and District Municipality especially Tourism, Agriculture, Forestry and Manufacturing and some of these are the major corridors like R38 from Barberton to Kaapmuiden, R38 from Barberton to Elukwatini via Ekulindeni, the refurbishment of Bulembu Road from Piggs Peak to Josephsdal/ Bulembu Border Post, the revitalization of the railway line from Barberton to Kruger National Park via Kaapmuiden. These projects are entirely to boost tourism in the main and to unlock transportation opportunities such as consideration for a truck stop and scenery views.

The Finance and ICT related workstream has prioritized the development of the Revenue and enhancement strategy as a priority to enable municipalities to attract investment and but also to remain viable and self-sustainable. This strategy has already been approved by Council for implementation. There are projects that were earmarked as flagship which were squarely introduced to assist to uplift the face of the towns like Mbombela, Komatipoort, Barberton, Sabie, Graskop and Lydenburg and these include: streetlighting, resealing of roads and patching of potholes and grass cutting.

Figure 4: Sector Integration Process

CHAPTER 3

3. SITUATIONAL ANALYSIS

3.1. LOCATION OF EHLANZENI DISTRICT MUNICIPALITY

Ehlanzeni District Municipality (EDM) is one of the three district municipalities located in the north eastern part of Mpumalanga Province. It is bordered by Mozambique and Swaziland, Gert Sibande District on the Southern side, Mopani and Sekhukhune Districts of Limpopo in the northern side and Nkangala District Municipality in the south western side.

The district municipality comprises of four local municipalities namely: Thaba Chweu, City of Mbombela, Nkomazi and Bushbuckridge. The district used to comprise of a district management area (DMA) in the southern part of Kruger National Park of which the demarcation Board has split it into the three local municipalities i.e., Mbombela, Nkomazi and Bushbuckridge. With the incorporation of Bushbuckridge into Ehlanzeni, the total area coverage of the district is approximately 27,895.47 Km². On the 3rd of August 2016, Umjindi and Mbombela local municipalities were amalgamated to form the City of Mbombela Local Municipality, MP326.

Figure 5: Municipal Boundaries & IDP Projects 2023/24

3.2. DEMOGRAPHICS

3.2.1. Population Size

According to Stats SA’s Census 2022, Ehlanzeni District population increased from 1 688 615 in 2011 to 2 270 897 people in 2022, an increase of over half a million people. This translates to the growth rate of 2.96 % between the two time periods.

According to the Stats SA’s Census 2022, Ehlanzeni’s population increased from 1 688 615 in 2011 to 2 270 897 people in 2022 – largest population among districts & increased since 2011 to 44.2% of Mpumalanga’s population in 2022.

In 2022, the youth population (0-34 years) formed 53.6% of the total population & the elderly population (60+ years) formed 4.9% of the district’s population. In 2022, the female population’s share was 52.8% and that of males 47.2%.

The population increased by 582 282 between 2011 and 2022, a population growth rate of 2.9% per annum between 2011 & 2022, which was more than double the annual average economic growth of 1.1% p.a. Between 2011 & 2022, the average annual population increase of Nkomazi was the fastest among the local municipal areas in Mpumalanga & in that of Bushbuckridge was the joint fourth fastest.

The number of households in Ehlanzeni increased from 445 079 in 2011 to 560 370 households in 2022, an increase of 115 291 households & a growth rate of 2.2% p.a. Ehlanzeni’s share of Mpumalanga’s households declined from 41.4% in 2011 to 39.4% in 2022. The household size surprisingly increased from 3.8 to 4.1 between 2011 & 2022, where the other Districts recorded a decline in this regard.

The district is the largest district amongst the three districts in the province in terms of population size. When looking at local municipality level the city of Mbombela remains the most populous municipality in the district, while Thaba Chweu local municipality continues to be the least populated (refer to the table below).

Table 3: Population Size

Municipality	Pop 1996	Pop 2001	Pop 2011	Pop 2022	Change 2011 - 2022	Growth rate 2011-2022
City of Mbombela	474637	530647	655953	818925	162972	2,22
Nkomazi	277864	334668	393030	591928	198898	4,09
Thaba Chweu	65909	81681	98388	109223	10835	1,04
Bushbuckridge	545811	500128	541248	750821	209573	3,27
Ehlanzeni DM	1364221	1447124	1688619	2270897	582278	2,96

Source: EDM: GIS Unit

Figure 6: Ehlanzeni Population Pyramid 2011 vs 2022

The population pyramid depicts larger percentage of people in younger ages (0-14). The pyramid also indicates that females are in majority in the district in all age groups. The proportion of females then surpass that of males throughout the various age groups. The district has more female elderlies than males, which implies that females live longer than males.

The 2021 Mid-year Population Estimates (Stats SA, 2021) revealed that youth constituted 35.5% to the total population. Nevertheless, population projections revealed that the proportion of youth population will decline to 31.9% by 2031. With regards to dependency ratio there are 50 people in the economic dependent age groups (0-14 and 65 years and older) for every 100 people in the economic age group (15-64 years). the lower the dependency ratio presents the district with the opportunity to reap from the demographic dividend. However, reaping the demographic dividend is not automatic since it depends on the quality of population in economic active age group. They have to be educated, empowered and employed (3Es) for them to contribute to the economic development of the district. Hence, there is a need to invest in skills development and job creation opportunities for the economic active population.

Figure 7: Fertility Rate

There were 35 children born to 1000 adolescents aged 12 to 17 years in 2016. This is an indication that there is a problem of teenage pregnancy in the district. This is also confirmed by the Provincial Department of Health in their annual reports, which indicates that the district recorded an increase in teenage deliveries from 3 082 in 2016/2017 financial year to 6 775 in 2019\20 financial year.

Figure 8: Migration Patterns

The district receives majority of its in-migrants from Gauteng and Limpopo. Majority of them migrate to City of Mbombela and Thaba Chweu. In terms of out-migration, Bushbuckridge is one municipality that losses its people

to other areas. Most of their out-migrants go to the Eastern Cape and Limpopo. With regards to international migration majority (94.4%) of migrants come from SADC region. This is followed by 3.4% from the rest of Africa

Figure 9: Teenage Pregnancies

Figure 10: Mortality Rate

According to STASSA (CS 2016) In terms of mortality by age majority of the deaths occurred to adolescences, Youth, and adults from 15-44 years and 65+ age group. The district has the second highest infant mortality in the province at 452, while Gert Sibande recorded the highest at 533 and Nkangala 428 respectively.

Figure 11: Disability Prevalence

According to Stats SA's Community Survey 2016, there were 440 236 people living with different types of disabilities in Ehlanzeni district. The highest prevalent disability is eyesight, followed by walking and remembering. City of Mbombela recorder the highest municipality having 172202 people living with disabilities.

Figure 12: Youth Perception on Gender Based Violence

Percentage of youth by what they think causes violence against woman and children, 2020\21
source STASSA Social Profile of Youth Report, Released March 2022

Figure 13: Youth Perception on Gender Based Violence

Percentage of youth by whom they think commits the most acts of GBV, 2020\21 source STASSA Social Profile of Youth Report, Released March 2022

3.2.2. Age And Sex Composition

Age-sex composition is critical in conveying the distribution of the population of children, youth, adults, and older persons as well as balance between males and females in a population. This is crucial in policy formulation and program planning. The best way to present the age-sex composition of population in an area is through the use of population pyramid. The population pyramid of Ehlanzeni district in 2022 depicts what is referred to as expansive population pyramid. This is the type of the pyramid which depicts population with larger percentage of people in younger ages. the pyramid also indicates that males are in majority in the district until the age of 44 years. The proportion of females then surpass that of males from the age of 44 years.

The district has more female elderlies than males, which implies that females live longer than males. Majority of the population is aged between 0 and 14 years. However, the pyramid depicting projected population in the district in 2031 shows equal number of males and females between the ages of 5 to 9 and 10 to 14. However, the proportion of these children is less than that in the 2022 pyramid. This implies a decline in fertility rates in the district, while there is an increase in the proportion of older persons. This is confirmed by improvement in the province's life expectancy at birth. According to Stats SA's Mid-year population estimates, males' life expectancy increased from 51.5 years between 2001 to 2006 to 60.8 years between 2016 and 2021. Females' life expectancy increased from 56 between 2001 and 2006 to 66 years between 2016 and 2021. Hence, the district should consider this when planning for different age groups.

3.2.3. Racial Profile

The Census 2022 conducted by Statistics South Africa (Stats S.A) indicates that the district is dominated by black (African). The total contribution of the African group is 93.8%. White people are the second dominant population group with 2.5% contribution to the total population whilst the Asian group remained the least contribution group.

Table 4: Ehlanzeni Racial Profile

Local Municipality	African	Coloured	Indian\Asian	White	African (%)	Coloured (%)	Indian/Asian (%)	White (%)
Thaba Chweu Local Municipality	92584	1892	631	10282	78	2	1	9
Nkomazi Local Municipality	561690	1687	1538	8109	96	0	0	1
Bushbuckridge Local Municipality	721256	1700	938	874	99	0	0	0
City of Mbombela Local Municipality	746608	4695	4251	33152	90	1	1	4
Total	2122138	9974	7359	52417	94	0	0	2

Source: Statistics S.A: Community Survey 2016

3.2.4. Ehlanzeni Education Indicators

Ehlanzeni's grade 12 pass rate deteriorated from 82.9% in 2014 to 81.8% in 2023, whereas the pass rate Bohlabela declined from 76.8% in 2014 to 69.1% in 2023. The grade 12 pass rates of Ehlanzeni improved between 2022 and 2023, whereas the pass rate in Bohlabela declined alarmingly. Between 2022 and 2023, the pass rate improved in two of the four municipal areas that falls under the two education districts. In 2023, City of Mbombela had the highest pass rate and Bushbuckridge the lowest.

Among the districts in 2023, Ehlanzeni's admission to degree studies was the highest/best (34.7%) and that of Bohlabela the 4th highest/lowest (26.4%). Ehlanzeni 's admission to degree studies improved between 2022 and 2023, whereas the rate deteriorated in Bohlabela. City of Mbombela achieved the highest admission rate in district at 39.9% - 4th highest in the province.

Concern about Bushbuckridge and Thaba Chweu's pass rates deteriorated between 20233 and 2023 by 10.9 percentage points and 4.9 percentage points, respectively. Concern about Bushbuckridge's admission rate to degree studies that was the 2nd lowest in the province.

The proportion of population twenty years and older with no schooling improved between 2011 and 2022- the indicator shows a decline from 16.6% in 2011 to 14.3% in 2022. The proportion of population twenty years and older with tertiary qualifications declined alarmingly between 2011 and 2022- the indicator deteriorated from 9.2% in 2011 to 7.5% in 2022. In 2022, Ehlanzeni's functional literacy rate (86.2%) was the lowest of the three districts, but showed an improving trend

Table 5: Matric Performance 2014-2023

Local Municipal Area	Grade 12 Pass Rate				Admission to B Degree studies 2023
	2014	2021	2022	2023	
City of Mbombela	80.5%	75.6%	78.6%	83.1%	39.9%
Thaba Chweu	81.1%	80.9%	82.2%	81.0%	37.1%
Nkomazi	86.0%	75.5%	73.5%	80.2%	34.9%
Bushbuckridge	76.4%	73.7%	79.1%	68.2%	25.6%

Source : Stats S.A Census 2022

3.2.5. Unemployment and Employment in Ehlanzeni

Unemployment rate of Ehlanzeni deteriorated from 32.9% in 2019 to 37.8% in 2022. The expanded unemployment rate deteriorated from 41.5% to 49.6% over the same period. In 2022, Ehlanzeni's official unemployment rate was the 2nd highest/lowest & the expanded unemployment rate was the highest/worst among the districts. In 2022, the official unemployment rate for females was 41.7% & that of males 34.0%.

In 2022, the official youth (15-34 years) unemployment rate was 53.3% - highest/worst of the three districts.

There is concern about the high share of unemployed youth & especially females – there appears to be a mismatch between their offering of education and skills (or lack thereof) and the demand of the labour market, but also a lack of investment to create jobs.

The largest employing industries in Ehlanzeni are community services, trade, finance and agriculture. There is High labour intensity in industries such as agriculture. There is great importance of quality and relevant education and training in line with the economic needs of the province, hence the important role of the University of Mpumalanga and TVETs.

There was an increase in employment level between 2014 and 2018, but at a relatively slow rate. On average only 8 000 (only 11% of the annual provincial job creation target) were new employment opportunities per annum in the four (4) year period, which is far below its potential to create jobs in the province. The Employment growth was relatively low the last couple of years. Only Thaba Chweu recorded employment growth of more than 2% per annum the last couple of years.

3.2.6. Poverty, Inequality, HDI and Crime Indicators in Ehlanzeni

The share of population in Ehlanzeni below the lower bound poverty line (LBPL) increased/deteriorated from 52.8% in 2019 to 53.2% in 2022- the highest of the three districts. In 2022, the number of people below the (LBPL) was the highest of the three districts at 1.03 million.

In the calculation of the Local Government Equitable Share (LGES), National Treasury estimates that Ehlanzeni had 370 522 poor households in 2023. In 2022, Ehlanzeni's share of income by the poorest 40% of households was 8.4%, an increase/improvement from 7.8% in 2019.

Ehlanzeni ranked highest/best in terms of income inequality among the three districts. Improved Human Development index (HDI) from 0.59 in 2019 to 0.60 in 2022. In April 2023, there were 452 417 beneficiaries of social assistance grants in Ehlanzeni. Ehlanzeni ranked lowest/best in terms of seventeen serious crimes reported and recorded an improvement between 2018/19 and 2022/23. Two of Ehlanzeni's four municipal areas ranked lowest and second lowest/best in terms of serious crimes among the municipal areas in the province.

3.2.7. Household Services in Ehlanzeni

In general, some good improvement with household services in Ehlanzeni between 2011 and 2016 according to the Community Survey of Stats SA. The number of informal dwellings increased from 21 357 in 2011 to 26 860 in 2016, an increase of 5 503 households. Some 5.6% of households, however, still without any toilet facilities. Households with connection to electricity was 463 311 in 2016. The share of households connected to electricity improved to a level of almost 96%

Informal Dwelling numbers and Shares				
Local Municipal Area	Number of households in informal dwellings		Share of total households	
	2011	2016	2011	2016
Thaba Chweu	6 790	4 791	20.4%	12.9%
City of Mbombela	10 173	14 826	5.6%	7.0%
Nkomazi	2 797	6 684	2.9%	6.4%
Bushbuckridge	1 597	1 099	1.2%	0.8%

3.3. ECONOMIC PROFILE

Ehlanzeni made dominant contributions to Mpumalanga’s community services, finance, trade, construction, & transport industries & made significant contributions to agriculture & utilities.

Over the period 1996 to 2022, the economic growth rate for Ehlanzeni was 2.5% p.a., however, it declined to a stagnant 0.0% p.a. between 2019 & 2022. The Ehlanzeni economy expanded by 0.7% in 2019, contracted by 1.4% in 2022 & is expected to expand by 1.3% in 2023. The estimated average annual GDP growth between 2023 & 2027 for Ehlanzeni is 1.2% p.a. In 2022, the size of the economy was estimated at R178.1 billion in current prices & R125.6 billion in constant 2015 prices.

In 2022, the four largest industries (community services, finance, trade & manufacturing) contributed 80.3% to the economy of Ehlanzeni. Ehlanzeni holds comparative advantages in agriculture, utilities, construction, trade (including tourism) & community services. In 2019, tourism spend totaled R15.5 billion or equal to 9.8% of the district’s GDP in current prices. By 2022, it declined to R13.3 billion, which was equal to 7.5% of the district’s GDP in current prices. This demonstrates the importance of the tourism industry as economic and job driver.

3.4. LED STRATEGIC FRAMEWORK – DEVELOPMENT OBJECTIVES

The LED vision of Ehlanzeni District Municipality is as follows:

“Diversified economy around value chain networks, business and human capacity & skills development across local municipal spaces; and improved livelihoods”

STRATEGIC OBJECTIVES

- Diversified economy
- Economic value-chain networks
- Business development and support
- Human capacity and skills development
- Growth and development across all local spaces
- Improved livelihoods

DEVELOPMENT STRATEGIES

- Creating an enabling environment for retaining existing businesses, attracting new investment, and supporting SMMEs
- Nodal and cluster development by focusing investment on key sectors
- Linkages and corridor developments

DEVELOPMENT GOALS

- Goal 1: Agriculture Support and Value adding
- Goal 2: SMME Development and Support to integrate rural economies
- Goal 3: Environmental sustainability, Tourism Development and Promotion
- Goal 4: Mining Development and Value chain Diversification

3.5. SECTORAL ANALYSIS

The sectoral profile provides an analysis of the primary, secondary and tertiary sectors as well as the industries within the respective sectors for Mpumalanga, Ehlanzeni DM and all Local Municipalities of the District.

Table 6: Sector Review

Sector	Description
Agriculture	The agriculture sector consists of establishments and activities that are primarily engaged in farming activities, but also includes establishments focusing on commercial hunting and game propagation and forestry, logging and fishing.
Mining	This sector includes the extracting and beneficiating of minerals occurring naturally, including solids, liquids and crude petroleum and gases. It also includes underground and surface mines, quarries and the operation of oil and gas wells and all supplemental activities for dressing and beneficiating ores and other crude materials.
Manufacturing	This sector is broadly defined as the physical or chemical transformation of materials or compounds into new products and can be classified into ten sub-groups.
Utilities	This sector includes the supply of electricity, gas and hot water, the production, collection and distribution of electricity, the manufacture of gas and distribution of gaseous fuels through mains, supply of steam, and the collection, purification and distribution of water.
Construction	This sector includes site preparation, the building of complete constructions or parts thereof, civil engineering, building installation, building completion and the renting of construction or demolition equipment with operators.
Trade	The trade sector entails wholesale and commission trade, retail trade, repair of personal household goods, sales, maintenance and repair of motor vehicles and motorcycles, hotels, restaurants, bars, canteens, camping sites and other provision of short-stay accommodation.

Transport, storage and communication	Transport as an economic sector refers to activities concerned with land transport, railway transport, water transport and transport via pipelines, air transport, activities of travel agencies, post and telecommunication, courier activities, as well as storage and warehousing activities.
Financial and business services	This sector includes inter alia financial intermediation, insurance, and pension funding, real estate activities, renting or transport equipment, computer and related activities, research and development, legal, accounting, bookkeeping and auditing activities, architectural, engineering and other technical activities and business activities not classified elsewhere.
Social, community and government services	This sector includes public administration and defense activities, activities of government, government departments and agencies, education, public and private, health and social work, sewerage and refuse disposal, sanitation and similar activities, activities of membership organizations, recreational, cultural and sporting activities, washing and dry-cleaning of textiles and fur products, hairdressing and other beauty treatment, funeral and related activities.

3.6. SECTORAL EMPLOYMENT

The section will focus on the sectoral contribution to formal employment. Figure 17 below indicates that in 2019, the highest levels of employment within Ehlanzeni were experienced in community services (19%), trade (17%) and agriculture (17%). Bushbuckridge LM contributed most (31%) to formal employment through the government services sector.

Table 7: Average Annual Economic Growth

Average Annual Economic Growth				
Local Municipal Area	Average annual economic growth 1996-2018	Average annual economic growth 2011-2014	Average annual economic growth 2015-2018	Average annual economic growth 2020-2025
Thaba Chweu	3.2%	2.5%	1.5%	1.5%
City of Mbombela	3.7%	2.5%	0.9%	1.2%
Nkomazi	1.6%	1.5%	0.6%	2.2%
Bushbuckridge	0.5%	1.1%	0.3%	3.1%

Source: SERO Report- Dept of Economic Development & Tourism

3.6.1. Labour Market in Ehlanzeni

The strict unemployment rate of Ehlanzeni deteriorated from 30.6% in 2016 to 36.4% in 2021. The expanded unemployment rate also deteriorated from 40.0% to 47.5% over the same period.

In 2021, Ehlanzeni’s strict unemployment rate was the 2nd highest among the districts, whilst the expanded unemployment rate was the highest/worst.

In 2021, the strict unemployment rate for females was 40.2% and that of males 32.6%.

In 2021, the strict youth (15-34 years) unemployment rate was 51.6% - highest/worst in Mpumalanga.

There is concern about the high share of unemployed youth & especially females – there appears to be a mismatch between their offering of education and skills (or lack thereof) and the demand of the labour market, but also a lack of investment to create jobs.

Importance of quality and relevant education and training in line with the economic needs of the province to improve their employability but also a need to retain businesses and attract new investment. Emphasis on the role of the University of Mpumalanga and TVETs.

In 2021, 39.0% of Mpumalanga’s employed worked in Ehlanzeni.

Between 2016 & 2021, employment contracted by 1.6% p.a. The average annual employment growth deteriorated compared with the 2010-2015 growth of 4.2% p.a.

The job losses in 2021 was 37 300, which was slightly less than the 38 287 job losses in 2020.

In the 5-year period between 2016 and 2021, Ehlanzeni lost 34 705 jobs, which portrays the devastation that COVID-19 brought to the labour market in 2020 & 2021.

In 2021, the largest employing industries in Ehlanzeni were community services, trade (including tourism and the informal sector), finance, & agriculture.

3.7. ECONOMIC OPPORTUNITIES

3.7.1. Introduction

This section of the report will analyze the opportunities present within the different economic sectors of Ehlanzeni DM. The opportunity analysis will indicate areas which the municipality should target to take hold of potential opportunities. The tourism sector, according to SIC system classification, is not a true economic sector, but rather a multifaceted integrated economic sector

The following criteria are used to identify opportunities:

- Availability of raw materials and resources
- Economic linkages
- Market trends
- Gap analysis/agglomeration advantages
- Logistics/nodal point function
- Regional service delivery function

- Availability of labour
- Technology change
- Imports and exports
- Enabling policy environment

3.7.2. Economic Interventions in Ehlanzeni

- Roll-out of the Mpumalanga Industrial Development Plan (MIDP) in Ehlanzeni especially through the Mpumalanga International Fresh Produce Market (City of Mbombela) and associated Agri-Parks and Hubs as well as the Forestry Technology Park in Sabie (Thaba Chweu)
- The establishment of the Nkomazi SEZ

3.7.3. Other Economic Opportunities

- Opportunities in especially agriculture & Agro-processing industries, forestry, SUV-tropical fruits and sugar cane produce
- Opportunities in tourism, Gold and Chrome mining;
- Support to SMMEs and Cooperatives where the Social Enterprise model or programme and Government Nutrition Programme will contribute to job creation and economic development
- Rejuvenation of township and rural business with initiatives to transform townships and villages from labour and consumption reserves into thriving productive investment hubs.

3.7.4. District Comparative Advantages

Ehlanzeni	Gert Sibande	Nkangala
Agriculture: Sub-tropical fruit and sugar cane	Manufacturing: Petro-Chemical industry	Coal mining & Electricity Generation
Gold & Chrome Mining	Agriculture: Crop and livestock Farming	Manufacturing: Metals Fabrication
Tourism: Scenic views and KNP	Coal mining & Electricity Generation	Tourism: Trout-Triangle
Forestry	Forestry	Agriculture: Crop and livestock Farming

Source: SERO Report- Dept of Economic Development & Tourism

3.8. MPUMALANGA TOURISM INDUSTRY

3.8.1. Significant Attractions or Landmarks

These are the significant attractions or landmarks visited by foreign tourists in Mpumalanga:

- Kruger Park via Mpumalanga gates – 12th most visited in S.A
- Blyde River Canyon/ Gods Window – 20th most visited in S.A
- Panorama Route – 33rd most visited in S.A
- Bourke’s Luck Potholes – 34th most visited in S.A

- Hazyview attractions – 38th most visited in S.A
- Mall in Hazyview – 39th most visited in S.A
- Pilgrims Rest – 40th most visited in S.A

3.8.2. Mpumalanga Economic Reconstruction & Recovery Plan (MERRP) High Impact Projects in Ehlanzeni

Table 8: MERP Catalytic Projects on Ehlanzeni

CATALYTIC PROJECT	LOCATION	STRATEGIC OBJECTIVE
Tourism road infrastructure improvement	District wide	To facilitate easy access to tourism attractions and heritage sites
Mpumalanga International Fresh Produce Market	City of Mbombela	Key enabler of the broader fresh produce ecosystem and also to build a strong fresh produce export industry
Nkosi City Integrated Human Settlement	Mbombela, Matsulu	Addressing spatial disparities and creating functional and sustainable human settlements
Nkomazi Special Economic Zone	Komatipoort	Enhance agro-processing and facilitate export of commodities through, inter alia, the South African ports, including the Maputo Port or air transportation to foreign markets
Renewable energy & circular economy (waste recycling)	District wide	Decouple economic activities from environmental degradation and carbon-intensive energy consumption
Public Employment Programmes	District wide	Create massive employment opportunities and empowerment of small enterprises through public employment programmes focusing on youth & women
God’s Window Skywalk Project	Graskop	A true breath-taking attraction to unlock economic opportunities within the tourism value chain
The Barberton Makhonjwa Mountains World Heritage Site (BMM WHS) & Barberton Tourism Development Hub	Barberton	Facilitate the growth of the tourism sector, culture, conservation and related economic development activities within Barberton and surrounding areas.
Railway Heritage Tourism Project	Municipalities in Ehlanzeni	A daily heritage railway tourism services with defined routes, connecting Mbombela with various heritage and tourism attractions
Programmes to increase crop and livestock production	District wide	To intensify crop and livestock production; enhance agri-processing and fresh produce for export, including support to small scale agri-businesses owned by youth and women (supply International Fresh Produce Market & Nkomazi SEZ)

Sector Based Skills Development Program	District wide	Create employment opportunities for young people through Mentorship and training programmes in partnership with SEDA, University of Mpumalanga, Private colleges, and established companies)
--	---------------	--

3.9. TRIPPLE CHALLENGES, IMPACT OF COVID-19 LOCKDOWN, HDI AND CRIME

3.9.1. Leading Challenges Facing Ehlanzeni Municipalities

According to the 2016 CS (Community Survey) of Stats SA, the 5 leading challenges facing municipal areas as perceived by households in Ehlanzeni were the following:

- Lack of safe and reliable water supply.
- Lack of/inadequate employment opportunities.
- Inadequate roads.
- Cost of electricity.
- Cost of water.
- Important information for decision making purposes especially related to IDP & LED as well as DDM purposes.

3.9.2. Covid-19 Impact on Employment

- In Q1 2020, there were 1.25 million employed in Mpumalanga, which was a record high for the province.
- Due to COVID-19 and the lockdown regulations the number of employed shrunk by 133 838 in Q2 2020.
- This was the largest quarterly decline in employment numbers ever recorded in Mpumalanga, and more than three times the quarterly decline recorded in Q2 2009 at the height of the 2008-09 Global Financial Crisis.
- Although it is clear that the Mpumalanga labor market gained jobs since the height of the lockdown, those gains were erased in Q3 2021.
- The Q3 2021 employment level of some 1.1 million was 141 816 jobs short of the 1.25 million persons employed in Q1 2020 before the lockdown was instituted.
- In Q3 2021 the level of employment in Mpumalanga was more or less equal to what it was in Q2 2013.

3.9.3. Covid-19 Impact on Formal Employment

- In Q1 2020, there were 318 065 people employed in Mpumalanga’s informal sector – 25.5% of total employment.
- Due to COVID-19 and the lockdown regulations the number of employed in the informal sector shrunk by 69 644 in Q2 2020.
- The Q3 2021 employment level in the informal sector of 304 579 was 13 486 jobs less than the Q1 2020 number before the lockdown was instituted.
- In Q3 2021 the employed in the informal sector constituted 27.6% of total employment.
- The informal sector recorded 35 572 net job gains in the first nine months of 2021.
- The informal sector, however, recorded 1 822 quarterly job losses in Q3 2021.

3.9.4. Labour Market in Ehlanzeni

- The expanded unemployment rate of Ehlanzeni was 42.3% in 2020, which has since recorded a decline to 37.8%, on official strict unemployment rate in 2022.
- In 2022, the expanded unemployment rate for females was 41.7% and that of males 37.8%.
- In 2020, the expanded youth (15-34 years) unemployment rate was 56.6%, however, in 2022 there is a decline to 53.3% which is a good picture on youth employment rate.
- There is concern about the high share of unemployed youth & especially females – there appears to be a mismatch between their offering of education and skills (or lack thereof) and the demand of the labour market, but also a lack of investment to create jobs.
- Importance of quality and relevant education and training in line with the economic needs of the province to improve their employability but also a need to retain businesses and attract new investment. Emphasis on the role of the University of Mpumalanga and TVETs.

3.9.5. Poverty, Inequality, HDI And Crime Indicators in Ehlanzeni

- The share of population in Ehlanzeni below the lower bound poverty line (LBPL) increased/deteriorated from 49.8% in 2016 to 55.2% in 2020.
- In 2020, Ehlanzeni’s share of population below the LBPL was the highest (unfavorable) among the three districts in Mpumalanga.
- In 2020, the number of people below the LBPL at 1 044 208 was higher than each of the other two districts.
- In the calculation of the Local Government Equitable Share (LGES), National Treasury estimates that Ehlanzeni has 343 775 poor households.
- Income inequality within the district was not as severe in Ehlanzeni as in the other two districts. In 2020, Ehlanzeni’s share of income by the poorest 40% of households was 7.7%, however, it deteriorated between 2016 (8.2%) and 2020.
- Improved Human Development Index (HDI) from 0.56 in 2016 to 0.60 in 2020, however, it was the lowest among the three districts.
- Ehlanzeni ranked the lowest/best in terms of the 17 serious crimes reported and recorded an improvement between 2014/15 and 2019/20. Thaba Chweu the worst of the 4 municipal areas in Ehlanzeni.

3.10. ECONOMIC LANDSCAPE & ECONOMIC IMPACT OF COVID-19 LOCKDOWN

3.10.1. Ehlanzeni Economy

- In 2021, the contribution to the Mpumalanga economy was 35.0% – 2nd largest contribution among the three districts.
- Ehlanzeni made dominant contributions to Mpumalanga’s community services, finance, trade (including tourism), construction, & transport industries.
- Over the period 1996 to 2021, the economic growth rate for Ehlanzeni was 2.3% p.a., however, it contracted by 0.5% p.a. between 2016 & 2021.
- Estimated contraction around 6% in 2020 as a result of COVID-19 and the lockdown. The Ehlanzeni economy expanded by more or less 4% in 2021.
- The estimated average annual GDP growth between 2021 and 2026 for Ehlanzeni is relatively low at 1.0% p.a.
- In 2021, the size of the economy was estimated at R152.3 billion in current prices & R104.8 billion in constant 2015-prices.
- In 2021, the four largest industries (community services, finance, trade, & manufacturing,) contributed 76.3% to the economy of Ehlanzeni.
- Ehlanzeni holds comparative advantages in industries such as agriculture, construction, trade and tourism, and community services.
- In 2016, tourism spend totaled R9.5 billion or equal to 8.2% of the district GDP. In 2020, it decreased to R4.9 billion (3.5% of GDP), however, it recovered to R11.3 billion in 2021, which was equal to 7.4% of the district’s GDP.

3.11. RELEVANT ECONOMIC PLANS & OPPORTUNITIES FOR EHLANZENI

Importance and relevance of:

- The implementation of the Provincial Spatial Development Framework (SDF) by COGTA.
- The implementation of a Provincial LED strategy framework by DEDT. Viable, vibrant and representative LED Forum, capacitated LED Unit and updated LED strategy. SMME development, including the informal sector.
- The roll-out of the District Development Model (DDM).

Linking with economic interventions in Ehlanzeni:

- Roll-out of the Mpumalanga Industrial Development Plan (MIDP) in Ehlanzeni through the Mpumalanga International Fresh Produce Market (City of Mbombela) and associated Agri-Parks/Hubs (Bushbuckridge), as well as the Forestry Technology Park in Sabie (Thaba Chweu).
- Establishment of the Nkomazi SEZ near Komatipoort.

Economic opportunities in Ehlanzeni:

- The implementation of MERRP catalytic projects with links with the City of Mbombela, Nkomazi, Thaba Chweu and Bushbuckridge.
- Opportunities in especially tourism, agriculture & agro-processing industries, forestry, sub-tropical fruits & sugar cane produce as well as gold and chrome mining.
- The establishment of the MIFPM and an agricultural park/hub as part of the MIFPM.
- The establishment of the Nkomazi SEZ should also stimulate growth and contribute to job creation.
- Support to SMMEs and Cooperatives where the Social Enterprise Model/Programme and Government Nutrition Programme will contribute to job creation and economic development.
- Rejuvenation of township & rural businesses with initiatives to transform townships and villages from labour and consumption reserves into thriving productive investment hubs.

3.12. STRATEGIC INTERVENTION EMANATING FROM THE REVIEWED LED STRATEGY 2023

The district municipality will be implementing its LED strategy based on the following strategic intervention focus areas:

- Strategic intervention 1: Create an enabling environment.
- Strategic intervention 2: Support and develop small enterprises SMEs and start-ups
- Strategic intervention 3: Support for the mining sector
- Strategic intervention 4: Expansion and diversification of the of the manufacturing sector
- Strategic intervention 5: Tourism development and tourism
- Strategic intervention 6: Promotion and expansion of the agriculture sector

Figure 14: Ehlanzeni District Investment Opportunities

SECTOR	TYPE	PROJECT NAME	PROJECT LOCATION

Tourism	Community/Business	Mnisi Resort (Community tourism project)	
Tourism	Community	Huntington Tsonga Cultural Village	
Tourism	Community/ Business	Bushbuckridge Nature Reserve	

3.13. RURAL DEVELOPMENT

Rural poverty is caused primarily by a limited access to resources. This limitation may result from an imbalance between population and available resources. There are difficulties of improving the balance by applying a successful population policy, and a solution at long term will require a gradual closing of the gap between economic and population growth.

Besides the problem caused by population growth, access to resources is quite often limited for the rural poor because of the current socio-political situation. Here, the limited access to resources is deliberate, and the result is, that the available resources are underutilized because of obstacles of a socio-cultural and political nature. There are numerous examples of such a situation. Landless people cannot obtain land for cultivation, while landlords use their land extensively only; subsistence farmers have difficulties in obtaining credit; scarce means of production are supplied to certain sectors of the population only, etc.

If access to resources, i.e. to the factor responsible for rural poverty, is determined by the general socio-political situation, there cannot be a "rural" explanation to the rural situation. The reason for the poverty of rural areas is often to be sought outside these very areas. The ultimate cause of rural poverty is the lack of integration of rural areas into the overall socio-political and economic system. This holds true, not only for the national, but for the international system as well.

Poor rural areas and rural population find themselves in a marginal situation; they are not part of the overall system. They do not participate in the development process, either actively as producer, or passively as receiver of goods and services. Likewise, they hardly participate in the decision-making process. The result of this marginality is widespread apathy, especially among the older generation of the rural poor, and a dangerous gap between aspiration and reality among the youth. The national government has established a new department to relook into the current dispensation of rural development which focuses on agriculture, agrarian reform, livestock farming, small scale farming and production. The buzz word and concept is comprehensive rural development programme which has been introduced to take over the switch from the former Integrated Sustainable Rural Development Programme. There are seven sites (municipalities) where this programme is being piloted and two out of the 7 are from Ehlanzeni District Municipality. The two are Bushbuckridge and Nkomazi Local Municipalities.

It is against this background that Ehlanzeni District Municipality has established a Rural Development Department to address this challenge which also presents itself as the national priority pronounced by the National Government in 2009. There are a vast number of programmes and projects which have been outlined in the IDP projects section which include rural CBD, Agricultural hub and other initiatives.

3.14. COMMUNITY PRIORITIES OF THE LOCAL MUNICIPALITIES

Table 9: Community Priorities

CITY OF MBOMBELA				
NATIONAL DEPARTMENT OF WATER & SANITATION				
Priority	Problem statement	Affected wards	Location	Proposed intervention
Water	Bulk water infrastructure	4,5,6,7,8,9,10,11,19,24,27,28,29,30,42,43	Phakane,Phola, Bhekiswako & Salubindza,Bhodlindlala, Dingindoda, Nkanini, Swalala, Mangozeni, Khanyisani & Magarula,Emoyeni Block,Bhayizane; Clau-clau; Mhlume; Mafambisa; Mkikitweni & Ngulubeni,TV 2 & Magwabaratsane,ZB section, Entokozweni section 1, 2, 3; MRTT informal, Nkandla, Mountain View,Enyokeni, Mzamane,Comprehensive primary school, Hazypark, part of Sibukosetfu and Bongani,Hillaria Section,Khutsong, Matjaweni, Matsulu Entrance, White Velly and Marikana,Mashonamini; Sibuyile & Vodacom Park, Nkohlakalo & Bhuga, Nyongane; & Numbi	Construction of dams, water treatment works (WTW), Package Plants, installation of Reservoirs, Bulk supply lines, Augmentation schemes
	Reticulation	1,2,4,6,7,8,10,11,12,18,19,20,21,22,23,24,25,26,28,29,31,32,35,36,37,38,40,41,45	Sanford,Mluti & Mbongeni primary school Area,Zwelisha & PhakaneDingindoda (Phakane); Emathuneni (Zwelisha) ,Swalala; Mafifty; Nkanini & Stadium block, Dingidoda,Roma, Khalazembe, maswazini, Center 1 and centre2),TV 2, 3, 4 & Success, Clau-Clau,	Household water supply, communal standpipes, reticulation network, 24-hour water supply

CHAPTER 4

4.1. EDM ORGANISATIONAL STRUCTURE

The Organizational Structure was reviewed and adopted by council on the 30 May 2022 under council resolution A63/2022.

Following numerous consultations with Management and various structures on the need to review the current **Macro Organizational Structure** i.e., the first 2 reporting levels to the Municipal Manager, Management undertook to do the following:

- a. Review the current structure with a view to align it to the district mandates;
- b. Mitigate on the Salary Bill which is currently sitting at 69%;
- c. Club functional areas with a view to align like for like; and
- d. Identification of any gaps and changes required to support the strategy and mandate of EDM to inform the repositioning process.

CHAPTER 5

ORGANISATIONAL PERFORMANCE MANAGEMENT

This chapter reflects a high-level overview of the strategy of the District Municipality in terms of the strategic objectives and the implementation of prescribed Outcome Based Indicators, as per the Circular 88 pilot project.

5.1. District Goals and Strategic Objectives

EDM derives its mandate and goals from Section 83 (3) of the Municipal Structures Act of 1998 which states that a district municipality must seek to achieve the integrated, sustainable and equitable social and economic development of its area as a whole by:

- ensuring integrated development planning for the district as a whole;
- promoting bulk infrastructural development and services for the district as a whole;
- building the capacity of local municipalities in its area to perform their functions and exercise their powers where such capacity is lacking; and
- promoting the equitable distribution of resources between the local municipalities in its area to ensure appropriate levels of municipal services within the area.

5.2. Strategy Map

An Organizational Scorecard was compiled for the Municipality, setting targets and identifying measures with regard to these strategic objectives and also identifying programmes for each one of these objectives. The organizational scorecard reflecting the performance in terms of each of these programmes is indicated during the strategy and project phases of the IDP, the district undertook a rigorous approach in prioritizing its strategic initiatives and projects in order to ensure that the budget was informed by these initiatives and projects.

"A District Municipality that provides Impactful service delivery to its communities"

STRATEGY MAP

5.3. EDM ALIGNMENT

Table 10: Alignment NDP 2030, MTSF 2019-2024 & EDM Strategic Objectives

NATIONAL DEVELOPMENT PLAN (VISION 2030)	MTSF PRIORITIES 2019-2024	EDM STRATEGIC OBJECTIVES
• Creating Jobs and livelihoods Expanding Infrastructure	• A capable, ethical and developmental state	• Create a conducive Environment for District Socio-Economic Development Growth • Improve District Integrated & Coordinated Strategic Planning and Development
• Economy and Employment	• Economic Transformation and Job creation	• Create a conducive environment for District Socio - Economic Development and growth
• Improving Education and training	• Education, Skills and Health	• Improve District Integrated & Coordinated Strategic Planning and Development
• Economic Infrastructure	• Consolidating the social wage through reliable and quality basic services	• Deliver services and implement projects in line with the mandate of EDM
• Transforming urban and rural spaces	• Spatial integration, Human Settlement and Local Government	• Improve District Integrated & Coordinated Strategic Planning and Development
• National Building & Social Cohesion	• Social Cohesion and Safe Communities	• Create a conducive environment for District Socio - Economic Development and growth
• Transforming society and uniting the Nation	• A Better Africa and the World	• Strengthen intergovernmental relations and stakeholder management

5.4. Strategic Focus Area

EDMs Strategy remains underpinned by our values and our purpose, to build trust in society and to solve important problems. When planning for the FY2023/24, the Municipality aligned its service delivery targets in terms of 07 strategic objectives, in line with the Revised Framework for Strategic Plans and Annual Performance Plans, which seeks to further improve government planning systems and processes and to institutionalize development planning in government, the district underwent a strategic planning session where the strategic objectives were reduced from 15 to 7, which are listed on the table below:

STRATEGIC PBJECTIVE	INSTITUTIONAL PROGRAMME
SO 1 – Improve District Integrated & Coordinated Strategic Planning and Development	Integrated Development Planning
SO 2 – Deliver Services and Implement Projects in line with the Mandate of EDM	Service Delivery & Project Implementation
SO 3 – Create a Conducive Environment for District Socio- Economic Development Growth	Regional Economic Growth
SO 4 – Strengthen Intergovernmental Relations and Stakeholder Management	IGR and Stakeholder Relations
SO 5 – Manage Performance, Monitoring & Evaluation	Organisational and Individual Performance Management
SO 6 – Manage Organizational Risks and Improve Institutional Development	Organisational Risk
SO 7 – Ensure Prudent Financial Management	Implementation of Financial Management Practices

STRATEGIC OBJECTIVE 1: TO IMPROVE DISTRICT INTEGRATED & COORDINATED STRATEGIC PLANNING & DEVELOPMENT

PROGRAMME: INTEGRATED DEVELOPMENT PLANNING

With the District Municipality mandated with the function of integrated development planning for the district as a whole, as well as playing a key role in terms of the implementation of the District Development Model, it is imperative that planning processes be informed by specialist studies. The drafting of the IDP has been done in compliance with the legislative framework during the period of review.

STRATEGIC OBJECTIVE 2: DELIVER SERVICES AND IMPLEMENT PROJECTS INLINE WITH THE MANDATE OF EDM

PROGRAMME: SERVICE DELIVERY AND PROJECT IMPLEMENTATION

In line with the mandate of the District Municipality, indicators relating to Municipal Health and Disaster Management are planned for and reported on in terms of this strategic objective.

STRATEGIC OBJECTIVE 3: CREATE A CONDUCIVE ENVIRONMENT FOR THE DISTRICT SOCIO-ECONOMIC DEVELOPMENT GROWTH

PROGRAMME: REGIONAL ECONOMIC GROWTH

This strategic objective covers programmes and projects focusing on regional economic development, tourism development and rural development.

STRATEGIC OBJECTIVE 4: STRENGTHEN INTERGOVERNMENTAL RELATIONS AND STAKEHOLDER MANAGEMENT

PROGRAMME: IGR AND STAKEHOLDER RELATIONS

This strategic objective relates to the structures which play a role in the planning process, the most key of which is the IDP Representative Forum and the three Clusters – Good Governance and Administration, Social and Economic Growth and Infrastructure development. During the period under review, these structures had meetings regularly as per the IDP Process and Framework Plan, with minor disturbances because of the Covid 19-pandemic and the 2020 Elections. Electronic platforms were put to use to ensure consistent and effective meetings.

STRATEGIC OBJECTIVE 5: MANAGE PERFORMANCE, MONITORING & EVALUATION

PROGRAMME: ORGANISATIONAL AND INDIVIDUAL PERFORMANCE MANAGEMENT

This strategic objective relates to compliance in terms of the respective processes of the Organisational and the

Individual Performance Management Policies and Systems. The Municipality has been doing well in terms of the compilation of the Service Delivery and Budget Implementation Plan, the quarterly performance reports (for the first and third quarters), the Mid Term Budget and Performance Assessment reports and the Annual Performance Reports, in terms of timeliness and quality.

This strategic objective relates to Evaluation of the outcomes and impact of projects and programmes implemented by the Municipality. Reporting on outputs planned for without considering the outcome/result of a service delivery initiative is restricting government to reflect on value for money and impact made on the life of beneficiaries. Reporting against outcome indicators and impacts or results is required, which requires the implementation of a result-based approach to planning and reporting.

STRATEGIC OBJECTIVE 6: MANAGE ORGANISATIONAL RISKS AND IMPROVE INSTITUTIONAL DEVELOPMENT

PROGRAMME: ORGANISATIONAL RISK

The strategic objective focuses on risk management, a vital process in terms of the successful implementation of planned processes of the Municipality.

STRATEGIC OBJECTIVE 7: ENSURE PRUDENT FINANCIAL MANAGEMENT

PROGRAMME: IMPLEMENTATION OF FINANCIAL MANAGEMENT PRACTICES

This programme focuses on compliance requirements with regard to budgeting (preparation, implementation and reporting), procurement reports, standard processes in terms of reconciliations, the time frame allowed for payment of invoices and the drafting and implementation of the audit action plan. Performance has met the required standard for all key performance indicators.

5.5. Five -Year Strategic Outcome Based Planning Implementation

Table 11: Outcome Based Planning-Economic Planning & Development

5 YEAR STRATEGY IMPLEMENTATION PHASE						
Municipal KPA	Local Economic Development					
Problem Statement	Poor economic growth and implementation of development goals due to a poor performing economy					
One Plan Transformation Area	Economic Positioning					
2019/24 MTSF Priority Area	Economic transformation and job creation					
Municipal Priority	Job Creation SMME Development (Micro Enterprises)					
Strategic Objective	A Conducive Environment for District Socio Economic Development and Growth					
MTSF Target	• 3% Economic Growth • decent jobs created and sustained, with youth, women and persons with disabilities prioritised • Investing for accelerated inclusive growth • Economic sector industrialisation and localisation					
Impact Statement	Economically vibrant and resilient district space.					
Outcome	Outcome Indicator	Baseline	Situational Analysis	Year 5 IDP Target	Intervention/Programme	District Development Model
						Stakeholders
Sustainable economic growth	Improved Economic Growth as	1% GDP	Insufficient Investments in the District	3% GDP	Increase investments	National Treasury, MEGA, SEDA, NYDA, DEDET, DARDLEA, Business Chambers

"A District Municipality that provides Impactful service delivery to its communities"

		Policy development to advance SMME's & reduce red tape			Policy Development			

"A District Municipality that provides Impactful service delivery to its communities"

		% of reduced red tape	%		%	%	%	%
		Number of jobs created						

5.6. Prescribed Key Performance Indicators

Apart from the key performance indicators contained in the Service Delivery and Budget Implementation Plan for the period under review, there are indicators which are prescribed to be reported on. These indicators are guided by the following legislation:

LOCAL GOVERNMENT: MUNICIPAL PLANNING AND PERFORMANCE MANAGEMENT REGULATIONS, 2001

In terms of Section 120 of the Municipal Systems Act, 2000 (Act 32 of 2000), the Minister may promulgate regulations pertaining to planning and performance management. The Local Government: Municipal Planning and Performance Management Regulations, 2001 were published under Regulation 796 and prescribes general key performance indicators to be part of the reporting system of the Municipality, in terms of Section 43 of the Act. This section provides for the Minister of COGTA to prescribe and regulate key performance indicators to local government.

The General KPIs which municipalities have to report on, are as follows:

- a) The percentage of households having access to basic level of water, sanitation, electricity and solid waste removal;
- b) Percentage of households earning less than R1100 per month with access to free basic services;
- c) The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's IDP;
- d) The number of jobs created through the municipality's LED initiatives including capital projects;
- e) The number of people from employment equity target groups employed in the three highest levels of management in compliance with the municipality's employment equity plan;
- f) The percentage of a municipality's budget actually spent on implementing the workplace skills plan;
- g) The financial viability of the Municipality, expressed in terms of specific ratios.

Not all of these indicators are relevant to the District Municipality, as they measure service delivery targets which are not the mandate of the District. Those that are relevant, are being reported on annually in the annual report, but will not form part of the Service Delivery and Budget Implementation Plan of the Municipality as they are not service delivery indicators but rather status indicators.

INDICATORS PILOTED IN TERMS OF ADDENDUM 2 OF THE MFMA CIRCULAR 88

National Government initiated a process to review, rationalize and streamline the reporting arrangement of Municipalities in an attempt to remedy challenges experienced within the local government environment. Such challenges include lack of outcome indicators, the number of indicators being too high, indicators not being strategic, duplicated indicators, fragmentation and insufficient coordination of management and reporting of performance information.

Addendum 2 to Circular 88 was published on 17 December 2020 to provide an update to all municipalities on the preparation of statutory planning and reporting documents required for the 2021/22 MTREF cycle. Section 4 of the said Circular is specifically dealing with the development and application of the Circular 88 indicator set to the intermediate cities, the districts and the local municipalities. Indicators have been categorized in terms of levels of readiness for the different categories of municipalities. Tier 1 and Tier 2 indicators relevant to the District Municipality have to be reported on, as well as the compliance questions and compliance indicators.

Planning for and reporting on the applicable set of indicators contained in the appendices to Addendum 2 of Circular 88 is required by all District and Local Municipalities as a pilot project. These indicators are annexed only to the IDP and the SDBIP, as the Municipality is not to be audited in terms thereof. The purpose with implementation of such indicators as a pilot project is to allow for processes and systems to be set in place before the promulgation of the indicators, in terms of Section 43 of the Municipal Systems Act, 2000 (Act 32 of 2000). The setting of baselines before or on 31 July 2021 was required and quarterly reporting to COGTA has to be done.

The planning process for the IDP for the FY2022/23 to FY2026/27 has put more focus on result-based planning. Outcome indicators will be devised for implementation, as well as the setting of medium-term targets. Once fully implemented and measured, the Municipality will be able to report on results or outcomes, apart from reporting on the outputs planned for in the Service Delivery and Budget Implementation Plan (the SDBIP).

Below is a table reflecting the indicators which are currently being reported on quarterly, as per the reporting template of COGTA. It needs to be indicated that a number of the indicators in the table above is not applicable to the District Municipality as it does not relate to services delivered as part of the mandate of the District Municipality. The indicators are not being reported on.

OUTPUT INDICATORS	
REFERENCE NO.	INDICATORS
WS1.11	Number of new sewer connections meeting minimum standards
WS1.11(1)	(1) Number of sewer connections to consumer units
WS1.11(2)	(2) Number of new sewer connections to communal toilet facilities
WS2.11	Number of new water connections meeting minimum standards
WS2.11(1)	(1) Number of new water connections to piped (tap) water
WS2.11(2)	(2) Number of new water connections to public/communal facilities
WS3.11	Percentage of callouts responded to within 24 hours (sanitation/wastewater)
WS3.11(1)	(1) Number of callouts responded to within 24 hours (sanitation/wastewater)
WS3.11(2)	(2) Total number of callouts (sanitation/wastewater)
WS3.21	Percentage of callouts responded to within 24 hours (water)
WS3.21(1)	(1) Number of callouts responded to within 24 hours (water)
WS3.21(2)	(2) Total water service callouts received
TR6.12	Percentage of surfaced municipal road lanes which has been resurfaced and resealed
TR6.12(1)	(1) Kilometres of municipal road lanes resurfaced and resealed
TR6.12(2)	(2) Kilometres of surfaced municipal road lanes
TR6.13	KMs of new municipal road lanes built
TR6.13(1)	(1) Number of kilometres of surfaced road lanes built

OUTPUT INDICATORS	
REFERENCE NO.	INDICATORS
TR6.13(2)	(2) Number of kilometres of unsurfaced road lanes built
TR6.21 TR6.21(1) TR6.21(2)	Percentage of reported pothole complaints resolved within standard municipal response time (1) Number of pothole complaints resolved within the standard time after being reported (2) Number of potholes reported
FD1.11 FD1.11(1) FD1.11(2)	Percentage compliance with the required attendance time for structural firefighting incidents (1) Number of structural fire incidents where the attendance time was less than 14 minutes (2) Total number of distress calls for structural fire incidents received
LED1.11 LED1.11(1) LED1.11(2)	Percentage of total municipal operating expenditure spent on contracted services physically residing within the municipal area (1) R-value of operating expenditure on contracted services within the municipal area (2) Total municipal operating expenditure on contracted services
LED1.21 LED1.21(1) LED1.21(2)	Number of work opportunities created through Public Employment Programmes (incl. EPWP, CWP and other related employment programmes) (1) Number of work opportunities provided by the municipality through the Expanded Public Works Programme (2) Number of work opportunities provided through the Community Works Programme and other related infrastructure initiative
LED2.12 GG6.11(1) GG6.11(2)	Percentage of the municipality's operating budget spent on indigent relief for free basic services (1) R-value of operating budget expenditure on free basic services (2) (2) Total operating budget for the municipality
LED3.31 LED3.31(1) LED3.31(2)	Average number of days from the point of advertising to the letter of award per 80/20 procurement process (1) Sum of the number of days from the point of advertising a tender in terms of the 80/20 procurement process to the issuing of the letter of award (2) Total number of 80/20 tenders awarded as per the procurement process
LED3.32 LED3.32(1) LED3.32(2)	Percentage of municipal payments made to service providers who submitted complete forms within 30-days of invoice submission (1) Number of municipal payments within 30-days of complete invoice receipt made to service providers (2) Total number of complete invoices received (30 days or older)
GG1.21 GG1.21(1) GG1.21(2)	Staff vacancy rate (1) The number of employees on the approved organisational structure (2) The number of permanent employees in the municipality
GG1.22 GG1.22(1) GG1.22(2)	Percentage of vacant posts filled within 3 months (1) Number of vacant posts filled within 3 months since the date (dd/mm/yyyy) of authority to proceed with filling the vacancy (2) Number of vacant posts that have been filled
GG2.31 GG2.13(1) GG2.13(2)	Percentage of official complaints responded to through the municipal complaint management system (1) Number of official complaints responded to according to municipal norms and standards (2) Number of official complaints received
GG4.11 GG4.11(1)	Number of agenda items deferred to the next council meeting (1) Sum total number of all council agenda items deferred to the next meeting
GG5.11 GG5.11(1)	Number of active suspensions longer than three months

OUTPUT INDICATORS	
REFERENCE NO.	INDICATORS
	(1) Simple count of the number of active suspensions in the municipality lasting more than three months
GG5.12 GG5.12(1)	Quarterly salary bill of suspended officials (1) Sum of the salary bill for all suspended officials for the reporting period

COMPLIANCE INDICATORS	
REFERENCE NO.	INDICATORS
C1 (GG)	Number of signed performance agreements by the MM and section 56 managers:
C2 (GG)	Number of Executive Committee or Mayoral Executive meetings held
C3 (GG)	Number of Council portfolio committee meetings held
C4 (GG)	Number of MPAC meetings held
C5 (GG)	Number of recognised traditional leaders within your municipal boundary
C6 (GG)	Number of formal (minuted) meetings between the Mayor, Speaker and MM were held to deal with municipal matters
C7 (GG)	Number of formal (minuted) meetings - to which all senior managers were invited-held
C8 (GG)	Number of councillors completed training
C9 (GG)	Number of municipal officials completed training
C10 (GG)	Number of work stoppages occurring
C11 (GG)	Number of litigation cases instituted by the municipality
C12 (GG)	Number of litigation cases instituted against the municipality
C13 (GG)	Number of forensic investigations instituted
C14 (GG)	Number of forensic investigations conducted
C15 (GG)	Number of days of sick leave taken by employees
C16 (GG)	Number of permanent employees employed
C17 (GG)	Number of temporary employees employed
C19 (GG)	Number of recognised traditional and Khoi-San leaders in attendance (sum of) at all council meetings
C20 (ENV)	Number of permanent environmental health practitioners employed by the municipality
C21 (ENV)	Number of approved environmental health practitioner posts in the municipality
C22 (GG)	Number of Council meetings held
C23 (GG)	Number of disciplinary cases for misconduct relating to fraud and corruption
C24 (GG)	Number of council meetings disrupted
C25 (GG)	Number of protests reported
C27 (GG)	Number of all awards made in terms of Section 36 of the MFMA Municipal Supply Chain Management Regulations
C28 (GG)	R-value of all awards made in terms of Section 36 of the MFMA Municipal Supply Chain Management Regulations
C31 (GG)	Number of approved posts in the municipality with regard to municipal infrastructure
C32 (GG)	Number of positions filled with regard to municipal infrastructure
C33 (GG)	Number of tenders over R200 000 awarded
C34 (GG)	Number of months the Municipal Managers' position has been filled (not Acting)
C35 (GG)	Number of months the Chief Financial Officers' position has been filled (not Acting)
C36 (GG)	Number of vacant posts of senior managers
C37 (GG)	Number of approved posts in the treasury and budget office
C38 (GG)	Number of filled posts in the treasury and budget office
C39 (GG)	Number of approved posts in the development and planning department
C40 (GG)	Number of filled posts in the development and planning department
C41 (GG)	Number of approved engineer posts in the municipality
C42 (GG)	Number of registered engineers employed in approved posts

C43 (GG)	Number of engineers employed in approved posts
C44 (GG)	Number of disciplinary cases in the municipality
C45 (GG)	Number of finalised disciplinary cases
C46 (ENV)	Number of approved waste management posts in the municipality
C47 (ENV)	Number of waste management posts filled
C48 (EE)	Number of approved electrician posts in the municipality
C49 (EE)	Number of electricians employed in approved posts
C70 (FD)	Number of volunteer responders in the service of the municipality
C71 (LED)	Number of procurement processes where disputes were raised
C72 (FD)	Date of the last municipal Disaster Management Plan tabled at Council
C76 (LED)	Number of SMMEs and informal businesses benefitting from municipal digitisation support programmes rolled out directly or in partnership with other stakeholders
C77 (LED)	B-BBEE Procurement Spend on Empowering Suppliers that are at least 51% black owned based
C78 (LED)	B-BBEE Procurement Spend on Empowering Suppliers that are at least 30% black women owned
C79 (LED)	B-BBEE Procurement Spend from all Empowering Suppliers based on the B-BBEE Procurement
C89 (GG)	Number of meetings of the Executive or Mayoral Committee postponed due to lack of quorum
C90 (ENV)	Date of the last Climate Change Needs and Response Assessment tabled at Council
C91 (ENV)	Date of the last Climate Change Response Implementation Plan tabled at Council

COMPLIANCE QUESTIONS	
No.	QUESTIONS
Q1	Does the municipality have an approved Performance Management Framework?
Q2	Has the IDP been adopted by Council by the target date?
Q3	Does the municipality have an approved LED Strategy?
Q4	What are the main causes of work stoppage in the past quarter by type of stoppage?
Q5	How many public meetings were held in the last quarter at which the Mayor or members of the Mayoral/Executive committee provided a report back to the public?
Q6	When was the last scientifically representative community feedback survey undertaken in the municipality?
Q7	What are the biggest causes of complaints or dissatisfaction from the community feedback survey? Indicate the top four issues in order of priority.
Q9	Does the municipality have an Internal Audit Unit?
Q10	Is there a dedicated position responsible for internal audits?
Q11	Is the internal audit position filled or vacant?
Q12	Has an Audit Committee been established? If so, is it functional?
Q13	Has the internal audit plan been approved by the Audit Committee?
Q14	Has an Internal Audit Charter and Audit Committee charter been approved and adopted?
Q15	Does the internal audit plan set monthly targets?
Q16	How many monthly targets in the internal audit plan were not achieved?
Q17	Does the Municipality have a dedicated SMME support unit or facility in place either directly or in partnership with a relevant role-player?
Q18	What economic incentive policies adopted by Council does the municipality have by date of adoption?
Q19	Is the municipal supplier database aligned with the Central Supplier Database?
Q21	What is the organisational location of the disaster risk management function within your municipality? (Specify the placement and highest level filled post within it).
Q22	Please list the name of the structure and date of every meeting of an official IGR structure that the municipality participated in this quarter:

Q23	Where is the organisational responsibility for the IGR support function located within the municipality (inclusive of the reporting line)?
Q24	Is the MPAC functional? List the reasons why if the answer is not 'Yes'.
Q25	Has a report by the Executive Committee on all decisions it has taken been submitted to Council this financial year?

CHAPTER 6

Summary of the Key Performance Areas

6.1. SPATIAL ANALYSIS

6.1.1. Location of Ehlanzeni District

32 2 76” to 30 06’25” East and

24 2’26” to 25 59’25” South

See MAP 1: Planning Area

The total size of the Municipal area is 2,366,353 ha. Part of the Kruger National Park in Ehlanzeni District makes up 36.8% of the total area whilst Thaba Chweu makes up 21.6%

Municipality	Ha	%
City of Mbombela	463 041	
Nkomazi LM	290 852	12.3
Bushbuckridge LM	231 093	9.8
Thaba Chweu	511 696	21.6

Source: EDM, SDF 2010

6.1.2. Protected and Sensitive Areas

Figure 15: Protected & Sensitive Areas

This map indicates areas within the district that are environmental sensitive. In Ehlanzeni there are number of wetland areas which if are not prioritized and preserved will be destroyed and that leads to health hazards in the future as they are regarded as natural purifiers of water. In addition, the map also indicates the dolomite bed rock underlying the Sabie area in Thaba Chweu. The importance is that land use patterns must be revisited in line with this observation and the municipality should prioritize the dolomite investigation studies.

6.1.3. Climate

Ehlanzeni District falls within the summer rainfall region with the rainy season normally lasting from October to March. The average mean annual precipitation for the Ehlanzeni area varies between approximately 750 and 860 mm with averages varying from approximately 450 to 550 mm on the eastern areas to 1500 mm at the Escarpment and higher lying areas (DWAF 2000).

Climate Zones	Ha	%
Alpine	88,253	3.7
Dry Subtropical	13,877	0.6
Dry Temperature	258	0.0
Dry Topical	122,482	5.1
Humid Tropical	38,857	1.6
Moist Tropical	787,634	32.6
Moist Temperature	33,272	1.4
Moist Tropical	462,951	19.2
KNP (Moist Tropical)	869 669	36.0
Ehlanzeni	2,417,252	100.00

The area is regarded as a moist subtropical /tropical region with more than 80% of the area in the district within these zones.

6.1.4. Natural Ecology

South African environmentalists identify six biomes on land in South Africa. A biome can, in general terms be described as a broad ecological unit, representing a large natural area with a relatively uniform plant and animal life, closely determined by environmental conditions and especially climate.

The six biomes of South Africa are:

- Grassveld Biome
- Succulent Karoo Biome
- Forest Biome
- Savannah Biome; and
- Fynbos Biome

Ehlanzeni District forms part of the Savanna Biome, which includes the KNP and areas to the west and South thereof as well as the Grassveld Biome that includes the higher lying areas. According to Acocks (1975), the largest portion of Ehlanzeni is categorized as Lowveld and Lowveld Sour Bushveld types.

Vegetation	Area (Ha)	%
Arid Lowveld	38 253	2.6
Bankenveld	36 497	2.4
Lowveld	617 045	41.3
Lowveld Sour Bushveld	366 570	24.5
Mixed Bushveld	10 825	0.7
North-Eastern Mountain Sourveld	270 609	18.1
North-Eastern Sandy Highveld	105 818	7.1
Piet Retief	4 190	0.3
Sourish Mixed Bushveld	32 163	2.2
Zululand thornveld	11 852	0.8
Total	1 493 822	100.00

Source: Acocks Veld Type (1975) Conservation and Environment, Mpumalanga 2005

Topography

The Municipal Area is situated within the Lowveld escarpment with an average elevation of 1400m above sea level and altitudes varying from 600 to 2100 m. The escarpment and related mountains provide an attractive variety to the landscape promoting scenic tourism. The Thaba Chweu area is also malaria free due to its altitude.

The elevation of the landscape is illustrated in **MAP 2 of the SDF**.

Rang (m)	Area (ha)	%
601-700	2242	0.4
701-800	13458	2.2
801-900	29158	4.8
901-1000	29158	5.2
1001-1100	31401	6.7
1101-1200	40373	6.7
1201-1300	62802	10.4
1301-1400	74017	12.3
1401-1500	76360	12.7
1401-1600	65045	10.8
1601-1700	51588	8.5
1701-1800	51588	8.5
1801-1900	42616	7.1
1901-2000	20196	3.3
2001-2100	11215	1.9
2101-2200	2243	0.4

Source: Dept of Agriculture, conservation and Environment, Mpumalanga 2005

The table below depicts the elevation of the area varies between 600 and 2200m above sea level. The larger part (63%) of the area is situated between 1201m and 1800m above sea level.

The table below indicates the slopes within the Municipal area. See Map 3 of SDF

Slope	Area (Ha)	%
0-9%	2069397	85.9
9 -15%	264074	11.0
15 -25%	73729	3.1
>25%	1958	0.1
	2409160	100.0

Source: Dept of Agriculture, conservation and Environment, Mpumalanga 2005

The majority of the area is level to moderate (96.9%) and, thus, **potentially suitable** for urbanization and agriculture. Steep slopes occur in 3.2% of the area. The morphology of the Ehlanzeni district excluding KNP, which is mostly plain and hills, consists of the land forms as set out below

Landform	Area (Ha)	%
Plains and Hills	448426	30.1
Hills	39745	2.66
High Mountains	396980	26.573.
Escarpments	77337	5.18
Plains	48463	3.24
Low Mountains	483287	32.34
Total	1494240	100.0

Source: SDF 2010

Low and high mountains make up **59%** of the area and plains and hills **30%**. It is this 59% landforms that set the basis for scenic and natural tourism but it also severely restricts the areas suitable for human settlements and as a result it leads to a clash with the high potential agricultural land. A further aspect of the abundance of mountainous and hilly areas is that the cost of and the provision of infrastructure and civil services is much higher than in other parts of Mpumalanga. This should be used as a motivation for larger equitable shares than normal, to provide for the higher costs.

Geology and Soils

No real problems associated with geology and soil types exist in the Ehlanzeni District, except for a part of Thaba Chweu, in the vicinity of Sabie; Graskop, Pilgrims' Rest and Blyde River Canyon, which is underlined with Dolomite, and are therefore not suitable for human settlements, except with special conditions and requirements from the Local Municipality, and also requiring special geotechnical investigations. This leads to the fact that these areas are not highly suitable for extended/expanding human settlements and urban growth in these areas should be restricted, and land uses should be aimed at tourism, forestry and mining purposes.

Agricultural Potential

Type	Area (Ha)	%
High	41509	1.8
Medium	920154	38.9
Low	1121493	47.4
Very Low	282382	11.9
	2365538	100.0

The topsoil depth however plays a major role in determining the agricultural potential of land and the soil depths deeper than 750 mm within access of a water source need to be regarded as worthy of protection as a scarce resource. See **MAP 5 SDF**.

Water Resources – Rivers and Dams

Ehlanzeni District disposes of four river systems, the Olifants River, the Komati River, the Sabie River and Crocodile River, flowing from the Highveld Plateau over the Drakensberg Escarpment towards the Indian Ocean. Together with the escarpment, the river systems form the backbone of the natural environmental system, providing the major water source needed for development and the scenic environment essential for tourism

Major rivers in the area include the following (See Map 6)

- Elands River
- Nels River
- Sabie River
- Sand River
- Blyde River
- Steelpoort River
- Watervals River
- Timbavati River
- Crocodile River

Dam	River	Capacity (M3)
Blyderivierspoort	Olifants	54.4
Inyaka	Marite	123.7
Driekoppies	Lomati	250.9
Da Gama	Crocodile/Komati	13.5
Klipkoppie	Crocodile / Komati	11.8
Witklip	Crocodile / Komati	12.3
Primkop	Crocodile / Komati	2.0
Longmere	Crocodile / Komati	4.2
Buffelspruit	Olifants	5.2
Ohrigstad	Olifants- origstad Rivier	13.4
Vygeboom	Crocodile / Komati	77.8
Nkomazi	Crocodile / Komati	158.9

Total abstraction from rivers and dams are as set out in Table 7.1.2.8 in the SDF

Name	Source Type	Permitted abstraction (M1/Year)	Prior	Current	Use
Crocodile	River	26.925	26.925	26.925	Domestic/Agriculture
Mlumati	River	Unknown	Unknown	15.38	Domestic/Agriculture
Nkomati	River	Unknown	Unknown	3.81	Domestic/Agriculture
Driekoppies	Dam	Unknown	Unknown	9.21	Domestic/Agriculture
Mbuzini	Dam	0.737	0.736	0.736	Domestic/Agriculture

Source: EDM, WSDP

Dams on private land used for agricultural purposes have not been included in the above table. No indication of the future demand in surface water abstraction was given, although Nkomazi LM indicate that by reducing the water losses, the future demand on the existing surface water resources can be greatly reduced

City of Mbombela

Mbombela LM as WSA abstract water from different water sources from more than one water management area as indicated in the table below. The water rights, permits and licenses from the Crocodile River as well as Sabie River that formed part of the transfer process that was concluded end 2005, still need to be re-issued and transferred to finalize the conditions of the transfer agreement. See 7.1.2.9

Name	Source Type	Current	Use
Witklip	DWAFMLM	750	750
Longmere Dam	WRVCBMLM	1250	1250
Crocodile River 1 (Nelspruit)	River 1 Silulumanzi	10000	10000
Crocodile River 2 (Rocky Drift)	River 2 Silulumanzi	5000	0
Crocodile River 3 (Nelspruit Agriculture College)	River 3 Silulumanzi	92.25	92.25
Crocodile River 4 (Nelspruit Golf course)	River 4 (Silulumanzi)	98.56	98.56
Crocodile River 5 (Nsikazi South)	River 5 MLM	11200	18980
Crocodile River 6 (Matsulu)	River 6 Silulumanzi	3464	380.68
Sabie River 1 (Hazyview)	River 7 MLM		
Sabie River 2 (Nsikazi North)	River 8 mlm		
Elandshoek	Stream Elandshoek		
Ngodwana 1	Ngodwana DamSappi	14600	13870
Ngodwana 2	Elands River sappi	3372	1321
Emoyeni	River 9 MLM	309.40	239.68

Source: EDM, WSDP

Umjindi

Water supplied to Barberton and Umjindi from Komatipoort dam in the Suid-Kaap River. Lows Creek irrigation scheme is supplied from the Shiyalongubu dam in the Kaap River. The mine and farming communities make use of various tributaries of the Suid-Kaap River for supply, The total abstraction from rivers and dams are set out in table 1.2.10 SDF

Name	Source Tyoe	Permitted abstraction (M1/year)	Prior	Current Use
Komati Dam	Dam		6434	2900
Suidkaap	River		2679	500
Shebasiding	River		Unknown	53

Source: EDM, WSDP

Thaba Chweu

The Sterkspruit is the only surface water resource utilized for primary water supply to the Lydenburg area. Lydenburg is abstracting water from the Sterkspruit via the Lydenburg town dam. Graskop is abstracting water from a fountain.

The Pilgrims Rest Rural area basically has two water supply schemes, the Matibidi scheme and the Pilgrims Rest scheme. Only two surface water resources are currently being utilized for primary water use in the Pilgrims Rest area.

One source is called the Moremela spring that feeds the Moremela stream. Water is withdrawn from the spring. The flow rate of the Moremela stream has been determined but the assured yield should be established. Detailed investigations are required to augment supply to the Matibidi scheme.

The Blyde River, which passes south east of Moremela, is not currently utilized as a bulk water source. The Treur River converges with the Blyde River at Bourke’s Luck just east of Moremela. These are two surface water resources that could be considered for utilization in future when the groundwater sources in the Pilgrim’s Rest area become depleted. These sources are however in ecological very sensitive areas and obtaining permission to use water from these two rivers will be very problematic.

Bushbuckridge

Total abstraction from rivers and dams are set out in Table 39

Name	Source Type	Current Use
Acornhoek	Dam	1413
Klein Sand	River	1095
Sand	River	1387
Casteel	Dam	219

6.2. SPATIAL CONTEXT OF THE DISTRICT

6.2.2. Land Uses and Development

Figure 17: Land Ownership full title

Source: EDM GIS.

6.2.3. Land use Patterns

The land use patterns of urban or rural areas are mostly influenced by a diverse set of factors, which include climate, topography, and resource base in the area such as minerals, soil types, water availability, and biodiversity (Daniel and Hopkinson, 1989). Forestry, agriculture and other activities such as tourism are the result of the moderate climatic conditions of Ehlanzeni. Ehlanzeni is a low rainfall area (mean annual rainfall is 350 to 700mm), characterized by flat terrain at low altitude as well as highly to moderately dissected mountains terrain, characterized by steep valleys and gorges that form part of the Escarpment.

Ehlanzeni District is also rich in terms of its biodiversity and mineral resources. Gold mines are operating at Barberton and Pilgrims Rest and chrome mines at Lydenburg. The future development of the Eastern Limb of the Bushveld Complex directly west of Lydenburg will also have an influence on the future land use patterns within the Thaba Chweu Local Municipality. The Biodiversity within Ehlanzeni also plays a significant role in terms of boosting the tourism industry with the Kruger National Park as one of the major destinations for international and domestic tourism. Tourism, like agriculture, is among other land use patterns, which uses land extensively because of the availability of natural resources.

LANDUSE	% OF EHLANZENI
Forestand woodland	39.11
Thicketbush	24.85
Grassland	12.02
Cultivatedland	8
Commercialdrylandcultivation	1.77

Temporary commercial irrigated	1.77
Commercial irrigatedsugar cane	1.52
Forests andplantations	11.39
Degradednaturalvegetation	3.04
Mining, quarries and urban	1.21
Waterbodies	0.14

6.2.4. Spatial Economic Development Initiatives

The location of Ehlanzeni presents a strategic position and a number of growth and development opportunities within an international, regional and Southern African context. The existing spatial development initiatives in the region are of critical importance to the district namely, the Maputo Development Corridor Spatial Initiative, the Tourism and Biodiversity Corridor and the Limpopo Trans- frontier Park.

6.2.5. The Maputo Development Corridor

Figure 16: Maputo Development Corridor

The Maputo Development Corridor provides Ehlanzeni specifically Mbombela with the status of economic development node. The Corridor runs from Witbank in the Eastern South African province of Mpumalanga, through Nelspruit, to Maputo the capital of Mozambique. Investment targets the provision of infrastructure, agriculture, mining, energy, chemicals, tourism and manufacturing sectors.

The key infrastructure projects are the N4 Maputo Corridor toll road, the upgrading of the railway line from Ressano Garcia to Maputo, the upgrading of the Maputo Port, the dredging of the harbor and telecommunications. The transport axis between Gauteng, the industrial heart of South Africa, and Maputo offers the shortest link to an export harbor

The Maputo Development Corridor provides Ehlanzeni specifically Mbombela with the status of economic development node. The Corridor runs from Witbank in the Eastern South African province of Mpumalanga, through Nelspruit, to Maputo the capital of Mozambique. Investment targets the provision of infrastructure, agriculture, mining, energy, chemicals, tourism and manufacturing sectors.

The key infrastructure projects are the N4 Maputo Corridor toll road, the upgrading of the railway line from Ressano Garcia to Maputo, the upgrading of the Maputo Port, the dredging of the harbor and telecommunications. The transport axis between Gauteng, the industrial heart of South Africa, and Maputo offers the shortest link to an export harbor.

6.2.6. The Mbombela-Phalaborwa SDI

The main road link will run from Phalaborwa to Mbombela in the Mpumalanga province, where the SDI will join the Maputo Development Corridor. The corridor aims to create better access between the port of Maputo and the mining potential around Phalaborwa in Limpopo Province. The following incentives also support the SDI:

- The Bushbuckridge Local Municipality has been declared as an **ISRDP** (Integrated Sustainable Rural Development Programme) Node, which prioritizes the area for special development incentives and funding for National Government
- The **Kruger to Canyons Biosphere**, which links the Blyde River Canyon with the Kruger National Park.

6.2.7. The Limpopo Trans Frontier Park

The Kruger National Park is the largest game reserve in South Africa and covers some 20,000 square kilometers. It extends approximately 350 kilometers from north to south and approximately 60 kilometers from east to west. To the west and south of Kruger Park are the provinces of Mpumalanga and Limpopo. In the north is Zimbabwe, and to the east is Mozambique.

The Kruger National Park is now part of **the Great Limpopo Trans-Frontier Park** (with a total area of 35 000 squarekilometers). This peace park links Kruger Parkwith Gonarezhou National Park in Zimbabwe, and with the Limpopo National Park in Mozambique. Other areas of incorporation are Manjinji Pan Sanctuary and Malipati Safari Area in Zimbabwe, as well as **the area between Kruger and Gonarezhou**, the Sengwe communal land in Zimbabwe and the Makuleke region in South Africa. The Park is part of **the Kruger to Canyons Biosphere**, an area designated by the United Nations Education and Scientific Organization (UNESCO) as an International Man and Biosphere Reserve. **The Giryondo Border Post between** South Africa and Mozambique is provided north of the Ehlanzeni boundary with Limpopo.

6.2.8. The Tourism and Biodiversity Corridor

The Tourism and Bio diversity corridor include parts of south-eastern Mpumalanga, northern Swaziland and southern Mozambique, which are closely associated with the Maputo Corridor Spatial initiative. It adds a further dimension to the Maputo corridor in the sense that it promotes the utilization of the undeveloped tourism development potential in rural areas that house the poor communities.

It also coordinates and integrates with agricultural led developments forming part of the Komati River Basin

Development programme. These initiatives span over international boundaries and are managed by international agreements. Although some of these initiatives are still in a very early stage of implementation it paves the way for regional as well as local development strategies and should be thoroughly taken into account in all levels of integrated development planning. Accessibility within the district and region needs to be enhanced to enable the optimal application of private and public investments.

The regional and international accessibility of Ehlanzeni provides it with the necessary thrust to become an active role player in the SADC and global economy. The challenge with regard to local spatial planning lies in the utilization and provision of social and engineering infrastructure in a manner, which will support the above initiatives and enhance the comparative advantages of Ehlanzeni within the region.

6.2.9. Spatial Development Priorities

The district developmental intentions as informed by the provincial and district spatial profiles and priorities. The development priorities hereunder support four crucial components that will underlie sustainable development in the district. Focus is therefore on the need for basic infrastructure and development for the poor, economic growth and development, environmental conservation and improving livelihoods as set out in the principles of the Mpumalanga Provincial Spatial Framework. These priorities guide decision making with regard to spatial development and arrangement of, within and between settlements, and investment and development spending in the Ehlanzeni District.

Priority 1: An integrated functional urban and rural system focusing on the development of a functional urban and rural system supporting the alleviation of poverty needs in eradicating the dysfunctional spatial system that was created during the pre-democratic period where areas of severe poverty, limited economic opportunities, limited land tenure options, limited social and engineering infrastructure were far removed from employment opportunities and economic growth.

Spatial integration of displaced settlements with areas of economic opportunity and potential within the Ehlanzeni District will focus on:

- 6.2.9.1. Provision of investment opportunities and accessibility to development corridors
- 6.2.9.2. Provision of housing within reasonable distance to enhance accessibility to economic and employment opportunities, and social facilities.
- 6.2.9.3. Integration of the natural environment into urban areas
- 6.2.9.4. Provision of a range of social, economic and recreational opportunities in nodes or along development corridors
- 6.2.9.5. Promoting local economic development initiatives, attracting economic development to existing impoverished areas.

Priority 2: Focus investment on localities with greatest economic potential Emphasizing on investment needs on those areas providing the best opportunities to better quality of living of all the residents in the Ehlanzeni District. Currently, the main areas with higher levels of economic potential are Nelspruit, White River, Hazyview, Malelane, Lydenburg, Barberton and Sabie. These areas having higher levels of economic potential attract greater intensity of investment in higher density development forms and provide a greater range and diversity of investment types and supporting services needed to accommodate a greater mix of income levels and activities. These neighborhoods should provide for different types of housing for different income groups; ownership of productive facilities for all the inhabitants in the neighborhood; and different choices for people at different life stages and with specific needs addressing the needs of a range of residents of the neighborhood.

Priority 3: Development of areas with a high development need and low levels of economic and livelihoods potential focusing on investment in those areas namely Bushbuckridge, Eastern Mbombela, Southern Nkomazi, Leroro, Matibidi and Moremela where there is a dire need to improve the quality of living through provision of commercial and infrastructure services, efficient engineering and social infrastructure development nodes that will act as a catalyst for restructuring and renewal of urban and rural areas.

Priority 4: The development of sustainable settlements in rural areas that is, all areas outside areas of higher concentration of people and activity with specific development and settlement needs focusing on the balance of resources on which development is based, and providing differentiated needs of settlement types i.e., Agri-villages; mine towns (Lydenburg, Umjindi, Steelpoort and Orighstad); resort development; low density rural residential; eco estates and golf estates.

Priority 5: The responsible use and management of the natural environment requires by balancing the use of resources for infrastructure development and operation with the carrying capacity of ecosystems. In areas of high priority with high levels of economic and sustainable livelihood potential which need development, high environmental sensitivity overlaps and more detailed planning at local scale will take place. The protection and preservation of not only the Kruger National Park as an international nature reserve but also the provision of managed buffer zones within the adjoining municipal areas form part of spatial development.

Priority 6: Human Resources Development by recognizing that spatial restructuring will not occur if development of the people does not happen. This will require the development of people through skills development programmes and access to knowledge of opportunities especially in areas of low economic and livelihood potential. The provision of training and education facilities within areas with a high development need and low levels of economic and livelihoods potential is thus a high priority.

Priority 7: Land Reform which includes land restitution, redistribution and tenure reform plays a major role in providing a sustainable socio-economic development of the disadvantaged communities. The severe lack of access to land for the poor can be addressed through implementation of appropriate policies for restitution and land availability in order to accommodate the need of poor for tenure and ownership. The Nsikazi, Nkomazi, Bushbuckridge, Leroro, Moremela, Matibidi areas need to be prioritized through the district and Department of Land Affairs strategy.

Priority 8: Enhancing regional accessibility in order to develop the full potential of all the development nodes within Ehlanzeni. The spatial structure will be provided with the aim of enhancing inter municipal and in municipal accessibility.

6.2.10. Local Municipal Spatial Development

The four local municipalities of the district are at disparate levels of developing and reviewing their Spatial Development Frameworks the table below provides the status. It must however be mentioned that the district one is under review also to incorporate some parts which were still accounted for in Limpopo Province under the former Bohlabe District Municipality

Municipality	Recent Updates
Thaba Chweu	Currently under Review
City of Mbombela	Currently under Review
Nkomazi	Currently under Review
Bushbuckridge	Currently under Review
Ehlanzeni District	Currently under Review

The district SDF is representative of its local municipalities; however, all spatial development framework is under reviewed to ensure alignment with the requirements of the Spatial Planning and Land Use Management Act of 2013, (Act 16 of 2013).

6.3. BASIC SERVICES

6.3.1 The state of Basic Services and Infrastructure in the District Municipality

There has been notable improvement with regards to access to basic household services in Ehlanzeni between 2011 and 2022. When looking at the findings from Census 2011 and Census 2022, there has been improvement in households' access to sanitation and electricity. The share of households connected to electricity improved to a level of 96.7% in 2022, however, 18 764 households were still not connected to electricity at all. Share of households without flush/chemical toilet improved from 73.8% in 2011 to 60,4 % in 2022, however there were still 356 219 households without access to flush/chemical toilets and 12 151 without any toilet.

Share of households without access to piped water Improved slightly from 19.0% in 2011 to 18,6 %, however, the challenges remain in terms of access to piped water in some of the local municipalities such as City of Mbombela and Nkomazi. In 2022, 456 013 households had access to piped water, either in the house, yard or through a communal tap. This 81.4% access was marginally higher/better than in 2011, however, 104 357, or 18.6% of households were still without access to piped water, resulting to Ehlanzeni being the worst of the 3 Districts in Mpumalanga.

It must be noted that, Ehlanzeni has for the past two terms of office adopted the Provincial direction to prioritize water and sanitation as the two main focus areas. In line with the proclamation of this strategic direction, Ehlanzeni District Municipality with the four local municipalities then ensured that bulk of their capital projects were tailor made to address the backlogs and challenges on service delivery initiatives. The Table above indicate the level at which the initiatives have assisted Ehlanzeni to roll back the frontiers of the backlogs to the basic services.

In terms of Water, more households are now able to access water than it was in the past decade. The same applies to the other basic services such as sanitation, roads, electricity and refuse removal. What has to be noted

is that, sanitation remains another challenge to the district municipality with very low percentage access due to Bushbuckridge and Nkomazi Local Municipalities which are having vast areas with no water infrastructure. In some instances, especially like Nkomazi, the infrastructure is there but insufficient to cater for the entire population. It is encouraging to point out that, although Nkomazi Local Municipality is struggling with water supply, a detailed master plan which was adopted and compiled in 2009 is now being implemented. This project includes the expansion of the Bulk Water Schemes in Driekoppies and Sibange Villages., These projects after completion will address most backlogs that are in Nkomazi Local Municipality. In Bushbuckridge Local Municipality, the entire area has a coverage of the bulk water supply from Inyaka Dam which traverses the municipality from Maviljaan to Acornhoek. The challenge facing the municipality is the installation of secondary bulk and reservoirs storage to ensure continuous and consistent supply. The municipality currently is focusing on reticulation and secondary bulk projects. The intervention by the district to the two municipalities have been through becoming an implementing agent for the Department of Water and Sanitation and Nkomazi Local Municipality in expanding the two bulk water schemes mentioned above. Whilst on the other hand, the district is implementing some water related projects in Bushbuckridge Local Municipality.

In Thaba Chweu Local Municipality, according to the statistics, this municipality has high level of access to the basic services and hence the lowest population compared to all other 3 municipalities in the district. In almost all the five focus areas, they have high access to these services. Their challenge are centred around the new mushrooming settlements around Harmony Hill, Skhila and in Mashishing. The municipality has prioritized instead of Water and Sanitation, the roads and storm water drainage systems. The major tourism routes traversing the Mashishing Town (Lydenburg) and other routes are heavily affected and characterized by massive potholes due to heavy and industrial trucks which transport mineral endowments and timber mined and manufactured in the area. Due to lack of enforcement of by-laws and critical levies for such private companies, the municipality is finding extremely difficult to maintain the roads in good and accessible conditions. In the City of Mbombela, whilst there are challenges with water and sanitation especially in the rural areas of Nsikazi and Kabokweni, the main issue is water rationing due to lack of adequate bulk supply and capacity of reservoirs supplying the areas. The municipality is working on expanding the Nyongane Bulk and Karino Bulk water schemes to counter the challenge. There is a consideration that a dam may be constructed to support the earmarked Inkosi City Development Project Initiatives.

The Table above suggests that, EDM and the Local Municipalities are to prioritise as a matter of urgency, more infrastructure development is still required in the former Comprehensive Rural Development Programme (CRDP) municipalities, More Operations and Maintenance (O&M) budgets required. In old towns like Komatipoort, Malalane, Lydenburg, Sabie, Graskop, Barberton and White River, there is a need for continuous replacement of asbestos pipes with UPVC Pipes. The municipalities must isolate with caution and look at other sources of raising revenue to cater for sustainable sanitation and refuse removal systems which will promote green energy and recycling of disposable material.

Some of the initiatives to be executed by the District Municipality as interventions to local municipalities are included in the capital budget section of the IDP and have been projected for the Medium-Term Revenue and Expenditure Framework Period.

The District Roads Master Plan was concluded in May 2009 with the aim to assist in integrating and coordinating the planning and implementation process followed by the various parties involved in roads infrastructure, and to address the links between them. Public transport routes within the area of jurisdiction that had priority consisted of district roads, bus / taxi routes and major access roads. The process of identifying roads for assessment were done by means of highlighting the routes which provide access to schools, clinics, places of worship, cemeteries, police stations and places of public interest.

The roads hierarchy development was tested against various future development scenarios, based on information from the IDPs of the local municipalities in order to determine the most effective road hierarchy.

In order to obtain an indication of the type of work and cost required to rehabilitate the existing roads infrastructure, fieldwork and visual assessments were carried out on selected routes and the existing roads were further classified in order to record their status.

A total of approximately 6245km of roads within the EDM’s area of jurisdiction was assessed and information pertaining to their locality, road name, ownership, surface type and condition, road width, adequacy of storm water related structures and an upgrading/maintenance cost estimate was captured and compiled. On average, approximately 74% of the gravel roads and 30% of the surfaced roads in the various Local Municipalities require re-alignment and reconstruction, as well as maintenance and base failure corrections respectively.

The district participated in the updating of the Provincial Freight Data Bank. The purpose of the data bank is to cover all types of freight mode (road, rail and air) with foundations for and facilitate informed decision-making in the field of freight transport and infrastructure. The data bank will also assist in continuous planning through consultative forum with relevant stakeholders.

6.3.1. Water

A large portion of Ehlanzeni District Municipality is dominated by rural areas and many people do not have full access to potable water. Lack of bulk and reticulation infrastructure in these areas aggravates the situation. Poor operation and maintenance by the relevant authorities is at the core of the poor situation.

Figure 17: Water Sources

Source: Stats SA Census 2022

The figure above indicates water sources within the district in percentages, comparing progress from census 2011 to census 2022. In terms of access from local water schemes in the district has observed an increase from 62% in 2011 to 70% in 2022 census. Most households in the district have access to water although there are still some households that depend on rivers and water tankers.

Municipality	Male	Free Basic Water	
		Households	%
ThabaChweu	29,746	10,381	34.9
Mbombela	156,309	107,088	68.5
Umjindi	14,459	7,010	48.5
Nkomazi	85,000	1,200	1.4
Bushbuckridge	164,600	34,566	21.0
DistrictManagementArea	475	285	60
Ehlanzeni	450,114	160,245	35.6

Source: Ehlanzeni blueprint on water & sanitation, 2006

The district developed a water and sanitation Blueprint to guide project implementation on matters relating to water and sanitation. Funding for operations and maintenance is a critical challenge to the district and its Local municipalities in Ehlanzeni are water service authorities as published in Section 12 notice (2003). The Department of Water Affairs and Forestry (DWAF) is providing technical support to the district and local municipalities in the development/review of Water Services Development Plans.

Municipality	Piped (tap) water inside the dwelling	Piped (tap) water inside the yard	Piped (tap) water on community stand: distance less than 200m from dwelling	Piped (tap) water to community stand: distance less than 200m and 500m from dwelling	Piped (tap) water to community stand: distance less than 500m and 1000m from dwelling	Piped (tap) water on community stand: distance greater than 1000m (1 km) from dwelling	No access to piped (tap) water	Total
Thaba Chweu Local Municipality	24363	12336	1961	1010	401	336	2888	43295
Nkomazi Local Municipality	39626	55248	6113	2694	1598	1241	27623	134143
Bushbuckridge Local Municipality	43470	78746	15006	6573	3011	2350	18771	167927
City of Mbombela Local Municipality	89532	53990	8833	3671	2146	1757	55075	215004
Ehlanzeni	196992	200320	31913	13948	7157	5683	104357	560370

In terms of the Census 2022 in the district municipality comprise of 56 037 households, out of these households, 104 357 have no access to piped water inside the dwelling. Most of the municipalities have been affected by service delivery protest especially water related. The district and its local municipalities have prioritized and budgeted water as number one.

The Department of Water Affairs is currently involved in a programme of converting all WSDP into an electronic format. This process will at the end provide a standard format for WSDPs and will subsequently provide all Municipalities, as these aspects are not quantified in the Water Services Development Plan (WSDP). All the local data per water service authority depicting all aspects of water service provision.

In terms of the Local Municipalities' backlogs, the figures reflected in Table 15 above do not reflect the actual

water backlogs as captured in the technical reports of local municipalities, and the challenges of differences in statistics contained in various planning documents.

6.3.2. Sanitation

The rate of households with no access to sanitation in Census 2011 was 10% and it dropped to 2% during Census 2022, which shows an improvement on the backlog with regards to sanitation. However, the main challenge the district is mostly faced with regards to sanitation is 338 321 number of households still has no access to chemical/flush toilets which is about 60% of the households. Bushbuckridge, Nkomazi and City of Mbombela are the most affected municipalities due to their nature of being mostly rural. Bushbuckridge having their highest rate of 74%, followed by Nkomazi with 70% and the City of Mbombela with 50%.

Source : Stats SA Census 2022

Source : Stats SA Census 2022

6.3.3. Electricity

Most households in the district have access to electricity as a form of energy although there are still some households that depend on other forms of energy like gas, paraffin, solar and wood. The ratio of dependence on other forms of energy beside electricity is aggravated by high unemployment rate within the district. In terms of the census 2022, only 1551 of households have no access to electricity. The rate of households with access to electricity in Census 2011 was 89% and it increased by 7% during Census 2022, which shows an improvement.

Source: Stats SA Census 2022

	Electricity from mains		Other source of electricity (e.g. generator etc.)		Gas		Paraffin		Candles		Solar		Other		None

6.3.4. Roads and Transport

Source: EDM, GIS

The road network within EDM, especially in rural areas are predominately of poor condition which are gravel and, in most instances, not surfaced. Most of the surfaced roads are not well maintained. Residential streets in rural areas are not defaced and make accessibility difficult during rainy seasons.

There are different types of transportation that operate within the district. Rail network transverses the entire district along the N4 Maputo corridor to Komatipoort and to the north along the R40 to Phalaborwa. The current railway system only serves for long distance and commercial purposes. Majority of commuters either use buses or taxis between their places of work and home or getting to any other destination.

The bus sector is more formalized and reliable in the entire district carrying more than 85% passengers on 500 routes, with 139 terminals and 338 buses for BUSCOR and 15 for Great North Transport. The taxi industry is formalized, regulated and reliable, accounting for less than 20% of the commuters with about 1200 registered vehicles, twenty taxi associations and a number of metered taxis which are not registered hence they operate without licenses.

Another type of transportation which operates within the district in the non-motorized transport; the bicycles, animal drawn-carts and wheel barrows. Much still need to be done in this sector of transportation infrastructure to provide cycle paths/lanes to ensure safety of cyclists.

It must be noted however that the district has surfaced number of roads for the different municipalities in pursuit of ensuring better infrastructure development for easy movement of communities and goods to various district nodal points. EDM strives to further assist municipalities with the designing of new roads, upgrades and refurbishments.

Within its jurisdiction, EDM has an international airport the KMIA and the Nelspruit public airport. The Malelane, Skukuza and Mhlahlala private airports also serve as other mode of transport links in the district. The district developed a Comprehensive Integrated Transport Plan (CITP) funded by the Provincial Department of Roads and Transport. Table 24, 34 and 25 below illustrate the length of roads in all the local municipal areas of jurisdiction and the length of all the provincial and national roads in the EDM area (*Source: EDM Current Public Transport Record 2007*)

6.3.5. Basic Services backlog within Ehlanzeni

Level of Service Access	WATER		SANITATION		ELECTRICITY		WASTE REMOVAL		ROADS	
	HH with access	HH without access	HH with access	HH without access	HH with access	HH without access	HH with access	HH without access	Tarred (KMs)	Gravel (KMs)
Bushbuckridge	64 096 (44.8%)	78 937 (55.2%)	106 640 (75%)	36 393 (25.4%)	139 255 (97%)	3 778 (3%)	22 817 (16%)	120 216 (84%)	103.5	4449.85
City of Mbombela (Former Mbombela LM)	149 599 (83%)	30 885 (17%)	99 110 (55%)	81 374 (45%)	166 795 (92.4%)	13 689 (7.6%)	52 439 (29%)	128 045 (70.9%)	593.53	2825
Nkomazi	79 089 (75.3%)	25 921 (24.7%)	80 777 (76.9%)	24 233 (23.1%)	92 892 (88.5%)	12 118 (11.5%)	24 876 (23.6%)	75 870 (72%)	143.93	3177.54

6.3.6. Housing

The demand for housing in rural areas is increasing. Home ownership is one of the most important issues in establishing stability in a community. The Mpumalanga Department of Human Settlement has been implementing housing projects in the municipal area. In terms of the provincial survey conducted in January to July 2006 there was a backlog of 113,000 houses in the province, and the district backlog was 95,000. A majority of people in the rural areas are living in traditional or informal type of houses. The mushrooming of informal settlements also contributes to the rise of housing shortage. The district has a challenge in developing human settlements in terms of the National Housing Strategy, which encourages housing people close to their places of employment. EDM has coordinated all initiatives implemented during the past years to address the shortage of housing within the district. There is still a huge backlog on housing demands, which needs to be addressed during the next five years. The slow pace of delivery and poor quality of the housing constructions has a heavy impact on the shortage of houses in the district.

6.3.7. Posts And Telecommunications

A majority of households living in the municipal area have access to basic communication infrastructure such as postal and telecommunication services. In terms of the Mpumalanga Spatial Development Perspective, 91% of the population have access to telecommunication system. One of the goals for 2010 in relation to Mbombela hosting the FIFA 2010 World Cup is to provide public viewing areas in the rural areas for the poorer communities to view the soccer tournament and the challenge is to provide these public viewing areas with adequate network coverage. Currently the District and its Local Municipalities are in a process to identify suitable sites for these public viewing areas.

6.3.8. Cemeteries

In in-depth study regarding cemeteries in the area of Jurisdiction of Ehlanzeni District Municipality was conducted in 2003. Out of this study, Ehlanzeni District Municipality has identified a number of sites in three Local Municipalities out of the four namely Thaba Chweu, Nkomazi and Mbombela. These sites were financed and access roads were upgraded. The objective was to provide enough space up to the year 2020. It seems the provisions made for the year 2020 was not enough due to a higher-than-expected death rate. This serves to indicate that the existing in-depth study must be urgently reviewed and updated to include Bushbuckridge Local Municipality as well.

6.4. INSTITUTIONAL ARRANGEMENTS AND GOVERNANCE

This chapter articulates EDM's broad institutional framework in relation to the governance model and provides details on the roles and responsibilities of the constituents of the model. This includes the outline of the oversight arrangements of the Council, Administrative arrangements of EDM. Municipalities have a duty in terms of S152 (1) (a) to provide a democratic and accountable government for local communities. The hallmark of a democratic and

accountable government is good governance characterized by political and administrative stability; functional governance and oversight committees; effective anti-corruption measures and functional Intergovernmental relations forums amongst others.

This section will therefore look at a number of internal systems as well as governance structures of the Municipality.

6.4.1. Performance Management

The Performance Management System is a key mechanism through which organizational and individual performance is measured to enhance attainment of the objectives of the Municipality. The Organizational Performance Management System is integrated with the strategic planning process, linking the planned IDP priorities and objectives to key performance indicators and targets contained in the Service Delivery and Budget Implementation Plan (to be referred to as “the SDBIP”).

Performance review is done in terms on planned activities and set targets on a quarterly basis. The Audit Committee plays an oversight role in ensuring that performance reports reflect a true representation of service delivery by the District Municipality. Accountability for the implementation of the planned targets is ensured through the signing of performance agreements with detailed performance plans. The Municipal Manager and General Managers’ performance plans are informed by the SDBIP. The Individual Performance Management System aligns the duties of the other staff members to the job descriptions as well the strategic initiatives of the institution. The District Municipality has successfully implemented both the organizational and individual Systems, whilst only one of the Local Municipalities in the District, Bushbuckridge Local Municipality, implemented both Systems. As for Thaba Chweu Local Municipality, City of Mbombela Local Municipality and Nkomazi Local Municipality, the Organizational System has been implemented, but the Individual Performance Management System has not yet been implemented.

6.4.2. Monitoring And Evaluation

EDM re-established the Monitoring and Evaluation unit in 2014/15 FY. The objective of the unit is to link evaluation to planning and budgeting processes. It aims to improve the quality of evaluation undertaken and ensures that evaluation findings are utilized to improve service delivery, planning and allocation of resources. The District Monitoring & Evaluation unit together with performance management unit seeks to provide management with information that is directly relevant and collected using scientific methods that conform to national standards. The information collected through monitoring and evaluation of the work done in the district can provide a scientific basis for decision-making and improve performance. The District M&E unit further seeks to address the use of evaluation to promote improved impact of the district programmes, at the same time increase transparency, accountability, relevance, effectiveness, efficiency and sustainability.

6.4.3. Audit Committee

To ensure good governance and compliance to Section 166 of the Municipal Finance Management Act No.

56 of 2003, EDM has established an Audit Committee which was subsequently appointed by Council. EDM maintained this good practice since the MFMA was enforced in 2003/04 financial year.

The current Audit Committee which comprises of five independent members was appointed by a Council, Resolution number A156/2016 and these members of which one is appointed as the Chairperson, forms an independent advisory body that operates within a Council approved Audit Committee Charter, the charter guides the manner in which the Committee operates in order to effectively provide advice to the municipal council, the political office bearers, the accounting officer and the management staff of the municipality on matters relating to:–

- (i) Internal financial controls and internal audits;
- (ii) Risk management;
- (iii) Accounting policies;
- (iv) The adequacy, reliability and accuracy of financial reporting and information;
- (v) Performance management;
- (vi) Effective governance;
- (vii) Compliance with the MFMA, the annual Division of Revenue Act and any other applicable legislation
- (viii) Performance evaluation; and
- (ix) Any other issues rereferred to it by the municipality.

The Audit Committee should meet as often as required but not less than four times a year to perform its functions, which among others includes the review of the financial statements to provide the Council of the municipality with authoritative and credible view of the municipality’s financial position as well as to respond to the council on any issues raised by the Auditor General in the audit report. Through liaison with the Internal Audit Unit or external auditors, the committee should carry out such investigations as may be required into the financial affairs of the municipality. As contemplated in regulation 14(2)(c) of the Local Government: Municipal Planning and Performance Management Regulations of 2001, the EDM’s Audit Committee serves as a Performance Audit Committee which on a continuous basis must review the Performance Information (performance measures) of the Municipality and in doing so, the committee should focus on economy, efficiency and effectiveness and impact in terms of the performance indicators and targets.

In order to ensure that the required independence and objectivity of the Internal Audit Unit of the Municipality is at all times strengthened and maintained, the Internal Audit Unit functionally report on all its activities to the Audit Committee and administratively to the Accounting Officer of the Municipality. The Audit Committee must on an annual basis review and approve the Internal Audit Charter, Methodology, Risk-based audit plan and the three-year internal audit program In order to effectively perform its oversightrole on the governance issues of the Municipality the Audit Committee must review the reports submitted to it by the Internal Audit Unit and quarterly prepare a report with its recommendations to Council,the report will among others reflect on the implementation of the internal audit plan on matters relating to–

- (i) Internal Audits;
- (ii) Internal controls;
- (iii) Accounting procedures and practices;

- (iv) Risk and risk management;
- (v) Performance management;
- (vi) Loss control; and
- (vii) Compliance with the MFMA, the annual Division of Revenue Act and other applicable legislation.

6.4.4. Information Technology

Information technology is creating an enabling environment within which internal and external communication takes place. Furthermore, the Municipality requires IT for a number of Systems which are required for purposes of planning, management, monitoring and reporting, such as the Financial Management System, Payroll, the Geographic Information System and the Performance Management System. To control vulnerabilities in terms of security of the IT Systems, the Municipality has adopted 26 IT policies which forms the Municipal Corporate Governance IT Framework. An IT Strategic Plan was developed to ensure efficient IT Systems in terms of hardware and software. The IT Section needs to have the capacity to implement these policies and strategies, both in terms of the number of staff members and the necessary skills. The IT function provides the Municipality with the maintenance of the Municipality's payroll and monthly payment of salaries, the provision and maintenance of the Municipality's internet and communications infrastructure and services, the provision and maintenance of the Municipality's internal telephony network and services and end-user support through and IT service desk.

6.4.5. Governance Structures

The legislative functions of Council include the approval of policies which governs the systems of Municipality, the Integrated Development Plan and the budget, which will provide resources to ensure the implementation of such. Council considers reports received from the Executive Mayor, debate such in multi-party Portfolio Committees and executes on oversight role.

6.4.6. Speaker Of Council

The Speaker of Council plays a coordination and management role with regard to the Section 79 Committees or Portfolio Committees. Other responsibilities of the Speaker, as per the legislative framework, includes the presiding over meetings of Council, ensuring at a minimum the quarterly meeting of Council and maintaining of order during such meetings. The Speaker also ensures compliance with the Code of Conduct for Councilors.

6.4.7. Chief Whip of Council

The role of the Chief Whip is pivotal in the overall system of governance in terms of sustaining cohesion within the governing party. The role of the Chief Whip includes the maintaining of sound relations with various political parties in Council, ensuring the proper representation of all political parties in the various committees, attending to disputes and building consensus between political parties.

6.4.8. Executive Mayoral Committee

The Executive Mayoral Committee is made up of the Executive Mayor and the Mayoral Committee, who are also Chairpersons of the Portfolio Committees. The Mayoral Committee ensures service delivery and strengthens the administration of the Municipality.

6.4.9. Portfolio Committees

Section 79 Portfolio Committees perform an oversight role by monitoring the delivery of services, as planned per the Service Delivery and Budget Implementation Plan. The functions include the review, monitoring and evaluation of departmental policies, monitoring of the implementation of departmental plans (as per the SDBIP) and reviewing performance reports on projects or programmes implemented.

List of Portfolio committees:

- I. Economic Planning and Development
- II. Corporate Services
- III. Financial Services
- IV. Technical Services
- V. Community Services

Apart from the Section 79 Committees, a number of Section 80 Committees have been established. These include the Municipal Public Accounts Committee, the Risk Management and Fraud Prevention Committee, chaired by an external Chairperson, and the Audit Committee.

6.4.10. Intergovernmental Relations

The Constitution of South Africa, 1996, provides the basis for intergovernmental relations between the three spheres of government; National; Provincial and Local. The principal of co-operative governmental and intergovernmental relations, as found in Section 41 of the Constitution, needs to be observed and adhered to by the three spheres in order to foster cooperative governance. This is to be done through the discourse of intergovernmental relations.

The Intergovernmental Framework Act, 2005, requires that all spheres of government effectively coordinate, communicate, align and integrate service delivery to ensure access to services. The spheres of government need to cooperate in order to coordinate the implementation of policy and legislation. This will ensure coherent government, the effective provision of service, monitoring of the implementation of policy and legislation. This will ensure coherent government, the effective provision of services, monitoring of the implementation of policy and legislation and the realization of national priorities. The Municipality has adopted a coordinated process of intergovernmental relations, which is governed by the IGR Strategy of the Municipality.

Fraud And Prevention Policy and Response Plan

The Fraud Prevention Policy is intended to reinforce existing systems, policies, procedures, rules and regulations of EDM by preventing, detecting and reducing the impact of fraud. EDM fosters a zero tolerance to fraud. The policy statement states that all fraud will be investigated and followed up by the application of all remedial actions available within the full extent of the law as well as the application of appropriate prevention and detection controls which include financial and other controls. The Fraud Prevention Policy and Response Plan was approved and adopted by Council on 3 December 2008 Council Resolution No A231/2008.

6.4.11. Risk Management

In terms of section 62 (1)(c)(i) “the accounting officer of a municipality is responsible for managing the financial administration of the municipality and must for this purpose take all reasonable steps to ensure- that the municipality has and maintains effective, efficient and transparent systems – of financial and risk management and internal control;”. The role of the service departments is to identify, review and manage their risks on an ongoing basis, making risk management an integral or natural part of the organizational processes and procedures. Risk management should be embedded in the organization, it becomes an intrinsic part of business planning and decision making - there is no direction taken without looking at potential risks. The objective of risk management is to assist management in making more informed decisions which:

- Provide a level of assurance that current significant risks are effectively managed;
- Improve operational performance by assisting and improving decision making and planning;
- Promote more innovative, less risk averse culture in which the taking of calculated risks in pursuit of opportunities, to benefit the municipality is encouraged; and;
- Provide a sound basis for integrated risk management and internal control as components of good corporate governance.

Status of Risk Management within the Ehlanzeni Municipality

The district comprises of four Local Municipalities, namely: City of Mbombela, Thaba Chweu, Nkomazi and Bushbuckridge Local Municipality and have these municipalities have established functional risk management units, approved risk management enabling documents as follows:

- Risk Management strategy;
- Risk Management Policy;
- Risk Management and Fraud prevention committee charter;
- Fraud prevention strategy;
- Fraud prevention policy;
- Whistle blowing policy;
- Risk management implementation plan;
- Risk appetite Framework;
- RFPC Key Performance Indicators;
- Compliance calendar; and Risk Assessment report and register.
- Functional risk management and fraud prevention committees.

All members have been appointed by the accounting officers.

The following are the challenges experienced within the various Risk management units;

- Poor attendance by members during committees;
- Insufficient capacity within risk management units;
- Late approval of Risk management frameworks; and

- Inadequate implementation of risk management strategies by the Risk owners

The following interventions are implemented:

- Members are reported to the accounting officers for non-compliance;
- Through the district and provincial risk management forum support is provided to ensure adherence to timeframes;
- District developed a standard template with activities per quarter for the reporting of progress;
- Shared services for the independent chairperson for the City of Mbombela and Thaba Chweu local municipalities.

Ehlanzeni District Municipality has embarked on a strategic risk assessment process. A review of the municipal risks and associated potential risks was undertaken during the 2016/17 financial year. All risks were identified; their associated controls and risk mitigation plans were reviewed in preparation for the new financial year. The objective of these reviews is to ensure sustainability and continuous improvement in the management of risks and that appropriate and timely action is taken in response to the inevitable changes in the external and internal organizational environments.

The following strategic risks were identified for the Municipality:

- 1) Possibility of delivering inferior quality projects and services;
- 2) Impact of dreadful diseases on service delivery;
- 3) Lack of off-site storage for all records;
- 4) Failure to identify fraud, misappropriation and theft;
- 5) Non-conducive environment to render support to LM's;
- 6) Failure to promote the image of the municipality;
- 7) Ineffective governance structures (MPAC, AC, RFPC, Cluster & forums);
- 8) Untimely termination of partnerships;
- 9) Unstructured training programmes;
- 10) Non-adherence to OPM/IPM processes;
- 11) Non implementation of recommendations of benchmarking report;
- 12) Ineffective coordination of district economic growth programmes;
- 13) Failure to mainstream;
- 14) Inability to implement recommendations of the monitoring and evaluation; and

Non adherence to the IDP Framework and process plan.

Ehlanzeni District Municipality operates with limited resources which require much discipline and dedication in order to maximize the value from the resources at our disposal. Value is maximized when set clear objectives are set, appropriate strategies are developed, the intrinsic risks associated with such objectives and strategies are being understood and direct effort and resources are being put towards managing the risks on cost-benefit principles. Risk management is an important mechanism for ensuring that things happen as they should. In reality, the process of managing risks is inseparable from that of managing for success – it is one and the same. Seen in this context it is therefore not surprising that risk management is considered to be a central part of

Government’s performance improvement initiatives.

Risk management is not a once off or periodic event. It is a continuous journey during which the Ehlanzeni District Municipality will continuously sharpen its response to the risks it faces by interrogating the completeness and accuracy of the risk register and the assumptions used to determine the priority of risks. Ehlanzeni District Municipality believes that its risk management process and system design are in line with internationally recognized best practices and provide for all internal and external forms of organizational risks. A key consideration in designing the process and system was to ensure that these become an integral part of management, with line managers taking full responsibility for managing all the risk that can affect their operations.

Incorporation Of Traditional Leaders

EDM held its first Traditional Leadership Summit on 3-4 June 2008. The objective of the summit was to get communities especially tribal authorities closer to government programmes so that they become partners and agents of service delivery in the district. The theme of the summit was dubbed as “Renewing our pledge, a district partnership, to build a better life for all”. One of the key resolutions of the summit was that traditional leaders, chairpersons of development committees and councilors should take lead and work together in delivering services to rural communities in the district to address the need to strengthen the structures in the district and involvement of traditional leadership as key stakeholders on matters of development especially in rural communities that live on tribal land. The District and the House of Traditional Leaders have elected 10 Traditional Leaders to sit/serve in the District Council meetings. The district continued to conduct training and capacity building programme for traditional leaders which included local economic development, planning, project management and leadership conflict management.

EDM is the first district in Mpumalanga to incorporate Traditional Leaders in its council seating [10 seats are reserved for Amakhosi]. By so doing partnership will be forged and also to encourage the participation of Amakhosi on matters of local government pertaining their areas and communities.

6.4.12. Communications, Marketing and Events

EDM’s Communication unit is responsible for communicating the work of government to the people of Ehlanzeni, Mpumalanga Province, South Africa guided by the government communications and Information Systems (GCIS) communication Framework which is meant to support the political heads for the rest of the mandate period beginning from the 2016 to 2019. This is informed by the decision of the June 2014 National Cabinet Lekgotla, the State of the Nation address, State of the Province address and the Mid-Term Strategic Framework (MTSF) 2014-2019.

The unit provides communication support to 4 local municipalities under I.T (The City of Mbombela, Nkomazi, Thaba Chweu and Bushbuckridge) to ensure that government is talking with one voice.

The objectives set out by the unit and also indicated in the communication

- Fulfill constitutional and legal mandate and obligation of deepening democracy;
- Encourage public participation in government processes and policies;
- Encourage communication between the municipality and sector departments including amongst others community-based organizations, the Traditional Authorities and other important stakeholders;
- Co-ordination of government programs National, Provincial, Local and parastatals through Inter-Governmental Relations framework communications;
- To develop and maintain correct public perception on government services;
- To maintain good relations with the media by forging good relations;

- To publicize Ehlanzeni District Municipality’s programme of action as advised the Executive Mayor

Within our local municipalities, communication units have been established and are fully functioning with minor challenges that the district is attempting to assist on. Our local municipal communications units have successfully established their local communicator forums

Research has proven that communication has in modern times become a fundamental tool used by organizations to remain in touch with their clientele. In this light, the objective of this strategy is to ensure that the municipality does not lose touch with its constituency by ensuring that the principles of Batho-pele is advanced at all times.

SIYA DELIVER MANJE QUARTERLY JOURNAL

The district municipality in an effort to reach out to community and external stakeholders has introduced the Siya Deliver Manje (Quarterly journal). They are intended to disseminate valuable information on services rendered to the various localities during that quarter. This communication tool is receiving more attention due to its appealing nature and content which entails progress of key projects and programmes as prescribed in the Integrated Development Plan.

INTERNAL NEWSPAPER

On a monthly basis, internal staff is kept up-to date with activities taking place within the institution. Of course, the primary aim is that of aligning projects and programmes but also to ensure that everyone has the same understanding of the broader events and activities which may have serious implication on their work plan. In addition, the tool assists to communicate internal information (changes and planned functions) much faster to internal staff.

WEBSITE

EDM has officially launched a website which was long been awaited by many stakeholders. The primary objective is to increase collaboration with outside world in terms of quality services rendered. Other objectives include the following:

- To reach the community within Ehlanzeni District Area;
- To inform stakeholders, investors and the community in general about EDM;
- To increase brand awareness;
- Build an online community;
- To communicate projects and programmes that EDM is currently running;
- More critically to post adverts and documents of regulated by legislation such as IDP, Budget, Tenders, Forms, Vacancies, MPRA and Performance Management Systems.

6.5. SOCIAL DEVELOPMENT

6.5.1. Social Services

To lead and coordinate outcome 13 namely an inclusive and responsive social protection system which seeks to achieve developmental social welfare services. The Strategic goals of social development are namely:

- Integrated development social welfare services
- Comprehensive child and family care and support services
- Integrated developmental restorative services

SOCIAL SERVICES WELFARE PROGRAMME

The social welfare services focus on the social and economic development of individuals, families and communities. The programme social welfare services are composed by four (4) sub-programmes i.e., services to older persons, services to persons with disabilities, HIV and AIDS and social relief.

CHILDCARE PROTECTION PROGRAMMES

It is about the administration of the Children’s Act no 38 of 2005. The placement of orphaned and vulnerable children in care namely: Child and youth care centres, places of safety, orphanages, fostercare and adoption. It further provides for the regulation and registration of care facilities like Early Childhood Development centres and drop-in centres. It further manages and coordinates the caregivers and funding of NPOs.

RESTORATIVE SERVICES PROGRAMME

It is the provision of integrated developmental social crime prevention and anti-substance abuse services to the most vulnerable in partnership with stakeholders and civil society. This further addresses the establishment and regulation of Rehabilitation centre, Juvenile centres and funding of NPOs. Social behavior change programmes are conducted.

It further provides for Victim empowerment. There are centres established and programmes implemented in support of those who are survivors of abuse and violence.

The Department of Social Development has established a number of social service points throughout Ehlanzeni

District Municipality rural areas to provide the affected communities with access to the services which includes the roll-out of the social grants. The Department of Social Services through its service provider SASSA is busy attending to those areas still lacking these service points and eradicating the backlog in this regard.

KEY ISSUES OF MARGINALISED YOUTH GROUPS

Ehlanzeni District Municipality developed a youth development strategy with an aim of providing a framework that will guide the implementation of youth programmes within the district. The focus of the district youth strategy is mainly aligned with the national youth policy which has the following pillars:

- Education and Training;
- Health;
- Economic participation;
- Sports and Recreation;
- Environmental and Tourism;
- Science and Technology
- Strategic planning sessions for the South African Youth Council
- Youth camps for Ehlanzeni Youth partnership with the Department of culture, sports and recreation
- Teenage pregnancy programme in partnership with Youth of Christ;

- Graduation ceremony for the youth artisans who were trained in the previous financial year; and
- Artisan training in partnership with Mpumalanga Regional Training Trust.

6.5.2. Educational Facilities

The District Department of Education is responsible for advancing excellence in quality education provision. The district is further sub-divided into two District namely Ehlanzeni and Bohlabela.

Ehlanzeni refers to Nkomazi, Umjindi and Mbombela. It is sub-divided into 14 Circuits namely: Umjindi, Mbombela, White River, White Hazy 1, White Hazy, Mgwenya, Nsikazi, Sikhulile, Nkululeko, Malelane, Khulangwane, Nkomazi East and Nkomazi West. Bohlabela refers to Thaba Chweu and Bushbuckridge. It is sub-divided into 16 Circuits namely: Mashishing, Sabie, Manyeleti, Dwarsloop, Thulamahashe, Greenvally, Malvian, Agincourt, Mkhuhlu, Ximhungwe, Marite, Casteel, Lehukwe, Cottendale, Arthurseat and Shatale

6.6 Municipal Health Services

6.6.1 Introduction

Municipal health services are first mentioned in the Constitution of the Republic of South Africa as part of the powers and functions of municipalities in Section 156 (1) where municipalities are given executive authority in respect of and the right to administer the local government matters listed in Part B of Schedule 4 and Part B of Schedule 5. Municipal health services appear under Part B of Schedule 4, whereas “health services” appear in Part A of Schedule 4 and are thus concurrent national and provincial legislative competencies but can be assigned or delegated to a municipality according to section 156 (1) (4) of the Constitution.

The definition of municipal health services is provided in the National Health Act 61 of 2003 which was promulgated in May 2005. Before then, local government legislation touched on municipal health services but there was no definition of municipal health services. Municipal health services are defined in the National Health Act in Chapter 5 which deals with the District Health System. Section 32 (1) of the Act requires every metropolitan and district municipality to ensure that appropriate municipal health services are provided. These municipal health services are defined in the Act as:

- Water quality monitoring;
- Food control;
- Waste management;
- Health surveillance of premises;
- Surveillance of communicable diseases, excluding immunization;
- Vector control;
- Environmental pollution control;
- Disposal of the dead; and
- Chemical safety.

Excluded from municipal health services are port health, malaria control, and control of hazardous substances, which are rendered by the province.

Section 32 of the National Health Act 61 of 2003 district mandates municipalities to provide municipal health services. Municipal health also known as Environmental Health services are services rendered by professionals (Environmental Health Practitioners) governed by HPCSA to promote health and prevent diseases. Environmental Health is the public health field that monitors and addresses those physical, chemical, and biological factors that we might not have direct control over but can impact our health anyway. We don’t always see it, but our environment is shaping our health every moment of every day. Where we live, what we eat, and how we interact with the world around us can tip the scales between healthy and not. That’s where

environmental health professionals, policies, and programs all come into play. The following are municipal health services as implemented by Ehlanzeni District Municipality:

6.6.2 Water quality monitoring

- Monitoring water quality through sampling and analysis, including mapping of water sources.
- Enforcement of Acts and Regulations related to water quality management
- Ensuring a hygienically safe and adequate supply of potable water provision
- Ensuring the monitoring of effective wastewater treatment and water pollution control, including the collection, treatment, and safe disposal of sewage and surveillance of the quality of surface water for waterborne diseases.

6.6.3 Food Control

- Ensuring compliance with R638 and issuing certificates (COA) to food premises
- Carry out routine inspections of food handling in establishments (formal and Informal premises) to ensure compliance
- Enforcement of the food-related provisions of the Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No: 54 of 1972) and Regulations.
- Implement measures for the recall and/or condemnation and proper disposal of foodstuffs unfit, unwholesome for human consumption
- Promote the safe transportation, handling, storage, and preparation of foodstuffs used in Primary schools Nutrition Programme (PSNP), Prisons, Health establishments, and ect

6.6.4 Waste Management

Monitoring of waste management systems- refuse, health care waste, hazardous waste, and sewage. Advocate for proper sanitation.

- Ensuring that all types of waste are stored, collected, removed, and disposed of effectively and efficiently and that proper facilities and containers are provided.
- Compliance monitoring of garden refuse sites, refuse transfer sites, landfill sites, incinerators, recycling sites, sewerage, and water works and the processes associated with such premises and instituting remedial and preventative measures.
- Ensuring safe usage of treated sewerage sludge and health safety of reclaimed waste

6.6.5 Health Surveillance of Premises

Residential, Business, and public premises are regularly monitored to identify and evaluate health risks and hazards and institute remedial and preventative measures.

Conduct inspections and issuing of health certificates to complying premises such as Early Childhood Development Centres, Schools, Accommodation establishments, Clinics, Hospitals, old age homes, and disability centers,

Environmental Impact Health Assessments.

- Assessing aspects such as ventilation and indoor air quality, lighting, moisture-proofing, thermal quality, structural safety, and floor space.
- Ensuring the abatement and prevention of any condition on any premises which is likely to constitute a nuisance or health hazard.
- Assessment of an overcrowded, dirty, or unsatisfactory condition in any residential, commercial, industrial, or other occupied premises.

6.6.6 Surveillance and prevention of communicable diseases, excluding Immunizations

- Health and hygiene promotion aimed at prevention of environmentally induced and communicable diseases.

- Determination of sources of infection, contacts, and carriers of diseases (case investigation) and reporting.
- Collection and analysis of appropriate epidemiological information on communicable diseases.
- Collaborate with other stakeholders and Departments regarding outbreaks.
- Taking samples and specimens for analysis and further action if deemed necessary.
- Instituting remedial and preventative measures.

6.6.7 Vector Control

- Identification of vectors, their habitats, and breeding places and instituting remedial and preventative measures.
- Removal or remedying of conditions favoring the prevalence or increase of rodents, insects, and vectors.
- Carrying out routine surveillance actions and surveys to determine the prevalence of vectors.
- Instituting eradication/control measures such as spraying of premises, baiting, fumigation, application of pesticides, and placing of traps at premises.

6.6.8 Environmental Pollution Control

- Ensuring hygienic working, living, and recreational environments.
- Identification of polluting agents and their sources i.e. air, land, and water, and instituting of corrective measures where such nuisances, risks, or hazards occur.
- Approval of Environmental Health Impact reports and commenting on Environmental Impact Assessment applications

6.6.9 Disposal of the Dead

- Controlling, restricting, or prohibiting the business of an undertaker or embalmer, mortuaries, and other places or facilities for the storage of dead bodies. Issuing certificates of Competency to Funeral Undertakers' premises complying with legislation.
- Monitoring practices at cemeteries, crematoria, and other facilities used for the disposal of dead bodies.
- Managing, controlling, and monitoring exhumations and reburials or disposal of remains.
- Investigating and monitoring pauper burials

6.6.10 Chemical Safety

- Listing all operators, fumigation firms formal or informal, retail premises which deal with the (manufacturing, application, transportation, and storage)
- Permitting and auditing of all hazardous substance premises and issuing of health certificates.
- Ensuring compliance and enforcement in accordance with the Health and Safety Act
- Facilitating advice, education, and training on pesticides and or chemical safety.

6.6.11 Awareness

Awareness-raising aims to bring about positive changes in understanding Municipal Health Services Functions by voluntary rather than forced means. Improvements in public knowledge through environmental education, sharing of knowledge and experience, and access to information, can lead to voluntary changes that are often more sustainable than forced changes initiated by legislation. The district is involved in education programs developed for food handlers, traditional authorities, local municipality officials, sector departments, Daycare centers, and schools considering the local context.

In so doing Ehlanzeni District Municipality is upholding promises made in Section 24(b) of the Constitution which states all citizens have a right to live in an environment that is not harmful to their health or well-being.

6.6.12 MUNICIPAL HEALTH DISTRICT STRATEGY

Vision:

“A Healthy Developed Society”

Mission

“To improve the quality of health and well-being of all people in the providing needs based, people, centered, equitable health care delivery system through an integrated network care service provided by a cadre or dedicated and well skilled Health workers”

The district has adopted Primary Health Care (PHC) as the main strategy for developing and promoting the health of Ehlanzeni communities, using the District Health System as the vehicle for facilitating its implementation. This means that services to be rendered to each community must necessarily be based on their needs; acceptable to them; and delivered in a manner that is accountable to them and with their full participation.

This strategy and system are a commitment to ensure that the systems and resources are in place. The district team together with the regional staff are committed to providing the necessary technical support to the districts to make the implementation of Primary Health Care a reality.

There is a District Health Management Team (DHMT) established. The DHMT strives to deliver primary health care services on the basis of equal accessibility; building on existing structures; integrating the PHC programmes into an implementable package; optimizing the public-private sector mix; and empowering the users to participate in service provision and governance.

This aims at providing a high quality, compassionate and caring service founded on availability and accessibility of a well-organized referral network involving all levels of care, i.e., community, clinic, health care and hospital; availability of financial and material resources; provision of timely logistical support systems; and development of a culture that recognizes the health worker as an important resource. District Health Priorities are namely: National Health Insurance, HIV & AIDS, and Tuberculosis, Primary Health Care, and Maternal & Child Health, communicable and non-communicable diseases.

6.6.13. Safety And Security

Crime in the municipal area is quite problematic and unacceptable. There are a number of social factors affecting the communities that has resulted in the increase of crime in the municipal area. Lack of adequate police stations and capacity within the existing ones has had a negative impact on the safety and security of the communities. The mostly high reported crime cases in the district are property related at 17.3% followed by social fabric types of crime at 7.4% and lastly violent related crimes at 2.3%. An average 41021 number of people is served by one police station in the district and one police official serving 1000 people (ISDF2006) This ratio does not take into account other constraints like human resource and other related resources.

6.6.14. RECREATIONAL PARKS AND FACILITIES

Most of the R293 towns in the district do have parks identified and set aside for this purpose. However, due to a lack of maintenance and lack of land-use management, these areas have tendered to become slums informal settlements / waste dumps and as a result are not being used for their purpose.

In view of one of the province’s flagships projects which is the “Greening Mpumalanga Flagship Programme”, these parks should be re-claimed as parks through maintenance, land-use management, capacity building for the communities and also to provide services infrastructure elsewhere (such as proper housing, waste sites).

There is a need for the development of sports and recreation facilities now that South Africa has infrastructure that attracts the hosting of world events. Ehlanzeni District Municipal area has a climate and weather similar to other countries that is suitable for foreign athletes, sports men and women, tourists, etc. The district is facing a major challenge on sports facilities, as nearly all the facilities in the rural areas are inadequate or not available. Facilities that are available in the urban areas also need refurbishment to meet the required national and international standards. The district has a responsibility to facilitate the development of more

Facilities in all the local municipalities to be able to meet the demand manifested by this tournament, except for Mbombela Stadium

6.7. Environmental Management

6.7.1. Introduction

Environmental Management involves processes that minimize human impact on its surroundings with the aim of creating and maintaining a balance between the society and the natural environment in which both coexist. Environmental Management aims to potentially reduce the negative impacts on the environment by firstly identifying the potential polluting agents and sources of air, water, and soil (land) pollution within the district and develop sustainable indicators appropriate for monitoring the effectiveness of environmental management systems that are put in place. Ehlanzeni District Municipality Environmental Management (EM) unit has the legal mandate to support all its Local Municipalities with maintaining a healthy and clean environment by conducting the following environmental management functions: Environmental Pollution Control which includes Air Quality Management, Waste Management, Soil Pollution Control, Environmental Impact Assessments, Climate Change and Water Quality Monitoring in terms of the National Environmental Management Act 107 of 1998 (NEMA) and all its Specific Environmental Management Acts (SEMA’s).

NEMA principles dictate that environmental degradation must be controlled and monitored by applying more stringent measures that requires special attention. It is against that background that the district municipality established the EM unit separate from Municipal Health unit to fully perform its duties of protecting and conserving the environment against degradation. The EM unit are having officials who deals with compliance monitoring and enforcement and those officials are designated as Environmental Management Inspectors with the powers to enforce the National Environmental Management: Air Quality Act 39 of 2004 (NEM: AQA) and the National Environmental Management: Waste Management Act 59 of 2008 (NEM: WA).

EMI’s play a significant role in securing the behavioural and economic changes that are necessary for achieving sustainable development through their compliance activities to environmental legislations. It is through this functions that the environment is protected and conserved for present and future generations. Section 24 of the Constitution of the Republic of South Africa empowers the EM unit to continue to venture for the full realization of the right to an environment that is not harmful to the health and well-being of South Africans and all those who live in it.

Since the establishment of the EM unit the district has developed the Integrate Waste Management Plan (IWMP) and Air Quality Management Plan (AQMP). The district with the support of the Local Government Support Official from the Department of Forestry Fisheries and the Environment (DFFE) has established the Integrated Environmental Management Cluster which is held on a quarterly basis where all local municipalities come together to share good practices across the district in terms of waste management, greening programmes, climate change, air quality management, water quality management and biodiversity.

The district is the Licensing Authority for issuing of Atmospheric Emission Licenses in terms of NEM: AQA. There are 26 AELs that have been issued by the district and monitoring is done on a regular basis to ensure compliance to the conditions.

The unit also aims to promote environmental awareness through the implementation of awareness campaigns to communities. The Department will provide leadership in environmental management, utilization, conservation and protection of ecological infrastructure. Local Government Municipal Structures Act. – Section 84: division of functions and powers between district and local municipalities.

The district has embarked on a programme to continuously supporting its local municipalities on proper waste management measure with the aim of promoting a clean and healthy environment for our communities. Since 2020 the district has been implementing a cleaning and rehabilitation project across its local municipalities and a programme that supports the importance of waste pickers (recycling initiatives) in the value chain of waste management to improve the working conditions and livelihoods of the informal waste sector and to better integrate waste pickers into the country's waste economy. The District Municipality managed to host its first World Environment Day Commemoration in June 2023 which was a great success, and the aim is to celebrate on the annual basis.

6.7.2. Environmental Management Legislation

- Constitution of the Republic of South Africa 200 of 1993;
- National Environmental Management Act 107 of 1998;
- National Environmental Management: Protected Areas Act 57 of 2003;
- National Environmental Management: Waste Act 59 of 2008;
- National Environmental Management: Air Quality Act No. 39 of 2004;
- National Environmental Management: Biodiversity Act No. 10 of 2004;
- Environmental Conservation Act 73 of 1989;
- National Water Act 36 of 1998;
- World Heritage Convention Act 49 of 1999;
- Climate Change Bill
- Municipal Structures Act 117 of 1998;
- Health Professions Act 56 of 1974;
- National Health Act 61 of 2003.
- Including regulations, frameworks, strategy and policies.

6.7.3. Mandate and Core Business

Environmental Management unit must perform its functions of compliance monitoring and enforcement, investigate any noncompliance in case there is reasonable suspicion that an offence or breach of condition in terms of a licence or environmental authorization issued. The unit is mandated to perform its legislative functions in line with the National, Provincial and Local legal framework and within its area of Jurisdiction (EDM).

The Department of Forestry Fisheries and the Environment (DFFE) is mandated to give effect to the right of citizens to an environment that is not harmful to their health or wellbeing, and to have the environment protected for the benefit of present and future generations. To this end, the department provides leadership in environmental management, conservation and protection towards sustainability for the benefit of South Africans and the global community. Environmental management consists of the following thematic areas:

a) AIR QUALITY MANAGEMENT

Ehlanzeni District Municipality is the Licensing Authority for the Atmospheric Emission License in terms of the National Environmental Management: Air Quality Act No 39 of 2004. The district appointed one Air Quality Officer for all air quality related matters within the district. The district has developed an Air Quality Management Plan (AQMP) in 2019.

The district is responsible for the following function:

- Issuing of Atmospheric Emissions Licenses (AELs);
- Auditing of annual emissions reports from AEL holders;
- Community and stakeholders’ capacity building and empowerment;
- Alignment of the EDM Air Quality Management Plan with the National and Provincial Air Quality Management Plans, policies and strategies;
- Adoption and implementation of Air Quality Management Plan, programs & projects to improve air quality;
- Inclusion of EDM Air Quality Management Plan in the integrated Development plan;
- Support air quality projects and programs that promote job creation and sustainable livelihoods e.g., greening projects;
- Improvement of inter sectoral collaboration and partnership through the Inter-Governmental Relations forums.

b) WASTE MANAGEMENT

The Ehlanzeni District Municipality is faced with a rapidly growing urbanisation and an increase in population; however, the environment has a limited ability to absorb solid and liquid waste generated daily. The National Department of Forestry, Fisheries and the Environment (DFFE) through the National Waste Management Strategy has committed to sustainable development which aims to balance the broader economic and social challenges of a developing and unequal society while protecting our environmental resources. There is a need to eliminate the unnecessary use of raw materials and to support sustainable product design, resource efficiency, and waste prevention. Reuse of products and recovery value from products through recycling, composting, and energy recovery is the best method in trying to minimise waste.

The systematic approach of waste management hierarchy where re-use, recycling, recovery, and treatment of waste are identified as preferred options for managing waste. The National Waste Management Strategy is a legislative requirement of the National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA) which aims to achieve the objective of NEM: WA. The main goal of the National Waste Management Strategy focuses on implementing the waste management hierarchy with the aim of diverting waste from landfill by promoting waste minimisation.

The district has developed the Integrated Waste Management Plan (IWMP) and the plan is included in the Integrated development Plan of the district, the IWMP is the initial strategic planning step in the overall planning for Waste Management. Currently all local municipalities in the district have finalized updating their Integrated Waste Management Plans.

There are challenges in terms of waste collection backlog in all four local municipalities, there are areas that are currently not receiving waste collection services. There is also a need for the district to provide support to Waste Minimization Activities to improve waste management in the district and divert waste from landfill to adhere to the principles of the waste hierarchy that is reflected in the National Waste Management Strategy and the Waste Act. Environmental Officers are responsible for monitoring of Waste Management Facilities such as landfill site, buyback centres, recycling facilities and transfer stations, wastewater treatment works within the district.

The following waste management activities are conducted by the district:

- Support Local Municipalities in waste related matters
- Monitoring the development and management of regional and local landfill sites;
- Monitor the landfill site management and collection strategies;
- Monitoring the updating and implementation of the Local Municipalities Integrated Waste Management plan (IWMP);
- Implement waste cleaning and rehabilitation projects;
- Support recycling facilities with waste management tools;
- Support waste management initiatives, projects and programs that promote job creation and sustainable livelihoods;
- Support Local Municipalities and other key stakeholders in terms of capacity building and awareness campaigns to improve waste management services such as collection and minimization strategies;
- Improvement of Inter-sectoral collaboration and partnership on working with waste through the Inter-Governmental Relations forums;
- Promote and support mitigation measures aimed at elimination or control of illegal waste disposal.

c) ENVIRONMENTAL IMPACT ASSESSMENT (EIA)

- Commenting on proposed developments;
- Inspection and analysis of studies conducted on proposed developments;
- Community and stakeholder’s capacity building and empowerment;
- Procedure manual Development and Review;
- Inter -sectoral collaboration programs and implementation of the EIA regulations

d) CLIMATE CHANGE

- Climate change adaption and mitigation programs and sectoral alignment;
- Promote activities related to reducing the impacts of climate change in order to build resilient communities.
- Participate in the Just Energy Transition programmes.
- Environmental capacity building empowerment on climate change & greenhouse gases issues;
- Support initiatives, projects and programs that promote job creation and sustainable livelihoods;
- Community participation programmes;
- Inter-sectoral collaboration program and implementation of the national climate change response policies and strategies.

e) BIODIVERSITY MANAGEMENT AND CONSERVATION

- Promote and support implementation of Land Use Management strategies and system.
- Support initiatives to rehabilitate and conserve arable land/ soil.
- Support land/ soil conservation and pollution control initiatives, projects and programs that promote job creation and sustainable livelihoods e.g., land rehabilitation projects,
- Increase awareness and provide capacity building on importance of land/ soil management to community and stakeholders;
- Support programs and projects aimed at reduction of land degradation and soil erosion Water Management
- Initiate and support initiative to rehabilitate, conserve wetlands and water bodies
- Support initiatives and programs aimed at ensuring sustainable water use;
- Promote and support programs and projects for protection of wetlands and water sources;
- Initiate and support programs and projects aimed at reduction of water usage;
- Mitigation of identified or reported cases of water pollutions;
- Promote and support mitigation measures aimed at elimination or control of illegal waste disposal in wetlands and water bodies.
- Auditing of water treatment works and wastewater treatment works

EDM in partnership with International Council for Local Environmental Initiatives (ICLEA) has afforded Ehlanzeni an opportunity to develop the Ehlanzeni Wetlands Report and mapped all the degraded wetlands within the district. through the Local Action for Biodiversity Program. The purpose of this initiative is to increase awareness

on the importance of wetlands as one the most vulnerable ecosystems in South Africa as well as the impact of climate change on wetlands in the district. The district does not have a biodiversity specialist.

f) COMPLIANCE, MONITORING AND ENFORCEMENT

- Monitoring compliance in terms of environmental management in local authorities as per National Environmental Management Act and its Specific Environmental Management Acts;
- Individual and joint routine and strategic inspections with other relevant authorities on environmental authorizations and operational licences issued;
- Auditing of waste management facilities (landfill sites, buy back centres, recycling facilities, waste water treatment works and industries.
- Continuous update of the complaint’s registers;
- Investigate complaints and prompt response to complaints received (environmental nuisance and incidents); including follow up / feedback and closure on complaints received;
- Issuing of notices, directives and fines on all non-compliance’s premises.

6.8. Disaster Management

The main purpose of the Ehlanzeni District Municipality Disaster Management unit is *inter-alia* to implement appropriate disaster risk reduction measures to reduce the vulnerability of communities and infrastructure at the risk. Ehlanzeni District Municipality is primary responsible for disaster management within its area of jurisdiction. In order to fulfil its primary mandate, Ehlanzeni District Municipality needs to adhere to the National Disaster Management framework, Provincial Disaster Management framework and the Disaster Management Act. The Municipal Council has adopted the district disaster management framework with the following key performance areas namely:

- Institutional arrangement and capacity as part of the establishment of the disaster management centre;
- Disaster risk assessment;
- Disaster risk reduction;
- Response and Recovery with respect to the need to establish early warning systems;
- Information management communication;
- Education, training, public awareness and research;
- Funding arrangements for disaster risk management

The above cited KPAs and enablers should function as a single integrated system on a regular basis to produce an integrated solution to incident and disaster management.

EDM has experienced a host of disaster management challenges ranging from flooding, severe weather formations, motor vehicle accidents. Predominantly some of these disasters are natural and other man-made. Nkomazi & Bushbuckridge Local Municipality is poised to be confronted with a host of Disaster Management challenges. Consequently, Disaster Management contingency planning with the requisite SOP (Standard Operating Procedures), have to be expedited. This demands a concerted and integrated effort from various stakeholders and sector to collectively craft and produce a multi-disciplinary process of planning and implementation of disaster management procedures.

6.9. EDM INTERNAL SOCIAL SERVICES

6.9.1. Transversal unit – Objectives

- To accelerate government’s response towards issues of the marginalized groups;
- To mainstream issues of the marginalized groups into all processes, policies and programmes of the municipality;
- To ensure that issues of the marginalized are considered and prioritized in all planning and budgeting processes; and
- To advocate for the rights of the marginalized groups at the district level.

6.9.2. FORUMS AND INTERGOVERNMENTAL RELATIONS STRUCTURES OF THE UNIT

- Ehlanzeni District Municipality’s Women’s Council;
- Regional South African Youth Council;
- Ehlanzeni District Municipality’s Disability Forum; and
- Social needs cluster (IDP)

6.9.3. KEY ISSUES OF MARGINALISED GROUPS

Ehlanzeni District Municipality developed a youth development strategy with an aim of providing a framework that will guide the implementation of youth programmes within the district. The focus of the district youth strategy is mainly aligned with the national youth policy which has the following pillars:

- Education and Training;
- Health
- Economic Participation;
- Sports and Recreation;
- Environmental and Tourism; and
- Science and Technology

6.9.4. WOMEN AND GENDER DEVELOPMENT

The District Municipality launched a Women’s Council Forum on an advisory capacity on women’s programming. The Terms of reference for the women and gender development are as follows:

- To improve the status of women in Ehlanzeni through the provision of sound strategic policy advice; represent women from all the communities within the district and act on an advisory capacity in the municipality, advising and recommending to the Portfolio committee of the Transversal Programmes Unit.
- Ehlanzeni District Municipality’s Women’s Council is a key structure in enhancing service delivery and equalization of opportunities for women in the district; provides advice to the MMC: Transversal Programmes for women’s interests; develops submissions for consideration by the municipality and addresses priority issues in women’s development such as economic empowerment, skills development, gender equality. Some of the issues addressed by the women’s council are unemployment, poverty, economic empowerment and domestic violence and abuse against women in general.

- The District Municipal Council adopted a reviewed gender strategy in 2012. The overall purpose of the strategy is to provide a framework that will serve as a guide for development of gender responsive programmes, projects, policies, and procedures within the District Municipality in transforming the status of women. The key outcome of the policy is to ensure the mainstreaming of gender in the broader planning agenda of the municipality.

6.9.5. CHILDREN

Children’s Rights are enshrined in the Constitution of the Republic of South Africa. Departments are, therefore, obliged to translate the Constitutional Mandate into legislation, policies and programmes at all spheres of Government to ensure that the human rights of children are meted out to South African children.

The areas of focus for children’s right issues will be on early child hood development. Emphasis on education through the back-to-school campaigns, orphaned and vulnerable children, substance abuse and social education on teenage pregnancy, career guidance, health education, child trafficking, child protection and child participation through the national development plan.

In ensuring that children’s rights issues are at the core of the district’s municipality’s programming, Ehlanzeni District Municipality allocated resources for implementing projects such as the champions for children in all four local municipalities, trained ECD practitioners in early childhood development and child abuse prevention. The municipality also partnered with ChildLine to strengthen educators on all child abuse related incidences. As the hub of information, the district municipality is conducting an analysis on all child related services provided by government, civil society and non- profit organization. As the central coordinating body of children’s rights issues at district level, the district has an insurmountable task of ensuring the following:

- Mainstream a child centered approach in governance service delivery processes;
- Build mainstreaming capacity;
- Advocate for and promote children’s rights;
- Monitor and evaluate children’s rights delivery;
- Review department/ municipal (IDP) policy and planning in line with Provincial CR Policy Framework;
- Review all policies, projects and programmes for their CR Implications;
- Coordinate progress reports regarding the implementation of programmes;
- Establish departmental/ municipal stakeholders forum on CR issues
- Establish systems and mechanisms within government for the delivery of services for children;
- Facilitate and coordinate child centered activities within the district; and
- Consult with children and ensure child participation on child related matters and when this is required

6.9.6. DISABILITY

Historically, disability issues have been addressed in a piecemeal, fragmented way. This has been one of the key factors contributing to the marginalization of disabled people and the dire poverty of the circumstances in which the majority are entangled in.

Ehlanzeni District Municipality has taken great strides in ensuring that disability issues are mainstreamed and addressed. A disability Summit was convened in 2012 with an aim of reviewing the District’s Disability Strategy and to launch a disability forum for the district. Through the Disability Forum, Ehlanzeni District Municipality allocated resource for the operationalization of the forum, implementation of Disability programmes as follows:

- Annual general meeting for the disability forum;
- Economic empowerment summit;
- Sports day for disabled persons;
- Job readiness training programme; and
- Career Expo for disabled learners and out of school youth.

Responsibilities of the Disability Forum:

- The facilitation of the integration of disability issues into municipal development strategies, planning and programmes;
- The development of an integrated management system for the coordination of disability planning, implementation and monitoring in the various line functions at all municipalities in the district;
- The development of capacity building strategies that will enhance municipality’s ability at all levels to implement recommendations contained in the district’s integrated disability strategy; and
- A programme of public education and awareness raising aimed at changing fundamental prejudices in Ehlanzeni’s societies and communities

Ehlanzeni District Municipality has done fairly well on the allocation of resources for disability programmes but still encounters a challenge in the compliance of Employment Equity Act with regard to the employment of disabled persons through cooperatives and through the procurement system. The district still does not have secondary schools for the blind and deaf, which will assist in meeting the minimum 2% of disabled persons being able to access full employment. They currently find themselves giving up prior secondary, due to many reasons such as a lack of secondary school facilities close by. Disabled persons are seriously affected by the scourge of HIV and AIDS due to a lack of information. The HIV and TB programmes have not yet mainstreamed disability into its programmes. This is a challenge that needs to be taken into consideration.

CHAPTER 7

7.1. Final 2024/25 Estimated Budget (Operational and CAPEX)

Description	Budget Forecast	Budget Estimate	Budget Estimate
	2024/25	2025/26	2026/27
Operating Revenue:			
Rental of facilities and equipment	R 1 612 875	R 806 1 854	R 2 133 027

CHAPTER 8

8.1. District Development Model (One Plan) Catalytic Projects

Project Name	Beneficiary Villages (Wards)	Cost Estimates	GPS Coordinates
Nkomazi Local Municipality			
Streetlights	Nkomazi	No estimate	-25.709672, 31.719547
Rehabilitation of Roads	Nkomazi South Bus routes/footbridges	No estimate	-25.664647, 31.856153
Repair of flood damaged road infrastructure	Komatipoort	10 000 000	25.433333, 31.950000
	Marloth Park	10 000 000	-25.355111, 31.764418
	Hectorspruit	10 000 000	-25.439800, 31.681064
	Malelane	10 000 000	-25.483333, 31.516667
Komatipoort Hawkers Stalls CBD Renewal	Komatipoort	2 000 000	-25.435025, 31.955019
Special Economic Zone (SEZ)	Nkomazi	23 Billion	31,944749 -25,447755
Bushbuckridge Local Municipality			
Bulk Sites Demarcation	Kulani	4 000 000	-24.591988, 31.072678
	Kildare	4 000 000	-24.591988, 31.072678
	Dumphries	4 000 000	-24.764969, 31.312339
	Meetsi	4 000 000	-25.1575631, 30.7662007
	Seville	4 000 000	-24.669889, 31.418737
	Masana	4 000 000	-24.798020, 31.090002
Revitalization of Industrial Park	Mkhuhlu	1 500 000	-24.985409, 31.240460
Development of Comprehensive Infrastructure plan (Water, Sanitation, Road & Storm Water Plans)	All Wards	10 000 000	-24.807983, 31.130014
Refurbishment of Thulamahashe new Stadium	Thulamahashe	20 000 000	-24.724158, 31.209703
Implementation of Inyaka Dam Master Plan (Establishment of picnic spots, ablution, and braai facilities)	Maviljaan	900 000	-24.845447, 31.070299
Construction of Acornhoek Precinct Centre	Acornhoek	20 000 000	-24.597387, 31.049217
Rezoning of sites for business and high density	Thulamahashe-C	500 000	-24.727490, 31.213905

Consolidation and Re-zoning of residential sites	Dwarsloop	500 000	-24.802471, 31.081565
Refurbishment of Thulamashe Stadium	Thulamahashe	15 000 000	-24.723186, 31.207624
Refurbishment of Dwarsloop WWTW	Dwarsloop	40 000 000	-24.792104, 31.078055
Servicing of new sites for residential	Thulamahashe	60 000 000	-24.720996, 31.214451
	Dwarsloop	60 000 000	-24.795143, 31.084921
Tarring of road from Rolle via Ludlow to Islington Cross road	Rolle	80 000 000	-24.733748, 31.239056
	Ludlow	80 000 000	-24.679984, 31.275917
	Islington	80 000 000	-24.626009, 31.259046
Tarring of road from Casteel to Zoeknag	Casteel	50 000 000	-24.726611, 31.012496
	Zoeknag	50 000 000	-24.760718, 30.978314
Mkhuhlu Agrihub	Mkhuhlu	1 Billion	31,098484 -25,385155
Tarring of road from Xanthia to Agincourt	Xanthia	70 000 000	-24.832905, 31.140212
	Agincourt	70 000 000	-24.824646, 31.218421
City of Mbombela			
Mpumalanga International Fresh Produce Market	City of Mbombela along R37	R2 Billion	31,098484 -25,385155
Inkosi Development City	Daantjie	R7.8 Billion	31,247315 -25,485876
Mountain View River Dam	City of Mbombela	R1 Billion	31.277309 -25.611320
Barberton Dam and Solar Power	Barberton	Private funding (undisclosed)	
Lebombo Hawkers Stalls	Koormatipoort Boader	R800 000	31.9842080 -25.441908
Makhonjwa World Heritage Site	Barberton	No estimate	31,040691 -25,785772
Steam Train and Railway revitalisation	Barberton	R1 Billion	31,048926 -25,785256

8.2. EDM's and Sectors Departments Draft Projects and Programmes

8.3.2. Municipal Infrastructure Support Agency (MISA)

Local municipality	Project/Programme Name/Description	Project Name	2024/25 Target Area of support
Thaba Chweu , Nkomazi, Bushbuckridge	Strengthening capacity in Local Municipalities and districts	Deployment of MISA Engineers, Planners, Young Graduates. Continuous development of municipal officials such as Artisans, Process Controllers, Apprentices as well as Recognition of Prior Learning.	The objective of this intervention is to address the challenges of scarce and critical skills shortage in municipalities . This is achieved by facilitating technical skills pool required to strengthen municipal technical capacity within municipalities for planning , implementation , operation and maintenance of municipal infrastructure. MISA mobilises expert capacity across government and the private sector for deployment to municipalities for interventions.
Thaba Chweu	Provision of infrastructure procurement support	Training of Municipal officials	Supply Chain Management
Thaba Chweu , Nkomazi	Budget Facility for Infrastructure (BFI)	Development of Business plans for funding/applications for BFI or other potential funders.	MISA support municipalities to deliver services also including procurement of infrastructure in compliance with legislation .
Thaba Chweu , Nkomazi	Improved functionality of dysfunctional Wastewater Treatment Works (WWTWs and WTW)	Conditional assessments of wastewater treatment and water treatment works Technical and Project management support in the Implementation of water treatment works projects and activities	Blue, and green drop assessment focuses on the whole value chain for both the wastewater and water treatment works. The Blue Drop Risk Rating (BDRR) focuses on the function of each water supply system The Green drop risk analysis (CRR) focuses on the wastewater treatment function. MISA in collaboration with SALGA and DWS are working on improvement plans for the municipalities falling off the rating scores.
Thaba Chweu , Nkomazi	Kilometres of roads maintained to include potholes patching	Technical and Project management support in the Implementation of road & stormwater activities.	Technical and Project management support in the Implementation of road & stormwater projects and road maintenance programmes utilizing the Labour Intensive Construction methods in collaboration with the municipalities and other stakeholders.

Local municipality	Project/Programme Name/Description	Project Name	2024/25 Target Area of support
	and drainage cleaning in the 22 dysfunctional municipalities.		
Thaba Chweu	Support with implementation of SPLUMA compliant municipal spatial plans, Spatial Development Framework (SDF's) and Land Use	Number of SPLUMA Compliant municipal spatial plans (SDF's) implemented in local municipalities. Review of Thaba Chweu Spatial Development Framework Plan	Contract & Project Management, Quality control Management, Project Management, Project advisory and, Monitoring & Evaluation.
Thaba Chweu	Dysfunctional municipalities increasing job creation through mainstreaming LIC on Municipal infrastructure projects	Support the municipalities with LIC implementation on on-going projects and monitor progress	MISA provides identified and dysfunctional municipalities with programme management support that seeks to institutionalise Labour Intensive Construction methods through conditional grant infrastructure projects. MISA seeks to promote training or inclusion of municipal officials in the implementation of LIC .MIS supports municipalities to implement their projects in accordance with LIC guideline henceforth achieving annual sector targets .
Thaba Chweu , Nkomazi	Support to Improve spending on Conditional Grants (MIG, INEP, WSIG, RBIG, IUDG, etc...)	Contract & Project Management, Quality site control Management, conducting project site visits, Development of TORs and TRs	Contract & Project Management, Quality site control Management, conducting project site visits, Development of TORs and TRs

Local municipality	Project/Programme Name/Description	Project Name	2024/25 Target Area of support
Thaba Chweu , Nkomazi	Implementation of INEP and EEDSM Programmes	Project Management, Technical Support and development of Business Plans	Contract & Project Management, Quality site control Management, conducting project site visits, Development of TORs and TRs

CHAPTER 9

SECTOR PLANS BRIEF OVERVIEW

The municipal systems Act, 32 of 2000, section 26(e) requires that a municipality should develop a spatial development framework which gives a long-term spatial view of its jurisdiction. It provides the basic guidelines which provide application of principles that will render the following benefits:

- Sustainability,
- Accurate planning,
- Integrated social and environmental activities,
- Ensures that spatial priorities are strategically implemented, amongst other things, Ehlanzeni SDF aims to achieve the following:
- Influence local spatial strategies to work towards attainment of regional, district and provincial
- Development goals and vice versa.
- To utilize best practices in development planning that will support regional and district development by pulling resources of all five LMs and DMA to develop a standard set guideline for use in town and regional and regional planning and land use management.
- To influence the development of a regional character that boost development ensuring equitable Investment through coordinated marketing.

Broader SDF has been attached to the IDP as an annexure for more detailed information.

9.1. Workplace Skills Plan

South Africa is faced with a challenge of ensuring that all its citizens have access to skills that will enable them to adapt and be successful in the global market and that all individuals and communities are offered opportunities for self-advancement to enable them to play a productive role in society. To establish an infrastructure that will facilitate the realization of these challenges the South African government, after extensive consultation with organized labor, business and other stakeholders, promulgated a clutch of education and training legislation that serves as a framework within which skills development need to take place. There is a need, therefore, from all responsible organs of civil society to ensure that this strategy is translated into action. The municipalities as responsible corporate citizen needs to ensure that they play an effective role in contributing to the national agenda of skills development.

Ehlanzeni district municipality just like any organization has developed a work place skills plan to keep up with the general practice of growing and learning organizations. The WSP is reviewed annually and adapted to changing circumstances by the HR unit. It enables various units to indicate gaps within their knowledge which if acquired can improve the municipal efficiency and performance systems and processes.

EDMs WSP seeks to achieve the following:

Lifelong learning—in a fast changing work environment individuals have to:

- Upgrade their lives and improve their skills continuously;
- Promotion of equity – skills development must be used as a vehicle to promote equity, as well as to encourage effective collaboration amongst people from diverse backgrounds;
- Demand-led skills development must be pursued in an environment to realistic assessment to how the skills is to be employed;
- Flexibility—Individuals (management and employees) must be afforded opportunities to participate in identifying skills development priorities and determining the most effective ways to address these priorities; Partnerships and co-operation— municipalities must establish learning development partnerships with institutions of learning that add value to the skills development process; and
- Efficiency and Effectiveness—the delivery of skills development initiatives must be

9.2. Disaster Management Plan

Section 26 (g) of the Municipal Systems Act, 32 of 2000 compels municipalities to develop this plan in order to ensure municipal safety. Most of the places in Ehlanzeni are prone to different adverse disasters ranging from veld fires, strong winds (tornado) and floods. These challenges require a municipality to take cautious steps in advance to prepare and have adequate mechanisms to deal with such disaster as and when they occur.

EDM has a comprehensive disaster management plan (adopted in 2008) but have since noticed that some of LMs do not have. An amount of R1 Million has been set aside to assist locals that are not having the plans and reviewing out dated plans.

Though Ehlanzeni has developed the plan, it has in its implementation plan, constructed in conjunction with LMs Disaster satellite centers which will later be connected to the District Main Centre in Nelspruit as municipalities gear themselves in advance methods of mitigating risks and effects. District Main Office Centre is complete and has all top high technology including the incident command vehicle which can be use on sites where incidents are occurring and transmit information and pictures to the control room.

The more detailed Disaster management plan has been attached to the IDP as an annexure for more perusal of more information. It must be mentioned however, that there plans to ensure integration of Disaster IT system to the Municipal GIS systems for information sharing and other purposes. There are about 200 volunteers who are appointed by EDM who receives stipends after their executing their duties from time to time. This programme will be connected to the EPWPs by which EDM aims to create jobs as enshrined in the SOPA and SONA and given the priorities of both National and Provincial government to fight poverty and abject poverty.

9.3. Local Economic Development Strategy

In the same like the other strategies, Section 26(c) of the Municipal Systems Act, 32 of 2000 read in line with

White Paper on Local Government (1998) provides for the need of council to include council’s development priorities and objectives for its elected term, including the local economic development aims. EDM has a developed LED strategy that has been interpreted in the context of the Spatial Development Framework in terms of spatial and strategic priorities.

The strategy identifies a number of packed investment projects which are viable and critical to curb the scourge of poverty. To mention just a few: Tourism Industrial Parks, Economic Hubs, Fresh Produce market and abattoirs and agro villages. All these projects have received a nod from the DBSA to fund

the entire project from feasibility to implementation. This will surely create more jobs and more opportunities for communities to get both services and employment to sustain their lives. The strategy identifies a need to ensure integrated LED planning so that municipal plans are properly complemented by district initiatives and vice versa.

The objectives of the study are fivefold:

- To revitalize the mainstay economic sectors in Ehlanzeni District, which have been undermined by the COVID-19 pandemic, within the relevant legislative framework.
- To coordinate multi-sectoral and multi-stakeholder efforts for purposes of economic growth within the District.
- To enhance SMME competitiveness through proposing sustainable business support.
- To promote entrepreneurial momentum among the District population.
- To accelerate economic inclusion of those excluded or adversely included.

Other projects that speak to SDF are the Rural CBD and Urban renewal strategies which feasibility studies are completed but require funding in terms of implementation. Request for proposal will be advertised to appoint suitable service providers to ensure the implementation. As part of the IDP priority is the establishment of a number of Public private partnerships (PPP) which ensure that the dream of EDM is realized and in a sustainable manner. The main object of the EDM strategy is to create an enabling environment for investors and local businesses, create jobs and ensure municipal economic viability and competitive advantage. The strategy takes into account the National LED Framework and the advancing Economic growth path and the flagships as well as the 5 priorities of the province which translates into Creation of more jobs and how to enhance rural development whilst not compromising the best practices of preserving the environment. The strategy is bound to be reviewed due to the focus into Comprehensive Rural Development Programme pronounced by the state president when he took over reigns. In Ehlanzeni, it is well known that both Bushbuckridge and Nkomazi Local Municipalities have been earmarked for this programme. Community profiling and development of coops and SMMEs have been started in Nkomazi. To aid to fast track such development the Department of Rural Development and Land Reform (National) and Dept. of Agriculture, Rural Development and Land Administration (Provincial DARDLA) have locked horns with EDM to develop the District Wide Land Audit which will give effects to all development initiatives in the region. Most of the places to be developed in Rural Area are shown in the SDF Map Below:

9.4. Tourism Development Strategy

In terms of section 84 Of the Municipal Structures Act, 117 of 1997, tourism is a key function of the district municipality. The municipality has prioritized this function due to number of spatial advantages which include the following:

- Located in the subtropical region bound by two neighboring countries Swaziland and Mozambique;
- Have two major development corridors traversing each other in Mbombela (R40 and Maputo Development Corridor N4);
- Kruger National Park one of the biggest parks in the world which have a bigger coverage of space;
- Railway corridors that connect the entire province and up to so far has been underutilized;
- The two airports also provide more flexibility to tourists visiting our shores. It must be noted that EDM plans to research more information on expanding KMIA as the earlier Act mandates them to do so in terms of regulating airports.

It must be said that EDM plans to create a couple employment opportunities within this industry by prioritizing key projects in the next financial year: Tourism development between Mbombela and Bushbuckridge [R1Million to improve signage and eventually consider market stalls and car wash-bays which will be for the youth and people living with disabilities and women and vulnerable communities]. This effort seeks to mainstream the Transversal and HIV/aids programme by ensuring that jobs created are for all South African irrespective of the race, gender, physique and other attributes.

9.5. Water Services Development Plan (WSDP)

Whilst there is no specific mention of this Act in the Municipal Systems Act, 32 of 2000, the Municipal Structures Act, 117 of 1997, section 84 does mention that district municipalities must also ensure connection of bulk services which include water and electricity. Although in the Province these functions were reassigned to local municipalities, symptoms show that they are not doing well. Ehlanzeni and its local municipalities have reviewed their WSDPs last 2010 as required by the Water Act, that at least once annually, this plan must be reviewed to cater for the changing circumstances of the municipality and the community. Further Water Services Act (No. 108 of 1997) gives effect to our LMs to be Water Services Authorities and as such they need to adhere to the specified guidelines and requirements. The role of the district then become one of promoting intergovernmental relations and planning, but also to support and coordinate what LMs are planning to execute. District and COGTA have the responsibility also to guide and monitor the implementation and the rollout of these plans and ensure that they comply with necessary legislation.

The EDM WSDP points out sustainability models, backlogs and challenges facing the provision of this service in the district. EDM is neither the WSA nor the WSP and are therefore not licensed or authorized to render this service except for the District Management Area which is the area that we service. Earlier in the IDP, it was mentioned that DMAs shall be taken from district and be shared amongst the surrounding municipalities as decided upon by the demarcation board in preparation of the 2011 new local government elections. This change has come with the number of changes in terms of boundaries and wards demarcations. It must be mentioned however that District has proposed to LMs an SLA to become a WSP for them as some of them lack capacity. As major projects of the district, more details of the WSDP are contained in the Plan attached to the IDP.

9.6. Roads And Transport Plan

The municipal systems Act, 32 of 2000 although not specific in terms of this plan but it does provide for the need of proper planning of roads in municipalities. The Section 84 of Municipal Structures Act, 117 of 1997 provides for the need of the district to ensure that regional routes are maintained and properly serviced. This falls out the district competency as Department of Transport is currently undertaking the responsibility of most of the Roads. It must be mentioned that for local and municipal roads the municipality is in charge to provide for that. It is out that district may assist with implementation of some of the access roads if the local municipality lacks capacity and finance to execute the functions. EDM has developed a very comprehensive Integrated Transport Plan in 2008 envisage reviewing the strategy in 2011.

The priority from the district has been to ensure that local municipalities have the following in place:

- Proper Roads and Transport units;
- Integrated Transport plans
- Prioritize the need for transport and roads projects in IDPs

9.7. Integrated Waste Management Plan

The main object of this plan is to integrate and optimize waste management and practices in the region. In 2010 EDM after a trip to Italy learnt some best practices and were quick to indicate a need to engage in waste management. In the wake that there was no strategy, EDM prioritized and directed some funds to this strategy.

The EDM IWMP indicates the following information:

- Baseline information;
- Objectives of how to deal with waste;
- Strategic planning;
- Proposed alternative methods to deal with waste;
- Implementation plan;
- Cost estimates for the implementation of the strategy;
- Quantification of generated waste

9.8. HIV AND AIDS Strategy

EDM has reviewed its HIV/AIDS Strategy in 2010 and assisted other Municipalities to review theirs. The strategy entails critical measures that must be undertaken in fight against HIV/AIDS Scourge. The strategy outlines vulnerable groups and proposes possible solutions to the problems. EDM has taken the fight in the streets by organizing and mobilizing people through childcare jamboree and other major campaigns.

EDM has partnered with Humana and other key stakeholders to spread the message and to try and put systems in place which promote prevention, testing and aftercare, access to ARVs.

More information has already been provided in the IIDP document and in the attached annexure: HIV/AIDS strategy.

9.9. Transversal Programmes

EDM is taking transversal programmes very serious and all programmes should be mainstreamed to ensure maximum benefits which are lacking at the moment. EDM transversal policies include the following:

- Youth development strategy, Disability strategy: and
- Mainstreaming gender development
- Recruitment and Retention Strategy

More information is contained in the Annexure attached.

The municipality has developed a recruitment and retention strategy to ensure that proper skills are sought from all angles of the country in pursuit of better practice and successful organizations. It must be mentioned that the retention strategy is in draft format as it has not been approved by council due to some reasons. It has been prioritized as one strategy that will be looked at and dealt with accordingly.

9.10. HR Strategy

This is one of the critical plans in the municipality which forms the backbone of each and every successful municipality. The plan entails the following components which must be reviewed from time to time as circumstances deem necessary.

The strategy includes the following components:

- Vision and Mission statement of the HR Strategy;
- Human resource planning;
- Recruitment and selection;
- HRD;
- Performance management; and
- Employee management.

9.11. Comprehensive Infrastructure Plan

This is perhaps one of the arguably best plan that indicates backlogs and budgets required to address the service delivery challenges, it encompasses the following:

- Sanitation;
- Roads;
- Water; and
- Housing;

9.12. Social and Migration Cohesion

EDM has recently developed a social cohesion plan by which it aims to ensure that the disparities of apartheid are pushed away. The plan also intends to ensure that spatial distortions which exist between different land uses are re-arranged to promote diversity and unified communities with common and shared vision. EDM has also prioritized the control of migration of people to and from the two neighboring countries as one posing a serious challenge. The strategy points out ways and means of controlling such challenge. This strategy has been developed and adopted by Council in 2010 and gives effect to the programmes and projects related to community involvement.

Chapter 4 of the Municipal Systems Act, 32 of 2000 gives effect to this strategy and has been prioritized because of the major protests in our local municipalities i.e. Mbombela, Nkomazi and Thaba-Chweu.

9.13. Comprehensive Infrastructure Plan

Ehlanzeni District Municipality held a delivery and implementation forum with Human Settlement and COGTA in 2010 wherein issues pertaining local government: delivery agreement 9: Ensuring effective, accountable and responsive local government. The forum promoted more interaction between the Human Settlement and other sector departments. One area of emphasis was the area of how and when we engage the community participation which should ideally inform the Human settlement of the people and localities that require housing infrastructure. Another key problem identified was that the department thumb-suck the figures even though they may appoint service providers to conduct social studies but if the information does not come from the communities, then service will not adequately address the challenges. The department was also tasked with a function to do the following:

- To ascertain how many people are still without housing;
- How many houses are incomplete;
- Visit district municipalities wherein department of housing should clarify their status and plans going forward; and
- That the department should consider joining municipalities during the public participation as housing is one of the key basic services enshrined in the constitution of (1996)

The municipality indicated that COGTA and Human settlement should explore possible municipalities that can be licensed to provide the housing services. According to COGTA, this function will be reserved to Human Settlement until municipalities build capacity to execute the services on their own. Another proposal from Ehlanzeni District was that Housing perhaps should be a function that assigned to District Municipality given that municipalities are struggling to deliver services (bulk and reticulation) at the moment.

This proposal is in line with the Section 84 of the municipal structures Act 117 of 1997 which state the powers and functions of the district as the following:

- Provision of Bulk water services;
- Provision of Bulk electricity services;
- Regulate abattoirs and fresh produce markets;
- Provide municipal health services;

During the public participation meetings our local communities raised the following challenges:

- Inadequate housing infrastructure in some villages and wards;
- Backlogs of houses in some villages and wards; and
- Incomplete houses in some villages.

The Municipal projects focusing on Water and Sanitation, Roads and Storm Water Drainage, Electricity, Refuse removal and Human settlement, Economic Development have been included as areas where district municipality must render support.

The sector projects for the main service delivery departments have been included which are the Department of Health, Education, Public Works Roads and Transport, Sports, Arts Culture and Heritage, Agriculture and Water Affairs as described below.

9.14. Tenure Upgrade Strategy

This strategy was adopted in 2010/11 financial year after a need to review the tenure reform was identified. The importance of strategy is primarily due to the nature of the district municipality which is about 70% rural and thus most of the areas are rural and not surveyed. The lack of tenure security poses a serious challenge in terms of development and ownership of properties. Though significant strides have been made to ensure that portions of the areas are surveyed and title deeds given to the rightful owners and occupants, there is still a huge backlog in terms of outstanding households with no titles which in the main will require tangible budgets. The strategy outlines the priority areas such as 6 settlements in Nkomazi LM area which are as follows: Boschfontein; KaMhlushwa; Langeloo; KamaQhekeza and Schoemansdal villages.

9.15. Communication And Corporate Identity Management Strategy

This strategy seeks to ensure that EDM is able to communicate its service delivery agenda, programmes and projects planned and or implemented within municipal space. The strategy has led to the formulation of the following:

- District communication Forum;
- Media working group; and
- Media breakfast show with the Executive Mayor

The strategy seeks to address also several communication gaps and systems which will cause the district to disseminate with easy information and knowledge, policies and strategies to communities. It further highlights the two broader forms of communication and how the institution should deal with such matters: Internal communication which includes internal magazines and movement of information from one office to another without compromising the confidentiality and classified content whilst on the other side embracing the need to encapsulate and strengthen external communication with local, national and international stakeholders.

The strategy further elaborates on the approved corporate identity of the institution and the responsible member of the municipality. This strategy within corporate identity covers the outlook of the buildings, utilization of logos, letterheads and, folders and business cards, use of coat of arms and branding material.

The strategy does outline the forms of communication media that can be used for the internal and external communication. It does take note of the role of the traditional leaders and how they should be incorporated into the broader picture.

9.16. Anti-Corruption Strategy and Policy

This strategy is customized to address the challenge of corrupt activities, fraudulent and malpractices on municipal employees when executing their duties. The strategy focuses on how to safe guard the interest of the organization by stating the rules and procedures to be followed when such an activity has been done.

The strategy emphasizes on members who serve in bid committees to sign declaration statements and commitments to disclose any business interests on the work executed on behalf of the municipality. This policy just like any other policies is reviewed as and when deemed necessary by Council.

9.17. Project Packaging and EDM's Led Implementation

This strategy is an extension to the LED and Tourism strategies of EDM in that identified massive projects derived from the two strategies are packaged into investments opportunities which may be used to attract investors for necessary implementation support. The ten packaged projects areas as follows:

- Fresh fruit market;
- Light industrial park;
- Packaging and storage hub;
- Organic fertilizer;
- Tonga precast;
- Timber cluster;
- Kruger Malalane junction;
- Inyaka Dam;
- Entertainment and Tourism hub; and
- KMIA

The strategy outlines also the methodology to be followed when the projects are packaged including the suitable identified locations where these are earmarked for implementation. The methodology outlines the background within which the project is initiated, the project description, outcomes, envisaged multiplier effect, SMMEs and Coops potential, existing and required infrastructure, incentives, labor requirements to be on site, potential funders and sponsors and investors and private sector investment opportunities.

9.18. IGR Strategy Framework Policy

EDM like any institution of government is governed by the Intergovernmental relations Act and principles as enshrined in the Constitution of the Republic of South Africa. Municipal institution comprises of structures such as ward committees, IDP representative forums, council of stakeholders, speakers’ forums, Mayor’s forum, Municipal Managers Forum, CFO’s Forum and other cluster groupings (Social Needs, Good Governance and Economic Growth and Development and the cluster for the Traditional Leaders).

This policy document provides guidelines in terms of the protocol that need to be followed when such partnerships are forged especially through local, provincial, national and international visit undertakings and signing of MOUs and service level agreement and or partnerships and other form of agreements. The Framework guides also the agenda that must be envisaged for partnerships, puts emphasis on object of developmental local government (State), the strategic agenda, pillars and necessity for alignment and planning, key issues for consideration during engagements and the functionality of the existing structures.

9.19. Service Delivery and Budget Implementation Plan (SDBIP)

Chapter 6 of the Local Government Municipal Systems Act, 32 of 2000 in conjunction with the Municipal Finance Management Act 56 of 2003 require that each municipality must for each financial year after adopting and approval of IDP and Budget document develop a service delivery and budget implementation plan which segment how the planned projects and programmes will be implemented monthly and quarterly enabling the audit committee and other municipal structures to audit review and modify the implementation plan. The plan is a middle man between the strategy (IDP) and the financial resources and human resources in terms of the approved organogram of the institution.

The plan outlines further than service delivery plan, the principles and the guidelines adopted by Ehlanzeni in planning, executing and implementing the plan.

9.20. Districtwide Spatial Development Framework Plan (Status Quo)

This document has been referenced so significantly in the spatial planning section of this IDP. It has however been attached as an annexure to the document. It must be reported that though the SDF is for 2010 Financial year and fairly recent, the new demarcation of the former District Management Area (DMA) requires that all affected municipalities must do minor adjustments to that effect. The Department of Agriculture, Rural Development and Land Reform (DARDLEA) has made provision for review of the SDFs of the following municipalities:

- Ehlanzeni DM

- Thaba Chweu LM, pending the completion of the Dolomite investigation studies

The three mostly affected adjacent local municipalities are Nkomazi LM, City of Mbombela and Bushbuckridge will need to prioritize finer adjustment to cater for these changes.

9.21. Districtwide Performance Management System Policy Framework

This document is intended to outline key requirements on the development, adoption and implementation of the PMS framework. The document is also aimed to streamline support of the district to LMs in terms of performance management.

Amongst other objectives, this document will embrace the following:

- Systems that will support effective service delivery;
- Forge accountability and ensure good governance;
- Monitor the developmental outcomes envisaged through MDGs and IDPs and other provincial and National development plans;
- Ensure and standardization of processes, monitoring and evaluation of services; and
- Ensure performance reporting and alignment to the provincial and National sector departments.

9.22. Air Quality Management Plan

This plan is aimed at ensuring that the district is able to monitor the emission of the companies and industries by way of regulating such activities. This emission of course has serious health implications to the environmental health and the health of the community members. This function has been a provincial competency until the new health Act which transferred the function to the District Municipality. However due to staff capacity challenges most of the district are not capable to perform this function not until the Environmental Health Practitioners have been trained and support staff are appointed. In Mpumalanga Province though the two Districts(Nkangala and Gert Sibande) are ahead, there are still a lot of gaps in the implementation process. EDM has extended the contract between the District and the Province as they are currently not in position to render such services. The district has however embarked on conducting section 78 assessments reports which should reveal the following areas:

- Current status of the Air quality management in the district;
- Focus areas;
- Resource requirements;
- Gap analysis; and

- What has to be done to efficiently deliver services

As a starting point, a strategy is being developed to support the Section 78 report but more above that the strategy will reveal the costing exercise, companies that emits, areas prone to disaster and undesirable consequences. The strategy shall also reveal role players and control and monitoring mechanisms to the challenges. It will also seek to integrate the role of the municipality in terms of enforcement of such policies and bylaws within their jurisdiction. A budget of R800 000 has been set aside to appoint service provider to compile this document.

9.23. Agriculture In-Depth Studies

The main objective of this strategy was to indicate the various agricultural potential and opportunities of the district wide area. At the time Bushbuckridge Local Municipality was not part of Ehlanzeni District Municipality but the former Bohlabela District Municipality which was later disestablished due to political reasons. The strategy aimed to encompass the status quo information of agriculture is compiled clearly showing the collaborative efforts which may be undertaken by the various key role players in exploiting the agricultural advantages of the area. Whilst the District displayed a strong agricultural advantage it must be pointed out that there are variations and comparative advantages of each municipality within the District.

The strategy reveals the various sectors that are strong in production but also contributing factors to the gross domestic product of the district such as the following produces:

- Sub-Tropical fresh fruit farming: avocados, bananas, mangoes, litchis, macadamia nuts, sugarcane cultivations.

The district produces about 16% of citrus crop and exports to over 70% at the time of the study compilation (2003)

The strategy or study identified the need to establish new biotechnology industries as a key critical factor to be explored in trying to expand and support agriculture in the district. This industry would focus on processing and refinements of finished goods in the following sectors:

- Focus on producing finished products and food;
- Processing of chemical products such as manufacturing of manure and fertilizers and extraction of gases such as methane through the grinding of sugarcane;
- Production of medicinal products and by products;
- Production of drugs and health related products which could be retailed national and internationally to various customers; and
- Collaboration with traditional and herbal specialists in supply and production of medicinal plants

accredited as the source of medicine and natural remedies of humankind.

The study also provides guidance in terms of coordination and collaborative engagement which must be undertaken by the various stakeholders in pursuing the objectives of the proposed strategy. The obvious of the study is due to the date that it was developed there is a need to review the strategy in order to cater for various changes which have taken place within the sector and industry for the past 10 years.

9.24. Draft Youth Skills and Development Strategy

The Strategy intends to expand on the projects and programmes which can be undertaken to speed up the development of youth in the district. It is well known fact that youth as one of the previously marginalized groups are now taking center stage. Ehlanzeni District Municipality is by far a youth dominant district which implies that more programmes and projects must focus on grooming and nurturing the youth. It is required that more investment be directed towards skills development, education and vocational works. The study identifies the need and focus areas which this strategy must embrace but also points out the keyrole players that must support the programmes for an example, the role of tertiary institutions, community- based organization in terms of skills development and other critical avenues. Compounding the challenge, the youth in our district is prone to number of challenges such as drugs abuse, teenage pregnancy, alcoholism and undesirable activities which they befall onto due to peer pressure and societal influences.

CHAPTER 10

10.1. STRATEGIC AND LONG TERM-DEVELOPMENT PLANNING

The district as a municipality tried to grasp this developmental nettle through annual processes of Integrated Development Planning, with the most recent IDP Review distilling five central challenges for the municipality:

- Recognized that EDM lacked a clearly-defined and long-term development strategy – a road-map to a better future;
- There is a low economic growth, high unemployment and high levels of poverty and inequality.
- The revenue-base is under pressure and efforts to address the basic needs of the poor are at risk of proving unsustainable.
- Many households still lack adequate transport, social services, access to economic opportunities and an environment that nurtures their communal humanity.
- There is possibility of risking the use of natural resources in an unsustainable manner that will
- Compromise the interests of future generations. in relation to each of these challenges, the district has proposed the following objectives:

- There is a need to put in place a clearly-defined and long-term development strategy that can galvanize all stakeholders to take forward EDM's vision in tangible ways.
- The need to create an enabling environment for an economy that is growing, diversifying, generating increasing numbers of quality jobs and reducing inequalities in the society.
- The need to find innovative ways to grow revenue-streams and improve the efficiency of financial management.
- District-region that is characterized by sustainable human settlements in which people can live secure, fulfilled and dignified lives.
- To ensure that developmental practices are managed in a way that meets the needs of people now, without compromising the rights of children to meet their own needs.

To address the challenges facing the people of Ehlanzeni District, there are key pillars that must constitute the Long-Term Development Strategy:

- Stimulate faster economic growth and drastically reduce unemployment
- Fight poverty and build secure and sustainable communities
- Develop healthy, appropriately skilled and productive people
- Deepen democracy and nation building and realize the constitutional rights of all the people
- Build an effective and caring government.

In the context of strategic planning, EDM is embarking on projecting a Long-Term Growth and Development Strategy (LTGDS) as a practical, action-oriented framework for integrated and sustainable growth and development in our district. The implementation of this framework will enable the continued restructuring of local economy and guide the actions and programmes of government and social partners in achieving growth and development objectives.

The strategic objectives of the LTGDS in achieving EDM's vision are:

- The provision of social and economic infrastructure and services that will build sustainable communities and contribute to halving poverty
- Accelerated, labor absorbing economic growth that increases perineum and that will create long-term sustainable jobs and contribute to halving unemployment
- Sustainable socio-economic development
- Enhanced government efficiency and co-operative governance
- Deepening participatory democracy, provincial and national unity and citizenship
- Contributing to the social and economic development of the continent and the successful achievement of New Partnership for Africa's Development's (NEPAD) goals and objectives.

The experience over many years has shown that local government cannot simply leave this to the market. Government has to play an assertive and leadership role in working with the private sector and other stakeholders to ensure socio-economic development and transformation and to stimulate economic growth.

However, it is important to note that the main objective is not simply to increase the rate of economic growth but also to ensure that the benefits of this economic growth translate into broad-based income redistribution and a reduction in poverty and inequality

There is need to address the marginalization and exclusion from the economy of, in particular, black people, women, people with disabilities, and the poorest of the poor. The LTGDS therefore talks about growing and developing the economy for all. It aims to ensure a shared and transformed economy through creating linkages between the first and the second economy, supporting the sustainability of the second economy and assisting previously disadvantaged groups to gain access to the opportunities of a growing economy.

In creating an enabling environment for effective growth, the challenge is also to improve the quality of the health and education system to build healthy, skilled and productive people and make Ehlanzeni a safe and secure place to live.

The Strategy therefore aims to not only fight income poverty but to also invest in the health sector, improve access to education resources and partner with education investors' intent on capitalizing on the advantages of Ehlanzeni's educational institutions.

The LTGDS seeks to underpin the District strategy to position and develop the area as a globally competitive sub-region that harnesses the strengths and advantages of the different municipalities and other public and private stakeholders in the province towards greater internal coherence, in order to compete more effectively externally in the global arena.

A central component of the Growth and Development Strategy is to grow the economy through the development of key growth sectors that have been identified based on their potential to achieve high growth rates and create jobs through multiplier effects. These are: smart industries including ICT and pharmaceuticals, tourism, agriculture including agro-processing and biotechnology, trade and services including finance and film, and manufacturing including steel-related industries, automotive parts and components, and beer and malt.

Promoting broad-based black economic empowerment (BEE) at all levels of the economy will improve equitable income redistribution and act as an economic driver. Transforming big business and multi-nationals to become more representative is a key challenge. The issue is not just at the level of ownership but also in areas such as management control and decision-making, preferential procurement, skills development, employment equity, social responsibility policies and programmes, enterprise development policies and strategies etc.

Support for small, medium and micro enterprises (SMMEs) is a critical sector to effect poverty reduction, create job opportunities and meaningful economic participation by black people, women, and people with disabilities, youth and other marginalized sectors of our society. In the near future there is need for developing SMME agency, which will provide both financial and non-financial support to SMMEs.

Skills development is a necessary to ensure that appropriate skills base is created to drive sustainable economy and social development. Youth development strategy will pay attention to the issue of young people's access to economic opportunities and skills development. Learnerships will be key in this regard, as well as improving the further education and training sector. Together with institutions of higher learning and the private sector cannot just identify skills gaps to sustain future growth but also undertake a provincial skills audit so that investment in skills is in line with the actual skills needed.

Implementing the expanded Public works programme (EPWP), this will create short-term jobs and build social capital by involving communities in socio-economic infrastructure development in their areas. The EPWP will also contribute to skills development, thus increasing job opportunities and enterprise development.

Proactively addressing the needs of women, people with disabilities and youth in social and economic life through mainstreaming and mitigating the effect of and ensuring an effective response to HIV and AIDS will also be critical in meeting our objectives. The AIDS Summit on this current financial year involving government, business and labor will be an important step in ensuring that all sectors of the economy are able to effectively perform in this regard.

A further condition for growth and development will be ensuring ease of access to government services, including through the use of information technology, achieving economies of scale and efficiency and better inter-governmental relations. The GDS further identifies existing strategic levers, which require focused attention and resources. These include the provision of an accessible, affordable and integrate public transport system; the provision of housing, investment in sustainable communities and innovative housing finance solutions; public safety and an integrated and improved security system that are critical for economic growth, quality of life and tourism; and improving government institutional efficiencies including quality integrated public services and reducing the cost of doing business in Gauteng.

As government we have made a firm commitment to the implementation of this Growth and Development Strategy. However, its success depends on the active participation of all sectors, particularly business. One of our key challenges in ensuring the successful implementation of the strategy will be our ability to catalyze resources from our partners.

To drive the effective involvement of all sectors in the implementation of the Growth and Development Strategy, a multi-sectoral forum will be established. This will spread the responsibility for its implementation to all sectors of society, while strengthening the partnership between the various sectors, for greater coordination and impact.

Other key targets which the strategy aims to achieve in Ehlanzeni by 2035 include reducing unemployment to; creating some jobs over the next ten years; and increasing the provincial government's procurement spend for broad-based economic empowerment enterprise to 80%.

The goals, objectives and priorities were then justified and motivated by the millennium goals (United Nations

1999) and the NEPAD priorities (2003). These priorities were then integrated into the Provincial Growth and Development Strategies (2004 – 2014). Unfortunately, due to extensive intellectual drainage from poorer provinces and municipality areas, areas lacking pre-1994 infrastructure, larger centers have grown through the tradition of Migrant Labor, stretching the larger municipalities’ capacity and collapse has in turn been the result in the poorer areas. Little to no realization of the Department of Provincial and Local Government’s Strategic Plan 2007 – 2009 and local municipality’s Integrated Development Plans.

Thus, there is a need to empower municipalities and provincial departments to reach the goals, objectives and priorities that have been and will be visualized to ensure:

- Rapid Economic Growth
- Education and Skills
- Infrastructure development

Thus, resulting in credible public and private institutions

What type of planning is envisaged?

To focus on Long-Term Strategic Planning there must be a change in terminology from short-term to long-term. Terminology influences our manifestations and Vision

Short-Term Terminology	Long-Term Terminology
Job Creation	Career Creation
Upliftment	Empowerment
Sustainable Development	Progressive Development

Planning and policy-making; leadership and collective responsibility

The governance cycle is incomplete. The five activities mentioned are all quantitatively measurable in terms of time and finances. To add quality, we must include three social aspects after the five activities:

- Policy development;
- Strategic and operational planning;
- Resources allocation;
- Implementation;
- Performance monitoring and evaluation;
- Reflection; and
- Lessons learnt

With these three additions quality becomes a measurable on three levels the individual, group and task and improvements can be made.

“Implementation of the plan, on the other hand, is the collective responsibility of Cabinet of all government and in some cases all society”

GAPS IN CURRENT SYSTEM- PROBLEM STATEMENT

The deficiencies stated are all due to lack of long- term visions

- Lack of knowledge and comprehension in both private and public institutions we have missed the direction of the millennium goals, NEPAD Strategy and our Provincial Growth and Development Strategies.
- Voluntarism and short-termism are motivated by our slogans for job-creation, sustainable development, grants, “Helping South Africa OUT”, “How can we help you?(Upliftment)
- A need for an agency to ensure comprehension and application of the plan in cabinet, all state departments and private sector with regard to synergy and holistic socio-economic development

Some lessons from international experience:

Ehlanzeni must become an implementation, results driven district (Business Unusual). Currently there are far too paper-based with little to no practical implementation and practical application.

To implement good development planning, education, skills and resources are required beyond the larger centres (pre-1994 infrastructures. More solid institutions, capable public servants, and stronger relationships between public and private sector and clear focus, knowledge, comprehension and application of the strategic objectives are required to shape the new horizon.

There is a new mental model to respect the past but that can drive the country forward from the smallest building block of society, the individual – family – neighborhood – community – town – city – municipality – province–state.

Focus of the strategic planning for EDM will amongst other things zoom into predicting the mechanisms of dealing with the following factors as they play a major role to shape the future of the District:

- Developing a district model demonstrating the future likelihood of the District in 2030 and beyond,
- Strengthening and centralizing planning in both District and family of municipalities
- District provision of municipal support on a sustainable manner to services with districtwide impact.
- Food security and sustainable rural development,
- Innovation technology and equitable economic growth,
- Poverty and challenge of social cohesion as a future dream of the District,
- Regional, continental and global dynamics and their long term capabilities,
- Industrial development trends and the changing structure of economy,
- Capability and performance of District and local municipalities,
- Advancing Human Resources for district development,
- Public transport, medium and long term choices,
- LED and spatial settlement trends
- Long-term microsocial and demographic trends,
- Energy consumption versus production (depletion of natural sources versus bio-energy production)
- Long-term availability and sustainability of water and its usage
- Consensus, biodiversity and eliminate the changing mitigation and adaptation factors.

10.2. TERMS OF REFERENCE: LONG TERM-PLANNING PERSPECTIVE

10.2.1 Background

Lack of coordination within the local sphere of government has led to implementation inconsistencies and in poor service delivery in some cases.

The District municipality understands that planning, coordination and performance management are interrelated and cannot be separated if the objectives of strategic operational planning are to be achieved.

The Municipality should be concerned with planning matters identified, including preparation of physical plans and policies/guidelines, as well as the monitoring of the impact of the implementation thereof on a high strategic level

The district further understands that the Green Paper on National Strategic Planning addresses mainly high level national strategic planning and that operational and infrastructural planning belongs at the local sphere of government except for bulk infrastructure. These plans will take account of the broader national plan. The

municipality shall commission research where necessary and make proposals on targets and milestones for the purposes of the national strategic plan.

It is hoped that the present initiative to establish a planning unit may lead to a more successful outcome and specially to strengthen local authorities to be capable of addressing and solving the problems related to human needs and land use.

10.2.2. Introduction

An improved approach should call for integrated planning for sustainable development. The system should satisfy the following specific needs:

- Improvement and strengthening planning, management, \monitoring; evaluation; implementation and delivery of services.
- Strengthening institutions and coordinating mechanisms
- Creation of mechanisms to facilitate satisfaction of the needs and objectives of communities and people at local level through service delivery.
- The development of policies which will result in the best use and sustainable management of land. This should thus ensure:
 - that development and developmental programmes are holistic and comprehensive, so that all factors in relation to land resources and environmental conservation are addressed and included. In considering competing needs for land, and in selecting the "best" use for a given area of land, all possible land-use options must be considered;
 - that all activities and inputs are integrated and coordinated with each other, combining the inputs of all disciplines and groups;
 - that all actions are based on a clear understanding of the natural and legitimate objectives and needs of individual land users to obtain maximum consensus;
 - that institutional structures are put in place to develop, debate and carryout proposals.

It is further acknowledged that a concerted focus on strategic operational planning and more coordination are some of the interventions required to remedy what did not work well. A need for strengthening coordination among the local spheres of government is proposed in order to drive collective action towards improved service delivery. It is further acknowledged that The Department must also identify and rectify institutional weaknesses in Local Government to ensure municipal financial viability and sustainability.

In order for the unit to succeed in its endeavors, a partnership between public and private sector, as well as active public participation is required. By and large extensive consultation with a wide range of stakeholders and agencies within the district is envisaged.

The Department acknowledges that the national strategic planning will be informed by our local plans (IDP) and that the local sphere will ensure that there is coherence intergovernmental planning as stated in the

Constitution, Particularly Section 41 (1). However, the formulation of Policies and assessments of the true nature and condition of Local Municipalities will be time consuming.

10.2.3. Mission

Increased efficiency in the use of land and resources used in planning; and drafting of plans that are realistic, acceptable and possible to implement; and to guide Council on all strategic medium- and long-term planning matters.

10.2.4. Objectives

The objective of the municipality will be to develop principles and norms aimed at achieving sustainability, equality, efficiency, fairness and good governance in spatial planning and land use management as well as infrastructural planning and delivery. The decisions of planning authorities, whether related to the formulation of plans such as IDPs or the consideration of land development applications such as rezoning, or the planning and implementation of infrastructure must all be consistent with these principles and norms.

The objective of the principles and norms is to influence directly the long-term substantive outcomes of planning decisions, whether they relate to spatial development; land-use management; or decisions on land use change or development applications, including the delivery of services to all communities. The overall aim of the principles and norms is to achieve planning outcomes that:

- Restructure spatially inefficient settlements
- Promote the sustainable use of the resources in the country
- Channel resources to areas of greatest need and development potential, thereby redressing the inequitable historical treatment of marginalized areas;
- Take into account the fiscal, institutional and administrative capacities of role players, the needs of communities and the environment;
- Stimulate economic development opportunities in rural and urban areas;
- Support an equitable protection of rights to land and inland.
- Promote and guide rural development and the upliftment of rural communities
- Promote and guide infrastructural delivery and the efficient use of resources
- Provide medium- and long-term planning guidelines
- accountable spatial planning, land use management and land development decision-making and infrastructure delivery by organs of state;
- cooperative governance and wider information sharing in plan-making and implementation;
- maximum openness and transparency in decision making
- Strategic medium- and long-term planning solutions.

10.2.5. Key Focus Areas

PLANNING

Ensure medium- and long-term planning in the district, both on regional and local level, within the context of the national planning issues identified, with specific focus on the following subjects of planning:

- Municipal services and infrastructure planning
- Energy production and consumption alternatives (Green energy generation)
- Spatial Development Planning
- Local Economic Development planning
- Financial Viability and Management
- Social Development planning
- Institutional Development and Transformation
- Human Resource Development plans
- Integration of traditional houses council
- Joint government integration and planning
- Research and Knowledge management (Across all spectrum)

Ensure coordinated and integrated development planning on both district and local level, reflecting relevant issues from the national planning principles.

To ensure the bottom-up and top-down approach to planning in order to influence the formulation and implementation of national policy and strategies.

To ensure the implementation of a structured process in the district to act as an early warning system to identify issues requiring immediate attention.

To ensure the implementation of appropriate and technologically advanced system to provide relevant information to guide decision-making.

RESEARCH AND DEVELOPMENT

- To commission research on a specific subject if and when necessary.
- To formulate, influence or review policy, plan and strategy.
- To assess and influence resource allocation (including capital infrastructure investment) in terms of value for money, sustainability, appropriateness and affordability.
- To conduct research on new technology and investigate and apply National and International best practices.

MONITORING AND EVALUATION

To ensure the monitoring and evaluation of the impact of strategies and policies implemented on both district and local level with respect to achieving long term goals.

10.2.6. Communication And Coordination

The municipality will use existing structures, mechanisms and tools in the organization to communicate the outcome of studies and work conducted by the Department to the communities and other stakeholders. Should we add those structures, mechanisms and tools below:

- Intergovernmental Relations Committees
- Public Participation Structures
- IDP Structures
- Website
- Newsletters (external and internal)
- Community based and SABC Radio Stations
- Journal articles production
- Other non-print and print media

QUOTE FROM THE GREEN PAPER

“There is a feedback loop between monitoring and evaluation, and planning. Performance monitoring and evaluation will assess progress, identify constraints, weaknesses and failure in implementation, and effect mechanisms of correction or enhancement”.

10.2.7. General Comments

We need to establish sooner than later as to what province is doing to gear themselves against this direction. The national department, apparently might be discussing some of these issues, writing articles, holding izimbizo's, we must ensure that we are part of the transformation otherwise they will impose and propose things which we cannot change and perhaps at some stage begin to regret the existence of the ministry.

10.2.8. Administration

All municipalities enforce competency standards for managers and appoint persons with the requisite skills, expertise and qualifications

- All managers sign performance agreements;
- Appoint suitably qualified, experienced and competent officials; and
- Implement and manage performance management system

10.2.9. Sound Financial Management

- All municipalities have a functional financial management system;
- rigorous internal controls;
- Cut wasteful expenditure;
- SCM structures and controls with appropriate oversight;
- Cash-backed budgets;
- Post audit action plans are addressed; and
- Act decisively against fraud and corruption

10.2.10. Community Engagements and Participation

All Councilors’ report regularly to their wards:

- Municipalities have clear engagement platforms with communities, e.g., ward level service delivery plans, IDPs and budget report backs; and
- Transparent, responsive and accountable processes to communities etc.

10.2.11. Basic Service Delivery

To ensure that municipalities develop new infrastructure at a faster pace whilst adhering to the relevant standards, and to enable them to improve operations and maintenance of existing infrastructure to ensure continuity of service provision.

10.2.12. Challenges Of Local Government

The District of Ehlanzeni consists of local municipalities, being City of Mbombela, Nkomazi, Thaba Chweu and Bushbuckridge Local Municipalities. Each of these municipalities have different challenges ranging from:

- None provision of democratic and accountable Government for Local communities
- Erratic provision of basic services to communities in a sustainable manner
- Promotion of social and economic development not adequate
- Inadequate Promotion of a safe and healthy environment
- Lack of encouragement of involvement of communities and community organizations in the matters of local Government
- Sound and sustainable financial management inadequate
