Annual Financial Statements for the year ended 30 June 2024

Accounting officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2025 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the is primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements will be examined by the municipality's external auditors and their audit report will be issued by the 30th of November 2024.

The annual financial statements set out on page 5 to 90, which have been prepared on the going concern basis, were noted by council on 31 August 2024 and were approved and signed on behalf of the municipality by the accounting officer.

Mr N. Pakade Accounting Officer

Statement of Financial Position as at 30 June 2024

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1. Presentation of annual financial statements

The annual financial stataments have been prepared in accordance with the Standard of Generally Recognised Accounting Practices (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statments, are disclosed below.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality. The figures are rounded off to the nearest Rand.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for the foreseeable future.

1.3 Materiality

Materiality omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.4 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Other significant judgements, sources of estimation uncertainty and/or relating information, have been disclosed in the relating notes.

Trade receivables and other receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments, loans and receivables is calculated on an individual debtor basis, based on historical loss ratios, debtor type and other indicators present at the reporting date that correlate with defaults.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.4 Biological assets that form part of an agricultural activity (continued)

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including municipallity specific variables and economic factors.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 21 - Provisions.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Accounting by principals and agent

The municipality makes assessments on whether it is the principal or agent in principal-agent relationships.

Additional information is disclosed in Note 67.

Useful lives of Property, plant and equipment, Intangible assets and Investment property and Changes in Accounting Estimates

The municipality depreciates/amortises its property, plant and equipment, investment property and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use.

The useful lives of assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets in order to determine the optimum useful life expectation, where appropriate.

The estimation of residual values of assets are based on management's judgement as to whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

1.5 Investment property

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised. The cost of self-constructed investment property is the cost at the date of completion.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.5 Investment property (continued)

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the municipality determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the municipality becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

1.6 Property, plant and equipment

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.6 Property, plant and equipment (continued)

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for Land and Building where is carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight-line	Infinite
Buildings	Straight-line	5-50 years
Plant and machinery	Straight-line	5-10 years
Furniture and fixtures	Straight-line	3-5 years
Office equipment	Straight-line	5-7 years
IT equipment	Straight-line	5-7 years
Computer software	Straight-line	3-5 years
Roads and paving	Straight-line	30 years
Access roads	Straight-line	3-10 years

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.6 Property, plant and equipment (continued)		
Pedestrian malls	Straight-line	30 years
Electricity	Straight-line	10-50 years
Community Buildings	Straight-line	30-50 years
Recreational equipment	Straight-line	20-30 years
Security	Straight-line	5 years
Halls	Straight-line	30 years
Libraries	Straight-line	30-50 years
Parks and gardens	Straight-line	20-30 years
Sports fields	Straight-line	20-30 years
Other property, plant and equipment		
Other vehicles	Straight-line	5 years
Other items of plant and equipment	Straight-line	7-10 years
Landfill sites	Straight-line	4-30 years
Fire engines	Straight-line	10-20 years
Bins and containers	Straight-line	5 years
Other leased assets		
Motor vehicles	Straight-line	5-20 years
Laboratory equipment	Straight-line	5-7 years
Specialised vehicles	Straight-line	10 years
Heritage assets	Straight-line	infinite
Cemetery	Straight-line	25-30 years
Stadium	Straight-line	25-30 years
Bridges	Straight-line	25-100 years

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 8).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 8).

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.7

Intangible assets

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Amortisation method	Average useful life
Computer software	Straight-line	3-5 years

Intangible assets are derecognised:

- · on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

1.8 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.8 Heritage assets (continued)

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

After recognition as an asset, a class of heritage assets, whose fair value can be measured reliably, is carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase is credited directly to a revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.9 Financial instruments (continued)

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.9 Financial instruments (continued)

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Receivable from exchange transactions Receivables from non-exchange transaction Cash and cash equivalents

Category

Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Other Financial Liabilities - Long term Other Financial Liabilities - Short term Finance Lease obligation - Long term Finance Lease obligation - Short term Payables from exchange transactions

Category

Financial liability measured at amortised cost Financial liability measured at amortised cost

1.10 Statutory receivables

Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

interest or other charges that may have accrued on the receivable (where applicable);

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.10 Statutory receivables (continued)

- impairment losses; and
- amounts derecognised.

VAT

VAT is a value-added tax that is charged at the applicable rate on the supply of goods or services supplied by the vendor in the course or furtherance of an enterprise.

The Municipality collects VAT on behalf of the South African

Revenue Services (SARS) based on the taxable supplies it provides in meeting its service delivery objectives.

The Municipality is a VAT vendor registered on the payment basis although the accrual basis of accounting is applied by the Municipality in accordance with the principles of GRAP.

The amount receivable from SARS is calculated as the VAT charged by the Municipality on taxable supplies (output VAT), reduced by the VAT input the Municipality is charged by service providers on expenditure incurred in the furtherance of the Municipality's service delivery mandate.

VAT receivable is measured in accordance with the accounting policy on statutory receivables.

1.11 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.12 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.12 Inventories (continued)

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories shall be recognised as an asset if and only if;

- it is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- The cost of the inventories can be measured reliably.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs

Inventories encompass goods held for resale including, for example, merchandise purchased by an entity and held for resale, or land and other property held for sale. Inventories also encompass finished goods produced, or work-in progress being produced, by the entity. Inventories also include materials and supplies awaiting use in the production process and goods purchased or produced by an entity, which are for distribution to other parties through a non-exchange transaction.

1.13 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.13 Impairment of cash-generating assets (continued)

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Identification of a potential impairment

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.13 Impairment of cash-generating assets (continued)

Recognition and measurement of cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are
 affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.13 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.14 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.14 Impairment of non-cash-generating assets (continued)

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP 21 - Impairment of non-generating assets.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.14 Impairment of non-cash-generating assets (continued)

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.15 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.15 Employee benefits (continued)

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
 undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the
 extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid
 exceeds the contribution due for service before the reporting date, an entity recognises that excess as an asset
 (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a
 cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.15 Employee benefits (continued)

Termination benefits

The entity recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

The entity is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than 12 months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

1.16 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 56.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.16 Provisions and contingencies (continued)

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

1.17 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

1.18 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.18 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality:
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight-line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Interest, Royalties and Dividends Received

Revenue arising from the use by others of municipality assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the
 municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.19 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.19 Revenue from non-exchange transactions (continued)

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes,

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Receivables that arise from statutory (non-contractual) arrangements are initially measured in accordance with this accounting policy, as well as the accounting policy on Statutory Receivables. The entity applies the accounting policy on Statutory Receivables for the subsequent measurement, derecognition, presentation and disclosure of statutory receivables.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.19 Revenue from non-exchange transactions (continued)

Taxes

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for income tax is the earning of assessable income during the taxation period by the taxpayer.

The taxable event for value added tax is the undertaking of taxable activity during the taxation period by the taxpayer.

The taxable event for customs duty is the movement of dutiable goods or services across the customs boundary.

The taxable event for estate duty is the death of a person owning taxable property.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, or the period for which the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.20 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset when it is probable that they will result in future economic benefits or service potential to the municipality, and the costs can be measured reliably. The municipality applies this consistently to all borrowing costs that are directly attributable to the acquisition, construction, or production of all qualifying assets of the municipality. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any
 investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the municipality on funds generally borrowed for the purpose
 of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred:
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.21 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.21 Accounting by principals and agents (continued)

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its
 own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.22 Prepayments

Prepayments relate to the payment of goods or services in advance.

Prepayments are initially measured at the value of the goods or services paid in advance and subsequently measured using the cost method, which changes the initial measurement to reflect any amounts derecognised as a result of having received the goods or services.

To the extent that goods and services are not received and the amount that was paid in advance becomes payable by the supplier to the Municipality.

1.23 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.24 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.25 Prepayments (continued)

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.26 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.27 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that
 activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.28 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2023/07/01 to 2024/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.29 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.30 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

Annual Financial Statements for the year ended 30 June 2024

Accounting Policies

1.31 Value added tax (VAT)

The Municipality is a VAT vendor registered on the payment basis although the accrual basis of accounting is applied by the Municipality in accordance with the principles of GRAP.

The amount payable to or receivable from SARS is calculated as the VAT charged by the Municipality on taxable supplies (output VAT), reduced by the VAT input the Municipality is charged by service providers on expenditure incurred in the furtherance of the Municipality's service delivery mandate.

VAT receivable / payable

VAT is levied in accordance with the VAT Act.

VAT receivable is recognised using the accrual basis of accounting to the extent that input VAT exceeds output VAT and VAT payables is recognised when Output VAT exceeds input VAT.

VAT receivable / payable is initially measured at the rate applicable to the transaction amount and subsequently measured using the cost method, which changes the initial measurement to reflect any interest or other charges that may have accrued on the receivable / payble or amounts derecognised.

There is currently no GRAP standard for statutory payables. The Municipality has therefore applied GRAP 19 – provisions, contingent liabilities and contingent assets, since there is an uncertainty regarding the timing of future cash outflows.

1.32 Consumer deposits

Consumer deposits are a partial security for a future payment of an account. All consumers are therefore required to pay a deposit equal to three months consumption of electricity services. Deposits are considered a liability as the deposit is only refunded once the service is terminated. No interest is paid on deposit.

The consumer deposit paid on application for the provision of municipal services must be reviewed annually and may be increased upon written notice to consumers. The deposit will be the equivalent of six month's (July -December) charge for all municipal services supplied where one month with the highest consumption will be taken then less the deposit that was already deposited by the consumer, however this may be increased if it is determined that the consumer is a credit risk.

1.33 Unspent conditional grants

This is represented funds unspent at the end of the financial year on grants received from national and provincial government or any other external party that can only be spent for the condition for which it was received. The amount is recognised as a current liability until the conditions of the grant are met or the money is transferred back to the funder.

The following provision are set for the creation and utilisation of this creditor;

Unspent conditional grants are recognised as a liabilty when the grant money is received.

When the grant conditions are met, an amount equal to the conditions met are transferred to revenue in th statement of financial performance.

Notes to the Annual Financial Statements

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard	I/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
•	Guideline: Guideline on Accounting for Landfill Sites	01 April 2023	The impact of the is not material.
•	GRAP 25 (as revised): Employee Benefits	01 April 2023	The impact of the is not material.
•	iGRAP 7 (as revised): Limit on defined benefit asset, minimum funding requirements and their interaction	01 April 2023	The impact of the is not material.
•	iGRAP 21: The Effect of Past Decisions on Materiality	01 April 2023	The impact of the is not material.
•	GRAP 2020: Improvements to the standards of GRAP 2020	01 April 2023	The impact of the is not material.
•	GRAP 1 (amended): Presentation of Financial Statements	01 April 2023	The impact of the is not material.

2.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2024 or later periods:

Standard	d/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
•	GRAP 103 (as revised): Heritage Assets	01 April 2099	Not expected to impact results but may results in additiona disclosure
•	iGRAP 22 Foreign Currency Transactions and Advance Consideration	01 April 2025	Not expected to impact results but may results in additiona disclosure
•	GRAP 104 (as revised): Financial Instruments	01 April 2025	Unlikely there will be a material impact
•	GRAP 2023: Improvements to the standards of GRAP 2023	01 April 2099	Unlikely there will be a material impact

5. Receivables from non-exchange transactions (continued)

Statutory receivables general information

Transaction(s) arising from statute

Included in Receivables from non-exchange transactions are statutory receivables of 2024: R132 081 955 (2023: R109 286 193) Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset. Property Rates arise from the MUNICIPAL PROPERTY RATES ACT NO. 6 OF 2004 as amended by Municipal Property Rates Amendment Act, No. 29 of 2014. This should be read together with Government Gazette 32061, updated by Government Gazette 38259 dated 28 November 2014. Statutory receivables transaction amounts is determined via the municipalities approved rates policy.

Impairment of Statutory receivables are assessed based on indicators that exist at each reporting date. These include but not limited to payment history and the customers overall profile.

Government grants and subsidies relates to the spending on the Small Town Revitalisation grant. The Small Town Revitalisation relates to the Office of The Premier (OTP) grant and the municipality firstly has to submit an invoice for the work done to Office of The Premier before money can be transferred to the municipality. As at 31 June 2024 the work had been done and the money was only transferred after year end by Office of The Premier and hence the receivables is being raised as at year end for the work done.

Receivables from non-exchange transactions

R135 104 669

R111 109 245

Receivables from non-exchange transactions past due but not impaired

Other receivables from non-exchange transactions which are less than 3 months past due are not considered to be impaired. At 30 June 2024, R120 786 491 (2023: R93 747 302) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	2 419 146	1 990 965
2 months past due	1 914 872	1 541 146
3 months past due	87 167 7 4 7	69 386 605
Penalties and Interest	29 284 726	20 828 586
	120 786 491	93 747 302

Receivables from non-exchange transactions impaired

As of 30 June 2024, other receivables from non-exchange transactions of R296 392 739 (2023: R301 364 353) were impaired and provided for.

The amount of the provision was (296 392 739) as of 30 June 2024 (2023: (301 364 353)).

The ageing of these receivables is as follows:

	296 392 739	301 364 353
Penalties and interest	90 248 544	81 760 020
Over 6 months	178 556 781	186 817 224
3 to 6 months	7 381 297	11 737 845
1 to 3 months	20 206 117	21 049 264

Reconciliation of provision for impairment of receivables from non-exchange transactions

Opening balance	301 364 353	290 948 698
Provision for impairment	(4 971 614)	10 415 655
	296 392 739	301 364 353

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Fig	ures in Rand	2024	2023
6.	VAT Payable / (Receivable)		

5 080 017

(19462)

VAT submissions to SARS are accounted for on a cash basis. The VAT due to SARS relates to amounts that were paid to suppliers that had VAT and amounts received from customers for services rendered. As at 30 June 2024 the VAT was due to SARS but not yet paid. All VAT returns have been submitted throughout the year.

7. **VAT Accrual**

Statutory Payable / (Receivable) - SARS

VAT	6 454 988	20 703 438
Reconciliation		_
VAT Provision	(26 502 801)	(8 238 634)
VAT Impairment	32 957 789	28 942 072
	6 454 988	20 703 438

VAT is accounted for on an accrual basis in the annual financial statements whilst VAT submissions to SARS are accounted for on a cash basis. VAT provision / accrual tracks VAT invoiced but not yet received from customers or paid to suppliers.

8. **Insurance Prepayments**

Opening balance	1 881 031	1 682 813
Payment made during the year	639 562	198 218
	2 520 593	1 881 031

The insurance prepayments is for insurance contract of municipality assets that requires a once off premium in advance for a period of 12 months (01 November 2023 to 31 October 2024).

9. Cash and cash equivalents

Cash and cash equivalents consist of:

Cash on hand Bank balances	1 050 8 198 521	1 050 22 567 033
Short-term deposits Other cash and cash equivalents	5 075 703 43 186 038	4 768 961 30 969 484
Caron case, and case, equivalents	56 461 312	58 306 528

Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or historical information about counterparty default rates. Excess cash is invested with reputable financial institutions with good credit ratings

11. Property, plant and equipment (continued)

Revaluations

Land and buildings are re-valued independently every 3-5 years. The last revaluation of assets was June 2022 by an external valuer. These assumptions used were based on current market conditions.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

The Wesbank/FNB motor vehicle finance lease contract was entered into during 2018 financial year. The finance lease periods for 5 years and each vehicle's period of lease begins on the delivery date and expires after 5 years. The finance lease balance is R0 (2023: R6 523 380) and attracts an average interest rate of 10.850% (2023: 10.850%) per annum.

The above was a facility of R120 million.

Finance lease obligation was fully paid during the current financial year.

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
20. Employee benefit obligations		_

The amounts recognised in the statement of financial position are as follows:

Carrying value Staff allowances	(5 349 177)	(6 365 332)
Bonus and leave pay accrual	(52 142 527)	(54 482 403)
Long service award	(26 863 000)	(25 608 000)
	(84 354 704)	(86 455 735)
Non-current liabilities	(20 469 000)	(21 775 000)
Current liabilities	(63 885 704)	(64 680 735)
	(84 354 704)	(86 455 735)

Provision for long service awards

Service cost increased the liability by R3 271 000. Interest cost over the valuation period resulted in an increase in liability by R2 672 000. Some of the employees attained milestones during the valuation period and this resulted in expected benefits of R3 833 000 which reduced the accrued liability by the same margin.

The average liability has increased by 5% since the last valuation due to:

- An increase in the average earnings and an increase in the average past service,
- These impacts were partially offset by an increase in the net discount rate.

The total liability has increased by 5% (or R 1,255 000) due to the above, and because there was virtually no change to the number of eligible employees since last valuation.

Environmental rehabilitation	32 600 655	1 793 036	34 393 691

Environmental rehabilitation provision

The provision relates to the rehabilitation of landfill sites. The operation of a landfill results in an obligation to rehabilitate the landfill and prevent any further pollution after closure thereof in terms of section 28 of the National Environmental Management Act, Act 107 of 1998, sections 3(14) – (16) and 4 (10) of Government Notice 718 of 3 July 2009, and the landfill permits issued under section 20 of the Environment Conservation Act, Act 73 of 1989, or the waste management licenses issued under section 50 of the National Environmental Management: Waste Act, Act 59 of 2008.

The municipality has two landfill sites (Mthatha and Mqanduli landfill site). At the current valuation date, 30 June 2024, the expected life of the Mthatha and Mqanduli landfill sites is projected to be +/- 1 and +/- 1 years respectively.

The Landfill Rehabilitation Provision was calculated by external valuer Enzokuhle Enterprise.

22. Other liabilities

Principal Liability Human Settlement

303 805 4 852 597

The municipality received funding from the Eastern Cape Department of Human Settlement to build houses on their behalf and thus the municipality is acting as an agent on behalf of the Department.

54. Budget differences

Material differences between budget and actual amounts

Only variances exceeding 10% are considered material and have been explained below.

Service charges:

This is due to Eskom Load shedding resulting to communities and businesses using less units of energy and the possible theft and illegal connections.

Rental of facilities and equipment:

This is due to overbudgeting and and challenges tracing customers.

Licence and permits:

Regular loadshedding result to DLTC takes less candidate per session. Also budgted for Mqanduli DLTC however not yet operating.

Other income:

Due to less receipt received on Department of transport than projected.

Recoveries:

This is due to over collection on insurance recoveries.

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Dand	2024	2022
Figures in Rand	2024	2023

54. Budget differences (continued)

Government Grants and Subsidies:

This is due to human settlement grant not fully spent and Disaster management received towards the end of the financial year.

Fines, Penalties and Forfeits:

This is due to termination of contract which was for traffic management system.

Fair value adjustment:

This is due to fair value adjustment not budgeted for.

Gains/(loss) on disposal of PPE:

This is due to under budgeting for gains on disposal of property, plant and equipment.

Finance costs:

Due to under budgeting for finance costs and interest charged on overdue accounts that was not budgeted for.

Bulk purchases:

The variance is due to a substantial increases in the Municipal Distribution losses resulting from illegal connections and a higher tariff billing applied by Eskom in the winter months..

Contracted services:

Due to under budgeting for contracted services and increse in security services.

Lease rentals on operating lease:

Due to over budgeting on lease rentals with significant savings on leases of printing machinery and Motor vehicle leasing and implementation of the municipal cost containment policy.

Debt impairment:

The variance is due to an implementation of the Municipal debt collection or Revenue Recovery plan that has been fully effective during the current year and disconnections that were conducted by the Municipality.

General expenses:

The variance is due to an increase in the Consumer debt incentive and repairs and maintenance of roads and electricity during the current year.

120 923 876

100 377 462

Losses are due to the following:

Own consumption

This is the unbilled energy consumed by the municipality in day-to-day operations (areas like offices, depots, workshops) without which the municipality cannot function.

Public lights

Cost in rands

KSDM provides its citizens public lighting through streetlights and High mast lights as part of the constitutional mandate of a safe environment.

Traffic signals

The traffic signals are vital for traffic management and pedestrian safety and these dedicated servants need to operate 24/7 and to operate the consume energy.

Defective meters and administrative errors

Some of the meters were installed a long time ago and are thus providing erratic readings. Meter readings and capturing are done manually wherein the possibility of human error is inevitable. Efforts are being made to audit the work and to monitor consumer complaints.

Electricity Theft and illegal connections

There is growing pattern of electricity theft through illegal connections and unauthorised re-connections. This often poses an unsafe environment and increases the load on the network causing power failures.

Meter tempering

Some residents have tempered with their electricity maters resulting to free consumption and or reduced electricity consumption. Others opted to remove the KSDM prescribed meter and install a foreign meter (in KSDM network supply area) which allows the consumer to buy electricity at the reduced rate.

Audit fees

Notes to the Annual Financial Statements

Figures in Rand 2024 2023

STATEMENT OF FINANCIAL POSITION

Receivables from non exchange transactions

The changes or adjustments made are due to conditional grants expenditure that was paid using municipal own funds but not yet transferred to the municipal by the funder.

VAT Receivable

The VAT was incorrectly offset VAT accruals (related to customers and suppliers) against the VAT control account (payable/receivable from SARS), instead of separately presenting the VAT amounts governed by different standards.

VAT Accrual

The VAT accruals is related to customers and suppliers VAT previously impaired, instead of separately presenting the VAT amounts and the Impaired.

Payables from exchange transactions

The changes or adjustments made are due to legal fees that were received and paid for in the current year relating to previous years and Group Life Insurance that relates to prior years but were however paid in the current year.

Payables from non exchange transactions

The changes or adjustments made are due debtors with credit balances from non exchange transaction that were re allocation from payables from exchange transactions.

VAT

The changes or adjustments made are due to legal fees that were received and paid for in the current year relating to previous years and furthermore VAT was incorrectly offset VAT accruals (related to customers and suppliers) against the VAT control account (payable/receivable from SARS), instead of separately presenting the VAT amounts governed by different standards.

Unspent conditional grants and receipts

The changes are due to grants that were recognised as conditional grants initially in 2012 and 2014 but there was no specific agreements that the funds should be returned to the funder if funds have not been utilised and these have been disclosed under unspent conditional grants since 2012 and 2014 with no movements.

Employee benefits obligations - current liabilty

The changes are due to a presentation issue of employe benefits such as leave and bonus provision that were previously disclosed under payables from exchange transactions and long term service award that was previously disclosed under provisions in past financial years.

Employee benefits obligations - non current liabilty

The changes are due to a presentation issue of employe benefits such as leave and bonus provision that were previously disclosed under payables from exchange transactions and long term service award that was previously disclosed under provisions in past financial years.

Provisions - current liability

The changes are due to a presentation issue of long term service award that was previously disclosed under provisions in past financial years.

Provisions - non current liability

The changes are due to a presentation issue of long term service award that was previously disclosed under provisions in past financial years.

Accumulated Surplus

The change in the accumulated surplus is due to all of the changes or movement in prior year as least above in the Statement of Financial Position and the below changes in the Statement of Financial Performance.

STATEMENT OF FINANCIAL PERFORMANCE

Government Grant & Subsidies

The changes or adjustments made are due to conditional grants expenditure that was paid using municipal own funds but not yet transferred to the municipal by the funder, however also recogination of grant income needed to be adjusted for.

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023

Employee Related Costs

The changes or adjustments made are due to Skill Development Levies that were previously disclosed under General Expenditure and reallocated to Employee Related Costs.

Debt Impairment

The changes or adjustments made are due to the impairment of VAT.

General expenses

The changes or adjustments made are due to legal fees that were received and paid for in the current year relating to previous years and also Skill Development Levies that were previously disclosed under General Expenditure and reallocated to Employee Related Costs.

Statement of Financial Performance		
Total revenue	1 565 947 120	-
Total expenditure	(1 665 360 006)	-
Fair value adjustment	23 535 042	-
	(75 877 844)	
Statement of Financial Performance		
Total revenue	1 589 482 162	-
Total expenditure	(1 660 737 886)	-
	(71 255 724)	-

The change was to separate the fair value adjustments from revenue from exchange transactions as it was previously disclosed in the financial statements in order to present the fair value adjustment separately in statement of financial performance to provide users with a clear understanding of the entity's operations. This was to ensure that this is disclosed below the surplus or deficit from operations.

Contributions to organised local government 2023 Restated		
Current year subscription / fee	6 308 255	6 131 255
Amount paid - current year	(6 308 255)	(6 131 255)
	-	=
Contributions to organised local government 2023 Previously Reported		
Opening balance	5 461 334	5 461 334
Current year subscription / fee	6 131 255	5 423 084
Amount paid - current year	(6 131 255)	(5 423 084)
	5 461 334	5 461 334

The above restatement is due to the fact that the municipality has no outstanding amount owed to Salga, as in the prior years the dislosed balance was never updated correctly after full payment was made.

64. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance. Risk management is carried out under policies approved by the accounting officer and council. The municipality identifies, evaluates and hedges financial risks in close co-operation with the municipality's various departments. The accounting officer and council provides written principles for overall risk management, as well as written policies covering specific areas.

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Donal	2024	2022
Figures in Rand	2024	2023

64. Risk management (continued)

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances equal their carrying balances as the effect of discounting is not significant.

At 30 June 2024	Within 1 year	Above 1 to 5	Over 5 years	
Trade and other payables	436 709 564	years -	-	-
Other financial liabilities	2 135 142	2 135 142	-	-
At 30 June 2023	Within 1 year	Above 1 to 5 years	Over 5 years	
Trade and other payables	381 807 707	-	-	-
Other financial liabilities	2 135 142	4 270 285	-	-
Finance Lease Obligation	6 407 337	116 043	-	-

Liquidity risk is mainly concentrated on the Trade and other payables balance.

The municipality does not have any collateral and /or credit enhancements that aid in the mitigation of the liquidity risks.

Credit risk

Credit risk is the risk of financial loss to the municipality if customers or counterparties to financial instruments fail to meet their contractual obligations, and arises principally from the municipality's investments, loans, receivables, and cash and cash equivalents.

The municipality limits its exposure to credit risk by investing with only reputable financial institutions that have a sound credit rating, and limits exposure to any one counter-party in accordance with Council's approved investment policy.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis and assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of receivables. Sales to retail customers are settled in cash or using major credit cards.

The municipality's maximum exposure to credit risk is represented by the carrying value of each financial asset in the statement of financial performance.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2024	2023
Cash and cash equivalents	56 461 312	58 306 528
Receivables from exchange transactions	169 526 518	102 497 307
Receivables from non exchange transactions	3 022 714	1 823 052

The municipality does not hold any collateral in relation to the financial assets above.

Market risk

Market risk is the risk of change in market prices, such as foreign exchange rates and interest rates, affecting the municipality's income or the value of its financial instrument holdings. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on the risk.

	r igaree iir rama		

64. Risk management (continued)

Interest rate risk

The municipality's interest rate risk arises from the long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk

67. Accounting by principals and agents

The municipality is a party to a principal-agent arrangement.

Details of the arrangment are as follows:

The municipality acts as an agent for the Department of Transport whereby it administers the provisioning of motor vehicle licences and registrations as well as driver's licences. It receives compensation for these services based on binding arrangement with the department.

The municipality received funding from the Eastern Cape Department of Human Settlement to build houses on their behalf and thus the municipality is acting as an agent on behalf of the Department

The municipality is the principal or agent. Refer to note 1.21 for significant judgements applied in making this assessment.

Entity as agent

Revenue recognised

The aggregate amount of revenue that the entity recognised as compensation for the transactions carried out on behalf of the principal is R 9 029 933 (2023:R 9 319 063).

Entity as principal (Electricity Vendor system)

Municipality acting as the Principal

The municipality utilises the services of an agent for provision of supply, delivery , installation and commissioning of an online hosted prepayment electricity vending and revenue management system for the King Sabata Dalindyebo (being the principal). These are specialists which are used due to the capacitation of the municipality and it is more cost effective which provide customers easy access to prepaid electricity.

68. Going concern

Total assets amounting to R2.8 billion exceed total liabilities balance amounting to R659 million by R2.1 billion the municipality is in a net asset situation. Accumulated surplus for the period is R1.6 billion.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

Events, conditions and circumstamtances that indicate going concern uncertainity:

The current liabilities exceeds the current assets, and the current ratio is 0.91 less than the 1 which is the required norm.

The creditors payment period is 164 days exceeding the required norm of 30 days.

The net debtor's days is 278 days exceeding the required norm of 60 days.

The repairs and maintenance of assets is sitting at 5% which is below the norm of 8%.

The electricity distribution losses are sitting at 15.02% which is above the norm of 10%.

The municipality's statement of financial performance indicates a deficit; however, it is noted that there is a decline from R73 million in the previous year to R62 million in the current year.

Based on the above thus, there is a material uncertainty related to events or conditions that may cast significant doubt on the municipality's ability to continue as a going concern and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business.

Measures taken to warrant going concern

The gross debtors for receivables from non-exchange transactions are sitting at R431 million while gross debtors for receivables from exchange transactions are sitting at R652 million and in total combined are sitting at R1 billion which is almost two times the total current liabilities. The municipality has appointed a debt collector to assist in collecting these debtors and as such this will assist the municipality in future to reduce the current liabilities.

The total assets exceed the total liabilities by R2.1 billion, the municipality is in a net asset situation. In addition, the current liabilities that require settlement amounts to R600 million. The municipality will receive equitable share amounting to R 460 million and R101 million for MIG in terms of the DORA allocation as gazetted in the 2024/25 financial year Division of Revenue Act. Municipality has collected 94% on billed income and 100% on billed electricity.

The municipality will increase efforts to recover the substantial arrears via the tools provided within the municipality's credit policy. The municipality has other potential revenue collection strategies such as allocation of current receipting against historical debt, limited amnesty.

Collections of other service debts via the prepaid system, door to door campaign and debt collection agents. A debt collector was appointed to collect revenue on difficult to collect debtors. The municipality has further procured appointment of three additional disconnection companies, this will assist in reducing R1 billion debtors' balance. Furthermore, the municipality have appointed two meter inspection service providers to curb the high illegal connections, and also considering appointment of additional debt collectors in the current financial year.

The municipality has a number of contingencies listed within the Annual Financial Statements. A contingent liability is a potential liability that may occur, depending on the outcome of an uncertain future event. Should a contingent liability translate into an actual liability, the municipality will, if required revisit its current budgets to ensure that the liability is settled as required.

In addition to the above, the municipality plans to finance this shortfall through the following measures:

- Cut backs on discretionary spending

Presented below are those items contained in the statement of financial position, statement of financial performance and cash flow statement that have been affected by prior-year adjustments:

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

69. Segment information

General information

Identification of segments

The municipality is organised and reports to management on the basis of five major service areas:electricity, refuse services, fines and penalties, licence services and rental of facilities and equipment. The segments were organised around the type of service delivered and the target market. Management uses these same segments for determining strategic objectives. Segments were separated for reporting purposes and not aggregated. Other functions are non-segment as they are support services.

Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

Aggregated segments

Segments identified above have not been aggregated.

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services
Segment 1	Electrical Services
Segment 2	Refuse (Solid Waste)
Segment 3	Fines and penalties
Segment 4	Licence services
Segment 5	Rentals of facilities and equipment

Following a change in the composition of its reportable segments, the corresponding items of segment information for earlier periods has been restated.

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand 2024 2023

69. Segment information (continued)

Measurement of Specific segment information

The accounting policies of the respective segments are same as those in the summary of significant accounting policies and therefore the basis of measurement between the segments reporting and the annual financial statements are consistent.

The municipality has no changes to the structure of its internal organisation in a manner that causes the composition of its reportable segments to change from the prior year.

Basis of accounting for transactions between reportable segments

The non-segment included above is the reconciling between the totals of segment revenues, reported segment surplus or deficit, segment assets segment liabilities to the corresponding municipality amounts as per the statement of financial performance and statement of financial position.

Geographic Segment Reporting

Although the municipality operates in a number of geographic areas (i.e. wards) in and around the Mthatha and Mqanduli area, the geographic information is not considered relevant to management for decision-making. The goods and services provided to the community throughout the entire municipal area are based on similar tariffs and service standards. Therefore, the municipality has assessed that it operates in a single geographic area.

70. Change in estimate

Property, plant and equipment

In the current period management have revised the estimated useful life of Special Vehicles, Movables Assets, Buildings and Community Assets The effect of this revision has decreased the depreciation charges for the current and future periods by R19 272 865.62 -
