Appendix A: Analysis of Property, Plant and Equipment	87
Appendix B: Budgeted Financial Performance (revenue and expenditure)	93

AUDITOR GENERAL **SOUTH AFRICA** 

3 0 NOV 2022

Audited Annual Financial Statements for the year ended 30 June 2022

## Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the audited annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the audited annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the audited annual financial statements and was given unrestricted access to all financial records and related data.

The audited annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The audited annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and placed considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the set standards for internal control aims to reduce the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the audited annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2023 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The audited annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

I would like to bring to your attention the following material matters to your attention:

I certify that the salaries, allowances and benefits of councillors as disclosed in note 31 to these financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act, Act 20 of 1998 and the Minister of Provincial and Local Government's determination in accordance with the Act.

The external auditor, being the Auditor General of South Africa, is responsible for auditing and expressing an opinion on the municipality's annual financial statements.

The audited annual financial statements set out on pages 7 - 94, which have been prepared on the going concern basis, were approved.

Ms. T.S. Ntsalla

**Acting Municipal Manager**

AUDITOR GENERAL SOUTH AFRICA 3 0 NOV 2022

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

2022	2021
Notes	

#### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below:

Reference	Description
GRAP Framework	Framework for the preparation and presentation of financial statements
GRAP 1	Presentation of financial statements
GRAP 2	Cash flow statements
GRAP 3	Accounting Policies, Changes in Accounting Estimates and Errors
GRAP 9	Revenue from Exchange Transactions
GRAP 12	Inventories
GRAP 13	Leases
GRAP 14	Events After the Reporting Date
GRAP 16	Investment Properties
GRAP 17	Property, Plant and Equipment
GRAP 18	Segment Reporting
GRAP 19	Provisions, Contingent Liabilities and Contingent Assets
GRAP 20	Related Party Disclosures (Revised)
GRAP 23	Revenue from Non-exchange Transactions
GRAP 24	Presentation of Budget information in Financial Statements
GRAP 25	Employee Benefits
GRAP 31	Intangible Assets
GRAP 103	Heritage Assets
GRAP 104	Financial Instruments
GRAP 108	Statutory Receivables
GRAP 109	Accounting by Principles and Agents

These accounting policies are consistent with the previous period.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality. All amounts are rounded to the nearest Rand.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months. In preparing the financial statements, management is required tomake estimates and assumptions that impact on the municipality financial statements once implemented. Actual results inthe future could differ from these estimates which may be material to the annual financial statements.

#### 1.3 Comparative Information

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

#### 1.4 Municipal Standard Chart of Accounts (mSCOA) Implementation and Reclassification

The Municipal Regulations on Standard Chart of Accounts promulgated in terms of Government Gazette 37577 dated 22 April 2014 apply to all municipalities and municipal entities and became effective from 1 July 2017.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.4 Municipal Standard Chart of Accounts (mSCOA) Implementation and Reclassification (continued)

The main objective of this regulation is to provide for a national standard in respect of uniform recording and classification of municipal budget and financial information at a transaction level by prescribing a standard chart of accounts for municipalities and municipal entities which:

a) are aligned to the budget formats and accounting standards prescribed for municipalities and municipal entities and with the standard chart of accounts for national and provincial government; and

 b) enable uniform information sets recorded in terms of national norms and standards across the whole of government for the purposes of national policy coordination and reporting, benchmarking and performance measurement in the local government sphere.

The impact of this mSCOA regulations affected the municipality's current business processes; transacting and reporting requirements.

#### 1.5 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a standard of GRAP.

#### Trade receivables / Held to maturity investments and/or loans and receivables

The municipality assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

#### Provisions

## **AUDITOR GENERAL**

Provisions were raised and management determined a lettingle property information available. Additional disclosure of these estimates of provisions are included in note 19 - Provisions.

#### Allowance for doubtful debts

3 0 NOV 2022

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Debtors from 90 days and above are impaired (debtors less than 90 days are not impaired).

### 1.6 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, as well as land with no determinable future use. Investment property is recognised as an asset i.e. probable that future economic benefits will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement. Costs include costs incurred initially and cost incurred subsequently to add to, or to replace a part or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.6 Investment property (continued)

#### Subsequent measurement

Investment property is measured using the fair value model. Under the fair value model, investment property is carried at its fair value at the reporting date. Any gain or loss arising from a change in the fair value of the property is included in surplus or deficit for the period in which it arises.

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note).

#### 1.7 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

#### Subsequent measurement

The following categories of Property, plant and equipment are carried on the revaluation model, being its fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses:

- Land and Buildings
- Infrastructure
- Community Assets

The following categories of Property, plant and equipment are carried on the cost model, being the cost less accumulated depreciation and any impairment losses:

- Other property, plant and equipment
- Capital under construction

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.7 Property, plant and equipment (continued)

Capital under construction is not depreciated as the asset has not been brought into use yet. Land is not depreciated as it is deemed to have an indefinite useful life.

Revaluations are made every 5 years such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

The land and buildings are checked against deeds information to ensure that the properties included in the register are owned and controlled by the municipality.

Market values are analysed to ensure that the value reflect the fair value of the fixed asset concerned. The assets with significant high market values to their carrying values are assessed for reasonableness as per requirements of GRAP 17.

The market value is split between land and buildings using a 10:90 split respectively.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

#### Depreciation

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Land is not depreciated as it is regarded as having an indefinite life. Depreciation on assets other than land is calculated on cost or revalued amount, using the straight line method, to allocate their cost to their residual values over the estimated useful lives of the assets. The depreciation method used reflects the pattern in which the assets future economic benefits or service potential are expected to be consumed by the municipality. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The depreciation rates are initially based on the following originally estimated useful lives and thereafter on the estimated remaining useful lives as at year end:

Item	Depreciation method	
Infrastructure	Straight-line	
<ul> <li>Roads and paving</li> </ul>	5-90 years

•	External wall	20-30 years
•	Floor structure	20-40 years
•	Wall painting	05-10 years
•	Drainage	10-30 years
•	Plumbing	10-30 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.7 Property, plant and equipment (continued)

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

#### 1.8 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

#### Intangible assets are initially recognised at cost:

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	AUDITOR GENERAL Depreciation method	Average useful life
Computer software, other	Sur Surantinia A	3-5 years
Intangible assets are derecognised:	3 0 NOV 2022  potential are expected from its use or di	isposal.
The gain or loss arising from the derecognition of intal derecognised.	rgible assets is included in surplus or defi	icit when the asset is

#### 1.9 Financial instruments

The municipality has various types of Financial Instruments and these can be broadly categorised as Financial Assets, Financial Liabilities or Residual Interests in accordance with the substance of the contractual agreement. The municipality only recognises a Financial Instrument when it becomes a party to the contractual provisions of the instrument.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.9 Financial instruments (continued)

#### Initial recognition and measurement

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The municipality does not offset a Financial Asset and a Financial Liability unless a legally enforceable right to set off the recognised amounts currently exist and the municipality intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

#### The Effective Interest Rate Method

The Effective Interest Rate Method is a method of calculating the amortised cost of a Financial Asset or a Financial Liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the Financial Instrument or, when appropriate, a shorter period to the net carrying amount of the Financial Asset or Financial Liability.

#### **Amortised cost**

Amortised Cost is the amount at which the Financial Asset or Financial Liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation, using the Effective Interest Rate Method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or collectability.

#### Fair value method and assumptions

The fair values of Financial Instruments are determined as follows:

- The fair values of quoted investments are based on current bid prices; and
- If the market for a Financial Asset is not active (and for unlisted securities), the municipality establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

#### Classification

In accordance with GRAP 104 the Financial Assets and Financial Liabilities of the municipality are classified as follows into the three categories allowed by this standard:

- Financial assets (or financial liabilities) at amortised cost are non-derivative financial instruments with fixed or determinable payments that are not quoted in an active market. They are included in current assets or current liabilities, except for maturities greater than 12 months, which are classified as non-current. Financial assets (or financial liabilities) at amortised cost are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial instrument. After initial recognition financial assets are measured at amortised cost, using the effective interest rate method less an allowance for impairment.
- Financial assets (or financial liabilities) at fair value are financial instruments that meet either of the following conditions:
  - a. derivatives;
  - b. combined instruments that are designated at fair value;
  - c. instruments held for trading;
  - d. non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; or
  - e. financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.
- Financial assets (or financial liabilities) at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.9 Financial instruments (continued)

Included under the major classes of financial instruments below, are line items that are separately disclosed in the notes that do not meet the definition of a financial instrument (such as Prepaid expenses, Payments made in advance etc.). The balances are clearly identifiable by the naming of the line items. Such items are excluded from the balances disclose in Note 46. In rare instances, aggregation within a line item of a note might contain both financial instruments and balances that do not meet the definition of a financial instrument. In these cases the individual line items would be assessed with reference to its significance. Where insignificant, non-financial instruments would be included in the aggregated line items that would normally meet the definition of a financial instrument, this disclosure aggregation was specifically selected to ensure comprehensive classification.

A financial asset is any asset that is a cash or contractual right to receive cash. The municipality has the following types of financial assets as reflected on the face of the Statement of Financial Position or in the notes thereto:

#### Class

Cash and cash equivalents (\*) Receivables from exchange transactions Receivables from non-exchange transactions Finance lease receivables

#### Category

Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost

Cash and cash equivalents include cash on hand (including petty cash) and cash with banks. Cash equivalents are both short-term highly liquid investments, readily convertible into known amounts of cash, and fixed term deposits that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, cash with banks and call deposits held with banks.

In accordance with GRAP 104 the Financial Assets of the municipality are all classified as financial assets at amortised cost, (\*) except for cash floats and petty cash, which are classified as financial assets at fair value.

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity.

There are three main categories of Financial Liabilities, the classification determining how they are measured. Financial Liabilities may be measured at:

- Financial Liabilities measured at Fair Value:
- Financial Liabilities measured at Amortised Cost; or
- Financial Liabilities measured at Cost.

financial position or in the notes thereto:

Category

3 0 NOV 12022 liability measured at amortised cost inancial liability measured at amortised cost Financial liability measured at fair value Financial liability measured at amortised cost

In accordance with GRAP 104 the Financial Liabilities of the municipality are all classified as financial liabilities at amortised cost, except for Consumer deposits, which are classified as financial liabilities at fair value.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

#### Initial and subsequent measurement

#### **Financial Assets**

#### Financial Assets measured at Amortised Cost

Financial Assets at Amortised Cost are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the Financial Asset. Subsequently, these assets are measured at amortised cost using the Effective Interest Method less any impairment, with interest recognised on an Effective Yield Basis.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.9 Financial instruments (continued)

Trade and Other Receivables (excluding Value Added Taxation, Prepayments and Operating Lease receivables) and Loans that have fixed and determinable payments that are not quoted in an active market are classified as Financial Assets at Amortised Cost.

#### Financial Assets measured at Fair Value

Financial Assets at Fair Value are initially measured at fair value, excluding directly attributable transaction costs. They are subsequently measured at fair value with unrealised gains or losses recognised directly in the Statement of Financial Performance.

#### Financial Liabilities

#### Financial Liabilities measured at fair value

Financial Liabilities at Fair Value are stated at fair value, with any resulted gain or loss recognised in the Statement of Financial Performance.

#### Financial Liabilities held at Amortised Cost

Any other Financial Liabilities are classified as Other Financial Liabilities (All Payables, Loans and Borrowings are classified as Other Liabilities) and are initially measured at fair value, net of transaction costs. Trade and Other Payables, Interest-bearing Debt including Finance Lease Liabilities, Non-interest-bearing Debt and Bank Borrowings are subsequently measured at amortised cost using the Effective Interest Rate Method. Interest expense is recognised in the Statement of Financial Performance by applying the effective interest rate.

Bank Borrowings, consisting of interest-bearing short-term bank loans, repayable on demand and overdrafts are recorded at the proceeds received. Finance costs are accounted for using the Accrual Basis and are added to the carrying amount of the bank borrowing to the extent that they are not settled in the period that they arise.

#### Subsequent measurement of financial assets and financial liabilities

#### Impairment and uncollectibility of financial assets

Financial assets, other than those at fair value, are assessed for indicators of impairment at each reporting date. Financial assets are impaired where there is objective evidence of impairment of Financial Assets (such as the probability of insolvency or significant financial difficulties of the debtor). If there is such evidence the recoverable amount is estimated and an impairment loss is recognised in accordance with GRAP 104.

An allowance for impairment of receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The amount of the allowance is the difference between the financial asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Cash flows relating to short-term receivables are not discounted where the effect of discounting is immaterial. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in the Statement of Financial Performance. Cash flows relating to short-term receivables are not discounted where the effect of discounting is immaterial.

Initially receivables from exchange and non-exchange transactions are valued at fair value and subsequently carried at amortised cost using the effective interest rate method, less an allowance for impairment. The allowance is made in accordance with GRAP 104, whereby the recoverability of receivables is assessed individually and then collectively after grouping the assets in financial assets with similar credit risk characteristics. Government accounts are not provided for as such accounts are regarded as receivable. An estimate is made for impairment of receivables, based on past default experience of all outstanding amounts at year-end. Amounts are written off in the year during which they are identified as irrecoverable. Amounts receivable within 12 months from the date of reporting are classified as current.

Annual impairment testing is conducted on all Receivable balances. The effects of the annual impairment testing are accounted for against the Provision for Bad Debts Allowance. Changes in the carrying amount of the allowance account are recognised in the Statement of Financial Performance against the Reversal of Impairment Loss/(Impairment Loss) on Receivables. Accounts identified and written-off during the year is recognised against Bad Debts Written Off in the Statement of Financial Performance.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.9 Financial instruments (continued)

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through the Statement of Financial Performance to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

#### Derecognition

#### Financial assets

The municipality derecognises Financial Assets only when the contractual rights to the cash flows from the asset expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of Financial Assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial asset, the municipality continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial assets and financial liabilities are only offset when the municipality has a legally enforceable right to do so and expects to settle or recover the instruments on a net basis.

#### Financial liabilities

The municipality derecognises Financial Liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

The municipality recognises the difference between the carrying amount of the financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, in the Statement of Financial Performance.

### 1.10 Statutory receivables

#### Identification

AUDITOR GENERAL Statutory receivables are receivables that arise from legislation Ato Pring regulations, or similar means, and require settlement

Carrying amount is the amount at which ar asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

#### Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

#### Initial measurement

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.10 Statutory receivables (continued)

The municipality initially measures statutory receivables at their transaction amount.

#### Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- · amounts derecognised.

#### **Accrued interest**

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

#### Other charges

Where the municipality is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, the entity applies the principles as stated in "Accrued interest" above, as well as the relevant policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers).

#### Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- Significant financial difficulty of the debtor, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- It is probable that the debtor will enter sequestration, liquidation or other financial re-organisation.
- A breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied)
- Adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

In estimating the future cash flows, an municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk-free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

#### Derecognition

Annual Financial Statements for the year ended 30 June 2022

## Accounting Policies

#### 1.10 Statutory receivables (continued)

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
  - derecognise the receivable; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

#### 1.11 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

#### 1.12 Inventories

Inventories are initially measured at cost except where inventories are acquired through a pan-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and current replacement cost where they are held for;

distribution at no charge or for a nominal charge; or consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.13 Impairment of assets

The entity assesses at each reporting date whether there is an indication that an asset may be impaired. Where the carrying amount of an asset exceeds its recoverable amount (or recoverable service amount in the case of non-cash generating assets), the asset is considered impaired and is written down to its recoverable amount or recoverable service amount.

If the recoverable amount of an asset is estimated to be less than its carrying amount, its carrying amount is reduced to the higher of its recoverable amount and zero. Subsequent to the recognition of an impairment loss, the depreciation or amortisation charge for the asset is adjusted to allocate its remaining carrying value, less any residual value, over its remaining useful life.

Impairment losses on receivables are determined based on specific and objective evidence that assets are impaired and is measured as the difference between the carrying amount of assets and the present value of the estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Impairment losses are recognised in profit or loss. If an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount but limited to the carrying amount that would have been determined had no impairment loss been recognised in prior years. A reversal of an impairment loss is recognised in the profit or loss.

#### 1.14 Derecognition of assets and liabilities

Financial assets are derecognised when the contractual rights to receive cash flows have been transferred or have expired or when substantially all the risks and rewards of ownership have passed.

All other assets are derecognised on disposal or when no future economic benefits are expected from their use.

Financial liabilities are derecognised when the relevant obligation has either been discharged, cancelled or has expired.

#### 1.15 Employee costs

These are all costs paid by an employer in exchange for services rendered by an employee. These include employee benefits such as salaries, bonuses, housing allowance, medical and other contributions, which are recognised in the income statement during the period in which the employee renders the related service. Detailed policies can also be noted under the Employee Benefits note.

#### 1.16 Employee benefits

#### Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

#### **Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Annual Financial Statements for the year ended 30 June 2022

## Accounting Policies

#### 1.16 Employee benefits (continued)

#### Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight-line basis over the average period until the amended benefits become vested.

All Actuarial gains and losses are recognised immediately in surplus or deficit when they occur.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets

#### 1.17 Provisions and contingencies

Provisions are recognised when:

the municipality has a present obligation as a result of a past event:

it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and

a reliable estimate can be made of the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability

Contingent assets and contil ties are not recognised. Contingencies are disclosed in note 45.

1.18 Revenue from exch

GENERAL Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered/goods sold, the value of which approximates the consideration received or receivable.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Recognition

Revenue from exchange transactions is only recognised once all of the following criteria have been satisfied:

a) The entity retains neither continuing managerial involvement to the degree usually associated with ownership effective control over the goods sold;

b) The amount of revenue can be measured reliably; and

c) It is probable that the economic benefits or service potential associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

### 1.18 Revenue from exchange transactions (continued)

#### Measurement

Revenue from exchange transactions is measured at the fair value of the consideration received or receivable taking into account the amount of any discounts and rebates allowed by the entity. Fair value is the amount for which an asset could be exchanged, or a liability, between knowledgeable, willing parties in an arm's length transaction.

Service charges relating to electricity are based on consumption. Meters are read on a quarterly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse containers per property.

Interest revenue is recognised on a time proportion basis.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods is passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

#### 1.19 Revenue from non-exchange transactions

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when the fine is issued

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

#### Government grants

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. Grants without any conditions attached are recognised as revenue when the asset is recognised.

#### Unspent conditional grants

For all conditional grants, a corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. The unspent conditional grant liability is disclosed in the Statement of Financial Position.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.20 Accounting by principals and agents

#### Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

#### Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

#### **Binding arrangement**

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

#### Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

- The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

   It does not have the power to determine the significant target and both one of the transaction.

   It does not have the ability to use all, or substantially all, of the respurces the Court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the court of the transaction for its own to be able to the court of the transaction for its own to be able to the court of the
  - It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

### Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

### 1.21 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.21 Unauthorised expenditure (continued)

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.23 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.24 Prepayments

The amount is not taken to profit or loss and other comprehensive income as an expense but disclosed as a current asset in the statement of financial position. The expense is only raised when it is incurred.

#### 1.25 Accumulated Surplus

Included in the accumulated surplus is the previous years profits as well as the effects of changes in accounting policies and correction of errors.

#### 1.26 iGRAP 1 - Probability of revenue

#### Initial Recognition

Revenue is recognised when it is probable that future economic benefits or service potential will flow to the entity and these benefits can be measured.

#### Subsequent measurement

Subsequently, the collectability of the revenue is assessed and an impairment loss is recognised where appropriate.

#### 1.27 VAT

The Municipality accounts for Value Added Tax on the payments basis. This means that VAT is declared to the South African Revenue Services as input VAT or output VAT only when payments are made to suppliers or payments are received for goods or services.

#### 1.28 Budget information

The municipality is typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2021/07/01 to 2022/06/30.

Annual Financial Statements for the year ended 30 June 2022

## Accounting Policies

#### 1.28 Budget information (continued)

The basis which has been applied in determining material variances is 10%. Income we have only provided reasons where the municipality has under achieved and for expenditure both over and under achieved where its 10% less or more than budget. The municipality treats employee costs as a major expense in its statement of financial performance hence we have provided a reason for that variance of 6%.

#### 1.29 Related parties

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Key management personnel is defined as the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

#### 1.30 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of resources.

Commitments are not recognised in the statement of financial position as a liability or as expenditure in the statement of financial performance but are included in the disclosure notes. A distinction is made between capital and current commitments. Commitments are disclosed for:

- Approved and contracted commitments, where the expenditure has been approved and the contract has been awarded at the reporting date.
- Approved but not yet contracted commitments, where the expenditure has been approved and the contract has yet to be awarded or is awaiting finalisation at the reporting date.
- Items are classified as commitments where the project of the contracts that are entered into before the report of the project of the contracts that are entered into before the report of the particles of the project of
- Other commitments for contracts are to municipally NOV 2022

#### 1.31 Revaluation reserve

The surplus arising from the revaluation of property, plant and equipment is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

#### 1.32 Deferred revenue

The calculation is done on the week commencing 15 June with the assumption that the electricity purchased in the first and second week of the month will be consumed of the financial year.

An average tariff has been applied for domestic as the municipality is on stepped tariff.

The indigent is not deferred.

#### 1.33 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

#### 1.34 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

#### 1.35 Segment Reporting

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.35 Segment Reporting (continued)

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

#### Measurement

Segment information is prepared in conformity with accounting policies applied for preparing and presenting the annual financial statements. The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

#### 1.36 Heritage assets

Assets are resources controlled by an municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

	2022	2021

#### 2. New standards and interpretations

#### 2.1 Standards and interpretations issued, but not yet effective

#### Standard/ Interpretation:

- GRAP 25: Employee Benefits
- GRAP 103 on Heritage Assets
- GRAP 104 on Financial Instruments

#### 3. Inventories

Consumable stores COVID-19 PPE Medallions - at cost	1 746 470 140 591 2 669	1 900 805 245 439 2 669
Inventories (write-downs)	1 889 730 (15 235)	2 148 913 (11 831)
	1 874 495	2 137 082

No inventory is held as security by the municipality.

#### 4. Statutory receivables

Traffic fines debtor Rates from non-exchange transactions Impairment	5 402 158 126 487 465 (50 602 671)	4 013 649 103 001 277 (42 172 961)
	81 286 952	64 841 965

#### Statutory receivables general information

The carrying value of Statutory receivables are in line with their fair value. A credit period of 30 days are granted on initial recognition of the receivable, which is considered to be in line with industry norms. Interest is charged at 18% per annum on overdue accounts.

#### Rates from non-exchange transactions

These are the receivables as rates that are levied on the properties within the jurisdiction of Matatiele Local Municipality. The rates that are applicable to a particular property are determined using the valuation roll. Rates are determined in accordance with the Municipal Property Rates Act No. 6 of 2004 as amended in 2014.

#### **Traffic fines**

These are the receivables for the fines in terms of the Road Traffic Regulations and the Municipal Bylaws where applicable. Fines are determined based on the Road Traffic Management Act.

### Statutory receivables impairment

The Allowance for impairment of Statutory receivables has been made for all consumer balances outstanding based on the payment ratio over 12 months. Based on these payment trends, management is satisfied that no further credit provision is required in excess of the current allowance.

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

2022	2021

### 7. Trade receivables from exchange transactions (continued)

### Consumer debtors past due but not impaired

Consumer debtors which are less than 3 months past due are not considered to be impaired. At 30 June 2022, R15 291 190 (2021: R4 622 383) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	6 174 510	11 857 602
2 months past due	1 650 156	1 628 231
3 months past due	2 037 637	1 805 357

### Consumer debtors impaired

As of 30 June 2022, consumer debtors of R70 148 484 (2021: R60 515 029) were impaired and provided for.

The amount of the provision was R37 740 808 as of 30 June 2022 (2021: R28 765 552).

The ageing of these debtors is as follows:

3 to 6 months	448 229	9 285 164
Over 6 months	37 244 014	19 480 389

In determining the recoverability of a Consumer receivable, the municipality considers any change in the credit quality of the Consumer receivable from the date credit was initially granted up to the reporting date. The concentration of credit risk is limited due to the customer base being large and unrelated. Accordingly, the management believe that there is no further credit provision required in excess of the allowance for doubtful debts.

All of the municipality's investment properties are held under freehold interests and no Investment Property had been pledged as security for any liabilities of the municipality and are held for capital appreciation. There are no restrictions on the reliability of investment property or the remittance of revenue and proceeds of disposal.

There are no contractual obligations on investment property.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

The effective date of the revaluations was 1 June 2021.

The valuation was performed using data based on arm's length transactions and related market evidence.

The municipality is required by relevant Environmental Legislation to rehabilitate landfill's ite at the closure date. The "Capitalised Restoration Cost" asset, which is capitalised in line with the requirements of GRAP 17 and iGRAP 2, relates to the initial estimate of costs involved to restore landfill site under control of the Matatiele Legal Municipality.

Although this item is accounted for under Property, Plant and Equipment Standard (GRA 17), the characteristics and nature of this item does not resemble that of normal PPE (such as the tangible nature of assets normally associated with PPE). Based on the aforementioned and in line with the requirements of GRAP 1, Capita ised Restoration Cost is disclosed as a separate item on the face of the Statement of Financial Position.

Refer to note 19 for more detail relating to this asset financed by way of a provision.

# Fair value of trade and other payables

The average credit period on purchases is 30 days from the receipt of the statement, as determined by the MFMA. No interest is charged for the first 30 days from the date of receipt of the invoice. Thereafter interest is charged in accordance with the credit policies of the various individual creditors that the municipality deals with. The municipality has financial risk policies in place to ensure that all payables are paid within the credit timeframe.

Income received in advance is due to payments received for hall hire, sale of municipal vacant plots and prepaid electricity. The management of the municipality is of the opinion that the carrying value of creditors approximate their fair values.

### Other assumptions

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed healthcare cost trends rates would have the following effects:

	****	One percentage point
Effect on the aggregate of the service cost and interest cost	3 419 000	2 570 000
Effect on defined benefit obligation	14 011 000	10 065 000

Amounts for the current and previous four years are as follows:

	2022	2021	2020	2019	2018
Defined benefit obligation	17 562 003	16 497 003	14 616 000	15 215 831	15 269 222
Surplus (deficit)	(17 562 003)	(16 497 003)	(14 616 000)	(15 215 831)	(15 269 222)

### Defined contribution plan

It is the policy of the municipality to provide retirement benefits to all its employees [or specify number of employees covered]. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act exist for this purpose.

The municipality is under no obligation to cover any unfunded benefits.

Included in defined contribution plan information above, is the following plan(s) which is (are) a Multi-Employer Funds and is (are) a Defined Benefit Plans, but due to the fact that sufficient information is not available to enable the municipality to account for the plan(s) as a defined benefit plan(s). The municipality accounted for this (these) plan(s) as a defined contribution plan(s).

### 18. Unspent conditional grants and receipts

### **Environmental rehabilitation provision**

The minimum requirements for waste disposal by landfill as stated by the Department of Water Affairs and Forestry, "All land fills, except those closed prior to August 1990 when the permitting system came into effect, must be permitted before they can be legally closed. Closure will involve, inter alia, the application of final cover, top soiling, vegetating, drainage maintenance and leachate management."

The financial implications for the rehabilitation of the landfill site were performed by Hendrik Adriaan Roets, who is registered with the South African Institution of Civil Engineering. This was carried out on the 18 July 2022 for the effective date, 30 June 2022. Currently no appointment for the closure has been made, and therefore estimates have been compiled. The provision is based on a 15 year estimation.

Landfill sites generally fall into 3 categories, which are separated by the size of the landfill, the type of waste and the amount of leachate produced. The land fill site closure design is based on it falling in the G:S:B+ formation which has the following capping layers:

- 200mm Topsoil
- 300mm Compacted clay

In calculating the provision for rehabilitation, the following four items have been included:

Direct contract costs - this equates to a unit cost of 90 Rand per square meter based on previous closure of the Ducats landfill. Unit costs are used to estimate rehabilitation costs until a service provider is appointed to perform an investigation and design.

Indirect professional fees - these fees are fixed and are based on a percentage of the contract.

Indirect disbursements - These are estimated by obtaining quotations from third party service providers for similar works.

Escalation has also been considered and included in the costs.

The monetary value for the provision for the landfill site at 30 June 2022 is R16 050 717 (2021: R14 374 066).

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

	2022	2021
19. Provisions (continued)		
Environmental rehabilitation provision		
Rehabilitation provision - Landfill site	16 050 717	14 374 066
The movement in Rehabilitation Provision - Landfill Site are reconciled as follows:		
Opening balance Contribution/(reduction) during the year	14 374 066 1 676 651	14 591 765 (217 699)
	16 050 717	14 374 066

It is estimated that the site will not be rehabilitated within 1 year from the reporting date and thus there is no short term portion associated with this provision. The timing of the outflow of resources relating to this provision is uncertain, but management expects the timing to be in line with the legal requirement subsequent to the expected closure date of the site as indicated below.

The total obligation at year end is attributed to the following site:

 Site
 Expected Closure Date

 Matatiele Landfill Site
 2029
 16 050 717
 14 374 066

The Environmental Specialists were utilised to determine the cost of rehabilitation of landfill site as well to assist the municipality in identifying any changes (if any) to estimated closure dates previously reported on in former entities.

The estimated area per site to be rehabilitated at year end were as follow (Rehabilitation area - per metre squared).

Matatiele Landfill Site

AUDITOR GENERAL
metre is based on the current cost of construction at each reporting period. The cost per square metre were estimated as follows OUTH AFRICA

Matatiele Landfill Site

3 0 NOV 2022

Annual Financial Statements for the year ended 30 June 2022

### Notes to the Annual Financial Statements

2022	2021

### 20. Revaluation reserve (continued)

The revaluation reserve arose on the revaluation of land and buildings and infrastructure asset in prior periods. Where revalued land and buildings and infrastructure assets are sold, the portion of the revaluation reserve that relates to that asset, and is effectively realised, is transferred directly to accumulated surplus. The revaluation reserve is also realised through the transfer of depreciation on revalued assets to accumulated surplus. Distribution from the revaluation reserve can be made where they are in accordance with the requirements of the municipality's accounting policy and relevant case law. The payment of cash distribution out of the reserve is restricted by the terms of the municipality's accounting policy. These restrictions do not apply to any amounts transferred to accumulated surplus. The council does not currently intend to make any distributions from the revaluation reserve.

### 21. Service charges

	68 145 618	68 588 657

Communal land	1 510 367	1 529 116
Municipal	32 230 529	31 293 327
Residential	7 149 448	6 991 964
Vacant land	826 907	667 032
	48 725 788	46 575 491

Supplementary assessment rates are levied on the value of land and improvements, for which a valuation is performed every five years. Valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

A new valuation roll has been implemented from 1 July 2018.

The council approved randage for this financial year are; Government R0,02176, Municipality R0,013054, Vacant Land R0,02176, Residential R0,010878, Business R0,013054 and Agricultural R0,0026403.

### Rebates are as follows:

Public Benefit Organisation 100%, Municipal Rebate 100%, Agriculture 70%, Residential Rebate 40% and Business 15%. Residential properties receives R65 000 exemption.

### 46. Risk management

### Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk; fair value interest rate risk, cash flow interest risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance. Risk management is carried out by a budget and treasury department (municipal treasury) under policies approved by the accounting officer. Municipality treasury identifies, evaluates and financial risks in close co-operation with the municipality's operating units. The accounting officer provide written principles for overall risk management, as well as written policies covering specific areas.

The amount of interest that has been charged on outstanding debtors for the current year is R16 187 979 (2021: R13 357 256).

### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Liquidity risk is mainly concentrated on the trade and other payables balances. The municipality does not have any collateral and / or credit enhancements that aid in the mitigation of the liquidity risk.

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

2022	2021

### 46. Risk management (continued)

### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards.

Financial assets exposed to credit risk at year end were as follows:

Financial assets Trade receivables Nedbank Standard bank	<b>2022</b> 106 093 954 2 945 059 4 016 044	<b>2021</b> 89 930 416 9 778 476 285 991
First National bank Short Term Investments	1 757 671 228 011 891	1 208 559 213 126 826
Security held in Eskom	4 517 888	4 373 560
Financial liabilities Trade Payables	55 641 925	51 180 689
47. Unauthorised expenditure		
Opening balance as previously reported	69 601 085	38 546 463
Opening balance as restated Add: Expenditure identified - current Less: Approved/condoned/authorised by council	<b>69 601 085</b> 93 380 933 (69 601 085)	<b>38 546 463</b> 69 601 085 (38 546 463)
Closing balance	93 380 933	69 601 085

After investigation by the MPAC, on the 28th of July 2022 as per Council Resolution CR 205/28/07/2022 it was resolved that an amount of R69 601 085 will be written off.

The unauthorised expenditure is as a result of transfer of assets from the municipal work in progress to Eskom as a result of rural electrification that is done by the municipality. The municipality receives a grant from INEP to construct these projects. These projects, once completed, are transferred to Eskom. The municipality must put these projects as part of assets or on the assets register as they cannot be left unaccounted for until Eskom receives them on their register.

### Analysed as follows: non-cash

Debt impairment
Depreciation and impairment
Provision of landfill site contribution expense
Loss on disposal of property, plant and equipment

Analysed as follows: cash

### **Notes to the Annual Financial Statements**

	2022	2021
48. Fruitless and wasteful expenditure		
Opening balance as previously reported	913 692	55 226
Opening balance as restated	913 692	55 226
Add: Expenditure identified - current	34 877	915 168
Less: Amounts recovered - current	-	(1 476)
Less: Amount written off - current	-	(55 226)
Closing balance	948 569	913 692

The fruitless and wasteful expenditure amounting to R913 692 is as a result of standing time that was charged by the contractor that was constructing the Matatiele Sports Center in 2017. This was as a result of a change of scope of work. This was investigated in the 2021/22 financial year and sent Council with the ones relating to Unauthorised and Irregular. The fruitless amount was not included on the report of the investigators and therefore could not be proven that it was investigated.

### 49. Irregular expenditure

Opening balance as previously reported	16 700 806	9 412 749
Opening balance as restated	16 700 806	9 412 749
Add: Irregular Expenditure - current Less: Amount written off - current	8 705 462 (15 127 717)	8 810 717 (1 522 660)
Closing balance	10 278 551	16 700 806

### Amounts written-off

After investigation by the MPAC on the 28th of July 2022 as per Council Resolution CR 205/28/07/2022 it was resolved that an amount R15 127 717 will be written off.

The irregular expenditure were as a results of the following: R176 200 for Equipment for Environmental Waste Unit Wattle Clearing Programme in ward 17. R200 000 Grass Cutting, drain cleaning and tree pruning in Harry Gwala and Mountain View. For these projects upon appointment, the service providers were not tax compliant.

R5 167 230 for Annual Financial Statements and Assets Register for both Protea Consulting and Sondlo Chartered Accountants. The appointment of these service providers were identified in the previous year as irregular and these are the transactions that occurred in the current year.

R1 566 362 for the appointment of three service providers for Matatiele Local Municipality Livestock Improvement Programme, dosing and vaccination of 400 sheep and 400 cattle per ward in 26 wards. This was due to the manager from the Budget and Treasury Office having sat in the evaluation committee for a particular project and later on being appointed as an acting Supply Chain Manager. Due to that manager being appointed as an acting Supply Chain Manager he had to sit on the Bid Adjudication committee as an supply chain management practioner as per the regulations. This was after the Supply Chain Manager had resigned.

R1 595 669 for the construction of Magema-Kutwana access road. The contractor was appointed with an expired tax clearance certificate.

R50 429 paid to former Councillor S. Baba who was paid after being sentenced in the 2020/2021 financial year. This was raised as a debtor in the same year and is to be recovered from his pension.

R578 858 for Annual Financial Statements and Assets Register for both Protea Consulting and Sondlo Chartered Accountants for payments made that were not identified as irregular in the 2020/2021 financial year.

R943 801 for the appointment of this service provider was identified in the previous year as irregular and these transactions ocurred in the previous year.

Annual Financial Statements for the year ended 30 June 2022

## Notes to the Annual Financial Statements

Figures in Rand

### 51. Segment Reporting (continued)

For management purposes, the municipality is organised and operates in six key functional segments (or business units). To this end, management monitors the operating results of these business units for the purpose of making decisions about resource allocations and assessment of performance. Revenues and expenditures relating to these business units are allocated at a transactional level.

### Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services	
- Community and Social Services	Llbrary Services, Cemetries and Recreational facilities	
- Energy Sources	Electricity distribution	
- Planning and Development	Local Economic Development, Property Services, Spatial Planning	
- Public Safety	Traffic Police	
- Road Transport	Provision of infrastructure and maintenance of roads	
- Waste Management	Refuse removal services	

AUDITOR GENERAL SOUTH & FRICA

3 0 NOV 2022

The grouping of these segments is consistent with the functional classification of government activities which considers the nature of the services, the beneficiaries of such services and the fees charged for the services rendered (if any).

Management does monitor performance geographically but does not at present have reliable separate financial information for decision making purposes.

The segments with no economic benefits have been included on the segment reporting for reconciliation purposes with the statement of financial performance.

2022	2021
2022	2021

### 55. Related parties

No transactions occured with related parties that were not at arm's length or not in the ordinary course of business during the current financial year.

When the municipality enters into agreements with service providers who made declarations that close family members or directors are in service of the State. The municipality considers the transactions to be at an arms length and in the ordinary course of business.

### Awards and payments to persons with relatives in the Matatiele Local Municipality:

Bokang Lehlehla, the brother of the General Manager Infrastructure, is a member of Maboka Contractors who were appointed to for the construction of Silo Phase 3. Mrs Bongeka Mohale, spouse of Cllr Polelo Mohale is a director of Sinalo Plastic Bag Manufacturing.

78 379

7 900

### 56. Impairment of assets

### **Impairments**

Property, plant and equipment

The carrying value of assets were assessed at year end and considered impaired as a result of the Matatiele area being affected by severe weather conditions (floods) during the current year that resulted in some road infrastructure being significantly affected in terms of functionality and service delivery.

1 113 241

### 57. Budget variances

The basis which has been applied in determining material variances is the throughout provided reasons where the municipality has under achieved and for expenditure both over and under achieved where its 10% less or more than budget. The municipality treats employee costs as a major expense in its second of the provided and the reason for that variance of 6%.

### Reasons for budget variances

### Licences and permits, variance of 61%

Reduction on collection of licences and permits was affected by loadshedding as it resulted in less hours worked due to disturbances on systems.

3 0 NOV 2022

### Other income, variance of 13%

One of the major contributors to other income is the sale of tender documents which did not go as anticipated due to the prohibition of supply chain procurement processed by National Treasury.

### Interest received, variance of 34%

Interest rates on investments made have been lower than anticipated due to interest rates cut that have been implemented by the South African Reserve Bank.

### Interest received, variance of 38%

Interest from outstanding debtors increased due to an increase in the debtors balance.

### Property rates, variance of 10%

Property rates collection was affected by the implementation of the Supplementary roll, changes of which included reviews on property values, property usage and subdivisions.

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

2022

2021

### 57. Budget variances (continued)

### Employee related costs, variance of 3%

The variance is due to vacant positions that have not been filled for more than six months.

### Remuneration of traditional leader, variance of 35%

This is due new gazetting received that reduced the number of traditional leaders to seat at Council meetings from 9 members to one member.

### Bad Debt Written Off & Debt Impairment, variance of 158%

This is due to increased debt balance in the 2021/22 financial year.

### Depreciation & asset impairment, variance of 23%

The varience is due to more provision made on the budget including asset impairment.

### Finance Charges, variances of 100%

This is due to late payment of Eskom invoices and interest incurred due to non-payment to COIDA.

### Other materials, variance of 11%

The procurement of material was affected by circular 15 of 2021-222 on validity of PPR OF 2017 that put on hold procurement over R30 000 to all organs of state.

### Lease rentals on operating lease, variance of 6%

This is due to rental of printers that were not done as planned due to SCM delays.

### Contracted services, variance of 5%

The procurement of material was affected by circular 15 of 2021-222 on validity of PPR OF 2017 that put on hold procurement over R30 000 to all organs of state.

### Other expenditure, variance of 18%

The procurement of material was affected by circular 15 of 2021-222 on validity of PPR OF 2017 that put on hold procurement over R30 000 to all organs of state.

### Agency Fees, variance of 100%

The budget provision for Agency fees is part of the Licenses and Permits on the final budget.

### VAT receivable, variance of 100%

The budget allocation for the item is included on Other Debtors on the Approved budget as per Mscoa reporting.

### Security held in Eskom, variance of 100%

Relates to amount paid to Eskom in the previous year for a deposit on the electrical substation.

### Trade receivables from non-exchange transactions, variance of 100%

Budget allocation for the item is under statutory receivables.

Annual Financial Statements for the year ended 30 June 2022

### Notes to the Annual Financial Statements

2022

2021

### 57. Budget variances (continued)

### Loss on disposal of PPE, variance of 100%

This is due to transfer of eskom projects.

### Landfill site provision contributions, variance of 100%

This is due to insufficient budget allocated for this item.

### Cash and cash equivalents, variance of 112%

Due to more cash at the end of financial year at bank than anticipated on the budget and more investments made during the 2021-22 financial year.

### Consumer debtors, variance of 25%

Due to increased government outstanding electricity debtors.

### Inventory, variance of 10%

This is due to more stock kept at year end than anticipated.

### Investment property, variance of 113%

This is due to insufficient budget allocation and classification differences at budget time.

### Property, plant and equipment - Capitalised, variance of 100%

The budget allocation for the item is included on Property Plant and Equipment on the Approved budget as per Mscoa reporting

### Intangible assets, variance of 81%

This is due to amortisation / write off done in the 2021/22 financial year.

### Other Non Current Assets, variance of 100%

A budget provision was made for items that are not on Mscoa Chart.

### Trade payables, variance of 21%

Due to incomplete projects at year with unpaid retention.

### Unspent conditional grants, variance of 100%

The spending on grants was affected by circular 15 of 2021-222 on validity of PPR of 2017 that put on hold procurement over R30 000 to all organs of state.

### Employee benefit obligation, variance of 100%

The budget allocation for the item is included on the approved budget for Provisions as per mSCOA reporting.

### Provisions, variance of 25%

Approved budget is inclusive of employee benefit provision.

**AUDITOR GENERAL** SOUTH AFRICA

3 0 NOV 2022

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

2022

2021

### 57. Budget variances (continued)

### Consumer deposits, variance of 13%

The varience is due to insufficient budget allocation for the item.

### Revaluation reserve, variance of 175%

The varience is due to impairment loss on revalued assets that was not included in the budget.

### Accumulated surplus, variance of 31%

Surplus was less than anticipated on the budget.

### **Cashflow Variances**

### Sale of goods and services, variance of 22%

The variance is due to under collection on revenue than anticipated

### Purchase of property, plant and equipment, variance of 23%

The variance is due to delayed expenditure on capital, circular 15 of 2021-222 on validity of PPR OF 2017 that put on hold procurement over R30 000 to all organs of state.

### Purchase of intangible assets, variance of 100%

No budget allocation was made for purchase of intangible assets.

### Security held in Eskom, variance of 100%

Relates to amount paid to Eskom in the previous year for a deposit on the electrical substation.

### Cash and cash equivalents at the beginning of the year, variance of 26%

Variance is due to less expenditure incurred than anticipated.

### Changes from the approved budget to the final budget

The municipality approved its budget 2021/2022 on the 27th May 2022. The approved budget was amended with two adjustments budgets. The first adjustments budget was approved on the 28 February 2022 and the second adjustments budget was approved on the 28 April 2022. Detailed reasons for the changes on the approved budget have been presented on the Adjustments budget reports.
