Annual Financial Statements for the year ended June 30, 2022

# Responsibilities and Approval

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I as the Accounting Officer acknowledge that I am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, there are sets of standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

I have reviewed the municipality's cash flow forecast for the 12 months to June 30, 2023 and, in the light of this review and the current financial position, I am satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the community and government for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

I am primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

I certify that the salaries, allowances and benefits of councillors, as disclosed in note 36 - Councillors remuneration to these annual financial statements, are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act (Act No. 20 of 1998) and the Minister of Provincial and Local Government's determination in accordance with the Act.

The annual financial statements set out on page 6, which have been prepared on the going concern basis, were approved by the Accounting Officer on August 31, 2022 and were signed on its behalf by:

Accounting Officer (G.P.T Nota)
KwaBhaca

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

| <br> |         |      |      |
|------|---------|------|------|
|      | Note(s) | 2022 | 2021 |

#### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

They are presented in South African Rand, and rounded off to the nearest Rand which is the municipality's functional currency.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

The municipality implemented the Municipal Standard Chart of Accounts(mSCOA) during the period ended 30 June 2022 as required in terms of the Municipal Regulations on Standard Chart of Accounts, announced by Government Gazette No 37577 of 22 April 2014, in section 168 of the Local Government: Municipal Finance Management, Act (Act 56 of 2003) and through directives and guidelines from National Treasury.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.4 Investment property

Investment Property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the municipality measures Investment Property at cost including transaction costs once it meets the definition of Investment Property. However, where an Investment Property was acquired through a non transaction (i.e. where it acquired the Investment Property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed Investment Property is the cost at date of completion.

Based on management's judgement, the following criteria have been applied to distinguish Investment Properties from owner occupied property or property held for resale:

- Land held for long term capital appreciation rather than for short-term sale in the ordinary course of operations; Based on management's judgement, the following criteria have been applied to distinguish Investment Properties from owner occupied property or property held for resale:
- Land held for a currently undetermined future use (If the municipality has not determined that it will use the land as owner occupied property or for shortterm sale in the ordinary course of operations, the land is regarded as held for capital appreciation);
- A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases on a commercial basis (this will include the property portfolio rented out on a commercial basis on behalf of the municipality);

- Property that is being constructed or developed for future use as investment property.

The rent earned does not have to be at a commercial basis or market related for the property to be last investment property.

Equipment or Inventory as appropriate:

- Property held for sale in the ordinary course of operations or in the process of construction or development for such sale;

- Property being constructed or developed or held if a finite constructed or developed o investment

- Property being constructed or developed on behalf of third parties;
- Owner occupied property, including (among other things) property held for future use as owner occupied property, property held for future development and subsequent use as owner occupied property, property occupied by employees such as housing for personnel (whether or not the employees pay rent at market rates) and owner occupied property;
- Property that is leased to another entity under a finance lease;
- Property held to provide goods and services and also generates cash inflows; and
- Property held for strategic purposes which would be accounted for in accordance with the Standard of GRAP on Property, Plant and Equipment.

#### **Subsequent Measurement**

Fair value

Subsequent to initial measurement investment property is measured at fair value. The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (which ever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property. Valuations are to be carried out with sufficient frequency owing to the prevailing

Annual Financial Statements for the year ended June 30, 2022

# Accounting Policies

#### 1.4 Investment property (continued)

circumstances, that may warrant a revaluation, i.e ercetion of a new block of flats next to the rental flat.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

#### Derecognition

The gain or loss arising from the derecognition of an item of Investment Property is included in Surplus or Deficit when the item is derecognised. Gains are not classified as Revenue.

#### 1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and the expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset whose it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and

the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.5 Property, plant and equipment (continued)

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

| Item                                   | Depreciation method | Average useful life |
|--|---------------------|---------------------|
| Buildings                              | Straight-line       | 8 -50               |
| Mobile offices                         | Straight-line       | 5 - 10              |
| Electrical infrastructure              | Straight-line       | 15 -50              |
| Roads and Paving Infrastructure        | Straight-line       | 8 - 80              |
| Gravel Roads Infrastructure            | Straight-line       | 3 - 10              |
| Landfill Sites                         | Straight-line       | 15 - 90             |
| Community assets                       | Straight-line       | 5 - 80              |
| Transport assets                       | Straight-line       | 5 - 20              |
| Computer equipment                     | Straight-line       | 3 - 20              |
| Furniture, Fittings & Office Equipment | Straight-line       | 3 - 20              |
| Watercraft                             | Straight-line       | 15                  |
| Bins & Containers                      | Straight-line       | 5 - 20              |
| Specialised Plant and Equipment        | Straight-line       | 2 - 15              |
| Library Books                          | Straight-line       | 5 - 20              |
| Leased equipment                       | Straight-line       | Lease period        |

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction of development in the notes to the financial statements (see note 11). 30 NON 5055

#### 1.6 Intangible assets

An intangible asset is an identifiable, non-monetary asset without physical substance. The proficipality has classified computer software and municipal website

An asset is identifiable if it either:

 is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or

SOUTH AFRICA

 arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- · there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the
  asset
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

| Item                                | Depreciation method | Average useful life |
|-------------------------------------|---------------------|---------------------|
| Computer software, other<br>Website | Straight-line       | 1-4<br>Indefinite   |

# **Accounting Policies**

#### 1.6 Intangible assets (continued)

The gain or loss arising from the derecognition of intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

#### 1.7 Heritage assets

Assets are resources controlled by an municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Heritage Assets are not depreciated owing to uncertainty regarding to their estimated useful lives. The municipality assess at each reporting date if there is an indication of impairment.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An impairment loss of a non-cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

An inalienable item is an asset that an municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Recoverable amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Value in use of a cash-generating asset is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Value in use of a non-cash-generating asset is the present value of the asset's remaining service potential.

Subsequently all Heritage Assets are measured at cost, less accumulated impairment losses.

#### Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

#### Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.7 Heritage assets (continued)

#### Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

After recognition as an asset, a class of heritage assets, whose fair value can be measured reliably, is carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase is credited directly to a revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

#### Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

#### Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

#### 1,8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary toan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

Annual Financial Statements for the year ended June 30, 2022

# AUDITOR GENERAL A SOUTH AFRICA

# **Accounting Policies**

#### 1.8 Financial instruments (continued)

The effective interest method is a method of calculating the amortised cost of a financial asset of a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash:
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- · exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as
  forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.8 Financial instruments (continued)

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

AUDITOR GENERAL SOLITH AFRICA

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- · the entity designates at fair value at initial recognition; or
- · are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- contingent consideration of an acquirer in a transfer of functions between entities not under common control to which
  the Standard of GRAP on Transfer of Functions Between Entities Not Under Common Control (GRAP 106) applies
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

#### Impairment of Financial Assets

Financial Assets, other than those at fair value, are assessed for indicators of impairment at the end of each reporting period. Financial Assets are impaired where there is objective evidence of impairment of Financial Assets (such as the probability of insolvency or significant financial difficulties of the debtor). If there is such evidence the recoverable amount is estimated and an impairment loss is recognised through the use of an allowance account.

A provision for impairment of Accounts Receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The provision is made whereby the recoverability of accounts receivable is assessed individually and then collectively after grouping the assets in financial assets with similar credit risk characteristics. The amount of the provision is the difference between the Financial Asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

Future cash flows in a group of Financial Assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Cash flows relating to short-term receivables are not discounted where the effect of discounting is immaterial.

Government accounts are not provided for as such accounts are regarded as receivable for the following reasons:

- -It is management's judgement that the accounts are not "lost events" in terms of GRAP 104.58.
- -State Departments and Entities have to pay their creditors within 30 days in terms of the MFMA.
- -Interest is charged on all outstanding balances at a rate of 10% per annum.
- -There is an urge from National Treasury that State Departments and Entities should start paying their outstanding debt.

The carrying amount of the Financial Asset is reduced by the impairment loss directly for all Financial Assets carried at Amortised Cost with the exception of Consumer Debtors, where the carrying amount is reduced through the use of an allowance account. When a Consumer Debtor is considered uncollectible, it is written off against the allowance account.

Subsequent recoveries of amounts previously written off are credited against revenue. Changes in the carrying amount of the allowance account are recognised in Surplus or Deficit.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.8 Financial instruments (continued)

#### Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Cash and cash equivalents Receivables from exchange transactions Receivables from non-exchange transactions Category

Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Consumer deposits
Payables from exchange transactions
Payables from non-exchange transactions

Category

Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost

#### 1.9 Inventories

Inventories comprise stationery for distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the Inventories to their current location and condition.

Where Inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

## 1.10 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

# 1.10 Impairment of cash-generating assets (continued)

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

SOUTH AFRICA

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- · the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Judgements made by management in applying the criteria to designate assets as cash-generating assets or non-cash-generating assets, are as follows:

An impairment of assets measured per the revaluation method reduces the Revaluation Surplus for that asset. The decrease shall be debited directly to a Revaluation Surplus to the extent of any credit balance existing in the Revaluation Surplus in respect of that asset.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

An impairment loss is recognised for cash generating units if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase and would be credited directly against the Revaluation Surplus to the extent of any previous impairments recognised against said reserve in respect of that asset.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

#### 1.11 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Annual Financial Statements for the year ended June 30, 2022

# Accounting Policies

# 1.11 Provisions and contingencies (continued)

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

AUDITON GENERAL

SOUTH AFRICA

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of an activity/operating unit concerned;
  - the principal locations affected:
  - the location, function, and approximate number of employees who will be compensated for services being terminated;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 51.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

1.11 Provisions and contingencies (continued)

- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

AUDITOR GENERAL SOUTH AFRICA 30 NOV 2022

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, an municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets;
   and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Provisions are reviewed at reporting date and the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money.

The impact of the periodic unwinding of the discount is recognised in Surplus or Deficit as a finance cost as it occurs,

#### Decommissioning, restoration and similar liability

Estimated long-term environmental provisions, comprising rehabilitation and landfill site closure, are based on the municipality's policy, taking into account current technological, environmental and regulatory requirements. The provision for rehabilitation is recognised as and when the environmental liability arises. To the extent that the obligations relate to the asset, they are capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset are charged to Surplus or Deficit.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficit.

#### 1.12 Revenue from exchange transactions

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.12 Revenue from exchange transactions (continued)

Revenue is derived from a variety of sources which include revenue from trading activities and other services provided.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the municipality's activities, Revenue is shown net of value-added tax, returns, rebates and discounts.

#### **Service Charges**

Service Charges are levied in terms of approved tariffs.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to all properties that have improvements. Tariffs are determined per category of property usage, and are levied based on the extent of each property.

#### **Rentals Received**

Revenue from the rental of facilities and equipment is recognised on a Straight-line Basis over the term of the lease agreement.

#### Finance Income

Interest earned on investments is recognised in Surplus or Deficit on the Time-proportionate Basis that takes into account the effective yield on the investment.

#### **Tariff Charges**

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

#### **Revenue from Agency Services**

Revenue for agency services is recognised on a daily basis once the revenue collected on behalf of agents has been quantified. The revenue recognised is in terms of the agency agreement.

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor
  effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
   and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.13 Revenue from non-exchange transactions

#### Rates and taxes

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a Time-proportionate Basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

AUDITOR GENERAL SOUTH AFRICA 30 NOV 2022

#### Fines

Fines constitute both spot fines and summonses.

Revenue for fines is recognised when the fine is issued at the full amount of the receivable. The municipality uses estimates to determine the amount of revenue that the municipality is entitled to collect that is subject to further legal proceedings.

#### **Public Contributions**

Donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Revenue from public contributions is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment are brought into use.

Assets acquired from non-exchange transactions are measured at fair value in accordance with GRAP 23.

#### **Government Grants and Receipts**

Equitable share allocations are recognised in revenue at the start of the financial year if no time-based restrictions exist. Conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in Surplus or Deficit in the period in which they become receivable.

Unspent conditional grants are financial liabilities that are separately reflected on the statement of financial position. They represent unspent government grants, subsidies and contributions from government organs.

This liability always has to be cash-backed. The following provisions are set for the creation and utilisation of this creditor:

- Unspent conditional grants are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met are transferred to revenue in the statement of financial performance.
- The cash which backs up the creditor is invested as individual investment or part of the general investments of the Municipality until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is
  recorded as part of the creditor. If it is the Municipality's interest, it is recognised as interest earned in the statement of
  financial performance.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.13 Revenue from non-exchange transactions (continued)

Unpaid conditional grants are assets in terms of the Framework that are separately reflected on the statement of financial position. The asset is recognised when the Municipality has an enforceable right to receive the grant or if it is virtually certain that it will be received based on that grant conditions have been met. They represent unpaid government grants, subsidies and contributions from the public.

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest, it is recognised as interest earned in Surplus or Deficit.

# Revenue from Recovery of Unauthorised, Irregular, Fruitless and Wasteful Expenditure

The recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No 56 of 2003) and is recognised as revenue when the recovery thereof from the responsible councillors or officials became virtually certain in a financial period subsequent to the period when the actual unauthorised, irregular, fruitless and wasteful expenditure was incurred.

#### 1.14 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

AUDITOR GENERAL SOUTH AFRICA 30 NOV 2022

# **Umzimvubu Local Municipality**

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

1.14 Significant judgements and sources of estimation uncertainty (continued)

Other significant judgements, sources of estimation uncertainty and/or relating information, have been disclosed in the relating notes.

#### Impairment of Financial Assets

Accounting Policy 1.8 on Impairment of Financial Assets describes the process followed to determine the value at which Financial Assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment and used its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of the reporting period. The management of the municipality is satisfied that impairment of Financial Assets recorded during the year is appropriate.

Accounting Policy 1.8 on Impairment of Financial Assets describes the process followed to determine the value at which Financial Assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment and used its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of the reporting period. The management of the municipality is satisfied that impairment of Financial Assets recorded during the year is appropriate.

#### Impairment of Trade Receivables:

The calculation in respect of the impairment of Debtors is based on an assessment of the extent to which Debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This is performed per service-identifiable categories across all classes of debtors.

#### Useful lives of Property, Plant and Equipment, Intangible Assets and Investment Property

As described in Accounting Policies and the municipality depreciates its Property, Plant & Equipment and amortises its Intangible Assets, over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use.

In making the above-mentioned estimates and judgement, management considered the subsequent measurement criteria and indicators of potential impairment losses. In particular, the calculation of the recoverable service amount for PPE and Intangible Assets and the Net Realisable Value for Inventories involves significant judgment by management.

In making the above-mentioned estimates and judgement, management considered the subsequent measurement criteria and indicators of potential impairment losses. In particular, the calculation of the recoverable service amount for PPE and Intangible Assets and the Net Realisable Value for Inventories involves significant judgment by management. Estimated impairments during the year to Plant and Equipment, and Intangible Assets are disclosed in Notes 8 and 9 to the Annual Financial Statements, if applicable.

#### **Defined Benefit Plan Liabilities**

As described in Accounting Policy 1.18 Employee Benefits – Post-employment Benefits, the municipality obtains actuarial valuations of its Defined Benefit Plan Liabilities. The defined benefit obligations of the municipality that were identified are Post retirement Health Benefit Obligations and Long-service Awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the relevant Notes to the Annual Financial Statements.

#### **Provisions and Contingent Liabilities**

Management judgement is required when recognising and measuring Provisions and when measuring Contingent Liabilities. Provisions are discounted where the effect of discounting is material using actuarial valuations.

### **Budget Information**

Deviations between budget and actual amounts are regarded as material difference

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

1.14 Significant judgements and sources of estimation uncertainty (continued)

#### Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the end of the reporting period.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

The carrying amount of available-for-sale financial assets would be an estimated R - lower or R - higher were the discounted rate used in the discount cash flow analysis to differ by 10% from management's estimates.

#### Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the [name a key assumption] assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of goodwill and tangible assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In addition, goodwill is tested on an annual basis for impairment. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including [list entity specific variables, i.e. production estimates, supply demand], together with economic factors such as [list economic factors such as exchange rates inflation interest].

#### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 18 - Provisions.

#### Post-retirement benefits

The present value of the post-retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post-retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 1.18.

Annual Financial Statements for the year ended June 30, 2022

# Accounting Policies

#### Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

AUDITOR GENERAL

SOUTH AFRICA

## 1.15 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during  $\bar{a}$  particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

If the related asset is measured using the revaluation model:

- changes in the liability after the revaluation surplus or deficit previously recognised on that asset, so that:
  - a decrease in the liability (subject to (b)) is credited to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit
    - an increase in the liability is recognised in surplus or deficit, except that it is debited to the revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.
- (b) in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the asset been carried under the cost model, the excess is recognised immediately in surplus or deficit; and
- (c) a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Any such revaluation is taken into account in determining the amounts to be taken to surplus or deficit or net assets under (a). If a revaluation is necessary, all assets of that class are revalued.

#### 1.16 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.16 Leases (continued)

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

#### 1.17 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

#### Useful life is either:

- · the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

# 1.17 Impairment of non-cash-generating assets (continued)

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the non-cash generating unit to which the asset belongs is determined.

The recoverable service amount of a non-cash generating asset is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

An impairment loss is recognised for non-cash generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

#### 1.18 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

## 1.18 Employee benefits (continued)

#### Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the
  absences is due to be settled within twelve months after the end of the reporting period in which the employees
  render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
  undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent
  that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

#### Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Annual Financial Statements for the year ended June 30, 2022

# **Accounting Policies**

#### 1.18 Employee benefits (continued)

#### Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

#### Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- éstimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
- those changes were enacted before the reporting date; or
- past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Annual Financial Statements for the year ended June 30, 2022

### **Accounting Policies**

### 1.18 Employee benefits (continued)

### Other post retirement obligations

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The entity shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost:
- interest cost:
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- · past service cost, which shall all be recognised immediately; and
- the effect of any curtailments or settlements.

### 1.19 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

### 1.20 Cost of sales

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all deficits of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The related cost of providing services recognised as revenue in the current period is included in cost of sales.

Contract costs comprise:

- costs that relate directly to the specific contract;
- costs that are attributable to contract activity in general and can be allocated to the contract on a systematic and rational basis; and
- such other costs as are specifically chargeable to the customer under the terms of the contract.

### 1.21 Accounting by principals and agents

### Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

Annual Financial Statements for the year ended June 30, 2022

### **Accounting Policies**

### 1.21 Accounting by principals and agents (continued)

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

### Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

### Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

### Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its
  own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

### Recognition

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

### 1.22 Insurance fund

The insurance fund is accounted for at net of cost, and any liability thereto, and adjustments are made only where there are valid claims to the fund.

### 1.23 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.24 Unauthorised expenditure

Unauthorised expenditure means:

· overspending of a vote or a main division within a vote; and

Annual Financial Statements for the year ended June 30, 2022

### **Accounting Policies**

### 1.24 Unauthorised expenditure (continued)

• expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

Unauthorised expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

### 1,25 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Fruitless and wasteful expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

### 1.26 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy.

Irregular expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

### 1,27 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

### 1,28 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

### Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

Annual Financial Statements for the year ended June 30, 2022

### **Accounting Policies**

### 1.29 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a cash basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2021-07-01 to 2022-06-30.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

### 1.30 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the ventures).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

### 1.31 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date);
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

Annual Financial Statements for the year ended June 30, 2022

### **Accounting Policies**

### 1.31 Events after reporting date (continued)

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

### 1.32 Accumulated Surplus

In order to finance the provision of Infrastructure and other items of Property, Plant and Equipment from internal sources, amounts are transferred from the Accumulated Surplus/(Deficit) to the CRR in terms of delegated powers.

The following provisions are set for the creation and utilisation of the CRR:

- The cash funds that back up the CRR are invested until utilised. The cash may only be invested in accordance with the Investment Policy of the municipality.
- The CRR may be utilised for the purpose of purchasing items of Property, Plant and Equipment and may not be used for the maintenance of these items.
- Whenever an asset is purchased out of the CRR, an amount equal to the cost price of the asset is transferred from the CRR and the Accumulated Surplus/(Deficit) is credited by a corresponding amount.

### 1.33 Bad Debts written off

### Consumer debtors

When the municipality identifies consumer debtors whose debts appear to be irrecoverable even after the whole credit control and debt collection process has been followed in terms of trying to obtain payment, then such accounts be regarded as irrecoverable.

Once the debt is regarded as irrecoverable during the year it must be grouped with others so that the report is presented to Council to solicit a resolution to write off irrecoverable debts.

### Traffic fines

Traffic fines debtors are assessed for each reporting period to establish their collectability. Once traffic fines debtors are regarded as irrecoverable during the course if the year, a report of all traffic fines doubtful debtors is presented to Council to solicit a resolution to write off irrecoverable debts

Traffic fines infringements that have not been served within a period of 18 months of the date of the alleged offence be withdrawn and/or warrants to the arrest that have not been executed within 2 years after the date of authorisation thereof be returned with the control documents to the relevant Magistrate for cancellation as per the National Prosecuting Authority of South Africa. (UNIFORM NATIONAL INSTRUCTION IN RESPECT OF TRAFFIC INFRINGMENTS MATTERS ISSUED BY VARIOUS LAW ENFORCEMENT AGENCIES)

### Notes to the Annual Financial Statements 2022 2021

### 2. New standards and interpretations

### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

### Grap 1

Directive 14: The application of Standards of GRAP by Public Entities that apply IFRS® Standards

### Presentation of Financial Statements April 1, 2021

sentation of Expected impact:

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

### 2. New standards and interpretations (continued)

### 2.2 Standards and Interpretations early adopted

The municipality has chosen to early adopt the following standards and interpretations:

Standard/ Interpretation:

Effective date: Years beginning on or after **Expected impact:** 

### 2.3 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after July 1, 2022 or later periods:

| Standard | / Interpretation:  | Effective date:<br>Years beginning on or<br>after | Expected impact:   |
|----------|--|---|--|
| •        | Guideline: Guideline on Accounting for Landfill Sites  | Not yet determined                                | Not expected to impact results but may result in additional disclosure       |
| •        | GRAP 25 (as revised): Employee Benefits  | Not yet determined                                | Not expected to impact results but may result in additional disclosure       |
| •        | iGRAP 7 (as revised): Limit on defined benefit asset, minimum funding requirements and their interaction | Not yet determined                                | Not expected to impact<br>results but may result in<br>additional disclosure |
| •        | Guideline: Guideline on the Application of Materiality to Financial Statements                           | Not yet determined                                | Not expected to impact<br>results but may result in<br>additional disclosure |
|          | GRAP 104 (as revised): Financial Instruments   | April 1, 2025                                     | Not expected to impact results but may result in additional disclosure       |
| •        | iGRAP 21: The Effect of Past Decisions on Materiality  | April 1, 2023                                     | Not expected to impact results but may result in additional disclosure       |
| •        | GRAP 2020: Improvements to the standards of GRAP 2020  | April 1, 2023                                     | Not expected to impact results but may result in additional disclosure       |
| •        | GRAP 1 (amended): Presentation of Financial Statements   | April 1, 2023                                     | Not expected to impact results but may result in additional disclosure       |

### 2.4 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after July 1, 2022 or later periods but are not relevant to its operations:

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

|  | 2022      | 2021      |
|--|-----------|-----------|
| 3. Inventories                                       |           |           |
| Finished goods                                       | 702,809   | 752,450   |
| Inventories recognised as an expense during the year | 7,304,566 | 6,134,330 |

Inventory consumables are held for own use and measured at the lower of cost and current replacement cost. No write downs of inventory to net realisable value were required.

### Inventory pledged as security

No inventories have been pledged as collateral for the liabilities of the municipality.

There was no inventory retained as personal protective equipment, by the municipality.

### 4. Operating lease asset (liability)

| Current assets | 13,884,681 | 11,694,611 |
|----------------|------------|------------|
|                |            |            |

Operating Leases are recognised on the straight-line basis as per the requirement of GRAP 13. The lease receivable recognised is in respect of Non-cancelable Operating Leases.

### **Leasing Arrangements**

The operating lease relate to Property owned by the municipality with lease terms of 2 to 50 years (2020/21 - 2 to 50 years) with an option to extend.

All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

### **Amounts receivable under Operating Leases**

At the Reporting Date the following minimum payments were receivable under Non-cancelable Operating Leases for Property, plant and equipment, which are receivable as follows:

| Reconciliation                            |             |             |
|---|-------------|-------------|
| Opening balances                          | 11,694,610  | 9,440,012   |
| Effects of straightlining for the year    | 2,190,071   | 2,254,598   |
|   | 13,884,681  | 11,694,610  |
| Operating Lease Arrangements              |             |             |
| Up to 1 Year                              | 1,023,834   | 1,414,122   |
| 2 to 5 years                              | 1,750,951   | 1,663,524   |
| More than 5 years                         | 119,788,289 | 119,788,289 |
|   | 122,563,074 | 122,865,935 |
| 5. Receivables from exchange transactions |             |             |
| Consumer debtors - Refuse                 | 539,328     | 829,858     |
| Consumer debtors - Rentals                | 24,711      | 216,301     |
|   | 564,039     | 1,046,159   |

There are no trade and other receivables pledged as security.

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

| · · · · · · · · · · · · · · · · · · · | 2022 | 2021 |
|---------------------------------------|------|------|

### 5. Receivables from exchange transactions (continued)

### Credit quality of trade and other receivables

The credit quality of trade and other receivables that are neither past nor due nor impaired can be assessed for indicators of impairment. The municipality considers that the above financial assets that are not impaired at each of the reporting dates under review are of good credit quality. The municipality continuously monitors consumers and identified groups by reference to annual payment rates and incorporates this information into its credit risk credit control. No external credit ratings is performed.

Consumers receivables from refuse removal are billed monthly. Interest is charged on overdue receivables from exchange transactions at a rate of 10% per annum.

The municipality enforces its approved credit policy to ensure the recovery of receivables. None of the financial assets that are fully performing have been renegotiated in the last year.

### Fair value of trade and other receivables

The management of the municipality is of the opinion that the carrying value of Receivables approximate their fair values.

### Trade and other receivables past due but not impaired

Receivables from exchange transactions which are government debt and past due are not considered to be impaired.

The ageing of amounts past due but not impaired is as follows:

| 1 month past due  | 13,597  | 20,247  |
|-------------------|---------|---------|
| 2 months past due | 12,163  | 19,745  |
| 3 months past due | 368,416 | 563,065 |

### Trade and other receivables impaired

As of June 30, 2022, trade and other receivables of R 12,460,810 (2021: R 7,808,386) were impaired and provided for.

The amount of the provision was R 11,896,771 as of June 30, 2022 (2021: R 6,978,529).

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

| 2022 | 2021 |
|------|------|

### Receivables from non-exchange transactions (continued)

### Statutory receivables general information

### Transaction(s) arising from statute

Statutory receivables arise from the implementation of the Municipality Property Rates Act through levying of property rates to the properties in Umzimvubu and also through implementation of the Adminstrative Adjudication of Road Traffic Offences Act through issuing of traffic fines to offenders.

Statutory receivables are as summarised in this note above.

The credit quality of receivables from non-exchange transactions that are neither past nor due nor impaired can be assessed for indicators of impairment. The municipality considers that the above financial assets that are not impaired at each of the reporting dates under review are of good credit quality. The municipality continuously monitors consumers and identified groups by reference to annual payment rates and incorporates this information into its credit risk credit control. No external credit ratings is performed.

Consumers receivables from rates are billed monthly for business and residential households. Government accounts are billed annually. Interest is charged on overdue consumers receivables at a rate of 10% per annum.

No interest is charged on overdue traffic fines debtors.

The municipality enforces its approved credit policy to ensure the recovery of receivables. None of the financial assets that are fully performing have been renegotiated in the last year.

### Statutory receivables impaired

1 month past due

As of June 30, 2022, Statutory receivables of R43,188,253 (2021: R35,785,581) were impaired and provided for.

The amount of the provision was R27,743,182 as of June 30, 2022 (2021: R27,350,171).

### Receivables from non-exchange transactions past due but not impaired

Receivables from non-exchange transactions which are government debt and past due are not considered to be impaired.

The ageing of amounts past due but not impaired is as follows:

| 2 months past due  | 2,667                                  | 3,333                                   |

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality. No impairment losses have been recognised on investment Property of the municipality at the reporting date.

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

|  |  | <br> | <br> |      |      |
|--|--|------|------|------|------|
|  |  |      |      | 2022 | 2021 |

### 10. Investment property (continued)

### Amounts recognised in surplus or deficit

Rental revenue from Investment property

3.594.628

3.603.921

Investment property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, for administration purposes, or the sale of an asset in the ordinary course of operations. Property with a currently undetermined use, is also classified as investment property.

Investment property is recognised as an asset when it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the Municipality, and the cost or fair value of the investment property can be measured reliably.

All of the municipality's Investment Property is held under freehold interests and no Investment Property had been pledged as security for any liabilities of the municipality.

There are no restrictions on the realisability of Investment Property or the remittance of revenue and proceeds of disposal.

There are no contractual obligations on Investment Property.

### Impairment of Investment property

No impairment losses have been recognised on investment property of the municipality at the reporting date.

### Work-in-progress

The municipality had no capital projects for Investment property which were not completed at year-end.

### **Delayed projects**

No projects that are currently in progress are experiencing significant delays. No projects for the period was halted.

### **Delayed projects**

The municipality has projects that are currently experiencing delays or were halted. For each project, the reason for the delay or halting of the project are noted. The carrying amount of those assets included in the balance of Property, Plant and Equipment are listed below:

Nophoyi Sport Field- The project is in our 3YCP with the intentions to advertise and complete the project. Service provider was terminated due to poor progress on site. The only outstanding item to complete the project was the grassing, however the recent heavy rainfalls caused major damages on the sport field. Expenditure to date is R3 390 430 (2021: R3 390 430).

Silindini Bridge- Similar to Tyinira, the high water levels had huge delays on the project and moreover the river banks were washed by these high volumes of water flows as such this resulted additional scope of works which was not catered for in our tender documentation. The extension of time was granted, and the Contractor awaiting the approval of VO for major earthworks that were not part of the scope. The project is still under construction. The project is budgeted to be completed in the 22/23 financial year, the appointed service provider surrendered the project due to financial constraints. Expenditure to date is R8 393 986 (2021: R7 685 768).

Annual Financial Statements for the year ended June 30, 2022

### 11. Property, plant and equipment (continued)

Infrastructure services on Municipal Plots (Scientific roots) – The project is in our 3YCP with the intention to implement the project. The appointment was only for the professional services. The detailed designs were done and due to budgetary constraints, the Municipality was unable to proceed with the actual construction. The project is budgeted for implementation in the 2022/23 financial year, and it will be advertised before the end of first quarter of the said financial year. Expenditure to date is R1 167 567 (2021: R1 167 567).

**Upgrading of Emaxesibeni Streetlight Along CBD** - The installation of streetlights infrastructure was installed, commissioned for functionality however the cables were stolen and some damaged before the project was officially handed over to the municipality. The material for repairing the cables is budgeted for in the 2022/23 financial year for completion and handing over. Expenditure to date is R6 989 977 (2021: R6 989 977).

Annual Financial Statements for the year ended June 30, 2022

# Notes to the Annual Financial Statements

## 13. Heritage assets (continued)

All of the municipality's Heritage Assets are held under freehold interests and no Heritage Assets had been pledged as security for any liabilities of the municipality.

No restrictions apply to any of the Heritage Assets of the municipality.

## Depreciation and Impairment

In accordance with GRAP 103, a Heritage Asset have an indefinite life and their value appreciates over time due to their cultural, environmental, educational, natural sclentific, technological, artistic or historical significance; and shall not be depreciated but an entity shall assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the entity shall estimate the recoverable amount or the recoverable service amount of the heritage asset.

## Impairment of Heritage Assets

No impairment losses have been recognised on Heritage Assets of the municipality at the reporting date.

# Heritage Assets measured after recognition using the Cost Model

The municipality's Heritage Assets are accounted for according to the cost model and therefore no fair value has been determined.

### Work-in-Progress

The municipality had no capital projects for Heritage Assets which were not completed at year-end.

### **Delayed Projects**

No projects that are currently in progress are experiencing significant delays. No projects for the period was halted.

### Provision for leave pay

Staff Leave accrues to the staff of the municipality on an annual basis, subject to certain conditions. The liability is an estimate of the amount due at the reporting date.

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

| · | 2022 | 2021 |
|---|------|------|

### 18. Employee benefits obligations (continued)

### Provision for performance bonus

A performance bonus, is for senior managers and assistant managers. It is not guaranteed and as it is based on the achievements of the individual against the targets set out in his/her performance agreement. The payment of bonuses is purely based on performance then there is no legal obligation on a municipality to make such payments.

However a constructive obligation is created through the assessment of employees' performance throughout the year and the fact that the municipality has a practice of paying performance bonuses.

### Long service awards liability

Long Service Awards are provided to employees who achieve certain predetermined milestones of service within the municipality

### The following members are eligible for long service bonuses:

| In-service members           |         | 159     | 160     |
|------------------------------|---------|---------|---------|
| Eligible Employees           | Female  | Male    | Total   |
| Number of eligible employees | 91      | 68      | 159     |
| Average annual earnings      | 209,250 | 218,766 | 213,320 |
| Average age                  | 41,8    | 42.8    | 42,2    |
| Average past service         | 9.0     | 9.5     | 9.2     |
|                              | -       | -       | *       |

The earnings disclosed above and used in the valuation include an increase of 4.90% as at 1 July 2022, as per the SALGBC Circular No.: 01/2022.

### **Notes to the Annual Financial Statements**

| <br><u> </u> |      |      |
|--------------|------|------|
|              | 2022 | 2021 |

### 18. Employee benefits obligations (continued)

The next general earnings increase was assumed to take place on 1 July 2023.

### **Last Valuation**

The last valuation was performed in July 2021.

### **Actuarial Valuation Method**

The Projected Unit Credit Method has been used to value the liabilities. The valuation meets the requirements of GRAP 25 as well as those of Advisory Practice Note 301 issued by the Actuarial Society of South Africa. The valuation was prepared by ARCH Actuarial Consulting.

### The amounts recognised in the Statement of Financial Performance are:

|   | 109,000   | 30,000    |
|---|-----------|-----------|
| Expected benefits vesting / paid during the year (N1) | (322,000) | (322,000) |
| Actuarial Losses / (Gain)                             | (146,000) | (144,000) |
| Finance Charges - Interest Cost                       | 196,000   | 149,000   |
| Employee related costs - Current Service Cost         | 381,000   | 347,000   |

N1 - This is the total value of the long-service awards that were expected to be awarded to eligible employees over the year, based on the data at the previous valuation date. Employees are usually entitled to take this award in whole or in part as cash, with the remainder taken as leave. Therefore, this figure should not be confused as being only the amount of cash paid out in respect of the award. It represents the amount actually paid out in cash and the portion that was either taken or "stored" as leave,

If the actual amount of benefits vested is to be included instead in the above table, then the Actuarial Loss / (Gain) must change to exactly offset the impact, such that the Closing Accrued Liability remains unchanged. For example, if the actual amount of benefits vested was R100,000 lower than the estimate (based on last year's data), then the Actuarial Loss / (Gain) would have to reduce by R100,000 to leave the Closing Accrued Liability as is.

### Sensitivity Analysis on the Unfunded Accrued Liability

| Assumption Central assumptions  | % Change | <b>Liability</b> 2,429,000 | % Change |
|---------------------------------|----------|----------------------------|----------|
| General earnings inflation rate | +1%      | 2,553,000                  | 5%       |

### 19. Provisions

The municipality operates two landfill sites situated at emaXesibeni (Mount Ayliff) and kwaBhaca (Mount Frere). In accordance with legislation and to comply with the Department of Water Affairs (DWA) and Department of Economic Development and Environmental Affairs (DEDEAT) on the landfill waste sites, the municipality raises a provision every year for the estimated cost of rehabilitating the land over which the sites are situated.

Due to uncertainties about the amount or timing of these costs, the provision has been made for this cost based on the construction budget to rehabilitate the landfill site at 30 June 2022 at a rate of 11.05% taking into account price escalation of 7.23% relating to inflation. The estimated years for the rehabilitating these sites are 11 years for at emaXesibeni (Mount Ayliff) and 35.2 years for kwaBhaca (Mount Frere).

A valuation of the rehabilitation was conducted by an independent valuer (One Pangaea Expertise & Solutions) and a liability has been raised. Movements in the provision are recognised in the Statement of Financial Performance. The Provision has been determined on the basis of a recent independent financial requirement and viability.

### 26. Agency services (continued)

The municipality is an agent for the Provincial Department of Transport as well as the Eastern Cape Department of Human Settlements.

### **Department of Transport**

The Municipality is an agent for the Department of Transport wherein it is delegated to register and licence motor vehicles on its behalf.

There are no assets or liabilities that are held or incurred on behalf of the principal and recognised in our financial statements. The risks associated with the principal-agent relationship that exist on any monies collected by the municipality on behalf of the principal lies solely with the municipality.

During the year, all collections made are banked and paid over to the Department of Transport on a weekly basis. The income due to the municipality according to the agreement is 19% of the amount collected subject to certain conditions as per the Service Level Agreement and National Road Traffic Act, Act 93 of 1996. During the year, a total of R12 181 511 (2021: R11 744 579) was collected gross of commission.

All monies due to the principal were transferred to the principal and no amounts were owing at year end.

Minimal risk was transferred from the Department of Transport, as the principal, to Umzimvubu Municipality, as the agent, beyond the cash collected on behalf of the principal.

### Eastern Cape Department of Human Settlements.

The Municipality is acting as an agent to the EC Department of Human Settlement into a principal agent arrangement entered between the municipality and the department. In this agreement is between Human Settlements and the municipality, transactions are done with a third party which is the Contractor building the houses on behalf of the Department.

The amount received from the Department that remained unspent at year end was R387 631 (2021: R6 160 485), and the municipality is expected to use this money during the next 12 months. The department did not transfer any risks to the municipality in this arrangement. A total of R5 772 854 (2021: R0) was spent on behalf of the principal during the financial year.

The municipality does not receive any compensation for acting as an agent from this agreement,

| State  | 41,393,265 | 11,066,415 |
|  | 48,595,020 | 17,733,488 |

Annual valuation are processed on a continuous basis to take into account changes in individual property values due to alterations and subdivisions. Rates tariffs remain the same as 2021 (Agricultural 0.0017, Residential 0.0058, Business 0.0140, Vacant stands 0.0140, Government properties 0.0186, and Public service Infrastructure 0.0015).

Rates are levied monthly on property owners and are payable on the 7th of each month. Property owners can request that the full amount for the year be raised inJuly in which case the amount has to be paid by 30 September. Interest is levied at a rate of 10% as determined by council on outstanding rates amounts.

Welfare organisations are exempted from the payment of rates, while the first R15 000 of the valuation on improved residential properties exempted from payment of rates. An additional rebate of 25% of the current year rates are allowed for senior citizens, disabled persons and medically boarded property owners. There is a 15% rebate of rates allowed for the three years of a newly developed property from the date of issuance of certificate of occupancy.

#### 53. Risk management

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance. The municipality uses derivative financial instruments to hedge certain risk exposures. Risk management is carried out by a central treasury department (entity treasury) under policies approved by the . Municipality treasury identifies, evaluates and hedges financial risks in close co-operation with the municipality's operating units. The provide written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

Annual Financial Statements for the year ended June 30, 2022

## **Notes to the Annual Financial Statements**

2022

2021

#### 53. Risk management (continued)

#### Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, municipality treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

#### Market risk

#### Interest rate risk

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with First National Bank and Nedbank. No investments with a tenure exceeding twelve months are made.

The municipality is not exposed to credit interest rate risk as the municipality has no borrowings.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

The municipality had no floating rate long-term financial instruments at year-end requiring an Interest Rate Sensitivity Analysis.

2021

#### 54. Segment reporting

#### Identification of segments

For management purposes, the municipality is organised and operates in nine key functional segments (or business units). To this end, management monitors the operating results of these business units for the purpose of making decisions about resource allocations and assessment of performance. Revenues and expenditures relating to these business units are allocated at a transactional level. Costs relating to the governance and administration of the municipality are not allocated to these business units.

The nine key business units comprise of:

#### 1. Citizens and Community safety

This segment consists of all services provided by the municipality to citizens & for community safety.

#### 2, Executive and Council

This segment consists of all services provided by Council and Executive to the community.

#### 3. Budget and treasury office

This segment consists of all services for the providing of finance and administration operations of the municipality.

#### 4. Office of the Municipal Manager

This segment consists of all services for the providing of governance and administration for the municipality.

#### 5. Infrastructure and Project management unit

This segment consists of all services for the providing of infrastructure to the community.

#### 6. Public Safety

This segment consists of all services for the providing of public safety to the community.

#### 7. Road Transport

This segment consists of all services for the providing of road transport and infrastructure to the community.

#### 8. Sport and Recreation

This segment consists of all services for sports & recreation provided to the community.

#### 9. Waste Management

This segment consists of waste management services provided to the community.

No individually material operating segments have been aggregated to form the above reportable operating segments.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on nonfinancial metrics and the segment's operating surplus or deficit, measured consistently with the accounting policies applied in the Annual Financial Statements. There are no differences in measurement of these reportable segments' surplus/deficit and that of the entity's surplus/deficit nor are there any differences in measurement of assets and liabilities.

Inter-business unit services are not valued and are deemed to have been supplied for no consideration and are therefore not eliminated. However, the quality of services provided internally is monitored as part of the nonfinancial service performance information.

The municipality operates within 27 community wards, the municipality does however not monitor operating results for these geographical segments, and operational results are only monitored within the business units as previously disclosed.

Management assesses that the measurement principles of the accrual basis are most consistent with those used in measuring the corresponding amounts in the entity's financial statements. The accrual measure of surplus or deficit and assets or liabilities is therefore used in the segment report. There are no differences in the measurements between segments..

#### Segment surplus or deficit

Annual Financial Statements for the year ended June 30, 2022

#### Notes to the Annual Financial Statements

| Edda! All dalle Toda Toda Toda         |         |         |
|--|---------|---------|
| Less: Amounts recovered - current      | (7,668) | (2,000) |
| Add: Expenditure identified - current  | -       | 61,343  |
| Opening balance as previously reported | 871,710 | 812,367 |
| 55. Fruitless and wasteful expenditure |         |         |

Fruitless and wasteful expenditure is presented inclusive of VAT

The case relates to 3 officials that were formally placed at the E-Natis officials and the result of Disciplinary proceedings led to the recovery that is in progress at reporting date.

#### 56. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the council and includes a note to the annual financial statements.

In terms of section 36(2) of the Municipal Supply Chain Management Regulations approved by the council, any deviation from the Supply Chain Management Policy needs to be approved / condoned by the Municipal Manager, noted by Council and bids where the formal procurement processes could not be followed must be noted in the Annual Financial Statements.

The following deviations from the tender stipulations in terms of the municipality's Supply Chain Management Policy were ratified by the Municipal Manager and reported to Council:

| Supplier | name and | l Reason | for | Deviation |
|----------|----------|----------|-----|-----------|
|          |          |          |     |           |

SABC Corporation (Pty) Ltd

68,207

Awareness campaigns about municipal programmes and projects flowing from IDP which are targeted to local audience being Umzimvubu community amongst all radio stations, it was evidenced that Umhlobo Wenene has the highest listenership in the area of Umzimvubu and therefore impractical to obtain quotations from other service providers but directly from SABC Corporation (Pty) Ltd for such services.

SABC Corporation (Pty) Ltd

47,783

It will be impractical to follow SCM processes in terms of requesting quotations as per SCM thresholds due to the fact that the nature of the services requires the municipality to do it directly to one service provider being SABC Umhlobo Wenene. The municipality intends to do awareness about municipal programmes and projects flowing from IDP which targeted local audience being Umzimvubu community and Amongst all radio stations it has been evidence that Umhlobo Wenene has the highest listenership in the area of Umzimvubu Jurisdiction hence Umhlobo Wenene at an amount of R47 782.

Government Printing Works - Printing

22,087

Gazette of Municipal by –Laws is the only service provider done this type of service by Government Printing works. The municipality was Gazetting of By-Laws (2020: Building plan fees.)

Government Printing Works - Printing

3,026

Gazette of Municipal by –Laws is the only service provider done this type of service by Government Printing works. The municipality was Gazetting Rates tariffs for 2020/21.

#### Supply chain management regulations

In terms of section 36 of the Municipal Supply Chain Management Regulations any deviation from the Supply Chain Management Policy needs to be approved/condoned by the City Manager and noted by Council. The expenses incurred as listed hereunder have been condoned.

#### Interest charged on outstanding debtors - [MFMA 64 (2)(g)]

In terms of section 64 (2)(g) of the MFMA the municipality must charge interest on arrears, except where the council has granted exemptions in accordance with its budget related policies and within a prescribed framework. The municipality charges interest on outstanding debtors account at a rate of 10% per annum as approved by the council.

# **Notes to the Annual Financial Statements**

#### 58. SCM regulation 45 disclosures

The municipality bought goods from the following companies, where the directors are (related to) government officials.

The transactions were concluded in full compliance with the municipality's Supply Chain Management Policy and the transactions are considered to be at arm's length:

Annual Financial Statements for the year ended June 30, 2022

#### **Notes to the Annual Financial Statements**

#### 59. COVID-19 Additional disclosure

At the end of March 2020, the COVID-19 virus was declared a pandemic by the World Health Organisation and by the South African Government. South Africa entered into lockdown on 26th March 2020, which meant that businesses that were not seen as essential had to shut down.

This then meant any facilities that are normally rented out by the municipality had to be shut down and the affordability customers was negatively affected as such debt collection reduced even further. COVID-19 had a significant impact on the amounts as disclosed on the Annual Financial Statements. The affected areas were mainly debtors, cash and cash equivalent, debtor's impairment.

All areas of society were affected by the global pandemic as a result of the COVID-19 virus. South African government announced the national state of disaster and further gazetted regulations implementing National lockdown Level 5. The declaration of the national state of disaster as published in Gazette No 43096 on the 15th March 2020 and extended thereafter has had an impact which meant that businesses that were not seen as essential had to shut down.

COVID 19 had a significant impact on the amounts as disclosed on the Annual Financial Statements. The affected areas were mainly debtors, cash and cash equivalent, debtor's impairment and spending particularly on capital grants which the municipality under performed and resulted to unspent conditional grants. The Municipality has applied and for roll over to National Treasury.

The municipality continued to provide services during the national state of national disaster and raised revenue in accordance with services provided under both exchange and non-exchange revenue. Management has assessed that there have been no material changes in revenue raised for services. The nationwide lockdown has had a negative impact on the entity's recovery of income generated. The municipality in its assessment of impairment has considered the consumers risk profile and payment history.

Management has considered the impact of COVID-19 and that there have been no material changes in the use of asset that would require a change in the expected useful life of assets.

No material information has come to the attention of management to suggest that there is a going concern issue. The financial statements for the year ended 30 June 2022 have been prepared under the going concern assumption.

The amount spent by the council on COVID-19 related expenses for the year ended 30 June 2022 is R106 800 (2021: R955 447).

#### 60. Operational revenue

| Other income - (rollup) | 168,238 | 86,530 |
|-------------------------|---------|--------|
|                         |         |        |

#### 61. Operating (deficit) surplus

Operating (deficit) surplus for the year is stated after accounting for the following:

#### Operating lease charges

Equipment

Contractual amounts
 101,903 203,849

#### 62. Events after the reporting date

Disclose for each material category of non-adjusting events after the reporting date:

- nature of the event.
- estimation of its financial effect or a statement that such an estimation cannot be made.

#### 63. Unauthorised expenditure

| Add: Unauthorised expenditure - current<br>Less: Amount authorised - current | 77,440,532<br>(77,440,532) | 50 |
|--|----------------------------|----|
| Closing balance  |                            |    |

Annual Financial Statements for the year ended June 30, 2022

#### Notes to the Annual Financial Statements

#### 63. Unauthorised expenditure (continued)

During the year, assets worth R77 440 532 which relate to the electrification network of rural areas that are funded by INEP Grant were transfered to ESKOM. These asset are budgeted for under Capital Expenditure during the time they are constructed. There is no additional budget raised for the accounting entry of the transfer when the assets are completed as this would result in budgeting for the same expenditure twice. The effect of the transfer of functions and subsequent recognition of the transfer in the statement of financial performance leads to Unauthorised Expenditure.

This was presented to Council on the 24 June 2022 for authorisation.

The over expenditure incurred by municipal departments during the year is attributable to the following categories:

| Non-cash                       | 77,440,532 | 40 |
|--------------------------------|------------|----|
| Analysed as follows: non-cash  |            |    |
| Transfer of functions to Eskom | 77,440,532 | *: |

#### 64. Prior-year adjustments

Presented below are those items contained in the statement of financial position, statement of financial performance and cash flow statement that have been affected by prior-year adjustments:

N1: Being adjustment to PPE to capitalise the increase in provision for landfill site restaoration with acturial calculations and the related accummulated depreciation

N2: Reclassification Prepayments that were previously classified as receivabels from exchange transaction.

N3: Being reclassification of Department of Housing liability from Unspent Conditional liability to Payables from non-exchange transactions.

N4: Being recognition of the unspent grant from Office of the Premier at time of receipt.

N5: The effects of the chnages to the accummulated surplus

#### 65. Budget differences

#### Material differences between budget and actual amounts

Below are explanations of variances that are more than 10% between budgeted amounts and actual amounts for the year.

N1: The variance is as a result of over collection against the budget

N2: The cause of the variance is poor collection from rentals although there are measures in place to improve collection

N3: Variance is as a result of over budgeting and the impact of interest rate fluctuations due to economy still recovering from covid 19

N4: collection targets could not be met since hawkers are still recovering from the effects of lockdown

N5: Vat receivable is budgeted as revenue however on receipts it goes to vat receivables under current assets

N6: the variance for licences and forfeits- non exchange were not budgeted for

N7: Variance caused by grace period the given by national department of transport

N8: Cost containment regulation is a contributing factor towards cutting travelling costs

N9: the variance identified is as a result of over budgeting

N11: Variance is as result of fair value adjustment to investment property

N12: There was over budgeting on inventory due the factor for every inventory consumed segment the was a need of budgeting for acquisition of inventory

N13: The identified difference is caused by under-budgeting on operating lease

N14: the variance identified is as a result of over budgeting

N15: the variance is caused by receivables budgeted under revenue

N16: The identified variance is caused by over budgeting on Cash and cash equivalents

N17: The identified difference is called by acquiring new assets

N18: The anticipated acquisition of PPE could not be met

N19: The anticipated acquisition of Intangible assets could not be met

N20: The identified variance is as a result of taxes and transfers not budgeted for

Annual Financial Statements for the year ended June 30, 2022

### **Notes to the Annual Financial Statements**

#### 65. Budget differences (continued)

- N21: The variance is as a result of untraceable deposits
- N21: The variance is as a result of unspent grants not being budgeted for
- N22: The variance is as a result provisions being under budgeted for
- N23: The variance is as a result provisions being under budgeted for
- N24: The variance is as a result provisions being under budgeted for
- N26: The identified difference is as a result of under budgeting on NDR
- N27: The variance is as a result of poor revenue collection
- N27: The difference is due to under collection on rates due to COVID 19 constraint encountered by residents
- N28: The difference is due to under collection on service charge due to COVID 19 constraint encountered by residents
- N29: The variance is due to budgeting of vat refunds which is accounted for separately
- N31: Some the grants we anticipated to receive were never full received e.g OTP grant and Human settlement grant
- N30: The identified difference is due to increase in reporate
- N33: the variance is caused by implementation of cost containment regulation
- N32: the variance is caused by confusion caused by constitutional court judgement on SCM regulations, municipality had to stop the procurement of capital assets
- N35: There was no budget allocated for the disposal of Assets
- N36: There was no budget allocated for the disposal of Assets
- N37: Prepayments are not budgeted for. The municipality took advantage of discounts offered by SALGA hence the prepayment was made.

Annual Financial Statements for the year ended June 30, 2022

## **Notes to the Annual Financial Statements**

65. Budget differences (continued)

#### 66. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these are listed below:

- (i) The Council adopted the 2021 to 2024 Budget. This three-year Medium Term Revenue and Expenditure Framework (MTREF) to supported the ongoing delivery of municipal services to residents reflected that the Budget was cash-backed over the three-year period.
- (ii) The municipality's Budget is subjected to a very rigorous independent assessment process to assess its cash-backing status before it is ultimately approved by Council.
- (iii) Strict daily cash management processes are embedded in the municipality's operations to manage and monitor all actual cash inflows and cash outflows in terms of the cash-flow forecast supporting the Budget. The cash management processes is complemented by monthly and quarterly reporting, highlighting the actual cash position, including the associated risks and remedial actions to be instituted.
- (iv) As the municipality has the power to levy fees, tariffs and charges, this will result in an ongoing inflow of revenue to support the ongoing delivery of municipal services. Certain key financial ratios, such as liquidity, cost coverage, debtors' collection rates and creditors' payment terms are closely monitored and the necessary corrective actions instituted.

Taking the aforementioned into account, management has prepared the annual financial statements on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.
