METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and are given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2025 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The annual financial statements set out on page 7, which have been prepared on a going concern basis, were approved by the accounting officer on 31 August 2024 and were signed on its behalf by:

FJ Motloung
Accounting Officer

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

Figures in Rand	Note(s)	2024	2023
-----------------	---------	------	------

1. Significant accounting policies

The significant accounting policies applied in the preparation of these annual financial statements are set out below.

1.1 Basis of preparation

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

These accounting policies are consistent with the previous period.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Materiality

Omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

The entity does not retrospectively adjust the accounting of past items (or group of items) that were previously assessed as immaterial, unless an error occurred.

1.4 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Loans and receivables

The municipality assesses its loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether observable data is indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for loans and receivables is first for individually significant loans and receivables and then calculated on a portfolio basis for the remaining balance, including those individually significant loans and receivables for which no indicators of impairment were found. For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and poor payment history/default of payments are all considered indicators of impairment.

For loans and receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the loan's or receivable's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition (if practically determinable). Where the effective interest rate at initial recognition is not practically determinable, the government bond rate is used as the risk-free rate and adjusted for any risks specific to the loans and receivables.

Allowance for slow-moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management has made estimates of the selling price and direct cost of selling certain inventory items. The write-down is included in the operation surplus note.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the selling price assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of assets.

Value in use of cash-generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors together with economic factors such as exchange rates and inflation interest.

Value in use of non-cash-generating assets

The municipality reviews and tests the carrying value of non-cash-generating assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Internally generated intangible assets and intangible assets with an indefinite useful life are tested for impairment on an annual basis.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 20 - Provisions.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Useful lives of waste and water network and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for the wastewater and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives and decrease the depreciation charge where useful lives are more than previously estimated useful lives.

Post-retirement benefits

The present value of the post-retirement obligation depends on many factors that are determined on an actuarial basis using several assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post-retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension or other long-term liability. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, the municipality uses current market rates of the appropriate term to discount shorter-term payments and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 18.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

The provision for doubtful debt is determined by taking into account the payment rate by exchange receivable (consumer debtor), indigent status, whether the consumer debtor has a credit balance at financial year end as well as whether the consumer debtor is government related or not.

Non-exchange receivables (Traffic fine debtors) have been impaired taking into account historical payment rates by these non - exchange receivables.

Traffic fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. Non-exchange receivables arising from traffic fines are measured at the best estimate based on expected inflows of economic benefits to the municipality.

Pre-paid electricity

Pre-paid electricity is only recognised as electricity when consumed. The estimate is based on pre-paid electricity sold at year end, but still unused.

Water inventory

The estimation of the Water Inventory in reservoirs is based on actual dip readings, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir. Furthermore, the length and width of all pipes are also taken into account in determining the volume of water on hand at year-end.

Budget information

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

A difference of 10% or more between budget and actual amounts is regarded as material. All material differences (between budget and actual amounts) are explained in the notes to the annual financial statements.

1.5 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property - land	indefinite
Property - buildings	50 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note).

1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.6 Property, plant and equipment (continued)

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary asset, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight-line	Indefinite
Buildings	Straight-line	50 years
Plant and machinery	Straight-line	3-15 years
Furniture and fixtures	Straight-line	3-30 years
Motor vehicles	Straight-line	3-20 years
IT equipment	Straight-line	3-10 years
Infrastructure	Straight-line	3-50 years
Community	Straight-line	50 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.6 Property, plant and equipment (continued)

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality's expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the audited financial statements. The estimation of the Water Inventory in reservoirs is based on actual dip readings, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir. Furthermore, the length and width of all pipes are also taken into account in determining the volume of water on hand at year-end.

Compensation from third parties for an item of property, plant and equipment that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

1.7 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period.
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.8 Intangible assets

An intangible asset is an identifiable, non-monetary asset without physical substance. Intangible assets are identifiable resources controlled by the municipality from which the municipality expects to derive future economic benefits or service potential. The municipality has classified computer software as intangible assets.

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

The municipality does not have internally generated Intangible Assets.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software	Straight-line	5 years

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note).

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.9 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

When the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 6 - Heritage assets.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.9 Heritage assets (continued)

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage assets on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.10 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.10 Financial instruments (continued)

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash.
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;

1.10 Financial instruments (continued)

- contingent consideration of an acquirer in a transfer of functions between entities not under common control to which the Standard of GRAP on Transfer of Functions Between Entities Not Under Common Control (GRAP 106) applies
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.10 Financial instruments (continued)

Classification

The entity has the following types of financial assets (classes and categories) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Cash and cash equivalents	Financial asset measured at amortised cost
Receivables from exchange transactions	Financial asset measured at amortised cost
Receivables from non-exchange transactions	Financial asset measured at amortised cost
Other financial assets	Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and categories) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Payables from exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Finance lease obligation	Financial liability measured at amortised cost

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability, except for financial instruments subsequently measured at fair value, which are measured at its fair value.

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.

All financial assets measured at amortised cost are subject to an impairment review.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.10 Financial instruments (continued)

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations.

Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the municipality uses that technique.

The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Discounting of short-term receivables and payables

Short-term receivables and payables are not discounted when the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Reclassification

The municipality does not reclassify a financial instrument while it is issued or held unless it is: the combined instrument that is required to be measured at fair value; or an investment in a residual interest that meets the requirements for reclassification.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process

Impairment and uncollectibility of financial assets

The municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (if practically determinable). Where the effective interest rate at initial recognition is not practically determinable, the government bond rate is used as the risk-free rate and adjusted for any risks specific to the financial assets. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases, and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.10 Financial instruments (continued)

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognises the asset; and
 - recognises separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished - i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset, and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

1.11 Statutory receivables

Identification

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.11 Statutory receivables (continued)

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

In estimating the future cash flows, a municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk-free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.11 Statutory receivables (continued)

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and building elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as revenue and the contractual receipts is recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in the statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Any contingent rents are expensed in the period in which they are incurred.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.13 Inventories

Inventories are assets in the form of materials or supplies to be consumed or distributed in the rendering of services or held for distribution in the ordinary course of operations.

Inventories are recognised as an asset for distribution if it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and the cost of the inventories can be measured reliably.

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Water Inventory

Water is regarded as Inventory when the municipality purchases water in bulk with the intention to resell it to the consumers or to use it internally, or where the municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs, boreholes, etc). However, water in dams, which are filled by natural resources and that has not yet been treated, that is under the control of the municipality but cannot be measured reliably as there is no cost attached to the water, is therefore not recognised in the Statement of Financial Position.

The basis of determining the cost of water purchased and not yet sold at reporting date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the Inventory to its present location and condition, net of trade discounts and rebates.

Water and purified effluent are valued by using the FIFO Method, at the lowest of purified cost and net realisable value, insofar as it is stored and controlled in reservoirs at year-end.

1.14 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.14 Impairment of cash-generating assets (continued)

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Judgements made by management in applying the criteria to designate assets as cash-generating assets or non-cash-generating assets, are as follows:

- the current profitability of the unit, as well as management's assessment of the possibility of a unit becoming profitable.

Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or an asset or cash-generating unit as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, which are expected to be significantly higher than the cost of the asset.

An asset used with the objective of generating a commercial return and service delivery, is designated either as a cash-generating asset or non-cash-generating asset based on whether the municipality expects to use that asset to generate a commercial return. When it is not clear whether the objective is to use the asset to generate commercial return, the municipality designates the asset as a non-cash-generating asset and applies the accounting policy on Impairment of Non-cash-generating assets, rather than this accounting policy.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.14 Impairment of cash-generating assets (continued)

Basis for estimates of future cash flows

In measuring value in use, the municipality:

- base cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the asset. Greater weight is given to external evidence;
- base cash flow projections on the most recent approved financial budgets/forecasts, but excludes any estimated future cash inflows or outflows expected to arise from future restructuring or from improving or enhancing the asset's performance. Projections based on these budgets/forecasts cover a maximum period of five years, unless a longer period can be justified; and
- estimate cash flow projections beyond the period covered by the most recent budgets/forecasts by extrapolating the projections based on the budgets/forecasts using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. This growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used, unless a higher rate can be justified.

Composition of estimates of future cash flows

Estimates of future cash flows include:

- projections of cash inflows from the continuing use of the asset;
- projections of cash outflows that are necessarily incurred to generate the cash inflows from continuing use of the asset (including cash outflows to prepare the asset for use) and can be directly attributed, or allocated on a reasonable and consistent basis, to the asset; and
- net cash flows, if any, to be received (or paid) for the disposal of the asset at the end of its useful life.

Estimates of future cash flows exclude:

- cash inflows or outflows from financing activities; and
- income tax receipts or payments.

The estimate of net cash flows to be received (or paid) for the disposal of an asset at the end of its useful life is the amount that the municipality expects to obtain from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the estimated costs of disposal.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.14 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro-rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.14 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.15 Impairment of non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Judgements made by management in applying the criteria to designate assets as non-cash-generating assets or cash-generating assets, are as follows:

- consideration is given to the nature of the asset, whether it is primarily to provide a service to the community, and whether there is any realistic possibility of the asset being used in a commercial and profitable manner.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.15 Impairment of non-cash-generating assets (continued)

Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or an asset or cash-generating unit as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, which are expected to be significantly higher than the cost of the asset.

The municipality designates an asset as non-cash-generating when its objective is not to use the asset to generate a commercial return but to deliver services.

An asset used with the objective of generating a commercial return and service delivery, is designated either as a cash-generating asset or non-cash-generating asset based on whether the municipality expects to use that asset to generate a commercial return. When it is not clear whether the objective is to use the asset to generate a commercial return, the municipality designates the asset as a non-cash-generating asset and applies this accounting policy, rather than the accounting policy on Impairment of Non-cash-generating assets.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Significant Accounting Policies

1.15 Impairment of non-cash-generating assets (continued)

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occurs when there is clear evidence that such a redesignation is appropriate.

Significant Accounting Policies

1.16 Employee benefits

Identification

Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees or for the termination of employment.

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment as a result of either:

- (a) an entity's decision to terminate an employee's employment before the normal retirement date; or
- (b) an employee's decision to accept an offer of benefits in exchange for the termination of employment.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions whereby an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.16 Employee benefits (continued)

Short-term employee benefits

Recognition and measurement

All short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance-related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Provision for Staff Leave

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total amount of leave days due to employees at year-end and also on the total remuneration package of the employee.

Accumulating leave is carried forward and can be used in future periods if the current period's entitlement is not used in full. All unused leave will be paid out to the specific employee at the end of that employee's employment term.

Accumulated leave is vesting.

Staff Bonuses Accrued

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year end is based on bonus accrued at year-end for each employee.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.16 Employee benefits (continued)

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Post-employment benefits: Defined contribution plans

Recognition and measurement

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

(a) as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the end of the reporting period, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and

(b) as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

1.16 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Recognition and measurement

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.16 Employee benefits (continued)

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability, the entity recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The entity accounts not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.16 Employee benefits (continued)

obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is [OR is not] presented as the net of the amount recognised for a reimbursement.

Recognition and measurement: Present value of defined benefit obligations and current service cost

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the end of the reporting period, for the period over which the obligations are to be settled.

Actuarial assumptions: Discount rate

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Actuarial assumptions: Salaries, benefits and medical costs

The entity measures its defined benefit obligations on a basis that reflects:

- (a) the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the end of the reporting period;
- (b) any estimated future salary increases that affect the benefits payable;
- (c) the effect of any limit on the employer's share of the cost of the future benefits;
- (d) contributions from employees or third parties that reduce the ultimate cost to the entity of those benefits; and
- (e) estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - (i) those changes were enacted before the end of the reporting period; or
 - (ii) historical data, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs takes account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.16 Employee benefits (continued)

Other post-retirement obligations

Recognition and measurement

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The entity shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost, which shall all be recognised immediately; and
- the effect of any curtailments or settlements.

1.17 Provisions and contingencies

A provision is a liability of uncertain timing or amount.

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.17 Provisions and contingencies (continued)

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A contingent asset is a possible asset that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability is:

- a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality; or
- a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 48.

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.18 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments, which include future capital commitments relating to property, plant and equipment, investment property, intangible assets and heritage assets, as applicable, operational commitments, as well as future commitments relating to leases. Refer to notes on Finance lease obligations and Commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements.

The municipality discloses capital commitments (Property Plant and Equipment, Investment properties, Intangible assets and Heritage assets) in the financial statements, as well as future minimum lease payments for each of the following periods if applicable:

- Within one year;
- In second to fifth year inclusive; and
- Later than five years

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.19 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

Service charges are levied in terms of approved tariffs.

Service Charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without it being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to all properties. Tariffs are determined per category of property usage and are levied based on the extent of each property.

Service charges relating to sewerage and sanitation are recognised on a monthly basis in arrears by applying the approved tariff to all properties. Tariffs are determined per category of property usage and are levied based on the extent of each property.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

Revenue arising from application of the approved tariff of charges is recognised when the relevant services is rendered by allying the relevant published tariff.

Prepaid Electricity

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale. Revenue from the sale of electricity prepaid meter cards are recognised based on an estimate of the prepaid electricity consumed as at the reporting date.

Rentals Received

Revenue from the rental of facilities and equipment is recognised on a Straight-line basis over the term of the lease agreement.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.19 Revenue from exchange transactions (continued)

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Interest and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate methods.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.20 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

Revenue received from conditional grants, donations and other funding are recognised as revenue to the extent that the municipality has complied with the criteria, conditions or obligations embodied in the agreement, where applicable. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Property rates

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a Time proportionate Basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

The municipality recognises an asset in respect of property rates (taxes) when the taxable event occurs, and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur, and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Debt forgiveness and assumption of liabilities

The municipality recognise revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality. The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

Government Grants and Receipts

Equitable share allocations are recognised in revenue at the start of the financial year if no time-based restrictions exist.

Conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in Surplus or Deficit in the period in which they become receivable.

Unspent conditional grants are financial liabilities that are separately reflected on the statement of financial position. They represent unspent government grants, subsidies and contributions from government organs.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

This liability always has to be cash-backed. The following provisions are set for the creation and utilisation of this creditor:

- Unspent conditional grants are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met are transferred to revenue in the statement of financial performance.
- The cash which backs up the creditor is invested as an individual investment or part of the general investments of the Municipality until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is the Municipality's interest, it is recognised as interest earned in the statement of financial performance.

Unpaid conditional grants are assets in terms of the Framework that are separately reflected on the statement of financial position. The asset is recognised when the Municipality has an enforceable right to receive the grant or if it is virtually certain that it will be received based on that grant conditions have been met. They represent unpaid government grants, subsidies and contributions from the public.

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest, it is recognised as interest earned in Surplus or Deficit.

Revenue from Recovery of Unauthorised, Irregular, Fruitless and Wasteful Expenditure

The recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No 56 of 2003) and is recognised as revenue when the recovery thereof from the responsible councillors or officials became virtually certain in a financial period subsequent to the period when the actual unauthorised, irregular, fruitless and wasteful expenditure was incurred.

1.21 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.22 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.23 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason of classification is disclosed. Where material prior period errors have been identified in the current year, the correction is made retrospectively as far as it is practicable and the prior year comparatives are restated accordingly.

Refer to note to the financial statements - Comparative figures.

1.24 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred and classified in accordance with the nature of the expense. Upon investigation, if a person was found to be liable in law for the unauthorised expenditure that occurred, a receivable is recognised for the recovery of the monies, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

For details on unauthorised expenditure, refer to note to the financial statements - Unauthorised expenditure

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.25 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred and classified in accordance with the nature of the expense. Upon investigation, if a person was found to be liable in law for the fruitless and wasteful expenditure that occurred, a receivable is recognised for the recovery of the monies, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

For details on unauthorised expenditure, refer to note to the financial statements - Fruitless and wasteful expenditure

1.26 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred and classified in accordance with the nature of the expense. Upon investigation, if a person was found to be liable in law for the irregular expenditure that occurred, a receivable is recognised for the recovery of the monies, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

For details on irregular expenditure, refer to note to the financial statements - Irregular expenditure.

1.27 Segment reporting

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.27 Segment reporting (continued)

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.28 Budget information

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by functional classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2023 to 30/06/2024.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

In general, a difference of 10% or more is considered material, although the surrounding circumstances are taken into account if it could influence the decisions or assessments of the users of the annual financial statements in determining whether a difference between the budget and actual amount is material.

Comparative information is not required.

1.29 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Significant Accounting Policies

1.29 Related parties (continued)

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.30 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality does not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the reporting date. Where the non-adjusting event is material and non-disclosure could influence the economic decisions of the users, additional disclosure will be provided.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.31 Accumulated surplus/(deficit)

The accumulated surplus/(deficit) represents the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/(deficit). Prior year adjustments, relating to income and expenditure, are credited/debited against accumulated surplus/(deficit) when retrospective adjustments are made.

1.32 Consumer deposits

Consumer deposits are a partial security for a future payment of an account. All consumers are therefore required to pay a deposit equal to two months' consumption of electricity and water services. Deposits are considered a liability as the deposit is only refunded once the service is terminated. No interest is paid on deposits.

1.33 Value-added tax (VAT)

The municipality is registered with the South African Revenue Service (SARS) for VAT on the payment basis, in accordance with Section 15(2) of the Value-added Tax Act (Act No. 89 of 1991).

The municipality accounts for VAT on the payment basis.

1.34 Grants in Aid

The municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the municipality does not:

- receive any goods or services directly in return, as would be expected in a purchase of sale transaction; expect to be repaid in future; or
- expect a financial return, as would be expected from an investment

These transfers are recognised in the statement of financial performance as expenses in the period that the event giving rise to the transfer has occurred.

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

iGRAP 21: The Effect of Past Decisions on Materiality

Background

The Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors (GRAP 3) applies to the selection of accounting policies. Entities apply the accounting policies set out in the Standards of GRAP, except when the effect of applying them is immaterial. This means that entities could apply alternative accounting treatments to immaterial items, transactions or events (hereafter called "items").

The Board received questions from entities asking whether past decisions to not apply the Standards of GRAP to immaterial items effect future reporting periods. Entities observed that when they applied alternative accounting treatments to items in previous reporting periods, they kept historical records on an ongoing basis of the affected items. This was done so that they could assess whether applying these alternative treatments meant that the financial statements became materially "misstated" over time. If the effect was considered material, retrospective adjustments were often made.

This Interpretation explains the nature of past materiality decisions and their potential effect on current and subsequent reporting periods.

iGRAP 21 addresses the following two issues:

- Do past decisions about materiality affect subsequent reporting periods?
- Is applying an alternative accounting treatment a departure from the Standards of GRAP or an error?

The effective date of these interpretation have not yet been set. 01 April 2023.

The municipality has adopted the interpretation for the first time in the 2023/2024 01 April 2023.

The impact of the interpretation is not material.

GRAP 25 (as revised): Employee Benefits

Background

The Board issued the Standard of GRAP on Employee Benefits (GRAP 25) in November 2009. GRAP 25 was based on the International Public Sector Accounting Standard on Employee Benefits (IPSAS 25) effective at that time. However, GRAP 25 was modified in some respects where the Board decided the requirements of the International Accounting Standard on Employee Benefits (IAS@ 19) were more appropriate. Specifically, the Board:

- Eliminated the corridor method and required recognition of actuarial gains and losses in full in the year that they arise.
- Required the recognition of past service costs in the year that a plan is amended, rather than on the basis of whether they are vested or unvested.

Since 2009, the International Accounting Standards Board® has made several changes to IAS 19, including changes to the recognition of certain benefits, and where these changes are recognised. The IPSASB made similar changes to its standard and as a result of the extent of changes, issued IPSAS 39 on Employee Benefits to replace IPSAS 25 in 2016.

When the Board consulted locally on the proposed amendments to IPSAS 25 in 2016, stakeholders welcomed the amendments to align IPSAS 25 to IAS 19 and supported the changes that resulted in IPSAS 39.

In developing GRAP 25, the Board agreed to include the guidance from the IFRS Interpretation on IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (IFRIC 14@) partly in GRAP 25 and partly in the Interpretation of the Standards of GRAP on The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (IGRAP 7).

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

Key amendments to GRAP 25

The Board agreed to align GRAP 25 with IPSAS 39, but that local issues and the local environment need to be considered. As a result of this decision, there are areas where GRAP 25 departs from the requirements of IPSAS 39. The Board's decisions to depart are explained in the basis for conclusions.

The amendments to GRAP 25 are extensive and mostly affect the accounting for defined benefit plans. A new renumbered Standard of GRAP (e.g. GRAP 39) will not be issued, but rather a new version of the current GRAP 25.

The effective date of these revisions have not yet been set. 01 April 2023.

The municipality has adopted the revisions for the first time in the 2023/2024 annual financial statements.

The impact of the revisions is not material.

iGRAP 7 (as revised): Limit on defined benefit asset, minimum funding requirements and their interaction

Background

The Board issued the Standard of GRAP on Employee Benefits (GRAP 25) in November 2009. GRAP 25 was based on the International Public Sector Accounting Standard on Employee Benefits (IPSAS 25) effective at that time. However, GRAP 25 was modified in some respects where the Board decided the requirements of the International Accounting Standard on Employee Benefits (IAS® 19) were more appropriate. Specifically, the Board:

- Eliminated the corridor method and required recognition of actuarial gains and losses in full in the year that they arise.
- Required the recognition of past service costs in the year that a plan is amended, rather than on the basis of whether they are vested or unvested.

Since 2009, the International Accounting Standards Board® has made several changes to IAS 19, including changes to the recognition of certain benefits, and where these changes are recognised. The IPSASB made similar changes to its standard and as a result of the extent of changes, issued IPSAS 39 on Employee Benefits to replace IPSAS 25 in 2016.

When the Board consulted locally on the proposed amendments to IPSAS 25 in 2016, stakeholders welcomed the amendments to align IPSAS 25 to IAS 19 and supported the changes that resulted in IPSAS 39.

In developing GRAP 25, the Board agreed to include the guidance from the IFRS Interpretation on IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (IFRIC 14®) partly in GRAP 25 and partly in the Interpretation of the Standards of GRAP on The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (iGRAP 7).

The effective date of these revisions have not yet been set. 01 April 2023.

The municipality has adopted the revisions for the first time in the 2023/2024 01 April 2023.

The impact of the revisions is not material.

Guideline: Guideline on Accounting for Landfill Sites

The objective of this guideline: The Constitution of South Africa, 1996 (Act No. 108 of 1996) (the constitution), gives local government the executive authority over the functions of cleaning, refuse removal, refuse dumps and solid waste disposal. Even though waste disposal activities are mainly undertaken by municipalities, other public sector entities may also be involved in these activities from time to time. Concerns were raised about the inconsistent accounting practices for landfill sites and the related rehabilitation provision where entities undertake waste disposal activities. The objective of the Guideline is therefore to provide guidance to entities that manage and operate landfill sites. The guidance will improve comparability and provide the necessary information to the users of the financial statements to hold entities accountable and for decision making. The principles from the relevant Standards of GRAP are applied in accounting for the landfill site and the related rehabilitation provision. Where appropriate, the Guideline also illustrates the accounting for the land in a landfill, the landfill site asset and the related rehabilitation provision.

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

It covers: Overview of the legislative requirements that govern landfill sites, Accounting for land, Accounting for the landfill site asset, Accounting for the provision for rehabilitation, Closure, End-use and monitoring, Other considerations, and Annexures with Terminology & References to pronouncements used in the Guideline.

The effective date of the guideline is for years beginning on or after 01 April 2023.

The municipality has adopted the guideline for the first time in the 2023/2024 annual financial statements.

The impact of the standard is not material.

GRAP 1 (amended): Presentation of Financial Statements (Materiality)

Amendments to this Standard of GRAP, are primarily drawn from the IASB's Amendments to IAS 1.

Summary of amendments are:

Materiality and aggregation

The amendments clarify that:

- information should not be obscured by aggregating or by providing immaterial information;
- materiality considerations apply to all parts of the financial statements; and
- even when a Standard of GRAP requires a specific disclosure, materiality considerations apply.

Statement of financial position and statement of financial performance

The amendments clarify that the list of line items to be presented in these statements can be disaggregated and aggregated as relevant and additional guidance on subtotals in these statements.

Notes structure

The amendments add examples of possible ways of ordering the notes to clarify that understandability and comparability should be considered when determining the order of the notes and to demonstrate that the notes need not be presented in the order listed in GRAP 1.

Disclosure of accounting policies

Remove guidance and examples with regards to the identification of significant accounting policies that were perceived as being potentially unhelpful.

An municipality applies judgement based on past experience and current facts and circumstances.

The effective date of this amendment is for years beginning on or after 01 April 2025.

The impact of the amendment is not material.

2.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2024 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
---------------------------	---	------------------

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

2.3 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2024 or later periods but are not relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 107 Mergers	01 April 2023	Unlikely there will be a material impact
• GRAP 106 Transfer of Functions Between Entities Not Under Common Control	01 April 2023	Unlikely there will be a material impact
• GRAP 105 Transfer of Functions Between Entities Under Common Control	01 April 2023	Unlikely there will be a material impact
• GRAP 2023 Improvements to the Standards of GRAP 2023	To be determined by the Minister of Finance	Unlikely there will be a material impact
• GRAP 1 (amended): Presentation of Financial Statements (Going Concern)	To be determined by the Minister of Finance	Unlikely there will be a material impact
• GRAP 103 (as revised): Heritage Assets	To be determined by the Minister of Finance	Unlikely there will be a material impact
• iGRAP 22 Foreign Currency Transactions and Advance Consideration	01 April 2025	Unlikely there will be a material impact
• GRAP 104 (as revised): Financial Instruments	01 April 2025	Likely there will be a material impact

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

4. Receivables from exchange transactions (continued)

Receivables pledged as security

No receivables were pledged as security

Credit quality of receivables

The credit quality of receivables that are neither past nor due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates:

Receivables (excluding other receivables) past due but not impaired

The Debt impairment methodology employed by the municipality results in various debtors being tested for impairment through the evaluation of said debtors against applicable criteria. This results in debtors that are past due but not impaired from 1 month past due to over 3 months past due. At 30 June 2024, R93,611,258 (2023: R95,574,161) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	5,583,109	14,757,263
2 months past due	2,454,776	9,920,174
3 months past due	85,573,373	70,896,724

Receivables (excluding other receivables) impaired

As of 30 June 2024, receivables of R 2,962,760,564 (2023: R 2,436,128,906) were impaired and provided for.

The amount of the provision was R (2,769,140,025) as of 30 June 2024 (2023: R (2,334,024,271)).

The ageing of these debtors is as follows:

Current (0-30 days)	62,629,018	54,820,434
31- 60 days	44,903,101	37,079,642
61-90 days	50,020,885	50,630,455
Over 90 days	2,805,207,560	2,293,598,375

5. Receivables from non-exchange transactions

Consumer receivables - property rates	43,356,169	41,498,047

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

5. Receivables from non-exchange transactions (continued)

Statutory receivables general information

Transaction(s) arising from statute

Property rates related transactions arise in terms of the Municipal Property Rates Act, 6 of 2004, Municipal Finance Management Act, 56 of 2003, as well as the Property Rates Policy of the municipality approved by Council as part of the Budget Process.

Traffic fines arise from the National Road Traffic Act 93 of 1996, National Road Traffic Regulations 2000, National Land Transport Act 5 of 2009 and Criminal Procedure Act 51 of 1971. The prosecutor performs prosecutorial functions in terms of a general delegation awarded by the National Prosecuting Authority and is subject to the control of the Control Prosecutor at the Magistrate's Court in Sasolburg.

Government grants related transactions arise in terms of the applicable annual Division of Revenue Act Bill as well as the relevant Provincial Gazette.

Determination of transaction amount

Property rates transaction amounts are determined in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003.

Traffic fines transaction amounts are determined in line with the Traffic Offence Code Book as approved by Senior Magistrate and implemented in the district of the Metsimaholo Local Municipality.

Government grants related transaction amounts allocated to the municipality are stipulated in the applicable annual Division of Revenue Act as well as the relevant Provincial Gazette.

Interest or other charges levied/charged

Interest or other charges levied on Property rates balances are in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003. "Interest" means a charge levied, on all arrear accounts calculated at an interest rate which is one percent higher than the prime interest rate.

Traffic fines: Additional charges include contempt of court fees/warrant of arrest fee determined in terms of the Criminal Procedure Act. Currently at R200 effected after court date on non/default payment/non-appearance.

Basis used to assess and test whether a statutory receivable is impaired

The basis used to assess Property Rates receivables is outlined in the approved Debt impairment methodology looking at various factors including the extent to which debtors on an individual basis defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

The basis used to assess traffic fine receivables is outlined in the approved Debt impairment methodology involves evaluating the extent to which debtors, categorized by the nature of fines under the National Road Traffic Act, have defaulted on payments already due. This assessment also considers their ability to make future payments based on a historical analysis of payment trends over the past five years, adjusted for the expected recovery percentage derived from recent warrant payment history..

Each individual Grant is assessed for collectability in line with the legislative prescripts or contract arrangements that relates to the specific grant.

Discount rate applied to the estimated future cash flows

The discount rate applied for Property rates as Statutory receivables mentioned above is based on the risk category as outlined by the approved Debt impairment methodology. This is used to determine the discount rate applied for individual statutory debtors assessed .

High risk risk- Prime plus 1.25%

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

5. Receivables from non-exchange transactions (continued)

Medium risk- Prime plus 0.75%

Low risk- Prime plus .25%

The discount rate applied for Fines as a statutory receivables is prime plus 1

The impairment approach for traffic fine receivables described does not mention the use of a discount rate. Instead, the assessment is based on historical payment trends, past payment history, and the expected recovery percentage

Statutory receivables past due but not impaired

The Debt impairment methodology employed by the municipality results in various debtors tested for impairment through evaluation of said debtors against applicable criteria. This results in statutory receivables which are past due but not impaired from 1 month past due to over 3 months past due. At 30 June 2024, R19,716,609 (2023: R22,354,030) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	1,383,719	3,354,428
2 months past due	743,771	1,865,125
Over 3 months past due	17,589,119	17,134,477

Factors the entity considered in assessing statutory receivables past due but not impaired

Property rates

The specific details on factors considered are comprehensively outlined and discussed in the approved Debt impairment methodology. In summary, the impairment testing process for receivables begins by identifying those accounts that exhibit no indicators of impairment. Specifically, accounts with a credit balance, zero balance, accounts where the Municipality is the owner, or those with no outstanding balance beyond 30 days as of the reporting date are excluded from impairment testing. For those not meeting criteria above, further testing on recoverability of debt is performed to determine where there is impairment. These considerations are outlined in Factors the entity considered in assessing statutory receivables impaired of this note. When criteria are not met then the receivables are considered not impaired.

Traffic fines

The specific details on factors considered are comprehensively outlined and discussed in the approved Debt Impairment Methodology. In summary, the impairment testing process for receivables considers fines that have been issued and assesses impairment based on historical payment trends, with a focus on fines older than two years. Fines that are expected to be received based on the last three years' payment history are accounted for in the impairment calculation. If fines are not older than two years or have been identified with an expected recovery based on this history, they are not considered impaired but included in the assessment. These considerations are outlined in the methodology provided

Statutory receivables impaired

As of 30 June 2024, Statutory receivables of R314,528,496 (2023: R265,212,311) were impaired and provided for.

The amount of the provision was R(306,872,012) as of 30 June 2024 (2023: R(266,678,717)).

The ageing of these receivables are as follows:

Current (0-30 days)	6,210,849	7,471,500
31-60 days	6,237,051	4,944,299
61-90 days	6,249,534	5,420,085
Over 90 days	295,831,062	247,376,427

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

5. Receivables from non-exchange transactions (continued)

Factors the entity considered in assessing statutory receivables impaired

Property rates

The specific details on factors considered are comprehensively outlined and discussed in the approved Debt impairment methodology. Following the test for receivables that are not considered for impairment, significant receivables are identified and individually assessed for recoverability. Indicators such as account inactivity, referral to debt collection, liquidation/sequestration status, and payment history (both before and after year-end) are considered to evaluate whether payment can be expected. Accounts deemed fully recoverable are returned to the general age analysis for further assessment.

Receivables with potential impairment are categorized into high, medium, or low risk based on their payment trends. Accounts with a payment trend below 59% are high-risk, those between 60%-79% are medium-risk, and those above 80% are low-risk. These classifications inform the premium applied to the prime lending rate to determine the discount rate for impairment calculations. The discount rate is adjusted annually, considering economic conditions, debt collection effectiveness, and other risk factors.

Finally, expected future cash flows are estimated based on historical experience with each debtor group. High-risk receivables are adjusted using the balance from the most recent age analysis report, taking into account receipts in June, excluding billing. Specific groups, such as accounts with no recent payments, indigent receivables, and inactive accounts, are assumed to have no expected future cash flows and are fully included in the impairment allowance.

Traffic fines

When performing impairment for traffic fines, the methodology begins by grouping fines according to their nature under the National Road Traffic Act, such as Admission of Guilt, Spot Fines, Warrants, and Finalized Cases. A key factor in the impairment process is the write-off criteria, where fines outstanding for more than two years are written off following the guidelines in Circular 2 of 2006, with Council approval required for these actions.

Historical payment trends over the past five years play a crucial role in assessing the likelihood of recovering outstanding fines. Additionally, the methodology includes an expectation of recovery based on the payment history of the past three years, particularly focusing on small amounts received from concluded warrant payments and other outstanding fines.

The impairment calculation is performed using a specific tool that incorporates the historical average payment percentage. This process involves determining the recoverable amount and calculating the debtors to be written off by analyzing the outstanding balance, expected recoveries, and historical data, ensuring a comprehensive assessment of traffic fine receivables.

7. VAT receivable

VAT	5,667,088	6,594,411
-----	-----------	-----------

The municipality is registered on the cash basis and the timing of payments to/from SARS is at the end of each month.

Due to the accrual basis of accounting applied the amount disclosed for VAT includes the total movement of VAT accounts. The basis includes a set of accounts that indicate the amount accrued for VAT in debtors and creditors separate from the amount receivable or owed to SARS. The basis of accounting does not lend itself to the separate disclosure of VAT movement items. In terms of the prescribed guidelines only the net VAT receivable or payable are disclosed.

During the year, the municipality made payments to SARS.

VAT is payable on the receipts basis. Only once payment is received from debtors is VAT paid over to SARS.

The amount receivable for the month of June 2024 on cash basis is R3 046 949,21 and 30 June 2023 was R 6 594 410.84.

8. Cash and cash equivalents

For the purposes of the Statement of Financial Position and the Cash Flow Statement, Cash and Cash Equivalents include Cash-on-Hand, Cash in Banks and Investments in Money Market Instruments, net of outstanding Bank Overdrafts.

The municipality does not have any overdrawn current account facilities with its banker and therefore does not incur interest on overdrawn current accounts. Interest is earned at different rates per annum on favourable balances.

Finance Management Grant (FMG)	4,379,428	1,800,000
Municipal Infrastructure Grant	-	326
Sector Education Training Authority	1,169,162	565,722
Water Services Infrastructure Grant (WSIG)	-	1,722,013
Municipal Disaster Recovery Grant	308,675	-
Total	5,974,551	4,088,061

Cash on hand

Cash floats and advances	5,150	5,150
Total	5,150	5,150

The municipality did not pledge any of its Cash and Cash Equivalents as collateral for its financial liabilities.

No restrictions have been imposed on the municipality in terms of the utilisation of its Cash and Cash Equivalents.

The management of the municipality is of the opinion that the carrying value of Current Investment Deposits, Bank Balances, Cash and Cash Equivalents recorded at amortised cost in the Annual Financial Statements approximate their fair values.

The fair value of Current Investment Deposits, Bank Balances, Cash and Cash Equivalents was determined after considering the standard terms and conditions of agreements entered into between the municipality and financial institutions.

Financial assets at fair value		
Fair value hierarchy of financial assets at fair value		
The table below analyses Financial Instruments carried at Fair Value at the end of the reporting period by the level of fair-value hierarchy as required by GRAP 104. The different levels are based on the extent to which quoted prices are used in the calculation of the Fair Value of the Financial Instruments.:		
Level 1: Fair Values are based on quoted market prices (unadjusted) in active markets for an identical instrument.		
Level 2: Fair Values are based on valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instruments valuation. Also, this category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.		
Level 2: Fair Values are calculated using valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active, or other valuation techniques where all significant inputs are directly or indirectly observable from market data.		
Level 3: Fair Values are based on valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instruments valuation. Also, this category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Staff bonuses accrue to the staff of the municipality on an annual basis, subject to certain conditions. The provision is an estimate of the amount due at the reporting date.

Staff leave accrues to the staff of the municipality on an annual basis, subject to certain conditions. The provision is an estimate of the amount due at the reporting date.

Payments received in advance also include consumer debtors' accounts paid in advance.

No interest is charged for the first 30 days from the date of receipt of the invoice. Thereafter interest is charged in accordance with the credit policies of the various individual creditors that the municipality deals with.

The municipality did default on payments to its Creditors. Terms for payment have been re-negotiated by the municipality.

16. VAT payable

The municipality is registered on the cash basis and the timing of payments to/from SARS is at the end of each month. Due to the accrual basis of accounting applied the amount disclosed for VAT includes the total movement of VAT accounts. The basis includes a set of accounts that indicate the amount accrued for VAT in debtors and creditors separate from the amount receivable or owed to SARS. The basis of accounting does not lend itself to the separate disclosure of VAT movement items. In terms of the prescribed guidelines only the net VAT receivable or payable are disclosed.

During the year, the municipality did make any payments to SARS.

VAT is payable on the receipts basis. Only once payment is received from debtors is VAT paid over to SARS.

The amount receivable for the month of June 2024 on cash basis is R3 046 949,21 and 30 June 2023 was R 6 594 410.84

The remaining balance of VAT payable is made up of Output tax accrual, Input tax accrual and VAT on provision for impairment. The breakdown of the amounts is as follows

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

16. VAT payable (continued)

Analysis of VAT amount	2024	2023
Cash basis	5,667,088	6,594,411
Output tax accrual	(331,996,544)	(278,932,484)
Input tax accrual	18,518,001	9,561,303
Vat on Provision for impairment	299,579,101	252,919,577
	(8,232,354)	(9,857,193)

17. Consumer deposits

Electricity	3,913,937	3,783,504
Water	25,167,140	23,985,445
Other deposits	1,502,000	1,502,000
	30,583,077	29,270,949

Consumer deposits are paid by consumers on application for new electricity connections. The deposits are repaid when the electricity connections are terminated. In cases where consumers default on their accounts, the municipality can utilise the deposit as payment for the outstanding account.

No interest accrues on consumer deposits.

The management of the municipality is of the opinion that the carrying value of consumer deposits approximates their fair values.

The fair value of consumer deposits was determined after considering the standard terms and conditions of agreements entered into between the municipality and its consumers.

18. Employee benefit obligations

The amounts recognised in the statement of financial position are as follows:

Carrying value		
Post-retirement Health Care Benefits Liability	(36,411,000)	(32,466,123)
Long Service Awards Liability	(27,697,000)	(16,686,000)
	(64,108,000)	(49,152,123)
Non-current liabilities	(54,451,000)	(45,444,132)
Current liabilities	(9,657,000)	(3,707,991)
	(64,108,000)	(49,152,123)

Post-retirement Health Care Benefits Liability

Opening balance	32,466,123	37,947,000
Benefits paid	(2,131,991)	(2,303,300)
Net expense recognised in the statement of financial performance	6,076,788	(3,177,577)
	36,410,920	32,466,123

METSIMAHOLO LOCAL MUNICIPALITY

Figures in Rand	2024	2023
-----------------	------	------

18. Employee benefit obligations (continued)

Post-retirement Health Care Benefits Liability

Transfer to current provisions	(2,615,000)	(2,131,991)
Non-current portion	33,795,920	30,334,132

Analysis of net expense recognised in the statement of financial performance(Including benefits paid)

Assumed discount rate have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed discount rate would have the following effects:

Current service cost	707,246	375,000
Interest cost	4,621,857	4,232,000
Actuarial (gains) and losses	747,765	(7,784,577)
Benefits paid	(2,131,991)	(2,303,300)
Total	3,944,877	(5,480,877)

The members of the Post-employment Health Care Benefit Plan are made up as follows:

Eligible employees	53	72
Continuation members (pensioners)	50	48
	103	120

The accrued liability in respect of past service has been estimated as follows:

In-service members	13,479,000	13,173,413
Continuation members	22,932,000	19,292,709
	36,411,000	32,466,122

18. Employee benefit obligations (continued)

Key assumptions used

Assumptions used at the reporting date:

In estimating the net defined benefit liability for the post-employment health care benefits a number of assumptions are required. The GRAP 25 standard places the responsibility on management to set these assumptions, as guided by the principles set out in the standard and in discussion with the actuary.

It should be noted that the valuation method and assumptions do not affect the ultimate cost of the post-employment health care arrangement – this is determined by actual experience and by the benefits provided. The method and assumptions influence how the DBO and future service costs are recognised over time.

The key financial and demographic assumptions are summarised below

A more detailed outline of these assumptions is contained in the actuarial report

Key Financial Assumptions

Discount rate	11.59 %	12.91 %
Health care cost inflation rate	7.15 %	8.50 %
CPI inflate rate	5.65 %	7.00 %
Maximum subsidy inflation rate	4.99 %	6.00 %
Net effective discount rate	6.29 %	6.52 %

Key Demographic Assumptions

Average retirement age	62	62.00 %
Mortality during employment	SA 85-90	SA 85-90
Termination of service (resignation and retrenchment) average	5%	5%
Mortality post-employment	PA(90)-1	PA(90)-1
Continuation of membership at retirement	75.00 %	75.00 %

Post-retirement Health Care Benefits Liability

The municipality makes monthly contributions for health care arrangements to the following Medical Aid Schemes:

- Bonitas
- Keyhealth
- LA Health
- Hosmed

Municipal employees contribute to accredited medical schemes.

The municipality offers employees and continuation members the opportunity of belonging to one of several medical aid schemes, most of which offer a range of options pertaining to levels of cover.

Upon retirement, an employee may continue membership of the medical scheme. Upon a member's death in-service or death in-retirement, the surviving dependents may continue membership of the medical scheme.

Members contribute according to tables of contribution rates which differentiate between them on the type and number of dependents. Some options also differentiate on the basis of income.

In-service members that were employed prior to 2001 are entitled to a post-employment medical aid subsidy of 60% of the contribution payable. All current continuation members receive a 60% subsidy.

Upon a member's death-in-service or death-in-retirement, the surviving dependents will continue to receive the same 60% subsidy.

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

18. Employee benefit obligations (continued)

The obligation in respect of medical care contributions for retirement benefits is valued every year by independent qualified actuaries.

An actuarial valuation has been performed of the municipality's liability in respect of benefits to eligible retirees and retired employees of the municipality. The provision is utilised when eligible employees receive the value of the vested benefits.

The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 30 June 2023 by Mr Chanan Weiss, Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligations, and the related current service costs and past service costs, were measured using the Projected Unit Credit Method.

Amounts for the current and previous four years are as follows:	2024	2023	2022	2021	2020
Present Value of Defined Benefit Obligation	36,411,000	32,466,123	37,947,000	46,371,724	42,321,460
	36,411,000	32,466,123	37,947,000	46,371,724	42,321,460

Long service awards liabilities

Long service awards

Opening balance	16,868,000	17,047,000
Benefits paid	(1,576,000)	(3,415,000)
Net expense recognised in the statement of financial performance	12,405,000	3,054,000
Total	27,697,000	16,868,000
Transfer to current provisions	(7,042,000)	(1,576,000)
Total long service awards liability	27,697,000	16,868,000
Total non-current portion	20,655,000	15,292,000

Analysis of net expense recognised in the statement of financial performance(Including benefits paid)

Assumed discount rate have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed discount rate would have the following effects:

Current service cost	1,752,000	1,943,000
Past service cost	9,263,000	-
Interest cost	1,665,000	1,700,000
Actuarial (gains) and losses	(66,000)	(589,000)
Benefits paid	(1,576,000)	(3,415,000)
Total	11,038,000	(36,100)

Eligible Employees

Total number	743	716
--------------	-----	-----

Key assumptions used

Assumptions used at the reporting date:

In estimating the LSA net defined benefit liability of the Municipality a number of actuarial assumptions are required. The GRAP 25 standard places the responsibility on management to set these assumptions, as guided by the principles set out in the standard and in discussion with the actuary.

It should be noted that the valuation method and assumptions do not affect the ultimate cost of the LSA arrangement – this is determined by actual experience and by the benefits provided. The method and assumptions influence how the DBO and current service costs are recognised over time.

The key financial and demographic assumptions are summarised below. A more detailed outline of these assumptions is contained in the actuarial report.

The key financial and demographic assumptions are summarised below.

A more detailed outline of these assumptions is contained in the actuarial report

Key Financial Assumptions

Discount rate	10.89 %	10.47 %
CPI inflate rate	5.00 %	5.26 %
General earnings inflation rate	6.00 %	6.26 %
Net effective discount rate	4.62 %	3.96 %

Key demographic assumptions

Figures in Rand	2024	2023
18. Employee benefit obligations (continued)		
Average age	62	62
Mortality during employment	SA 85-90	SA 85-90
Termination of service (resignation and retrenchment rates per annum)	5.00 %	5.00 %
Long service awards liabilities		

An actuarial valuation has been performed of the municipality's liability in respect of benefits to eligible employees of the municipality. The provision is utilised when eligible employees receive the value of the vested benefits.

At year end 743 (2023: 716) employees were eligible for Long-service Awards.

Metsimaholo Local Municipality offers employees long service awards for every 5 years of services completed. No other long service benefits are provided to employees.

Special leave pay

24 employees (appointed before 1999, according to the data provided) receive an additional six days of leave annually. This commenced when they reached five years of service.

Retirement gifts

55 employees (appointed before 2007, according to the data provided) are entitled to receive a retirement gift of 2% of annual earnings, provided they have at least 20 years of service at retirement.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2023 by Mr Chanan Weiss, Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

Amounts for the current and previous four years are as follows:	2024	2023	2022	2021	2020
Long service awards liability	27,697,000	16,686,000	17,047,000	15,867,000	15,463,000
	27,697,000	16,686,000	17,047,000	15,867,000	15,463,000

19. Unspent conditional grants and receipts

Unspent conditional grants and receipts comprises of:

Unspent conditional grants and receipts

Municipal Infrastructure Grant	-	5,186,639
Financial Management Grant	1,654,288	1,800,000
Integrated National Electrification Programme Grant(INEP)	-	2,000
LGSETA	1,169,162	565,721

19. Unspent conditional grants and receipts (continued)

The nature and extent of government grants recognised in the annual financial statements and an indication of other forms of government assistance from which the municipality has directly benefited; and unfulfilled conditions and other contingencies attaching to government assistance that has been recognised.

See note 29 for the reconciliation of grants from the National/Provincial Government.

The Unspent Conditional Grants and Receipts are invested in investment accounts until utilised.

The municipality complied with the conditions attached to all grants received to the extent of revenue recognised.

20. Provisions

Reconciliation of provisions - 30 June 2024

	Opening Balance	Utilised during the year	unwinding of the discount	Total
Environmental rehabilitation	98,017,478	(834,222)	12,369,843	109,553,099
	98,017,478	(834,222)	12,369,843	109,553,099

Reconciliation of provisions - 30 June 2023

	Opening Balance	Utilised during the year	unwinding of the discount	Total
Environmental rehabilitation	90,395,077	(2,366,289)	9,988,690	98,017,478
	90,395,077	(2,366,289)	9,988,690	98,017,478
Non-current liabilities			2,951,275	1,709,106
Current liabilities			106,601,824	96,308,372
			109,553,099	98,017,478

Environmental rehabilitation provision

The landfill rehabilitation and closure are created for the rehabilitation and closure of the current operational sites which are evaluated at year-end to reflect the best estimate at reporting date. The sites under consideration are the Sasolburg, Oranjeville and Deneysville landfill sites. The valuation for the landfill sites were performed by Masimba Mapfurira (Engineering Consultant)(BSc Hons Civil Engineering) and Nkosinobubelo Ndebele (Environmental Consultant)(MSc Environmental Sciences) from One Pangaea Expertise and Solutions.

Key financial assumptions used in this calculation were as follows:

	2024	2023
Average long-term CPI	7.39%	7.23%
Net Discount rate	4.87%	3.56%
Average Long-term Bond	12.62%	11.05%

Heading	Sasol landfill	Orangeville landfill	Deneysville landfill
Approximate footprint at 30 June 2022	16.8 Ha	0.6 Ha	1.4 Ha
Remaining useful lives	Approximately 0	Approximately 10	Approximately 4

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

21. Service charges

Sale of electricity	379,454,219	313,985,206
Sale of water	526,547,328	444,570,560
Sewerage and sanitation charges	71,841,713	64,626,845
Refuse removal	54,830,173	52,466,139
	1,032,673,433	875,648,750

The amounts disclosed above for revenue from Service Charges are in respect of services rendered which are billed to the consumers on a monthly basis according to Council's approved tariffs. These service charges revenue are the net amounts after taking into account revenue forgone.

22. Sale of goods and rendering of services

Advertisements	411,069	422,479
Building plan clause levy	239,684	290,910
Cemetery and burial	406,440	323,612
Clearance certificates	387,669	442,712
Drainage fees	6,065	8,805
Entrance fees	318,204	237,532
Fire services	699,720	892,132
Legal fees	1,894,000	2,931,689
Parking fees	63,044	55,113
Sale of goods	2,300	144,952
Tender documents	113,034	111,987
Town planning and servitudes	143,782	105,328
Valuation services	244	232
Building plan approval	6,595	-
	4,691,850	5,967,483

23. Rental of facilities and equipment

Premises

Premises	6,420,908	6,090,438
----------	-----------	-----------

Facilities and equipment

Rental of facilities	408,600	424,151
	6,829,508	6,514,589

Rental income generated is at market-related premiums.

Leasing Arrangements

The Municipality as Lessor:

Operating Leases relate to property leases for municipal houses. The lessee does not have an option to purchase the leased asset at the expiry of the lease period. These rentals are classified as contingent rentals due to some uncertain lease periods which are on a month-to-month basis. The operating lease payments are therefore not subject to straight-lining and it is impracticable to disclose the future minimum lease payments expected to be received for each of the following periods as required by GRAP13:

- no later than one year
- later than one year and not later than five years
- later than five years

The municipality has operating lease agreements for the following classes of assets:

- Buildings

	12,184,079	13,699,959
25. Interest received - exchange receivables		
Electricity	9,756,198	7,878,485
Service charges	9,206,304	7,213,021
Waste management	8,636,406	5,745,250
Waste water management	5,175,248	3,717,972
Water	81,269,069	59,535,059
	114,043,225	84,089,787
26. Property rates		
Rates received		
Residential	153,432,354	145,575,935
Commercial	92,690,408	89,798,782
Municipal	5,330,240	5,021,417
Small holdings and farms	3,853,734	3,647,228
Other property types	3,751,959	3,577,717
Less: Income forgone	(37,623,136)	(36,293,820)
	221,435,559	211,327,259
Valuation		
Business	1,041,010,000	1,013,133,000
Farms	4,288,730,000	2,901,198,000
Government	28,302,000	28,302,000
Municipal	4,633,200	40,482,000
Private	4,012,304,000	3,533,948,000
Residential	1,113,663,000	396,500,000
Unknown abakus	1,052,669,000	9,360,756,000
	11,541,311,200	17,274,319,000

The land value was changed to market value according to the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA) that came

into effect on 1 July 2008. The increase in valuation is due to the fact that the full market value of a property is now the basis of levying rates and not the land value

No difference is made between land value and the value of improvements and only the market value appears on the valuation roll.

With the implementation of the MPRA, different categories of properties are levied at different tariffs with different rebates applicable

Property owners of 60 years and older and/or physically or mentally disabled, who can substantiate receipt of a social pension, and

owners certified by the Medical Officer of Health as physically or mentally disabled, can qualify for a rebate, subject to certain conditions.

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
29. Government grants & subsidies (continued)		
Retained payment	(4,041,416)	(4,162,154)
Reduction (According to National Treasury)	(5,186,313)	(4,554,000)
	-	5,186,639

Conditions still to be met - remain liabilities (see note 19).

The Municipal Infrastructure Grant (MIG) was allocated for the construction of roads, basic sewerage and water infrastructure as part of the upgrading of poor households, micro enterprises and social institutions; to provide for new, rehabilitation and upgrading of municipal infrastructure.

Finance Management Grant (FMG)

Balance unspent at beginning of year	1,800,000	-
Current-year receipts	2,750,000	2,750,000
Conditions met - transferred to revenue	(1,095,712)	(950,000)
Reduction (According to National Treasury)	(1,800,000)	-
	1,654,288	1,800,000

Conditions still to be met - remain liabilities (see note 19).

The municipality received the Financial Management Grant from the National Treasury. It is used for capacity building and assistance to financial services to improve service delivery. This grant is also used to assist in support and implementation of financial management reforms, attendance at accredited training and capacity building programmes on financial management.

Expanded Public Works Program (EPWP)

Balance unspent at the beginning of the year	-	8,484
Current-year receipts	950,000	1,523,000
Conditions met - transferred to revenue	(832,714)	(1,531,484)
	117,286	-

Conditions still to be met - remain liabilities (see note 19).

The Expanded Public Works Programme (EPWP) Grant is a conditional grant of which the purpose is the funding of the department's Extended Public Works Programme. The grant was utilised as per the intended purpose. No moneys have been withheld.

Sector Education Training Authority Grant (SETA)

Balance unspent at the beginning of the year	565,721	303,175
Current-year receipts	603,441	548,073
Conditions met - transferred to revenue	-	(285,527)
	1,169,162	565,721

Conditions still to be met - remain liabilities (see note 19).

The municipality received grants from the Sector Education Training Authority to promote excellent performance by the human resources division. The funds must be utilised towards training. The agreement for the appointment of learners was carried over to 2022/2023.

Integrated National Electrification Programme (INEP)

Balance unspent at beginning of year	2,000	2,000
Current-year receipts	29,780,000	35,631,000
Conditions met - transferred to revenue	(29,780,000)	(35,631,000)

Fair value

The following methods and assumptions were used to estimate the Fair Value of each class of Financial Instrument for which it is practical to estimate such value:

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

46. Financial instruments disclosure (continued)

Cash

The carrying amount approximates the Fair Value because of the short maturity of these instruments.

Trade and Other Receivables/Payables

The Fair Value of Trade and Other Payables is estimated at the present value of future cash flows.

The management of the municipality is of the opinion that the carrying value of Trade and Other Receivables recorded at amortised cost in the Annual Financial Statements approximate their fair values. The Fair Value of Trade Receivables were determined after considering the standard terms and conditions of agreements entered into between the municipality and other parties as well as the current payment ratios of the municipality's debtors

Other Financial Assets and Liabilities

The Fair Value of Other Financial Assets and Financial Liabilities (excluding Derivative Instruments) is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

Long-term Liabilities

The Fair Value of Long-term Liabilities was determined after considering the standard terms and conditions of agreements entered into between the municipality and the relevant financing institutions.

Management considers the carrying amounts of Financial Assets and Financial Liabilities recorded at amortised cost in the Annual Financial Statements to approximate their Fair Values on 30 June 2024, as a result of the short-term maturity of these assets and liabilities. No Financial Instruments of the municipality have been reclassified during the year.

Assumptions used in determining Fair Value of Financial Assets and Financial Liabilities

The table below analyses Financial Instruments carried at Fair Value at the end of the reporting period by the level of fair-value hierarchy as required by GRAP 104. The different levels are based on the extent to which quoted prices are used in the calculation of the Fair Value of the Financial Instruments.:

Level 1: Fair Values are based on quoted market prices (unadjusted) in active markets for an identical instrument.

Level 2: Fair Values are based on valuation techniques using significant unobservable inputs. This category includes all

instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instruments valuation. Also, this category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

46. Financial instruments disclosure (continued)

Level 2: Fair Values are calculated using valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active, or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Fair Values are based on valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. Also, this category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Gearing ratio	0.47756	0.41640
	2,705,501,346	2,605,888,083

Financial risk management objectives

The Accounting Officer has overall responsibility for the establishment and oversight of the municipality's risk management framework. The municipality's risk management policies are established to identify and analyse the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities.

Financial Instruments play a much more limited role in creating or changing risks that would be typical of listed companies to which the IAS's mainly apply. Generally, Financial Assets and Liabilities are generated by day-to-day operational activities and are not held to manage the risks facing the municipality in undertaking its activities.

The Department Financial Services monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity risk. Compliance with policies and procedures is reviewed by the internal auditors on a continuous basis, and annually by external auditors. The municipality does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports periodically to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function. Further quantitative disclosures are included throughout these Annual Financial Statements.

Significant risks

It is the policy of the municipality to disclose information that enables the user of its Annual Financial Statements to evaluate the nature and extent of risks arising from Financial Instruments to which the municipality is exposed on the reporting date. The municipality has exposure to the following risks from its operations in Financial Instruments:

Credit Risk;
Liquidity Risk; and
Market Risk.

Risks and exposures are disclosed as follows:

Market risk

Market Risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the municipality's income or the value of its holdings in Financial Instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Credit risk

Credit Risk is the risk of financial loss to the municipality if a customer or counterparty to a Financial Instrument fails to meet its contractual obligations and arises principally from the municipality's receivables from customers and investment securities.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

46. Financial instruments disclosure (continued)

Liquidity risk

Liquidity Risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash or another financial asset. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liquidity Risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

Market risk

The municipality's activities expose it primarily to the financial risks of changes in interest rates (see Note below). No formal policy exists to hedge volatilities in the interest rate market.

There has been no change to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

Foreign Currency Risk Management

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

Interest Rate Risk Management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors,

bank and cash balances.

The municipality is exposed to fair value risk as it regularly invests capital in fixed deposit accounts. This risk is managed by investing the funds for less than a year (depending on cash flow requirements), thus allowing the interest rate to be updated regularly throughout the year.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with Absa Bank, First National Bank, Investec, Nedbank and Standard Bank. The municipality's borrowings are in fixed rate instruments.

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

At year end, the financial instruments exposed to interest rate risk were as follows:

Call deposits

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this.

Price risk

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

46. Financial instruments disclosure (continued)

The municipality is exposed to equity securities price risk because of investments held by the municipality at fair value of R3 731 140 (2023: R2 690 460).

This investment consists of equity in one listed entity (Sanlam Ltd), and the municipality does not actively trade in equity instruments or conduct any hedging activities.

Surplus for the year would increase/decrease as a result of gains or losses on equity securities classified as at fair value through surplus or deficit.

Credit Risk Management

Credit Risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

Investments/Bank, Cash and Cash Equivalents

The municipality limits its counterparty exposures from its money market investment operations by only dealing with Absa Bank, First National Bank, Investec, Nedbank and Standard Bank.

Trade and Other Receivables

There were no material changes in the exposure to credit risk and its objectives, policies and processes for managing and measuring the risk during the year under review. The municipality's maximum exposure to credit risk is represented by the carrying value of each financial asset in the Statement of Financial Position, without taking into account the value of any collateral obtained. The municipality has no significant concentration of credit risk, with exposure spread over a large number of consumers, and is not concentrated in any particular sector or geographical area.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of trade and other receivables.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:	30 June 2024	30 June 2023
Non-current investments	3,743,950	2,703,270
Long-term receivables	14,661	27,797
Receivables from exchange transactions	335,490,543	254,117,758
Receivables from non-exchange transactions	8,207,515	7,659,965
Cash and cash equivalents	121,848,983	160,234,070
	469,305,652	424,742,860

Liquidity Risk Management

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

46. Financial instruments disclosure (continued)

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

Liquidity and Interest Risk tables

The municipality ensures that it has sufficient cash on demand or access to facilities to meet expected operational expenses through the use of cash flow forecasts.

The following tables detail the municipality's remaining contractual maturity for its non-derivative financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the municipality can be required to pay. The table includes both interest and principal cash flows.

Payables will be settled during the course of the year and thus discounting would have not impact

Financial instruments at fair value.

50. Comparative figures

The comparative figures were restated as a result of the effect of Prior year adjustments (Note 61).

51. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

51. Risk management (continued)

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counterparty.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial Instrument	2024	2023
Cash and cash equivalents	121,848,983	160,234,070
Receivables from exchange transactions	335,490,543	254,117,758
Receivables from non-exchange transactions	53,941,411	50,036,909
Receivables from exchange transactions- Long term portion	14,661	27,797
Fruitless and waste full expenditure recoverable	213,158	213,158
Other financial assets	3,743,950	2,703,270
	515,252,706	467,332,962

Market risk

Interest rate risk

As the municipality has interest-bearing assets in the form of investments call accounts which it holds with various banks. The income derived from these investments have a substantial interest rate risk. The municipality's income and operating cash flows are substantially independent of changes in market interest rates.

At year end the short term investments where the only financial instruments exposed to interest rate risk.

Please refer to note 8 for the figures and break down of these investments

Price risk

The municipality is exposed to equity securities price risk because of investments held by the municipality and classified on the consolidated statement of financial position either as available-for-sale or at fair value through surplus or deficit. The municipality is not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the municipality diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the municipality.

The municipality's investments in equity of other entities that are publicly traded and are included in the , JSE Equity index.

The table below summarises the impact of increases/decreases of the indexes on the municipality's post-tax surplus for the year and on equity.

Other financial assets	2024	2023
Fair value gain/(Loss) in investment in shares	1,040,680	2,618,966

surplus for the year would increase/decrease as a result of gains or losses on equity securities classified as at fair value through surplus or deficit. Other components of equity would increase/decrease as a result of gains or losses on equity securities classified as available-for-sale.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)
Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

52. Going concern

We draw attention to the fact that at 30 June 2024, the municipality had an accumulated surplus (deficit) of R 1,831,061,544 and that the municipality's total liabilities do not exceed its assets -.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

53. Events after the reporting date

Non-Adjusting events

Nersa is prohibited from considering and approving electricity tariffs for the 2024-25 and subsequent financial years where the municipality's application for the approval of electricity tariffs is not based on a cost of supply study.

Municipalities are not entitled to levy electricity tariffs upon consumers until Nersa has approved an application supported by a cost of supply study. Until such time as Nersa has approved an application supported by a cost of supply study, the municipality must continue levying electricity on the same tariff applicable during the 2023-24 financial year.

Municipalities are afforded 60 days from the date of the court order (i.e. until 6 September 2024) to supplement electricity tariff applications with cost of supply studies. Nersa must consider and approve such electricity tariff applications if they are legally compliant and based on the municipality's cost of supply study.

Impact on Metsimaholo Local Municipality:

Metsimaholo local municipality obtained an approval to implement the increased electricity tariffs on 28 June 2024 from Nersa. These were implemented effective from 01 July 2024.

The above matter does not have an impact in the annual financial statements for the year ended 30 June 2024, as it relates to electricity price increases for the proceeding financial year, of which impact will be reported in the annual financial statements for the year ending ending 30 June 2025.

METSIMAHOLO LOCAL MUNICIPALITY

(Registration number FS 204 - Local Municipality)

Annual Financial Statements for the year ended 30 June 2024

Notes to the Annual Financial Statements

Figures in Rand	2024	2023
-----------------	------	------

54. Unauthorised expenditure

Opening balance as previously reported	141,415,280	141,415,280
Add: Unauthorised expenditure - current	83,950,621	-
Closing balance	225,365,901	141,415,280

The over expenditure incurred by municipal departments during the year is attributable to the following categories:

Non-cash	83,950,621	-
----------	------------	---

Analysed as follows: non-cash

Provision of impairment	83,950,621	-
-------------------------	------------	---

Unauthorised expenditure: Budget overspending – per municipal department:

Technical services	83,950,621	-
--------------------	------------	---

55. Fruitless and wasteful expenditure

Opening balance as previously reported	45,174,937	40,034,481
Add: Fruitless and wasteful expenditure identified - current	4,548,428	5,140,456
Closing balance	49,723,365	45,174,937

Fruitless and wasteful expenditure is presented inclusive of VAT

58. Segment reporting (continued)

Identification of segments

The mandate of the municipality is to provide basic services to the community over which it governs. In order to execute its mandate and achieve its strategic goals, internal management reporting is based on each service objective.

The components described below have been identified as individually significant segments for purposes of reporting according to these service objectives:

- Energy sources - Electricity generation and distribution
- Waste management - Solid waste and wastewater management
- Water - Water provision and treatment
- Road transport - Road infrastructure provision and maintenance

The following individually insignificant segments, with similar economic characteristics, have been aggregated for reporting purposes.

- Governance and administration
- Community and public safety
- Economic and environmental services
- Other

The municipality does not monitor segments geographically.

The municipality monitors the following business units operating results separately for the purpose of making decisions about resource allocation and performance assessment.

Aggregated segments

The municipality operates in Free State Province within Fezile Dabi District Municipality. Segments were aggregated on the basis of services delivered as management considered that the economic characteristics of the segments throughout Free State were sufficiently similar to warrant aggregation.

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment

Governance and administration

59. Budget differences

Material differences between budget and actual amounts

The excess of actual expenditure over the final budget of 15% (25% over approved budget) for the Health function was due to expenditures above the level approved by legislative action in response to the earthquake. There were no other material differences between the final budget and the actual amounts.

Differences between budget and actual amounts basis of preparation and presentation

Figures in Rand	2024	2023
-----------------	------	------

59. Budget differences (continued)

The budget and the accounting bases differ. The audited annual financial statements for the whole-of-government are prepared on the accrual basis using a classification based on the nature of expenses in the statement of financial performance. The audited annual financial statements are consolidated statements that include all controlled entities, including government business enterprises for the fiscal period from to . The audited annual financial statements differ from the budget, which is approved on the cash basis and which deals only with the general government sector that excludes government business enterprises and certain other non-market government entities and activities.

The amounts in the audited annual financial statements were recast from the accrual basis to the cash basis and reclassified by functional classification to be on the same basis as the final approved budget. In addition, adjustments to amounts in the audited annual financial statements for timing differences associated with the continuing appropriation and differences in the entities covered (government business enterprises) were made to express the actual amounts on a comparable basis to the final approved budget. The amounts of these adjustments are identified in the following table.

Changes from the approved budget to the final budget

The changes between the approved and final budget are a consequence of reallocations within the approved budget parameters. For details on these changes please refer to pages XX to XX in the annual report.

The changes between the approved and final budget are a consequence of changes in the overall budget parameters. For details on these changes please refer to pages XX to XX in the annual report

60. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

Buses and gym equipment were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting officer who considered them and subsequently approved the deviation from the normal supply chain management regulations.

Summary of deviations

Emergency	20,317,648	3,011,953
Other	-	179,367
Exceptional/Impractical	163,840	4,533,364

Errors

Receivables from exchange transaction.

Receivables from exchange was adjusted due to municipality aligning the impairment calculation to impairment methodology approved by council. This resulted to decrease in net balance of receivables from exchange transactions.

Receivables from non-exchange transaction

Receivables from non-exchange was adjusted due to municipality aligning the impairment calculation to impairment methodology approved by council. This resulted to decrease in net balance of receivables from non-exchange transactions.

VAT receivables

Municipality aligned the VAT input accrued to suppliers' invoices, VAT output to age analysis and cash basis to SARS statement as at the end of each financial reporting period. VAT on impairment was also adjusted based on application of approved impairment methodology by municipal council.

Cash and cash equivalent

Correction of interest on closing balances on investments as at 30 June 2023 that could not be verified with bank statements and accrual interest.
