NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

2021 2022 Restated

1 SEGMENT REPORTING

For management purposes, the municipality is organised and operates in four functional segments (or business units). To this end, management monitors the operating

results of these business units for the purpose of making decisions and resource allocations ans assessment of performance. Revenues and expenditures relating

these business units are allocated at a transactional level. Costs relating to the governance and administration of the municipality are not allocated to these business units.

The four functional segments comprise of: Governance and administration

Community and public safety which includes community and social services, sport and recreation, public safety, economic and services

Environmental services which includes planning and development, road transport and environmental protection services;

Trading services which includes waste management services:

The grouping of these segments is consistent with the functional classification of government activities which considers the nature of the services, the beneficiaries of such services and the fees charged for the services rendered (if any).

Management does monitor the performance of each segment but does not at present have reliable separate financial information for decision making purposes. Processes have been put in place to generate this information at a transaction level and in the most cost effective manner.

uMSHWATHI LOCAL MUNICIPALITY NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

2022 2021 Restated R R

STATUTORY RECEIVABLES

GRAP 108 requires receivable to be split between Statutory and Contractual receivables. In the case of uMshwathi Municipality receivables arising from levying rate properties and issuing of traffic fines will result in Statutory Receivables. Currently these receivables are included in Consumer debtors and other debtors respective

The transitional relief of implementation of GRAP 108 within 3 years has been voluntarily adopted for the current year while the municipality is splitting its receivable.

The municipality plans to be GRAP 108 compliant in the 2021/22 financial year.

16 PRINCIPAL-AGENT ARRANGEMENT

Income from Motor Licensing
Incomes from Agency Services is made up of commission earned from administering the Motor Licensing section on behalf of Department of Transport on an agency basis. Only the commission received is recognised as income. 2,964,642 2,631,077 The main cost related to this arrangement is the employee costs for the section.

The municipality is acting as the Project Manager for housing projects being carried out by the Department of Housing in the municipal area. No income is received by the municipality in acting as the project manager.

INEP Grant received from Department of Energy

The municipality constructs electrical infrastructure with funding received from the Department of Energy. The infrastructure is built according to standards set by Eskom. Since the municipality is not an electricity licence holder the infrastructure, once complete, is handed over to Eskom. As a result the municipality is an agent this a arrangement. Expenditure incurred on the project is netted off against the grant received from the department. The allocation of R 8 600 000 for the current ye was fully expensed.

33 RISK MANAGEMENT

The municipality's activities expose it to a variety of financial risks: market risk (fair value interest rate risk and cash flow interest rate risk) credit risk and liquidity risk. The municipality has developed a comprehensive risk strategy in terms of Treasury Regulation 28.1 in order to monitor and control these risks. Internal Audit function reports quarterly to the Audit Committee, an independent body that monitors risks and policies implemented to mitigate risk exposures. The risk management process relating to each of these risks is discussed under the headings below.

The entity manages liquidity risk through proper management of working capital, capital expenditure and actual forecast cash flows and its cash management policy. Adequate reserves and liquid resources are also maintained.

As the municipality has no significant interest-bearing assets, the entity's income and operating cash flows are substantially independent of changes in market interest rates.

Credit risk consists mainly of cash deposits, cash equivalents and trade receivables. The entity only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an on-going basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customers, taking into account its financial position, past experience and other factors.
