Annual Financial Statements for the year ended 30 June 2022

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and were given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2023 and, in the light of this review and the current financial position, she is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, she is supported by the municipality's audit committee, internal and external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's internal auditors.

I certify that the salaries, allowances and benefits of councillors as disclosed in note 52 of these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution, read with Remuneration of Public Officer Bearer Act and the Minister of Provincial and Local Governments determination in accordance with this Act.

The annual financial statements set out on page 6-179, which have been prepared on the going concern basis, were approved by the accounting officer on 12 December 2022 and were signed on its behalf by:

Accounting Officer
Lulamile H. Mapholoba

Transfers and subsidies approved budget was revised upwards due to the additional allocations received.

Employee related costs approved budget was decreased due to initial over budgeting.

Debt impairment, bulk purchases, inventory consumed, contracted services, transfers and subsidies and losses was revised upwards due to under budgeting.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003). The reporting framework is as prescribed by the Accounting Standards Board in Directive 5.

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The conceptual framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.4 Significant judgments and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Allowance for slow moving, damaged and obsolete inventories

An allowance for inventories to write inventories down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the in the inventory losses note 58.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including economic factors.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.4 Significant judgments and sources of estimation uncertainty (continued)

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 20 - Provisions.

Useful lives of property, plant and equipment

The municipality's management determines the estimated useful lives and related depreciation charges for all assets. These estimates are based on the National Treasury Guideline. This estimate is based on the industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 21 - Employee benefits obligations.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Debt Impairment

On consumer debtors and statutory receivables impairment loss is recognised in surplus and deficit when there is an objective evidence that debtors are impaired. The impairment is measured as the difference between the carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition unless if the effect of discounting is immaterial.

1.5 Agricultural assets

The Municipality recognises agricultural assets or agricultural produce when, and only when:

- the entity controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Agricultural assets are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of agricultural assets or agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of agricultural assets is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable is used to determine fair value.

The plantation harvested is derecognised at its fair value less costs to sell at the point of harvest.

1.6 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services, or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.6 Investment property (continued)

Investment property is recognised as an asset when it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the municipality determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on property, plant and equipment) until disposal of the investment property.

Once the municipality becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on property, plant and equipment.

1.7 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.7 Property, plant and equipment (continued)

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land		Infinite
Buildings	Straight line	5-50 years
Roads	Straight line	5-50 years
Plant and machinery	Straight line	5-15 years
Furniture and fixtures	Straight line	7-10 years
Motor vehicles	Straight line	5-10 years
System security	Straight line	5-10 years
Storm water drainage	Straight line	25 - 50 years
Airport Infrastructure	Straight line	20 years
Solid waste infrastructure	Straight line	5-10 years
Water and sanitation	Straight line	10 - 50 years
Major substations:buildings	Straight line	5-50 years
Transformers and related equipment	Straight line	50 years
Mains	Straight line	45 years
Street lighting	Straight line	50 years
Recreational facilities	Straight line	5-50 years
Fresh produce and other markets	Straight line	5-50 years
Fire engines	Straight line	20 years
Landfill site	Straight line	5-50 years
Transport facilities	Straight line	5-50 years
Fencing	Straight line	10 years
Heavy and mobile plant	Straight line	10-15 years
Bins and containers	Straight line	5-10 years
Office equipment	Straight line	5 - 10 years
Emergency equipment	Straight line	5 - 15 years
Electricity	Straight line	5 - 50 years
Security	Straight line	5 - 10 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.7 Property, plant and equipment (continued)

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 14).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 14).

1.8 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.8 Intangible assets (continued)

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software	Straight line	3-5 years
Servitudes		Indefinite

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of intangible assets is included in surplus or deficit when the asset is derecognised.

1.9 Heritage assets

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses except for Artworks and jewellery.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An impairment loss of a non-cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

An inalienable item is an asset that an municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Recoverable amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Value in use of a cash-generating asset is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

The municipality separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 11).

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.9 Heritage assets (continued)

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, all classes of heritage assets are carried at its cost less any accumulated impairment losses except for artworks and jewellery.

The Municipality measures artworks and jewellery using revaluation model.

After recognition as an asset, artworks and jewellery, whose fair value can be measured reliably, are carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If artworks carrying amount is increased as a result of a revaluation, the increase is credited directly to a revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If artworks and jewellery carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Impairment

The municipality assesses at each reporting date whether there is an indication that heritage assets may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised .

1.10 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.10 Financial instruments (continued)

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

At each reporting date conditions for impairment are conducted.

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the Statement of Financial Position or in the notes thereto:

Class	Category
Receivables from exchange transactions	Financial asset measured at amortised cost
Short term investments	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost
Other financial assets	Financial asset measured at amortised cost
Consumer debtors	Financial asset measured at amortised cost

The Municipality has the following types of financial liabilities (classes and category) as reflected on the face of the Statement of Financial Position or in the notes thereto:

Class	Category
Payables from exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Other financial liabilities	Financial liability measured at amortised cost

Initial recognition

The Municipality recognises a financial asset or a financial liability in its Statement of Financial Position when the entity becomes a party to the contractual provisions of the instrument.

The Municipality recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The Municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Subsequent measurement of financial assets and financial liabilities

The Municipality measures all financial assets and financial liabilities after initial recognition using the financial instruments at amortised cost.

All financial assets measured at amortised cost, are subject to an impairment review.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.10 Financial instruments (continued)

Derecognition

Financial assets

The Municipality derecognises financial assets using trade date accounting.

The Municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the Municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the Municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the Municipality :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The Municipality removes a financial liability (or a part of a financial liability) from its Statement of Financial Position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.11 Statutory receivables

Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the Statement of Financial Position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of this Standard) for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The Municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on 1.19 - Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on 1.20 - Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The Municipality initially measures statutory receivables at their transaction amount.

Subsequent measurement

The Municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Accrued interest

Where the Municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.11 Statutory receivables (continued)

Other charges

Where the Municipality is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, the entity applies the principles as stated in "Accrued interest" above, as well as the relevant policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers).

Impairment losses

The Municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables is reduced through the use of an allowance account. The amount of the losses are recognised in surplus or deficit.

Derecognition

The Municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the Municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the Municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.12 Income Tax

The Municipality is exempted from income tax in terms of section 10(1)(a) of the Income Tax Act.

1.13 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership to the lessee. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.14 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at lower of cost and net realisable value except for land which is carried at current replacement cost.

Inventories are measured at the lower of cost and net realisable value where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Inventories contain land that has been designated for the purposes of housing developments by the Municipality. The land is initially measured at cost. The land shall be subsequently measured at its current replacement cost. The Municipality shall derecognise the land it no longer controls.

1.15 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the Statement of Financial Position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.15 Impairment of non-cash-generating assets (continued)

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, that are expected to be significantly higher than the cost of the asset.

The municipality designates an asset as non-cash-generating when its objective is not to use the asset to generate a commercial return but to deliver services.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the depreciated replacement cost approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an oversized or overcapacity asset. Oversized assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.15 Impairment of non-cash-generating assets (continued)

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.16 Employee benefits

Employee benefits are all forms of consideration given by the municipality in exchange for service rendered by employees.

Termination benefits are employee benefits payable as a result of either:

- The municipality's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from the municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.16 Employee benefits (continued)

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which the entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

The municipality provides retirement benefits for its employees and councillors. Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

The Natal Joint Provident is a defined contribution plan. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

The Municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognized as an employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.16 Employee benefits (continued)

Multi-employer plans and/or State plans and/or Composite social security programmes

The municipality classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan.

Where a plan is a defined contribution plan, the municipality accounts for it in the same way as for any other defined contribution plan.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the entity pays fixed contributions into a separate fund and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the municipality recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.16 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, less the fair value of plan assets(if any), of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The Municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.16 Employee benefits (continued)

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Pension obligations

The Municipality's employees contribute to 6 different Pension Funds, of which the Natal Joint Provident and Retirement Pension Funds cater for the majority of the staff.

The following are defined contribution funds

- *The Natal Joint Provident Fund
- *The Natal Joint Pension Fund,
- *Government Employees Pension Fund,
- *Association Institution Pension Fund,
- *South African Local Authorities Pension Fund and
- *Municipal Councillors Pension Fund

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

Past-service costs are recognised immediately against revenue.

The Municipality does not apply "defined benefit accounting" to the defined benefit funds to which it is a member where these funds are classified in terms of GRAP 25 as multi-employer plans, as sufficient information is not available to apply the principles involved. The City contributes to the defined benefit plans, which are governed by the Pension Fund Act of 1956 due to the nature of these funds and the fact that there is no consistent and reliable basis for allocating the obligation. Plan assets and cost to individual entities participating in the plan, these funds are accounted for as defined contribution funds in terms of paragraph 31 of GRAP 25, the total contributions are included in employee related costs. As a result, GRAP 25 is applied and such funds are accounted for as defined contribution funds. The Municipality's participation in these plans is limited to the obligation of its own employees.

The NJMPF Superannuation and Retirement funds have been treated as defined contribution plans although they are defined benefit funds.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.16 Employee benefits (continued)

Other post retirement obligations

The municipality provides post-retirement health care benefits, upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost, which shall all be recognised immediately; and
- the effect of any curtailments or settlements.

1.17 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Where the effect is material, non-current provisions are discounted to their present value using a prevailing prime rate at year end which reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability. The municipality uses the prevailing prime rate at year end.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Future events that may affect the amount required to settle an obligation shall be reflected in the amount of a provision where there is sufficient evidence of occurrence.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 65.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.17 Provisions and contingencies (continued)

A contingent asset is a possible asset that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

A contingent asset is disclosed where an inflow of economic benefits or service potential is probable.

Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits or service potential will arise and the asset's value can be measured reliably, the asset and the related revenue are recognised in the financial statements of the period in which the change occurs.

A contingent liability is:

(a) a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or

(b) a present obligation that arises from past events but is not recognised because:

(i) it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; or

(ii) the amount of the obligation cannot be measured with sufficient reliability.

A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits or service potential is remote.

Contingent liabilities are assessed continually to determine whether an outflow of resources embodying economic benefits or service potential has become probable. If it becomes probable that an outflow of future economic benefits or service potential will be required for an item previously dealt with as a contingent liability, a provision is recognised in the financial statements of the period in which the change in probability occurs, except in the extremely rare circumstances where no reliable estimate can be made.

1.18 Commitments

A commitment is a binding agreement to undertake operating and capital expenditure at some set time in the future which has not yet become an actual liability.

Items are classified as commitments when the municipality has committed itself to future transactions that will normally result in the outflow of cash.

Capital expenditure is expenditure incurred to purchase, upgrade or construct physical assets (for e.g. buildings) for which there will be a long-term benefit. Long-term is defined as longer than one year.

Operational expenditure is expenditure incurred to purchase goods or services for which there will be a short-term benefit and which has been incurred in the normal course of business. Short-term is defined as less than one year.

An approved and contracted for commitment is where the expenditure has been approved and the contract has been awarded, service level agreement signed (where applicable) or any other pertinent authorisation has been granted at the end of the financial year/reporting date.

An approved and not yet contracted for commitment is where the expenditure has been approved and the contract has been awarded but awaiting finalisation of the service level agreement (where applicable) or any other authorisation pertinent to the contract at the end of the financial year/reporting date.

1.19 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.19 Revenue from exchange transactions (continued)

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Interest

Revenue arising from the use by others of municipality assets yielding interest or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.20 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

When the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and other funding are recognised as revenue to the extent that the municipality has complied with the criteria, conditions or obligations embodied in the grant agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

Taxes

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for income tax is the earning of assessable income during the taxation period by the taxpayer.

The taxable event for value added tax is the undertaking of taxable activity during the taxation period by the taxpayer.

The taxable event for customs duty is the movement of dutiable goods or services across the customs boundary.

The taxable event for estate duty is the death of a person owning taxable property.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Debt forgiveness and assumption of liabilities

The municipality recognise revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

1.21 Bad debts written off

Before any debt is written off it is proved that the debt has become irrecoverable.

Irrecoverable debt is debt which can not be traced successfully; and after all reasonable steps were taken to recover the debt.

Bad debt write offs are considered in terms of cost benefit; when it becomes too costly to recover and the chances of collecting the debt are remote, a write off is considered.

1.22 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.23 Borrowing costs

Borrowing costs are interest and other expenses incurred by the municipality in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.24 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.24 Accounting by principals and agents (continued)

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of Standards of GRAP.

1.25 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.26 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is disclosed in a note to the financial statements as an expense in the period that the expenditure is incurred.

1.27 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is disclosed in the notes to the financial statement in the period that the expenditure is incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.28 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.28 Irregular expenditure (continued)

Irregular expenditure is disclosed inclusive of VAT.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority is recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the municipal council may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

1.29 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.30 Internal reserves

Capital replacement reserve (CRR)

The CRR is an asset financing source that represents an alternative to the other funding sources available to the Municipality namely external loans (interest bearing borrowings) and government grants & subsidies.

Subsequent to the implementation of GRAP in 2008, Reserves and Funds had to be discontinued as they are not permissible in terms of GRAP. However, the National Treasury determined that the CRR is one of the few funds and reserves that are allowed.

As a matter of principle, the focus is the manner in which these reserves are created and accounted for, which in this instance the capital replacement of major components of Infrastructure Assets in the event of technical failure. For accounting purposes, the CRR will be created by transferring amounts out of Accumulated surpluses/deficits to the respective reserve account, or vice versa, in the Statement of Changes in Net Assets. The net effect of these transfers will be nil in the Statement of Changes in Net Assets, and will not affect the value of reserves in totality. It is the requirement of GRAP that no transactions should be accounted for, directly to the Statement of Changes in Net Assets other than those specifically allowed in terms of GRAP, i.e. Revaluation Surplus Reserve. Therefore, situations should be avoided where reserves are created and accounted for, by taking amounts directly to the Statement of Changes in Net Assets thereby circumventing the Statement of Financial Performance.

The CRR will only be utilised for the purpose of purchasing items of property, plant and equipment for the municipality and will not be used for the maintenance of such items.

Self - Insurance reserve

The municipality has a Self-Insurance Reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The self-insurance scheme has a policy that is aligned with the practice in the insurance industry. The balance of the self-insurance reserve is determined based on surpluses accumulated since inception.

The municipality operates a self-insurance scheme under the Self-Insurance Reserve, which has a policy that is aligned with the practice in the insurance industry. The balance of the Self-Insurance Reserve is determined based on surpluses accumulated since inception.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.30 Internal reserves (continued)

Compensation for occupational injuries and diseases (COID) reserve

The Compensation for Occupational Injuries and Diseases Act (Act 130 of 1993) is to provide for payment of medical treatment and compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, or for death resulting from such injuries or diseases. The contribution to the COID fund is 0.75% of the salary expense. The municipality is an exempt employer in terms of Section 84 (1) (a)(ii) & (2) and as such does not pay any assessments to the COID Commissioner. In terms of the exempt status the municipality is mandated to establish its own fund and administers this fund in terms of the COID Act.

1.31 Revaluation reserve

The increase arising from the revaluation of Heritage assets is credited to a revaluation reserve. The revaluation surplus is realised upon disposal of artworks and jewellery. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

1.32 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.33 Budget information

Municipalities are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by a municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by functional classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2021/07/01 to 2022/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.33 Budget information (continued)

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Deviations between budget and actual amounts exceeding 10 percent are obtained monthly for the preparation of the Section 71 reporting and used during the audit process.

The threshold for which reasons for variances are provided is 10% and above.

1.34 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

A related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

1.35 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.36 Living resources

Living resources (Game animals) are those resources that undergo biological transformation.

Non-living resources are those resources, other than living resources, that occur naturally and have not been extracted.

Agricultural activity is the management by an municipality of the biological transformation and harvest of biological assets for:

(a) sale;

(b) distribution at no charge or for a nominal charge; or

(c) conversion into agriculture produce or into additional biological assets for sale or distribution at no charge or for a nominal charge.

A bearer plant is a living plant that:

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

Living resources (continued)

- (a) is used in the production or supply of agricultural produce;
- (b) is expected to bear produce for more than one period; and
- (c) has a remote likelihood of being sold as agricultural produce, except for incidental scrap sales.

Biological transformation (for purposes of this Standard) comprises the processes of growth, degeneration, production, and procreation that cause qualitative or quantitative changes in a living resource.

Carrying amount is the amount at which an asset is recognised after deducting any accumulated depreciation and accumulated impairment losses.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or development and, where applicable, the amount attributed to the asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life.

Depreciable amount is the cost of an asset, or other amount substituted for cost, less its residual value.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Group of resources means a grouping of living of a similar nature or function in an entity's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

The residual value of an asset is the estimated amount that an municipality would currently obtain from disposal of the asset, after deducting the estimated costs of disposal, if the asset was already of the age and in the condition expected at the end of its useful life.

Useful life is the period over which an asset is expected to be available for use by an municipality, or the number of production or similar units expected to be obtained from the asset by an municipality.

Recognition

A living resource is recognised as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality is required in terms of legislation or similar means to manage a living resource, but it does not meet the definition of an asset because control of the resource cannot be demonstrated, relevant information are disclosed in the notes to the annual financial statements.

Where the municipality holds a living resource that meets the definition of an asset, but which does not meet the recognition criteria, relevant information are disclosed in the notes to the annual financial statements. When the information about the cost or fair value of the living resource becomes available, the municipality recognise, from that date, the living resource and apply the measurement principles.

Measurement at recognition

A living resource that qualifies for recognition as an asset is measured at its cost.

Where a living resource is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

The cost of a living resource comprises its purchase price, including import duties and non-refundable purchase taxes, and any costs directly attributable to bringing the living resource to the location and condition necessary for it to be capable of operating in the manner intended by management.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

Living resources (continued)

Measurement after recognition

Cost model

After recognition as an asset, a group of living resources are carried at its cost less any accumulated depreciation and any accumulated impairment losses.

Depreciation

Living resources are depreciated and the depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset, where appropriate.

The depreciable amount of a living resource is allocated on a systematic basis over its useful life.

The municipality assesses at each reporting date whether there is any indication that the entity's expectations about the residual value and the useful life of a living resource have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change(s) is accounted for as a change in an accounting estimate.

In assessing whether there is any indication that the expected useful life of the living resource has changed, the municipality considers the following indications:

- (a) The use of the living resource has changed, because of the following:
- The municipality has changed the manner in which the living resource is used.
 - The municipality has made a decision to dispose of the living resource in a future reporting period(s) such that this decision changes the expected period over which the living resource will be used.
 - Legislation, government policy or similar means have been amended or implemented during the reporting period that have, or will, change the use of the living resource.
 - The living resource was idle or retired from use during the reporting period.
- (b) The living resource is approaching the end of its previously expected useful life.
- (c) There is evidence that the condition of the living resource improved or declined based on assessments undertaken during the reporting period.
- (d) The living resource is assessed as being impaired.

In assessing whether there is any indication that the expected residual value of the living resource has changed, the municipality considers whether there has been any change in the expected timing of disposal of the living resource, as well as any relevant indicators as noted above.

The depreciation method used reflects the pattern in which the future economic benefits or service potential of the living resource is expected to be consumed by the entity.

The depreciation method applied to a living resource is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the living resource, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The useful lives of items of living resources have been assessed as follows:

Item	Depreciation method	Average useful life
Giraffe	Straight-line	25 years
Zebra	Straight-line	30 years
Blue Wildebeest	Straight-line	20 years
Inyala	Straight-line	20 years
Impala	Straight-line	15 years
Bush buck	Straight-line	15 years
Reed buck	Straight-line	15 years

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

Living resources (continued)

Impairment

The municipality assesses at each reporting date whether there is an indication that the living resource may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the living resource.

Compensation from third parties for living resources that have been impaired, lost or given up, is included in surplus or deficit when the compensation becomes receivable.

Transfers

Transfers from living resources are made when the particular asset no longer meets the definition of a living resource and/or is no longer within the scope of this accounting policy.

Transfers to living resources are made when the asset meets the definition of a living resource.

Derecognition

The carrying amount of a living resource is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a living resource is included in surplus or deficit when the item is derecognised.

1.37 Value Added Tax (VAT)

VAT is payable on the receipt and payment basis.

The transaction date is referred to as the "time of supply". Time of supply applies to certain supplies as the prevailing rate of VAT on that date will apply to the transaction concerned.

- before 1 April 2018 – a VAT rate of 14% will apply;
- on or after 1 April 2018 – a VAT rate of 15% will apply.

1.38 Expenditure

An expense is a decrease in the net financial position of the entity, other than decreases arising from ownership distributions.

An expense arises from exchange and non-exchange transactions, other events such as unrealised increases and decreases in the value of assets and the consumption of assets through depreciation and erosion of service potential and ability to generate economic benefits through impairments.

An expense may arise from individual transactions or groups of transactions.

Expenses are recognised in the Statement of Financial Performance when a decrease in future economic benefits or service potential related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably. The recognition of expenses occurs simultaneously with the recognition of an increase in liabilities or a decrease in assets

Expenses encompasses losses as well as those expenses that arise in the course of the operating activities of the municipality

Losses represent other items that meet the definition of expenses and may, or may not, arise in the course of the operating activities of the entity. Losses represent decreases in economic benefits or service potential and as such, they are no different in nature from other expenses.

Figures in Rand 2022 2021

2. New standards and interpretations

2.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published for the municipality's accounting periods beginning on or after 01 July 2022 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 25 (as revised): Employee Benefits	The Minister of Finance has not determined an effective date	Not expected to impact results but may result in additional disclosure
• GRAP 104 (as revised): Financial Instruments	01 April 2025	Not expected to impact results but may result in additional disclosure
• iGRAP 21: The Effect of Past Decisions on Materiality	01 April 2023	Unlikely there will be a material impact
• GRAP 2020: Improvements to the standards of GRAP 2020	01 April 2023	Unlikely there will be a material impact
• GRAP 1 (amended): Presentation of Financial Statements	01 April 2023	Unlikely there will be a material impact

3. Inventories

Consumable stores	32 462 245	32 788 610
Materials and supplies	41 310 862	33 401 053
Water for distribution	1 620 082	1 837 726
Land inventory	292 004 270	285 689 426
	367 397 459	353 716 815

Inventory are recorded using the weighted average cost method.

Inventory expensed during the year R84 307 652 (2021 : R58 158 321).

Inventory are carried at lower of cost or net realisable value except for land carried at current replacement cost.

Inventory losses - consumables for the year (R 2 687 271) (2021 : (R3 655 242)).

Consumable stores comprises mainly of fuel inventory, stationery, detergents and street fittings amongst other items.

Inventory pledged as security

No inventory was pledged as security for either overdraft facilities or any financial liabilities of the municipality.

4. Short term investment

Compensation for Occupational Injuries and Diseases Investment (COID)	32 670 009	32 311 434

Receivables from exchange pledged as security

There are no receivables from exchange transactions pledged as security for any financial liabilities of the municipality.

Credit quality of receivables from exchange transactions

The credit quality of receivables from exchange transactions are neither past due nor impaired except for land sale debtors, and IDT.

There is an ongoing dispute between IDT and Msunduzi Local Municipality on an amount that was paid by Msunduzi Local Municipality to IDT for the implementation of infrastructure projects. IDT was appointed as an implementing agent and advance payments were made to IDT during 2011/12 and 2012/13 financial years. The projects were implemented; however, IDT was unable to account for work amounting to R108 836 507. The municipality referred the matter to the legal team for a civil litigation and has not been finalised as yet. The receivable has been fully impaired since IDT is disputing the receivable and the matter is still under litigation.

During the year under review there has not been any change the matter is undergoing consequence management and legal process.

Statutory receivables general information

Transaction(s) arising from statute

Traffic fines

The two types of traffic fines that are issued are :

- 1)Traffic fines issued in terms of the Administrative Adjudication of Road Traffic Offences Act (AARTO Act).
- 2)Traffic fines issued in terms of the Criminal Procedures Act.

Property rates

The Municipal Property Rates Act No. 06 of 2004 governs property rates billed. The Act regulates, the power of the municipality to impose rates on properties; to exclude certain properties from rating in the national interest; to make provisions for the municipality to implement a transparent and fair system of exemptions, reductions and rebates through the municipalities rating policy, making provisions for fair and equitable valuation methods of properties; to make provisions for objections and appeals.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
-----------------	------	------

6. Statutory receivables (continued)

Determination of transaction amount

Traffic fines

Traffic fines are issued in terms of the AARTO Act by way of notices to offenders which specify the value of the fine that must be paid, along with any discount that can be applied if the fine is paid within a specific period of time.

Traffic fines issued in terms of the Criminal Procedures Act are usually issued by way of notice to offenders, and can :

- (a) indicate the value of the fine to be paid, and that certain reductions could be made to the value of the fine payable and how, or the circumstances under which, such reductions can be applied, or
- (b) indicate that the offender must appear in Court on a specified date (in these instances, the value of the fine may or may not be indicated but this is often only determined after a separate legal process).

Property rates

Property rates are levied in terms of the municipality's rates policy, which is aligned to the Municipal Property Rates Act No. 6 of 2004

The amount of rates levied by the municipality on properties, is the rate randage

- a) On the market value of the property;
- b) In the case of public service infrastructure, on the market value of the public service infrastructure less 30% of that value as contemplated in section 17(1)(a) of the Municipal Property Rates Act of 2004 or on such a lower percentage as the minister determines in terms of section 17(4) of the Municipal Property Rates Act of 2004;
- c) In the case of property to which section 17(1) (h), of the Municipal Property Rates Act of 2004, applies on the market value of the property less the amount stated in that section, or on such amount as the Minister may determine.

Refer to Note 37 for rate randages.

Interest or other charges levied/charged

Traffic fines

No interest is levied on traffic fines.

Property rates

The following are charges that may be charged in addition to rates levied:

a) Interest on outstanding rates billed:

Interest shall be charged on all rates arrears in terms of section 64(g) of the Municipal Finance Management Act and the Municipal Systems Act.

The municipality has a Credit control policy that is approved by council. The credit control policy states that amounts on accounts, which remain unpaid after the due date shall attract interest irrespective of the reasons for non-payment. Interest will be charged at a rate of 7%, which is the annual interest rate as per approved tariff register.

b) In addition to interest charged in respect of any property, collection charges shall accrue as follows:

As from the last working day, an amount representing ten per cent (10%) of the capital amount of the rates then in arrear in terms of Section 75A 1(b) of the Municipal Systems Act;

On the grant of a court order, a further amount representing ten per cent (10%) of the capital amount of the rates then in arrear in terms of Section 75A 1(b) of the Municipal Systems Act.

Notes to the Annual Financial Statements

Figures in Rand

2022

2021

6. Statutory receivables (continued)

Basis used to assess and test whether a statutory receivable is impaired

Traffic fines

The impairment loss is calculated as the difference between value of traffic fines issued for the year less finalised cases and the present value of expected cash flows thereof, at reporting date.

Property rates

Impairment regarding property rates are assessed collectively in terms of the municipality's impairment policy. Each debtor is classified into their risk profiles based on total services outstanding.

The difference between the carrying-value at reporting date less the present value of expected future cash flows, determines if impairment needs to be provided for. This is in terms of GRAP 108.

Discount rate not applied to the estimated future cash flows

Considering the fact that traffic fines payments are short term in nature discounting is not performed as it is immaterial.

Statutory receivables past due but not impaired

Statutory receivables which are past due and not impaired. At 30 June 2022 R103 969 206 (2021: R136 148 659).

Statutory receivables impaired

The amount of the provision was R943 896 823 as of 30 June 2022 (2021: R785 577 680).

Factors the entity considered in assessing statutory receivables impaired

Traffic fines

Past history patterns and peculiarity of traffic fines.

Collection rates in the current year.

Finalised cases in the reporting period.

Property rates

Past history payment of debtors and the debtors risk profiling. Accounts outstanding that are above a million are considered material and are assessed separately based on their recovery of debt.

There are no statutory receivables pledged as security for any liability.

Non-financial information

The municipality owns a plantation forest that produces felled trees for timber production, separately disclosed as consumable biological assets.

There was harvests of timber 2022: Nil (2021: Nil).

There has been no harvest in the current financial year.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Refer to note 77 for risk management strategies on agricultural assets.

Pledged as security

No agricultural assets have been pledged as security.

Restrictions imposed by regulations

There are no agricultural assets whose use or capacity to sell is subject to restrictions imposed by regulations.

Methods and assumptions used in determining fair value

The valuation at 30 June 2022 was performed by Stephen de Klerk.

Stephen de Klerk is a member of the South African Council for Property Valuers Profession (SACPVP), and has the required qualifications and expertise in the valuation of agricultural assets.

The valuations conform to South African Valuation Standards and were arrived at by reference to market evidence of transaction prices.

10. Living resources (continued)

Compensation from third parties

There was no compensation from third parties for living resources that were impaired, lost or given up during the current financial year.

General Information

Msunduzi Local Municipality Bisley Nature Reserve's main purpose is the conservation of a representative system of biodiversity encompassing fauna, flora and unique scenery within the nature reserve. The municipality does not manage the reserve for reproduction of biodiversity.

The municipality is involved in biological transformation of fauna and flora primarily as a service to the community for the main purpose of recreation rather than for sale.

Other information

Msunduzi Local Municipality has elected the cost model to account for Living resources.

A physical verification of living resources was performed by the conservation department from 17 to 26 May 2022.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Restrictions on heritage assets

There are no ownership and disposal restrictions on heritage assets.

There are no contractual commitments for the acquisitions, maintenance and restoration of heritage assets

Pledged as security

No heritage assets have been pledged as security for any financial liabilities.

Contractual commitments for the acquisition, maintenance and restoration of heritage assets

There are no contractual commitments for the acquisitions, maintenance and restoration of heritage assets.

Revaluations

Heritage assets

Artworks and jewellery whose fair value can be measured reliably are carried at the revalued amount, being their fair value at the date of valuation less any subsequent impairment losses.

Artworks were last valued on 30 June 2019 for the 2018/19 financial year.

According to the municipality's accounting policy, artworks are revalued every 4 years.

Jewellery was last valued in the 2018/19 financial year.

According to the municipality's accounting policy, jewellery are revalued every 4 years.

The valuation of artworks was performed by Harriet Marry Gilfillan who is an independent professional appraiser and has experience in the valuation of artworks and jewellery.

The valuations were arrived at by reference to market analysis, market records and trends relating to each artist and type of artwork was researched in order to arrive at a fair value.

The revaluation reversal relates to the impairment loss of the assets which were previously revalued.

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
-----------------	------	------

11. Heritage assets (continued)

Heritage assets which fair values cannot be reliably measured

The following heritage assets were not recognised due to a reliable measurement not being possible on initial recognition is as follows:

Legal Deposit collection at the Bessie Head Library

In 1916, the Natal Society Library (now the Msunduzi Municipal Library – Bessie Head Library) was identified as one of five libraries in South Africa accorded Legal Deposit status. This privilege helped make it into one of South Africa's major research and information libraries. Legal Deposit libraries play a unique and very important role as custodians, in perpetuity, of this country's cultural wealth and information. They also have to make this information available, as widely as possible, to the citizens of South Africa. The Legal Deposit Collection has become an important asset. Since 1916, the Msunduzi Municipal Library has amassed a huge collection of South African books, pamphlets, periodicals, maps and newspapers which it has to preserve for future generations. Due to the nature of the class of heritage assets, the Department of Arts and Culture has confirmed that there is no monetary value as there is no active market.

Expenditure incurred to repair and maintain heritage assets

There were no repairs and maintenance costs incurred in the current year.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

The valuation at 30 June 2022 was performed by Finley Hamilton an independent valuer.

Finley Hamilton has recent experience in location and category of the investment property being valued.

The valuation was based on open market value for existing use.

These assumptions are based on current market conditions.

Adjustments to the valuation is attributable to change in market value of investment property.

Finley Hamilton is a member of the South African Council for Property Valuers Profession (SACPVP), and has the required qualifications and expertise in the valuation of investment properties. The valuations conform to South African Valuation Standards and were arrived at by reference to market evidence of transaction prices for similar properties.

Investment property has been accounted for in terms of GRAP 16 and comprises both land and buildings owned by Msunduzi Municipality. Investment property is not depreciated but annually valued at year end in order to determine their fair value as prescribed in GRAP 16.

Amounts recognised in surplus or deficit

Rental revenue from Investment property	7 508 731	5 739 687
---	-----------	-----------

The municipality does not hold any operating property interest.

There were no repairs, maintenance and direct operating expenses related to investment property incurred in the current year.

Tenants are responsible for repairs and maintenance.

Included in Investment property is vacant land which has been invaded/illegally occupied. The land has a carrying value of R14 756 000 (2021 : R39 937 000).

The illegally occupied land is not considered impaired by management as the service potential is not considered affected as this land is addressed by the Rapid urbanisation management within the parameters of the approved land use scheme.

Notes to the Annual Financial Statements

Figures in Rand 2022 2021

14. Property, plant and equipment (continued)

Pledged as security

No property, plant and equipment has been pledged as security for any financial liabilities.

Other information

Refer to Appendix A for detailed property, plant and equipment schedule.

During the year the municipality undertook a conditional assessment of fixed assets, which culminated in the additional decreases/increases in remaining useful lives of assets.

The municipality applies the depreciated replacement cost method to calculate impairment.

Property plant and equipment were impaired by R5 441 557 (2021 : R7 607 464) as result of conditional assessment.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Invaded land

Included in Property, plant and equipment is vacant land which has been invaded/illegally occupied. The land has a carrying value of R25 222 261 (2021 : R25 222 261). The illegally occupied land is not considered impaired by management as the service potential is not considered affected as this land is addressed by the Rapid urbanisation management within the parameters of the approved land use scheme.

Funding provided by Department of Human Settlements as part of the restoration programme to assist in fast tracking the issuing of title deeds to the people of Msunduzi. The arrangement is through the MOA in order for the Provincial Department to provide funding in advance to the Municipality for appointment of social facilitators and a panel of conveyancers to undertake this process Beneficiary Audit and Transfers.

The Beneficiary Audit and Transfers was a National Programme which was then delegated to the Municipality through Provincial Department of Human Settlements. The EEDBS was a National program which was delegated to Municipalities in order to ensure that restoration of title deeds for houses constructed in Pre 1994 through the Housing Subsidy Scheme It was an existing programme that was handed over to the Municipality and the Municipality provided with the funding. The Municipality has no power to determine the beneficiary list. The project is solely for the transfer of title deeds to rightful owners. Title deeds are legal documents which the Municipality is not allowed to sell to beneficiaries and neither can those be used by the Municipality for own use.

The Municipality is not exposed to variability of the transactions, The Provincial Department of Humans settlements is responsible for fulfilling all rights and obligations. Even in the event of disputes the Provincial Department and the court make the final determinations on who the beneficiaries will be.

Significantly the arrangement was for the Department to transfer funds into the Municipality in order for the Municipality to undertake beneficiary verification and transfers of completed housing units. The purpose of the Principal-Agent relationship with regards to the Beneficiary Audit and Transfers is to task the municipality to review all projects approved prior to 1994 and ensure that beneficiary verification is completed to facilitate transfers without the municipality being exposed to any risks associated with the implementation of the Programme.

Military Veterans - Houses

The arrangement between the the Municipality and the Provincial Department of Human Settlements is to undertake planning and servicing of 180 proposed residential sites for the military veterans in the Msunduzi municipal area of jurisdiction. The department is responsible in fulfilling rights and obligations with respect to payment of service providers as well as processing of allocation of beneficiaries. The Municipality through the MOA signed between both parties undertook transactions with implementing agents on behalf of the department to get the sites ready for Human settlements projects (Military Veterans). The sites will be handed over to the Provincial Department of Human Settlement once ready for development and the Department will eventually hand over to beneficiaries as allocated by the Provincial Department.

Landfill rehabilitation

The landfill rehabilitation provision represents management's best estimate of the municipality's rehabilitation liability based on a valuation provided by an external consultant on the remaining useful life of the landfill site.

One Pangea Expertise and Solutions was appointed to perform the annual valuation of the provision for the rehabilitation and closure costs of the New England Road landfill site.

At the end of the life of the landfill site, the municipality is expected to restore the landfill site to the condition it was before its use.

According to the National Environmental Management Act, Act 107 of 1998, the operation of a landfill results in an obligation to rehabilitate the landfill and prevent any further pollution after closure thereof. The landfill site provision was created to ensure that the site is environmentally and publicly acceptable and suited to the implementation of the proposed end-use. The estimated remaining life of the landfill site is 6,32 years.

The key assumptions used by the experts were:

Net discount rate 3.56%
Average density of the waste 0.7 tonnes per cubic metres
Expected growth rate of waste generation 1.81%
Excavatable cover depth 2.5 metres
Cover to waste ratio 1.25

The municipality was declared to have been in breach of the Variation Waste Management Licence issued by the department of Economic Development, Tourism and Environmental Affairs (Kwa-Zulu Natal) on 3 July 2017, in respect of operation of the New England Road Landfill Site on Lot 1853 of the Farm Darvill No 15036, New England Road, Pietermaritzburg.

The High Court of South Africa issued a court order directing the Municipality to discharge its duty of care and remediation of environment as required by section 28(1) and (3) of the National Environmental Management Act 107 of 1998.

20. Provisions (continued)

Litigation

Litigations against the Municipality recognized as provisions are those that the appointed attorneys have considered probable that the Municipality is liable and an outflow of economic benefits associated with the litigation is expected and the costs can be measured reliably.

Key assumptions provided by legal counsel are:

Net effective discount rate varies case by case and range from prime rate to 15.5%

Alien vegetation provision

According to the National Environmental Management Act, 1998 (Act No. 107 of 1998) the municipality was encouraged to recognise a provision in this regard.

The Department of Agriculture has since 2006 provided considerable support to the municipality in terms of clearing listed alien invasive plants.

The municipality's involvement and responsibility is effectively operational support to the Department of Agriculture for the clearing of listed alien invasive plants.

No work has been carried out during the current reporting period.

21. Employee benefit obligations

Defined contribution plan

The Council provides retirement benefits to its employees by contributing to either a Provident fund, Retirement Pension Fund or Superannuation Pension Fund.

Membership to either a pension or provident fund is compulsory for all permanent employees.

The majority of the members and the Council contributes to the Natal Joint Municipal Pension and Provident funds (NJMP), employees contributes to the South African Local Authorities Pension Fund (SALA) and, Associated Institution Pension Fund (AIPF), Pietermaritzburg Provident Fund and Government Employees Pension Fund (GEPF). Employees contributing to SALA, AIPF, Pietermaritzburg Provident Fund and GEPF make up the minority of members contribution to the pension funds. The municipality's liability in these funds cannot be determined owing mainly to the assets not being allocated to each employer and one set of financials being compiled for each fund and not for each contributing employer. The majority of personnel are members of the following pension funds:

Kwa-Zulu-Natal Joint Municipal Provident Fund

An actuarial valuation was performed as at 31 March 2021 by SNG Argen Actuarial Solutions.

The market value of the fund's assets was R7 255 819 000 as at 31 March 2021.

Results of the valuation

The Fund self-insures its risk benefits in excess of the full benefit. It therefore maintains a Risk Reserve Account as a measure of protection against volatility in claims experience. The amount of R20 563 000 required to be held in the Risk Reserve Account.

The Fund is financially sound as at the valuation date.

Benefits of the fund:

- 1) Pension age - 65 years
- 2) Earliest retirement age - 58 years (55 years if more than 10 years continuous service)
- 3) Full benefit - Initial transfer plus member's contributions plus employer's contributions for full benefits plus investment earnings and bonuses.
- 4) Member's portion of full benefits - Initial transfer plus members contributions plus local authorities contributions for full benefits plus interim, special and final bonuses.
- 5) Benefit on retirement after earliest retirement age or pension age - full benefit.
- 6) Benefit on retirement because of ill health - full benefit.
- 7) Benefit on death in service - Full benefit plus 0.7% of annual pensionable salary for each month of potential service to a maximum of 2.1 years salary

Contributions to the fund

Defined contribution plans

Natal Joint Municipal Pension Fund: (Superannuation) actuarial valuation

An actuarial valuation was performed as at 31 March 2021 by SNG Argen Actuarial Solutions.

The market value of the fund's assets was R13 978 064 000 as at 31 March 2021.

The regulations of the fund have been amended with effect from 1 July 2004, so that the Committee of Management is able to levy a separate surcharge on local authorities which grant excessive salary increases, thereby causing a financial strain on the fund to the detriment of other stakeholders.

The employers are no longer permitting members to join the Fund, so that it is effectively closed to new members. This means that the average age will increase over time which, in turn, means that the required rate of contribution will also increase. Thus, once the surcharge ceases, the underlying rate of contribution will not be sufficient to meet the cost of the benefits. It is necessary to set aside a reserve to hold assets equal to the expected shortfall. For this reason a Contribution Reserve is held equal to the present value of the shortfall in terms of the Financial Services Board's Circular PF117 for the 5 years to 2015 when it is expected that the surcharge will cease.

Benefits of the fund:

- 1) Members Contributions - 9.25% of pensionable salaries.
- 2) Pension age 65 years.
- 3) Final average salary - average annual pensionable salaries during the last year of service.
- 4) Pension on retirement at pension age - 2.2% of final average emoluments per year of continuous service.
- 5) Lump sum on retirement at pension age - 8.25% of final average emoluments per year of service.

2022

2021

21. Employee benefit obligations (continued)

6) Pension on retirement because of ill-health (minimum ten years continuous service) - pension as for retirement at pension age.

7) Lump sum on retirement because of ill-health (minimum 10 years continuous service) - lump sum as for retirement at pension age.

8) Lump sum on retirement because of ill health (less than ten years continuous service) - the greater of the resignation benefit or twice the members contributions.

9) Surviving spouses pension on death in service - 1,2% of final average emoluments per year of continuous service

that the member would have had at the pension age.

10) Surviving spouses pension on death of pensioner - 1,2% (0,77% in the case of a pensioner who retired before 1 July 1999) of final average emoluments per year of continuous service.

11) Lump sum on death in service - Annual pensionable emoluments. 10.75% of final average salaries.

12) Withdrawal - members contribution plus 5/12% for each month of continuous service (the addition is approximately equal to compound interest at 10% a year) and increased by 5% for each complete year of service up to a maximum of 20 years.

Natal Joint Municipal Pension Fund: (Retirement) actuarial valuation

An actuarial valuation was performed at 31 March 2021 by SNG Argen Actuarial Solutions.

The market value of the fund's assets was R4 806 932 000 as at 31 March 2021.

The regulations of the fund have been amended with effect from 1 July 2004, so that the Committee of Management is able to levy a separate surcharge on local authorities which grant excessive salary increases, thereby causing a financial strain on the fund to the detriment of other stakeholders

Legislation does not oblige a fund to hold a Solvency Reserve for purposes of financial soundness. However, being financially sound only on the "best estimate" basis means that there is still a 50% chance of the Fund being in deficit in the future. Provisions of PF 117, the Circular issued by the FSCA setting out the level of solvency reserves that the FSCA considers reasonable as well as the guidelines set out in PF Notice No. 2 of 2016 were applied.

Benefits of the fund:

1) Members Contributions - 7 % of pensionable salaries.

2) Pension age 65 years.

The Municipality does not apply "defined benefit accounting" to the defined benefit funds to which it is a member where these funds are classified in terms of GRAP 25 as multi-employer plans, as sufficient information is not available to apply the principles involved. The City contributes to the defined benefit plans, which are governed by the Pension Fund Act of 1956 due to the nature of these funds and the fact that there is no consistent and reliable basis for allocating the obligation. Plan assets and cost to individual entities participating in the plan, these funds are accounted for as defined contribution funds in terms of paragraph 31 of GRAP 25, the total contributions are included in employee related costs. As a result, GRAP 25 is applied and such funds are accounted for as defined contribution funds. The Municipality's participation in these plans is limited to the obligation of its own employees.

The NJMPF Superannuation and Retirement funds have been treated as defined contribution plans although they are defined benefit funds.

The employees of the Council as well as the Council as employer contribute to municipal pension, retirement and various provident funds as listed below:

Associated Institution Pension Fund

Post employment medical aid

Eligible employees will receive a post-employment subsidy of 60% of the contribution payable should they be a member of a medical scheme at retirement.

Continuation members and their eligible dependants receive a between 60% and 65% subsidy.

Continuation members and their eligible dependants receive a 60% subsidy, with the exception of continuation members who retired prior to 2004, who receive a 65% subsidy. Members' individual subsidy rates were provided.

Upon a member's death-in-service, surviving dependants are entitled to commence receipt of the same post-employment subsidy. Upon a member's death-in-retirement, surviving dependants are entitled to continue to receive the same subsidy.

All post-employment subsidies are subject to a maximum subsidy. The maximum for the year ending 30 June 2023 is an assumed value of R 5,011.78 per member per month, which is the previous year's maximum of R 4,773.12 increased by 5.00% (the assumed 1 July 2022 general salary increase). The maximum subsidy amount has been assumed to increase in future at 75% of salary inflation.

The municipality's employees and councillors are members on 6 accredited medical aid schemes, namely:

- 1) Bonitas
- 2) Discovery Health
- 3) Hosmed
- 4) Key-Health
- 5) LA Health
- 6) SAMWU Med

Pensioners continue on the option they belonged to on the day of their retirement.

The latest actuarial valuation was performed by Arch Actuarial Consulting for the period ended 30 June 2022.

The valuation undertaken in accordance with the requirements of Professional Guidance Note (PPN) 301 of the Actuarial Society of South Africa.

The expert is independent and an approved pension fund valuator and a member of the Actuarial Society of South Africa (ASSA).

According to the last valuation the accrued liability amounted to R547 258 001 (2021: R512 371 001).

-----------------	------	------

21. Employee benefit obligations (continued)

Long service awards

The Municipality offers employees Long Service Awards (LSA) for every five years of service completed, from five years of service to 45 years of service, inclusive.

Employees' LSA are based on basic salary.

On termination of service of an employee with five or more years of service, for reasons of retirement after reaching pensionable age (excludes early retirement), medical incapacity or retrenchment, the above leave award is paid on a pro-rata basis. The pro-rata factor applicable is the number of years of service since an employee's most recent service milestone, divided by five.

An employee may choose to take the long service leave due to him/her or encash it. Whatever the employee chooses, it must be done in the same leave year in which he/she qualified for such leave.

The amounts recognised in the Statement of Financial Position are as follows:

Carrying value

Long service awards	(83 588 000)	(83 089 000)
Post employment medical aid	(547 258 001)	(512 371 001)
	(630 846 001)	(595 460 001)

Non-current liabilities	(589 320 000)	(555 608 000)
Current liabilities	(41 526 001)	(39 852 001)
	(630 846 001)	(595 460 001)

Current

Long service awards	(11 458 000)	(12 148 000)
Post employment medical aid	(30 068 001)	(27 704 001)
	(41 526 001)	(39 852 001)

Non current

Long service awards	(72 130 000)	(70 941 000)
Post employment medical aid	(517 190 000)	(484 667 000)
	(589 320 000)	(555 608 000)

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand 2022 2021

21. Employee benefit obligations (continued)

Changes in the present value of post employment medical aid benefit obligation are as follows:

Opening balance	(512 371 001)	(470 193 001)
Current service cost	(13 314 000)	(11 309 000)
Interest cost	(49 136 000)	(45 590 000)
Benefits paid	28 946 351	28 513 424
Actuarial gain/(loss)	(1 383 351)	(13 792 424)
	(547 258 001)	(512 371 001)

Changes in the present value of long service awards obligation are as follows:

Opening balance	(83 089 000)	(75 821 000)
Interest cost	(7 046 000)	(5 032 000)
Current service cost	(7 212 000)	(6 863 000)
Actuarial gain/(loss)	2 887 671	(4 397 732)
Benefits paid	10 871 329	9 024 732
	(83 588 000)	(83 089 000)

The total post employment medical aid benefit obligation increased by R34 887 000 (7%) from the previous valuation attributed to the following reasons:

- 1) An increase in the average age which means members are closer to retirement, which in turn results in less discounting.
- 2) An increase in the average age also diminishes the likelihood of members to leave before retirement.
- 3) The average in service non member liability increased
- 4) The increase in the the number of continuation members .

The significant decrease in the actuarial loss of 90% is attributed to the net effect of changes in the net discount rates, subsidy increases higher than assumed, changes to membership profile different from assumed and actual benefits vested greater than expected.

The total long service awards liability increased by R499 000 (1%) due to the following reason:

- 1) There are 36 more eligible employees compared to the previous year.

Net expense recognised in the Statement of Financial Performance(Post employment medical aid)

Current service cost	(13 314 000)	(11 309 000)
Interest cost	(49 136 000)	(45 590 000)
Actuarial (loss)/gain	(1 383 351)	(13 792 424)
	(63 833 351)	(70 691 424)

Net expense recognised in the Statement of Financial Performance(Long service awards)

Interest cost	(7 046 000)	(5 032 000)
Current service cost	(7 212 000)	(6 863 000)
Actuarial/(loss)/gain	2 887 671	(4 397 732)
	(11 370 329)	(16 292 732)

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand 2022 2021

21. Employee benefit obligations (continued)

Key assumptions used(Post employment medical aid)

Assumptions used at the reporting date:

Discount rates used	11,01 %	9,85 %
Health care inflation rate	7,85 %	6,65 %
Maximum subsidy inflation rate	5,51 %	4,61 %
Proportion with a spouse dependent at retirement	60,00 %	60,00 %
Continuation of membership retirement	75,00 %	75,00 %

The average retirement age is : 62 years.

Mortality during employment : SA 85 -90.

Mortality post-employment : PA(90) -1 with a 1% mortality improvement p.a. from 2010

The projected unit credit method is used as the standard valuation methodology for the valuation of the liability at the reporting date.

Other assumptions

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change is assumed in healthcare care inflation and discount rates changes and would have the following effect liability:

	One percentage point increase	One percentage point decrease
Health care inflation rate (8%/ -9% change)	590 497 000	499 297 000
Discount rate (-11%/13% change)	488 835 000	618 698 000

Amounts for the current and previous four years are as follows:

	2022	2021	2020	2019	2018
Defined benefit obligation	547 258 000	512 371 000	470 193 000	526 822 000	629 855 000
Surplus (deficit)	(547 258 000)	(512 371 000)	(470 193 000)	(526 822 000)	(629 855 000)
Experience adjustments on plan liabilities ((gain)/loss)	3 760 000	(17 252 000)	(16 924 000)	(22 837 000)	(17 781 000)

Total contribution to medical aid (employer and employees)

Bonitas	28 728 490	28 181 153
Discovery	454 933	499 599
Hosmed	450 184	433 492
Key Health	26 052 015	28 054 783
LA Health	86 366 118	81 704 578
Profmed	60 660	176 118
Samwumed	3 570 012	3 456 163
	145 682 412	142 505 886

Experience adjustments are the effects of differences between the previous actuarial assumptions and what has actually occurred.

2022

2021

21. Employee benefit obligations (continued)

Key assumptions used(Long service awards)

The long service awards provision represents the amount of money that should be set aside in present day terms to cover all expected long service awards for current employees.

The long service award provision is created to ensure adherence to SALGA collective agreement requirements. The liability was estimated by an Actuary in terms of GRAP 25 (Employee Benefits).

Long service awards payments are expected on the anniversary of appointment for all the qualifying employees.

At the reporting date there were no future events that could affect the future payment costs for long service awards.

As at 30 June 2022, the liability was estimated by experts, Arch Actuarial Consulting.

The key assumptions used by the experts were:

Net effective discount rate- 3.20%

Average retirement age- 62 years

Mortality during employment- SA 85-90

The projected unit credit method is used as the standard valuation methodology for the valuation of the liability at the reporting date.

22. Unspent conditional grants and receipts

Unspent conditional grants and receipts comprises of:

Transfer of savings on Operation Dlulisumlando to own revenue	(50 186)	-
Transfer of VAT on Jika Joe project to own revenue	(6 876 324)	-
VAT recovered from grant	(43 271 357)	(54 992 924)
Conditions met - transferred to revenue	(383 992 562)	(518 633 209)
	136 087 525	179 373 712

The extent of government grants recognised in the Statement of Financial Performance relates to the extent of the grant conditions having been met.

Refer to Appendix D for details of Unspent Conditional Grants, Receipts and Transfers from National, Provincial, Government and other departments.

See note 40 for reconciliation of grants from National/Provincial Government.

These amounts are invested in a ring-fenced investment until utilised.

23. VAT payable

VAT payable	178 111 817	179 672 591
VAT Reconciliation		
Accrued output tax	379 757 916	325 591 206
Accrued input tax	(193 780 864)	(135 257 921)
VAT refund (due)/payable (from)/to SARS	(7 865 235)	(10 660 694)
	178 111 817	179 672 591

VAT is claimed on a payment basis.

All VAT returns have been submitted by the due date throughout the year.

Only once an invoice is paid is VAT claimed and receivable from SARS.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
-----------------	------	------

37. Property rates (continued)

Valuations on land and buildings are performed every 4 years in terms of the Municipal Property Rates Act. The last general valuation came into effect on 1 July 2019. Interim/ Supplementary valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

The significant decline from R 21 574 000 to R 974 000 in the Municipal properties resulted from the property NOFT00000001496700000 (R 20 600 000) being removed from this category to the Mining category. The mining category is therefore, R26 070 000 in value, where previously it was R5 470 000

38. Interest from non-exchange receivables

	1 050 402 242	1 256 029 137

Equitable Share

In terms of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members.

In terms of section 227 of the Constitution, the Equitable Share grant provides funding for the municipality to deliver free basic services to poor households and subsidises the cost of administration and other core services for the municipality.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand

	2022	2021
--	------	------

40. Government grants and subsidies (continued)

Energy Efficiency and Demand Side Management Grant

Balance unspent at beginning of year	-	664
Funds paid back to National Treasury	-	(664)
	-	-

The energy efficiency and demand-side management grant is provided to implement energy-efficiency projects, with a focus on public lighting and energy-efficient municipal infrastructure.

Expanded Public Works Programme

Balance unspent at beginning of year	469 014	-
Funds paid back to National Treasury	(469 000)	-
Current year receipts	3 516 000	4 388 000
VAT recovered from grant	(41 692)	-
Conditions met - transferred to revenue	(3 474 322)	(3 918 986)
	-	469 014

Conditions still to be met - remain liabilities (see note 22).

The purpose of the grant is to incentivise municipalities to expand work creation efforts through the use of labour intensive delivery methods in the following identified focus areas, in compliance with the EPWP Guidelines:

- 1.Road maintenance and the maintenance of buildings
- 2.Low traffic volume roads and rural roads
- 3.Basic services infrastructure, including water and sewer reticulation, sanitation and pipelines (excluding bulk infrastructure)
- 4.Other economic and social infrastructure
- 5.Tourism and cultural industries
- 6.Waste management
- 7.Parks and beautification
- 8.Sustainable land-based livelihoods
- 9.Social services programmes
- 10.Community safety programmes

Finance Management Grant

Current year receipts	1 900 000	1 700 000
VAT recovered from grant	(131 943)	(91 083)
Conditions met - transferred to revenue	(1 768 057)	(1 608 917)
	-	-

The purpose of this grant is to promote and support reforms in financial management by building capacity in municipalities to implement the Municipal Finance Management Act.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand

	2022	2021
--	------	------

40. Government grants and subsidies (continued)

Integrated National Electrification Programme

Balance unspent at beginning of year	-	-
Current year receipts	20 000 000	-
Transfer to MHOA (Repayment of bridge funded INEP expenditure for 2020/2021)	(8 769 502)	-
VAT recovered from grant	(849 504)	-
Conditions met - transferred to revenue	(10 380 994)	-
	<u>-</u>	<u>-</u>

The purpose of the grant is to implement the Integrated National Electrification Programme by providing capital subsidies to municipalities to address the electrification backlog in all existing and planned dwellings (including informal settlements, farm dwellings, new and existing dwellings) and the installation of relevant bulk infrastructure.

A letter dated 15 February 2022 was received from National Treasury advising of their intention to stop the 3rd tranche of the INEP allocation amounting to R4 million which was due on the 25th February 2022. The reason for stopping was due to Msunduzi under performing in terms of the grant allocation.

In the Government Gazette 46095 dated 25th March 2022, the allocation for Msunduzi was reduced from R24 million to R20 million.

Municipal Disaster Relief Grant

Balance unspent at beginning of year	-	1 192 000
VAT recovered from grant	-	(129 897)
Conditions met - transferred to revenue	-	(1 062 103)
	<u>-</u>	<u>-</u>

Funding received for response and intervention measures for COVID-19 pandemic. The approved funding is meant to augment the resources of the municipality with regard to the following prioritised areas: a) Sanitation; b) Decontamination of specific selected municipal spaces; Personal Protective Equipment, and hygiene packs; and c) Waste management

Municipal Infrastructure Grant

Balance unspent at beginning of year	-	10 712 542
Current year receipts	209 331 000	193 721 000
VAT recovered from grant	(24 823 847)	(24 275 494)
Conditions met - transferred to revenue	(184 507 153)	(180 158 048)
	<u>-</u>	<u>-</u>

The funding has been provided:

1. For addressing specific capital projects for basic municipal infrastructure backlogs for poor households, micro enterprises and social institutions servicing poor communities.
2. For the development of asset management plans for infrastructure servicing the poor.

Neighbourhood Development Partnership Grant

Balance unspent at beginning of year	1 070 247	43 336
Funds paid back to National Treasury	-	(42 336)
Current year receipts	34 000 000	18 000 000
VAT recovered from grant	(4 565 158)	(2 208 359)
Conditions met - transferred to revenue	(30 434 387)	(14 722 394)
	<u>70 702</u>	<u>1 070 247</u>

Conditions still to be met - remain liabilities (see note 22).

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand 2022 2021

40. Government grants and subsidies (continued)

Funding provided to plan, catalyse and invest in targeted locations in order to attract and sustain third party capital investments aimed at spatial transformation, that will improve the quality of life, and access to opportunities for residents in targeted locations, underserved neighbourhoods, generally townships and rural towns.

Public Transportation Infrastructure Grant

Balance unspent at beginning of year	50 446 079	94 578 575
Current year receipts	11 900 000	134 000 000
VAT recovered from grant	(7 873 889)	(22 383 251)
Conditions met - transferred to revenue	(54 472 190)	(155 749 245)
	-	50 446 079

Conditions still to be met - remain liabilities (see note 22).

Funding provided for accelerated planning, construction and improvement of public and non-motorised transport Infrastructure that form part of the municipal integrated public transport network (IPTN) and to support the planning, regulation, control, management and operations of fiscally and financially sustainable municipal public transport network services.

In the Government Gazette 46095 dated 25th March 2022, Msunduzi was allocated an amount of R11,9 million which was received on the 28th March 2022.

Water Services Infrastructure Grant

Balance unspent at beginning of year	-	248 151
Current year receipts	40 000 000	44 556 000
VAT recovered from grant	(4 985 325)	(5 904 841)
Conditions met - transferred to revenue	(34 995 960)	(38 899 310)
	18 715	-

Conditions still to be met - remain liabilities (see note 22).

The purpose of the grant is:

- 1.To facilitate the planning and implementation of various water and sanitation projects to accelerate backlog reduction and enhance the sustainability of services especially in rural.
- 2.To provide basic and intermittent water and sanitation supply that ensure provision of services to identified and prioritised communities, including through spring protection and groundwater development.
- 3.To support municipalities in implementing water conservation and water demand management (WC/WDM) projects.
- 4.To support the close out of the existing bucket eradication programme intervention in formal residential areas.
- 5.To support drought relief programmes in affected municipalities.

CBD Revitalisation

Current year receipts	-	300 000
Conditions met - transferred to revenue	-	(300 000)
	-	-

Funding has been provided by the Department of Economic Development, Tourism and Environmental Affairs for the revitalisation of the City centre, The area that will be revitalised is the central mall area, Church Street between Chief Albert Luthuli and Peter Kerchoff. This will entail the removal of the fountains and tree stumps and to repave the central mall area with eco-pavers made from recycled plastic material and purchased by citizens. Pavers are to be laid in a substrate of recycled crushed glass instead of sand. All the property owners in the area will be contacted to request their assistance in doing up their building facades and to ask for a contribution towards the initiative, from which contribution the purchase of curbing made from recycled plastic, paint bollards and vendor stands, replace bins etc can be done.

Greater Edendale Development Initiative

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
40. Government grants and subsidies (continued)		
Balance unspent at beginning of year	99 595 434	14 436 496
Current year receipts	8 158 820	98 000 000
Current year interest received	4 004 267	1 300 669
Conditions met - transferred to revenue	(5 768 125)	(14 141 731)

Jika Joe Community Residential Units

Balance unspent at beginning of year	7 909 450	24 872 619
Current year receipts	12 986 042	42 328 685
Conditions met - transferred to revenue	(14 019 169)	(48 902 854)
Transfer to Housing Accreditation	-	(10 389 000)
Transfer to own revenue	(6 876 323)	-
	-	7 909 450

Conditions still to be met - remain liabilities (see note 22).

Funds provided by the Provincial Department of Human Settlements for the addressing of the housing backlog in the Municipality, and rental stock has been identified as a strategic intervention in addressing the formal accommodation needs. The Jika Joe project has been identified as a priority to address the Jika Joe informal settlement. The project also aims to relocate the residents from the existing Masukwana Street temporary housing and the removal of the of structures.

Project funding for Jika Joe project is inclusive of VAT. The Department of Human Settlements and Msunduzi Municipality on 25 February 2019 entered into an addendum to memorandum of agreement for the adjustment of the Value added Tax from 14% to 15%. Provincial Treasury approved the rollover of unspent balances which was VAT on claims submitted to Department of Human Settlements in the 2019/ 2020 and 2020/2021 financial year. Council approved a once the portion of the VAT on claims submitted is utilised in the project for prepaid water meters and temporary houses that were not funded by the Provincial Department of Human Settlement, the remaining balance be transferred to the Municipality as own revenue at the end of the financial year and subsequent years thereafter.

Library

Youth Enterprise Park

Balance unspent at beginning of year	136 270	2 616 061
Current year receipts	188 382	-
Current year interest received	5 391	116 072
Transfer from Manaye	787	-
Conditions met - transferred to revenue	(140 025)	(2 595 863)
	190 805	136 270

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand 2022 2021

40. Government grants and subsidies (continued)

Conditions still to be met - remain liabilities (see note 22).

Funds received from Cooperative Governance and Traditional Affairs for Youth Enterprise Park which emerged to address the challenges of finding appropriate localities for businesses. The concept of the park will be to cluster a purpose built park of 30 to 50 container enterprises in a particular locality either in community, small town or rural district or as part of urban or rural renewal programmes. The programme will also offer on site training facilities and support micro enterprises that operate within the park. The idea is to create a purpose built precinct at scale where the local community is able to take up local economic community opportunities to establish businesses. The Youth Enterprise Park should fundamentally be able to reconnect the economy with communities whose needs offer economic opportunity for its local entrepreneurs.

Eastwood Primary Substation

Balance unspent at beginning of year	-	-
Current year receipts	15 000 000	-
Current year interest received	156 962	-
Conditions met - transferred to revenue	(9 079 238)	-
	6 077 724	-

Conditions still to be met - remain liabilities (see note 22).

Funding has been provided by the Department of Cooperative Governance and Traditional Affairs for the electrification project - Eastwood 132/11kv primary substation infrastructure, building of 132kv over head lines and refurbishment of the 132kv primary substation.

Eastwood was established to cater for the local growth in the industrial network between Riverside and Northdale Substations including to cater for the residential areas in the vicinity. This project will relieve the loads on the Riverside and Northdale Substation strengthening the network and allow for future load growth.

The refurbishment of the Eastwood primary substation into effective service will bring a lot of benefits to the Willowton industrial area and the surrounding residential area.

Corridor Development (Heroes Acre Memorial Park)

Current-year receipts	6 600 000	-
Current year interest received	6 654	-
	6 606 654	-

Conditions still to be met - remain liabilities (see note 22).

Funding has been provided by the Department of Cooperative Governance and Traditional Affairs.

The Heroes Acre Memorial Park is a symbol of bravery and selflessness for the Moses Mabhida and Johnny Makhathini who played a significant role in the liberation struggle as exciled leaders of the South African Communist Party. In recognition of the liberation struggles, this project seeks to beautify, upkeep, maintain and repair of the Heroe's Acre as a place of honour, dignity and respect.

The project was approved on 10 June 2022 by Cooperative Governance and Traditional Affairs for implementation in 2022/2023 financial year. This grant allocation has been gazetted in the Provincial gazette for the 2022/2023 financial year, however this funds was transferred to the Municipality on the 23 June 2022.

57. Impairment loss		
Impairments		
Property, plant and equipment	(6 885 251)	(7 607 463)
The procedure used to determine if the asset was impaired was to physically inspect the asset and determine if the asset was impaired and what factors contributed to the impairment and then comparing the condition, age and cost of the asset to the current records in the asset register and if there was a change this was then adjusted.		
Heritage assets	(26 267)	(122 720)
A grading system which reflects the condition of each asset in relation to a monetary value whereby 0 indicated a 100% loss of value and 5 signified 100% retention of value with a sliding scale for the degree of damage apropos value was used to arrive at the impairment value.

61. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Regulation 36 of the Municipal SCM Regulations of 2005 permits the Accounting Officer to "dispense with official procurement processes established by the policy and to procure any required goods or services through any convenient process".

This would typically include urgent and emergency cases, single-source/sole providers of goods and services, and any other cases where it is impractical to follow normal SCM process. In the event of such a decision, the Accounting Officer is required to report this to the next council meeting for noting.

61. Deviation from supply chain management regulations (continued)				
Contract No.1/S36 OF 21/22	Mazondi Construction	Appointment of a service provider for burning and hoeing of fire breakings and fire standby services for the msunduzi forestry company	The business unit had completed the procurement process for a 3 year harvesting contract which was envisioned to commence on 01 May 2021 , whereby the execution of fire breaks would have been the responsibility of the contractor. The decision to continue with the harvesting contract was rescinded after the bids were adjudicated. This then muddled the planning of the business unit. The insurer has also indicated that cover will be terminated should there be no dedicated team on the ground for firefighting.	597 933

61. Deviation from supply chain management regulations (continued)		
Contract No.13/S36 OF 21/22	ATC Industries	1 215 219
	Service provider to undertake traffic signal repairs at the intersection of Moses Mabhida/Sutherland and Moses Mabhida /Archie Gumede intersections.	The Traffic Signals Specifications used in the IPTN route are different from the one we are currently using as the Municipality, hence we requested to deviate from normal processes due to time constraints. ATC Industries was the contractor appointed to install all traffic signals along Moses Mabhida under the IPTN project, they are familiar with the intersection configuration and all other aspects required. This will shorten the project duration and save cost, since project duration will only be two months . We are currently doing a Traffic Management study to open new lanes to public traffic by end of June 2022, however this will be impossible if these intersections are not functioning.

63. Irregular expenditure (continued)

Cases under investigation

Irregular expenditure has not been written off or condoned.

Section 32(4) of the Municipal Finance Management Act requires that Council can deal with these matters in the manner prescribed.

In the case of irregular and fruitless and wasteful expenditure, it is only after an investigation has been conducted that irregular expenditure can be certified as irrecoverable and written off by council, hence there were no movement between financial years 2008/2009 to 2017/2018 as the investigations are still open and as soon as they are closed council will write off or condone this expenditure.

2016 and 2019 Mr J P Moseya abused his position No FI-49/2019-20	-	281 000
Abuse of municipal assets (Truck and TLBs) and fraud on overtimeNo: FI-09/2019-20	-	564 940
	681 580	7 115 011

Fruitless and wasteful expenditure has not been written off or condoned.

Section 32(2)(b) of the Municipal Finance Management Act requires that Council can deal with these matters in the manner prescribed.

In the case of irregular and wasteful and fruitless expenditure, it is only after an investigation has been conducted that irregular expenditure can be certified as irrecoverable and written off by Council hence there is no movement between financial years 2008/2009 to 2020/2021 as the investigations are still open and as soon as they are closed Council will write off or condone this expenditure.

A system has been put in place to stream-line the payment process to ensure non occurrence of interest costs.

Staff have been advised on possible recovery of costs due to negligence.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
68. Electricity and water losses		
Electricity losses		
Units purchased - kWh	1 716 486 536	1 745 111 594
Units sold - kWh	(1 290 028 774)	(1 354 209 162)
Loss - kWh	426 457 762	390 902 432
Electricity loss as a percentage	24,67	22,12
Costs per kWh in cents	0,85000	0,82195
Electricity losses in rand value	362 588 493	321 301 494

The significant electricity losses of 426 457 762 kWh occurred during the year under review, which resulted in material revenue losses to the municipality.

The increase of losses from previous financial year may be as a result of the following:

Some of the main contributing factors to increased electricity losses are:

Non –Technical Losses

- 1) Illegal connections.
- 2) Infrastructure vandalism.
- 3) Metering inaccuracies (due to faulty meters).
- 4) Unmetered energy (meter tempering or bypassing the meter at the customer meter).
- 5) Revenue collection.

Technical losses (these are inherent in the distribution networks and cannot be eliminated):

- 1) Ageing infrastructure that results in increased power dissipation during transmission and distribution on lines, cables and transformers in the system.
- 2) Overloading.

How are these non technical and technical losses being addressed

Strategy to minimize electricity losses has been developed and is being implemented in line with available resources.

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
68. Electricity and water losses (continued)		
Water losses		
Units purchased (kl)	81 746 217	79 351 722
Units sold (kl)	(57 649 623)	(55 724 930)
Real losses (kl)	19 518 241	19 137 701
Apparent losses	4 578 353	4 489 090
Total water losses (kl)	24 096 594	23 626 792
Water loss as a percentage	29,50	29,80
Cost per kl in cents	9,981	9,454
Water loss in rand value	240 510 514	223 374 770

MFMA circular dictates that real losses and apparent losses be considered jointly as total water losses.

A calculated outcome of 24 096 594 kl was identified as a material water loss for the 2021/2022 year under review.

Progressive deterioration, illegal water connections, aging and increasing levels of fragility in the bulk water infrastructure is progressively contributing to increase in water losses.

Service Delivery initiatives slowed down marginally due to the Covid-19 protocols.

Budgetary and personnel constraints to effectively and efficiently undertake maximum service delivery efforts.

Due to the recent heavy rains; the Msunduzi's fragile water infrastructure became further compromised.

Resultant outcome was that there were frequent burst pipes (an increase of approximately 40% compared prior to the heavy rains).

Many areas were without water for long periods of time due to the complexities of initiating repairs. Furthermore the slippery environmental conditions did not allow for reasonably quick repairs.

In addition there were shortage of essential materials to undertake repairs timeously.

Financial and personnel constraints to undertake re-active measures within the shortest time period.

The above reasons can be attributed to the physical loss of 29.5 % (Water Losses)

The recent flood damage has further weakend the Water Infrastructure thus resulting in more frequent bursts and subsequently increase in water losses

Core Water Loss initiatives undertaken for 21/22 as at end of June 2022

Msunduzi Local Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
-----------------	------	------

68. Electricity and water losses (continued)

- 1) 4311 water meters were audited (Inventory and Inspection for accuracy and correct billing) in order to improve, reduce estimations and improve billing.
- 2) 1865 water meters were replaced in order to improve reduce estimations and improve billing.
- 3) Initiation of leak detection and repair tender, contract has been awarded to the panel of service providers. There is currently no budget available for commencement of work packages.
- 4) Pressure Reduction design of forty (40) new Pressure reduction Valve Zones, to be implemented when the Civils tender becomes active in the 2022/2023 financial year.
- 5) Reactively responded to 2108 (cumulative) burst pipes in the 2021/2022 financial year as at end of June 2022.
- 6) Monthly Water balances were undertaken in line with the International Water Association Balance principles and guidelines.

The following core Non-Revenue Water Interventions are proposed for the 2022/23 FY

Real Losses Interventions:

- 1 Pressure Reduction (Rezoning);
- 2 Pressure Reduction (Implementation);
- 3 PRV (Pressure Reducing Valves) Optimization;
- 4 Leak Detection ;
- 5 Leak Repair;
- 6 Reservoir Inspection and Control valve optimization.

Billing Improvement Interventions:

- 1 Top Consumer Investigation;
- 2 Meter Reading Accuracy;
- 3 Non-Domestic Meter replacement;
- 4 Domestic Meter Replacement;
- 5 Custody Transfer Points meter installation.

69. Non - compliance with Municipal Finance Management Act

The Municipality did not comply with section 65(2)(e) of the MFMA.

There were instances of non-compliance wherein some suppliers were not paid within 30 days.

70. Accounting by principals and agents

The Municipality is party to principal-agent arrangements.

Details of the arrangements are as follows:

Department of Human Settlements KwaZulu Natal (Housing Projects)

The Municipality is Level 1 accredited Municipality and in terms of the Implementation Protocol. Msunduzi Local Municipality is accredited in terms of section 10 of the Housing Act to Administer all the National programmes on behalf of the Provincial Department of Human Settlements. The Municipality is authorised within its municipal area to manage and administer all Housing programmes as per Para 7 of the Implementation Protocol.

Sale of Prepaid Electricity

The municipality utilises the service of an agent for provision of supply, delivery, installation and commissioning of an online hosted prepayment electricity vending and revenue management system for the Msunduzi Local Municipality.

There is a binding arrangement where Contour Technology (Pty) Ltd (agent) undertakes transactions with 3rd parties, on behalf of, and for benefit of, Msunduzi Local Municipality (principal).

Terms and conditions are as per the contract and no changes occurred during the reporting period.

No risks as the Municipality is able to access the Contour prepaid electricity and is able to reconcile monies paid to the municipality by the agent to the actual sales as per the reports for correctness.

Department of Transport (Driver's licences)

The municipality acts as an agent of the Kwa-Zulu Natal Department of Transport for the following services:

- 1) Application for renewal of driving licence;
- 2) Issue of credit card format driving licence, including eye test and fingerprints;
- 3) Issue of duplicate credit card format driving licence, where required;
- 4) Renewal of credit card format driving licence, including eye test and fingerprints;
- 5) Issue of temporary driving licence
- 6) Issue of professional driving permit, including eye test and fingerprints;
- 7) Issue of duplicate professional driving permit, where required;
- 8) Substitution of Foreign Driving licence and issue of Credit Card Format Driving licence card, including eye test and fingerprints;
- 9) Verification of driving licence particulars;
- 10) Referral of all queries to the Departmental employee specified by the RTI contact person within two working days of a query or lodging of a complaint or dispute.

The agreement is valid for the period from 1 November 2020 to 31 October 2023. Terms and conditions are as per the contract and no changes occurred during the reporting period.

The purpose of the principal-agent relationship is to ensure greater access to clients throughout the province. No significant risks have been identified in this relationship.

74. Prior period error - disclosures

Presented below are those items contained in the disclosure notes that have been affected by prior-year adjustments:

The correction of the error(s) results in adjustments as follows:

Fruitless and wasteful expenditure

As previously disclosed	-	45 277 565
Mr Mhlatshana -theft and fraud	-	123 025
2016 and 2019 Mr J P Moseya abused his position No FI-49/2019-20	-	281 000
Absenteeism during working hours whilst engaged in private trips No. FI-06/2019-20	-	362 733
Abuse of municipal assets (Truck and TLBs) and fraud on overtimeNo: FI-09/2019-20	-	564 940
Report of the forensic investigation Cogta S106 Manilal	-	5 000 000
Written Off (2008/2009 to 2019/2020)	-	(34 571 804)
Restated	-	17 037 459

Adjustment made to the disclosed Fruitless and wasteful expenditure is due to the identification of the case above .

Operating leases - as a lessee (expense)

Minimum lease payments due

	Within one year	In second to fifth year inclusive
As previously disclosed	5 174 736	5 384 773
Adjustments made	210 037	(5 384 773)
Restated	5 384 773	-

Adjustment made to the disclosed operating lease commitments correct an error.

75. Comparative figures

Certain comparative figures have been reclassified and restated.

76. Change in accounting estimate

Property, plant and equipment

GRAP 17: Property, plant and equipment requires that the review of the remaining useful life of an item of property, plant and equipment be conducted at least at each reporting period. The municipality performed this review as at 30 June 2022 and the following results were achieved:

Based on the condition assessment and utilisation of assets ascertained during the physical verification exercise, the remaining useful lives of assets were reviewed.

The impact of the adjustment is that depreciation charges on property, plant and equipment decreased by R365 760 983 (2021:R49 864 836).

It is impractical to determine the amount of the effect in future periods.

Depreciation before the review of useful life	(370 159 405)	(422 411 724)
Depreciation after the review of useful life	365 760 983	372 546 888
Change in estimate	(4 398 422)	(49 864 836)

Notes to the Annual Financial Statements

Figures in Rand

76. Change in accounting estimate (continued)

Property, Plant and Equipment - Landfill rehabilitation provision

Landfill rehabilitation provision is created to ensure that the municipality will be able to restore the landfill site to its original condition at the end of its life. The provision represents management's best estimate of the municipality's liability with regards to aforementioned restoration costs. The effect of the current year's revision was an increase of R6 883 141 due to change in discount factor and effect of re-measurement.

Employment benefit obligation

The municipality provides post-employment medical benefits to certain staff members. The provision represents management's best estimate of the municipality's liability with regards to aforementioned post-employment medical benefits. The effect of the current year's revision is an increase of R34 887 000 to R547 258 001, owing to the net effect of the actuarial loss, current service and interest costs for the reporting period ended 30 June 2022.

Leave accrual

The leave pay accrual is created to ensure adherence to SALGA collective agreement requirements. It states that at the end of a leave cycle, an employee may not have more than 48 days annual leave to their credit. The effect of this revision has increased the accrual by R8 463 187 to R147 949 191 .

Long service awards

In terms of the SALGA conditions of service collective agreement, employees qualify for long service leave upon completion of specified periods in the agreement. The provision was created to comply with the agreement. The effect of the current year's revision is an increase by R499 000 to R83 588 000, attributed to the net effect of the actuarial loss, benefits vesting, current service, past service and interest costs for the reporting period ended 30 June 2022.

77. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The municipality is exposed to the following liquidity risks:

Other financial liabilities

	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Total
At 31 June 2022				
Borrowings	79 162 900	74 270 956	50 310 656	203 744 512
At 30 June 2021				
Borrowings	81 573 484	79 162 900	124 581 612	285 317 996

Msunduzi Local Municipality

Notes to the Annual Financial Statements

Figures in Rand

2022

2021

77. Risk management (continued)

Credit risk

Credit risk refers to the risk that a counter party will default on its contractual obligations resulting in financial loss to the municipality.

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise mainly water, sanitation, refuse, rates, property rental, electricity and other service chargers, dispersed across different industries and geographical areas. Management evaluated credit risk relating to customers financial conditions on an ongoing basis, and have been presented in these financial statements net of a provision for impairment. In the case of debtors whose accounts become in arrears, it is endeavored to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors.

Individual risk limits are set based on internal or external ratings in accordance with limits set by management. The utilisation of credit limits is regularly monitored. Sales to consumers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

The carrying amount of financial assets recorded in the financial statements that represent the municipality's maximum exposure to credit risk obtained details - Refer to note 78 - Financial instruments disclosure.

As at the end of the reporting period, no collateral was being held as a means of mitigating the risk of financial loss from default except for consumer deposits.

Credit quality

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings. Although credit quality can be assessed, the Municipality did not apply any methods to evaluate the credit quality.

The credit quality of receivables from exchange transactions are neither past due nor impaired except for land sale debtors, insurance claims and IDT.

The analysis of the age of receivables that are past due but not impaired for the Municipality (Refer to note 7 - consumer debtors) for the analysis and details.

Market risk

Risk from agricultural assets

The municipality is exposed to financial risks arising from changes in timber prices. The municipality does not anticipate that the timber prices will decline significantly in the foreseeable future. The municipality has not entered into derivative contracts to manage the risk of a decline in sale of timber. The municipality reviews its outlook for timber prices regularly in considering the need for active financial risk management.

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk.

Notes to the Annual Financial Statements

Figures in Rand

2022

2021

79. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The Provincial Executive Council of KwaZulu-Natal and MEC for Department of Co-operative Governance and Traditional Affairs, resolved to intervene in terms of Section 139 (1) (b) of the Constitution and in terms of section 139 of the Municipal Finance Act. at the municipality and appointed the Ministerial representative. The appointment became effective on 14 April 2019 to 31 October 2022. The terms of reference specified the functions of the Ministerial representative which also include the implementation of governance systems and procedures including oversight of the administration including the ratification of decisions taken by the Municipal Council, the Executive Committee, Municipal Manager and Section 56 Managers in terms of the authority.

The terms of reference amongst others include, establishment of the Interim Finance Committee to monitor and manage the cash flow of the municipality. It is envisaged that the intervention will assist in improving the municipality's financial viability.

In assessing the going concern, management identified indicators casting doubt on the municipality's ability to continue operating as a going concern. These indicators are summarised below :

- 1) Impact of COVID 19 pandemic on municipal finance and operations.
- 2) Adverse liquidity ratios.
- 3) Below norm cash cost coverage ratio.
- 4) The outstanding gross debtors balance has increased significantly and the majority of the debtors have been outstanding for over 365 days.
- 5) The dwindling of reserves over the recent years.
- 6) Deteriorating creditors days.
- 7) The increase in net debtors balances
- 8) Successive deficits.

Msunduzi Local Municipality

Notes to the Annual Financial Statements

Figures in Rand

2022

2021

79. Going concern (continued)

The following measures are being implemented by management in response to the going concern risk indicators:

1)The municipality has monitored the implementation of the financial recovery plan that was developed in 2018. Management has voluntarily requested National Treasury to assist with the development of the revised financial recovery plan that is linked to the current challenges of the municipality after COVID 19. The revised recovery plan will be implemented in 2022/23 financial year.

2)There is a revenue enhancement committee that meets on a weekly basis to monitor the implementation of the revenue enhancement plan and the identification of additional revenue streams. The committee monitors implementation of the strategies that have been developed to recover the outstanding debt.

3)The dispute resolution committee was formed to speed up the process of dealing with consumer appeals.

4)The following strategies are currently being implemented to recover the outstanding debt:

a)The electricity disconnections conducted daily.

b)The water restrictions conducted daily.

c)The consolidation of accounts for customers with multiple accounts.

d)Consolidation of accounts where rates and services were billed on separate accounts.

e)Improved turnaround time for responding to customer queries.

f)Development of the customer dispute resolution process.

g)Review of the organogram to include the functions that were previously not catered for on the structure.

h)Processing name changes for deceased debtors with surviving spouses.

i) Increasing capacity at validations section.

j)Audit of bulk meters to ensure accuracy and completeness of billing.

k)COVID relief amnesty campaign for qualifying debtors.

l)Review of the credit control and by laws to allow debtors to enter into affordable payment arrangements.

m)Emailing of statements to customers.

n)Media campaigns for encouraging the debtors to pay.

o)Legal processes instituted against arrear debtors.

p)Vetting of indigent debtors.

q)Improved turnaround time issuing rates clearance certificates and processing name changes for changes in property ownership

5)The debt recovery plan was developed and approved by Council.

6)The debt collectors were appointed to recover long outstanding debtors.

7)KZN Provincial CoGTA and National Treasury are consistently monitoring the implementation of the financial recovery plan and revenue enhancement plan.

Financial Recovery Plan

Given the decline of the financial status and the nature of the recurring financial problems and that there was no noticeable progress made since the implementation of the current FRP the municipality requested National Treasury Municipal Financial Recovery Service to assist in revising the discretionary financial recovery plan for the municipality.

The revised FRP will be used as an instrument to guide the municipality in addressing the financial crisis and to ensure that the municipality regains its financial health within the shortest timeframe while ensuring that all issues which adversely affect the financial health of the municipality are comprehensively addressed. FRP adopts a strategic, focused approach which is time-bound yet comprehensive enough to ensure that the underlying causes of the crisis are adequately addressed. To achieve this objective, the draft financial recovery plan presents a phased approach to recovery, differentiating between issues to be addressed in the short, medium and long term.

The FRP is divided into three distinct but interdependent phases. These include:

a)Rescue Phase (Phase 1) which focuses primarily on cash and restoring the cash position of the municipality.

b)Stabilization Phase (Phase 2) which expands on the financial indicators to be monitored and emphasizes key governance and institutional issues which must simultaneously be addressed.

c)Sustainability Phase (Phase 3) to ensure that indicators are developed that will give effect to the long-term financial sustainability of the municipality.

Notwithstanding, the above negative indicators, the municipality continues to adopt the going concern assumption as it is management's view that the municipality will continue to operate in its present form provided that the financial recovery plan, the debt recovery plan and the other revenue and expenditure enhancement strategies are successful and there is a successful relationship between the municipality and consumers, and consumer behaviour is supportive of the municipality's efforts.

80. Segment information

General information

Identification of segments

The municipality is organised and reports to management on the basis of nine major functional areas: Electricity, Water, Rates, Sanitation, Refuse, Airport, Market, Forestry and Support services. The segments were organised around the type of goods and services delivered. Management uses these same segments for determining strategic objectives. Supporting services segment was aggregated for reporting purposes.

The identification of these segments is consistent with the functional classification of local government activities which considers the nature of the services, the beneficiaries of such services and the fees charged for the services rendered. Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

Separate financial and other relevant information on geographical areas in which the municipality operates is not available. The necessary information is not available and the cost to develop it would be excessive.

Aggregated segments

Support services segment was aggregated as a practical limit has been reached beyond which segment information becomes too detailed. Management is of the view that such additional detailed segments are not useful and relevant .

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services
Electricity	Provision of electricity
Water	Provision of water
Rates	Property tax
Sanitation	Provision of solid and water waste services
Refuse	Refuse removal services
Airport	Aviation services
Market	Administration and handling fees
Forestry	Timber
Support services	Various goods and services

Information about geographical areas

The municipality's operations are in the KwaZulu Natal Province.

Separate financial and other relevant information on geographical areas in which the municipality operates is not available. The cost to develop the necessary information would be excessive.

81. Variance analysis comparison of budget against actual

Reasons are only provided for variances above 10%

Account Balance / Transaction / Disclosure	Current year-to-date actual amount as at: 30 June 2022	Current year budget amount, as per approved budget	Current year budget adjustment	Current year budget final amount	Difference between current year actual and final budget - R	Difference between current year actual and final budget - %	Explanation for significant fluctuations
STATEMENT OF FINANCIAL PERFORMANCE							
Revenue by Source							
Property Rates	1 211 348 604	1 321 378 575	1	1 321 378 576	-110 029 972	-8%	Within an acceptable range
Service charges - electricity revenue	2 549 854 260	2 961 894 451	-1	2 961 894 450	-412 040 190	-14%	Loadshedding also played a role in less electricity being used less due to stage 6 being implemented. This resulted in less revenue than anticipated. Decrease in consumption due to loadshedding and electricity outages also contributed to actual being less. The negative variance is also attributed to the increase in electricity losses .
Service charges - water revenue	773 657 197	773 217 412	0	773 217 412	439 785	0%	Within an acceptable range
Service charges - sanitation revenue	182 241 050	160 154 913	0	160 154 913	22 086 137	14%	The increase can be attributed to new service applications (vacant land and households). The increases in trade effluent also contributes to the the higher variance
Service charges - refuse revenue	114 118 706	122 556 901	0	122 556 901	-8 438 195	-7%	Within an acceptable range
Rental of facilities and equipment	25 415 308	30 634 512	1	30 634 513	-5 219 205	-17%	Revenue on this item is dependent on usage of council facilities. At the end of the year, usage was a little lower than anticipated.
Interest received - external investments	10 445 070	16 076 855	0	16 076 855	-5 631 785	-35%	Due to cashflow constraints, money in the call accounts is not sitting long enough to earn interest as anticipated. The adverse variance is also in line with the decrease in the cash and cash equivalents for the year.
Interest received - outstanding debtors	199 152 491	213 289 286	0	213 289 286	-14 136 795	-7%	Within an acceptable range
Fines, penalties and forfeits	14 488 973	1 894 810	-36	1 894 774	12 594 199	665%	This is a secondary revenue source on which revenue generated is dependent on offences. Its impossible to accurately estimate. The actual sec 341 and 56 traffic fines issued where higher than envisaged. The increase is attributable to intensifying traffic law enforcement operations and increasing the visibility of law enforcement in an effort to restore law and order on the Citys roads.

Figures in Rand

81. Variance analysis comparison of budget against actual

Reasons are only provided for variances above 10%

Account Balance / Transaction / Disclosure	Current year-to-date actual amount as at: 30 June 2022	Current year budget amount, as per approved budget	Current year budget adjustment	Current year budget final amount	Difference between current year actual and final budget - R	Difference between current year actual and final budget - %	Explanation for significant fluctuations
Licences and permits	984 210	1 179 465	0	1 179 465	-195 255	-17%	The licences and permits revenue activities was much lower than predicted. Its impossible to accurately estimate as this is dependant on consumer needs and demand for licences and permits.
Agency services	2 139 483	634 104	0	634 104	1 505 379	237%	The relaxation of the constrictive lockdown regulations resulted in the clearing of backlogs which accumulated during the lockdown period. The extended operating hours and the increased activities were not envisaged during the budget preparation process. Revenue stream for this item is determined by how many customers will require these licenses on a monthly basis.
Transfers and subsidies	681 677 625	661 215 835	34 120 202	695 336 037	-13 658 412	-2%	Within an acceptable range
Other revenue	66 084 928	154 287 075	-119	154 286 956	-88 202 028	-57%	The operational revenue collected is less than forecasted. This is partly attributable to the adverse weather conditions experienced. The devastating floods destroyed infrastructure, interrupted agricultural activities and disrupted business activities. Which lead to the decrease in transaction commission transaction handling fees and administration handling fees.
Gains	20 879 124	0	0	0	20 879 124	100%	These are dependent on expert reports which are unavailable at the time of budget preparation. The valuations are done at year-end and are dependant on market variables which are difficult to predict at the budgeting stage.
Total Revenue (excluding capital transfers and contributions)	5 852 487 029	6 418 414 194	34 120 048	6 452 534 242	-600 047 213		
Total revenue from exchange transactions	5 852 487 029	6 418 414 194	34 120 048	6 452 534 242	-580 802 443		

Notes to the Annual Financial Statements

Figures in Rand

81. Variance analysis comparison of budget against actual

Reasons are only provided for variances above 10%

Account Balance / Transaction / Disclosure	Current year-to-date actual amount as at: 30 June 2022	Current year budget amount, as per approved budget	Current year budget adjustment	Current year budget final amount	Difference between current year actual and final budget - R	Difference between current year actual and final budget - %	Explanation for significant fluctuations
Expenditure By Type				0			
Employee related costs	-1 468 960 683	-1 538 089 743	33 389 451	-1 504 700 292	35 739 609	-2%	Within an acceptable range
Remuneration of councillors	-49 529 446	-56 332 922	14	-56 332 908	6 803 462	-12%	The transition of a new council structure resulted in the appointment of new councillors and the resignation of old due to the Local Government Elections. During this transition new councillors do not get paid until their official appointment.
Debt impairment	-1 003 762 757	-150 000 000	-350 000 000	-500 000 000	-503 762 757	101%	Within an acceptable range
Depreciation and asset impairment	-372 610 829	-421 872 298	954 309	-420 917 989	48 307 160	-11%	Due to aging infrastructure and assets reaching the end its useful life, a decrease in depreciation is notable. The conditional assessments conducted on the assets have resulted in the extension of the asset useful life consequently depreciation decreased.
Finance charges	-26 915 534	-34 724 271	1	-34 724 270	7 808 736	-22%	The municipality anticipated raising a new loan which did not materialise hence the actual finance cost is lower than budget.
Bulk purchases electricity	-2 212 724 552	-2 185 393 029	-33 000 000	-2 218 393 029	5 668 477	0%	Within an acceptable range
Inventory consumed	-821 790 405	-830 520 119	-10 386 829	-840 906 948	19 116 543	-2%	Within an acceptable range

Notes to the Annual Financial Statements

Figures in Rand

81. Variance analysis comparison of budget against actual
Reasons are only provided for variances above 10%

Account Balance / Transaction / Disclosure	Current year-to-date actual amount as at: 30 June 2022	Current year budget amount, as per approved budget	Current year budget adjustment	Current year budget final amount	Difference between current year actual and final budget - R	Difference between current year actual and final budget - %	Explanation for significant fluctuations
STATEMENT OF FINANCIAL POSITION							
Classes of assets							
Current assets	2 542 368 079	3 808 880 705	507 736 217	4 316 616 922	-1 774 248 843	-41%	Consumers debtors increased by 13,4% due to the the relaxed credit controls during the COVID-19 pandemic. Due to the financial constraints experienced by the municipality the cash and cash equivalents is lower than budgeted. The budget for the COID investment is under the cash and cash equivalents line item.
Non-Current Assets	8 208 641 879	7 969 426 726	138 483 629	8 107 910 355	100 731 524	1%	Within acceptable range
Classes of liabilities							
Current Liabilities	2 520 762 905	1 295 697 303	-13 772 594	1 281 924 709	1 238 838 196	97%	The variance was mainly due to the dire cashflow constraints experienced by the municipality which impacted the creditors payments. Consumer deposits depends on the demand of municipal services, hence its difficult to predict consumer behaviour.
Non-Current Liabilities	3 295 778 225	1 187 237 456	0	1 187 237 456	2 108 540 769	178%	The municipality anticipated raising a new loan which did not materialise hence the actual financial liability is lower than budget. The employee benefit obligation dependent is on expert reports which are unavailable at the time of budget preparation.
Reserves							
Reserves	7 455 231 733	9 295 372 672	659 992 440	9 955 365 112	-2 500 133 379	-25%	There was a write off of R14m relating to other financial assets , transfer of R8m bridging finance ,the increase of COID investment and the increase of insurance expenditure was not factored in during the budget process.Negative effects of COVID and the adverse weather conditions has impacted debt collection resulting in the municipality having to increase the debt impairment.

Notes to the Annual Financial Statements

Figures in Rand

81. Variance analysis comparison of budget against actual

Reasons are only provided for variances above 10%

Account Balance / Transaction / Disclosure	Current year-to-date actual amount as at: 30 June 2022	Current year budget amount, as per approved budget	Current year budget adjustment	Current year budget final amount	Difference between current year actual and final budget - R	Difference between current year actual and final budget - %	Explanation for significant fluctuations
STATEMENT OF CASH FLOWS							
Cash flows from operating activities							
Receipts	5 441 847 545	6 183 449 649	120 520 850	6 303 970 499	-862 122 954	-14%	The cash receipts collected is less than forecasted. This is partly attributable to the adverse weather conditions experienced. The devastating floods destroyed infrastructure, agricultural activities and disrupted business activities. Which lead to the decrease in cash collection. Negative effects of COVID and the has impacted debt collection.
Payments	536 138 615	-5 546 541 721	-99 297 255	-5 645 838 976	6 181 977 591	-109%	Cashflow constraints were a cause for low payment rates.
Cash flows from investing activities							
Net cash flows from investing activities	-524 931 844	-576 301 507	-127 172 303	-703 473 810	178 541 966	-25%	Over expenditure on the budgeted cashflow is mainly explained by unspent grants.
Cash flows from financing activities							
Net cash flows from financing activities	-81 573 483	8 362 466	-100 000 000	-91 637 534	10 064 051	-12%	The variance is attributed to the repayment of the long term DBSA loans, a couple of which were fully repaid in the current year.
