(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# Accounting Officer's Responsibilities and Approval

As an accounting officer I am required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and I am responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is my responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I, as the accounting officer acknowledges i am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable me to meet these responsibilities, I have sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

I have had reviewed the municipality's cash flow forecast for the year to 30 June 2023 and, in the light of this review and the current financial position, I satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern, and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although they are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

ial is

The external auditors are responsible for independently reviewing and reporting on the municipality's annual final statements. The annual financial statements have been examined by the municipality's external auditors and their reports on page 4.	
The annual financial statements set out on page 4, which have been prepared on the going concern basis, were approve the on the 31 August 2022 and were signed on its behalf by:	d b
Accounting Officer PN Mhlongo

Annual Financial Statements for the year ended 30 June 2022

# Statement of Comparison of Budget and Actual Amounts

Budget on Accrual Basis						
Figures in Rand	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis		Reference
Actual Amount on Comparable Basis as Presented in the Budget and Actual Comparative Statement	(13 654 725)	(6 547 575)	(20 202 300	) (22 125 983)	(1 923 683)	

### A. Agency services 150%

The reason for the over collection is because during license department was opened during December holidays when other municipalities were closed, therefore we ended up servicing more people coming from different municipalities.

#### **B. Licence and Permits** 138%

This variance is due to the fact when we preparing budget we don't budget for business owners who normally do not renew their business licenses, therefore during this financial year we received from those who were not budgeted for.

#### C. Impairment Reversal 100%

The reason for variance is that were no budget provision for Bad debt impairment reversal. The reason for reversal of bad debt impairment is because during this financial year the ingonyama Trust debtors category were given a 100% rebate, Government debtors is not impaired because nothing is outstanding for more than 2 months.

#### D. Other income 269%

The reason for over performance is because municipality raised the invoice for Planning department which was not budgeted for, and this invoice has not yet paid as at the end of financial year.

#### E. Interest received investment 192%

Reason for this over collection is due to the fact that when we preparing our final budget we anticipated that we will not manage to invest our portion of equitable share for the length period of time and we actual manage to invest and accumulate interest.

#### F. Public contribution and donation 100%

This was not budgeted for. this income is received as a part of donation from Arts and Culture for new modular library handed over to the municipality.

#### **G. Depreciation and amortisation 92%**

The reason for variance is because our budget was overstated.

#### H. Bad debts impairment 6%

The reason for small bad debt impairment is because during this financial year the ingonyama Trust debtors catergory were given a 100% rebate, Government debtors is not impaired because nothing is outstanding for more than 2 months

#### I. Other materials 74%

The reason for variance is that we over budgeted contracted services

#### J. Contracted services 72%

The reason for variance is that budget was understated

### K. Transfers and subsidies 230%

The reason for variance is that this account was under budgeted.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

Figures in Rand Note(s) 2022 2021

#### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Other significant judgements, sources of estimation uncertainty and/or relating information, have been disclosed in the relating notes.

#### Trade receivables / Held to maturity investments and/or loans and receivables

The municipality assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

#### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 14 - Provisions.

#### Accounting by principals and agent

The municipality makes assessments on whether it is the principal or agent in principal-agent relationships. The municipality has a memorandum of agreement (MOA) with the department and implementing agents (hereinafter referred to as the contractors) for each project and Department of Energy.

Additional information is disclosed in Note .

#### 1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.4 Investment property (continued)

- · use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

#### 1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

(Registration number KZN294)
Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.5 Property, plant and equipment (continued)

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for Land which is carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the over their expected useful lives to their estimated residual value.

(Registration number KZN294)
Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.5 Property, plant and equipment (continued)

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life	
Land	Straight-line	10 - 30 years	
Buildings	Straight-line	10 - 30 years	
Plant and machinery	Straight-line	10 - 55 years	
Furniture and fixtures	Straight-line	10 - 20 years	
Motor vehicles	Straight-line	5 - 15 years	
Office equipment	Straight-line	5 - 20 years	
IT equipment	Straight-line	3 - 10 years	
Infrastructure	Straight-line	10 - 50 years	

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

(Registration number KZN294)
Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.5 Property, plant and equipment (continued)

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note).

#### 1.6 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the
  asset
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.6 Intangible assets (continued)

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software, other	Straight-line	5 years

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note ).

#### 1.7 Statutory receivables

#### Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

#### Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the
  receivable is recognised when the definition of an asset is met and, when it is probable that the future economic
  benefits or service potential associated with the asset will flow to the entity and the transaction amount can be
  measured reliably.

#### Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

#### Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

#### Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.7 Statutory receivables (continued)

- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has
  transferred control of the receivable to another party and the other party has the practical ability to sell the
  receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without
  needing to impose additional restrictions on the transfer. In this case, the entity:
  - derecognise the receivable; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

#### 1.8 Trade and Other receivables

Trade and other receivables are categorised as financial assets: loans and receivables and are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at yearend. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired

An impairment of trade receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance within operating expenses. When a trade receivable is uncollectable, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance.

#### 1.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity
  price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in
  the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called
  the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.9 Financial instruments (continued)

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- · a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.9 Financial instruments (continued)

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives
- contingent consideration of an acquirer in a transfer of functions between entities not under common control to which the Standard of GRAP on Transfer of Functions Between Entities Not Under Common Control (GRAP 106) applies
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

#### Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Loan1

Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Loan1

Financial liability measured at amortised cost

The entity has the following types of residual interests (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

#### 1.10 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.10 Leases (continued)

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the .

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### **Operating leases - lessee**

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

#### 1.11 Employee benefits

#### Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

### **Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

(Registration number KZN294)
Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.11 Employee benefits (continued)

#### Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight-line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the entity is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

#### Other post retirement obligations

The entity provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The entity also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

#### Pension, Provident, Retirement Benefits and Group Life Scheme

The municipality provides retirement benefits for its employees in the form of both defined benefit and defined contribution. The municipality is no longer providing retirement benefits for the Councillors as they are now getting a total cost to company package

defined benefit plan is a plan that defines an amount of benefit that an employee will receive on retirement. A defined contribution plan is a plan under which the municipality pays a fixed contribution into a separate entity. The municipality has no legal or constructive obligation to pay further contribution if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior period.

The contributions to fund obligations for the payment of retirement benefits are charged against the revenue in the year they become payable. The defined benefit funds, which are administered on a provincial basis, are actuarially valued triennially on the projected unit credit method basis. Deficits identified are recognized as a liability and are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities.

(Registration number KZN294)
Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.11 Employee benefits (continued)

#### 1.12 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

#### 1.13 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

The amount of revenue arising on a transaction which is statutory (non-contractual) in nature is usually measured by reference to the relevant legislation, regulation or similar means. The fee structure, tariffs or calculation basis specified in legislation, regulation or similar means is used to determine the amount of revenue that should be recognised. This amount represents the fair value, on initial measurement, of the consideration received or receivable for revenue that arises from a statutory (non-contractual) arrangement (see the accounting policy on Statutory Receivables).

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

(Registration number KZN294)
Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.13 Revenue from exchange transactions (continued)

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality:
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight-line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by .

#### Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

#### 1.14 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.14 Revenue from non-exchange transactions (continued)

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

#### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

#### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Receivables that arise from statutory (non-contractual) arrangements are initially measured in accordance with this accounting policy, as well as the accounting policy on Statutory Receivables. The entity applies the accounting policy on Statutory Receivables for the subsequent measurement, derecognition, presentation and disclosure of statutory receivables.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.14 Revenue from non-exchange transactions (continued)

#### **Taxes**

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for income tax is the earning of assessable income during the taxation period by the taxpayer.

The taxable event for value added tax is the undertaking of taxable activity during the taxation period by the taxpayer.

The taxable event for customs duty is the movement of dutiable goods or services across the customs boundary.

The taxable event for estate duty is the death of a person owning taxable property.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Taxation revenue are not grossed up for the amount of tax expenditures.

#### **Transfers**

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

#### Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

#### 1.15 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

## 1.16 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

Unauthorised expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.17 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Fruitless and wasteful expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

#### 1.18 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy.

Irregular expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

#### 1.19 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a cash basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2010/04/01 to 2011/03/31.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

Comparative information is not required.

#### 1.20 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

# **Accounting Policies**

#### 1.20 Related parties (continued)

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

#### 1.21 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

#### UNISA

This is a study assistant paid by the municipality to UNISA on behalf of Manager Human resources(HR). Manager HR cancelled his registration because the municipality delayed the payment.

Municipality wrote a letter to the University to recall the paid amount, the money is not yet refunded as at the end of this financial year.

UNISA has refunded the muniicpality after 30 June 2022 but before the financial statement submited to Auditor General.

#### **Other Debtors**

Other debtors is made of unknown debit orders debited our main bank account.

#### Trade and other receivables past due but not impaired

Trade and other receivables is made of rental debtors and refuse. Trade and other receivables which are less than 2 months are not considered to be impaired. Only trade debtors (rentals) which are from 3 months upwards due are considered to be impaired. Rental debtors due but not impaired as at 30 June 2022, R26 741 (2021: R92 349) (these amounts is made of the different between rental debtors and the Debts impairment).

The ageing of amounts past due but not impaired is as follows:

1 month past due	21 967	18 989
2 months past due	4 774	58 965

#### Trade and other receivables impaired

As of 30 June 2022, trade and other receivables of R 541 096 (2021: R 406 461) were impaired and provided for.

The amount of the provision was R514 503 as of 30 June 2022 (2021: R 313 707).

The ageing of debtors past due but not impaired is as follows:

	430 055

121-365 days	848 532	771 072
	1 035 545	804 248
Government debtors are as follows:		
31 60 days	(117 498)	-
61 90 days	· -	441
91 120 days	-	441
121 365 days	477 649	1 435 856
	360 151	1 436 738
Allowance for impairment	(965 615)	(2 240 986)
Net receivables from non-exchange transactions	430 081	-

#### Receivables from non-exchange transactions impaired

As of 30 June 2022, other receivables from non-exchange transactions of R1 395 670 (2021: R 2 240 986) were impaired and provided for.

The amount of the provision was R 965 615 as of 30 June 2022 (2021: R2 240 986).

The ageing of debtors past due but not impaired is as follows:

3 to 6 months	203 880	721 891
Over 6 months	761 735	1 519 095

#### Reconciliation of provision for impairment of receivables from non-exchange transactions

Opening balance	(2 240 986)	(9 329 836)
Reversal of impairment	1 275 372	7 088 850
	(965 614)	(2 240 986)

Receivable from non-exchange transactions are divided into three groups of debtors which are Government debtors, Commercial debtors and ITB debtors. Commercial debtors which are due from 2 months upwards are considered to be impaired and commercial debtors which are due for less than 2 months are not considered to be impaired.

Government debtors are not considered to be impaired because they are paying accordingly. Government debtors were billed at the beginning of the financial year and the outstanding debtors as per age analyses is for 30 June 2022 which is paid in July 2022. ITB debtors are getting a 100% rebate.

At 30 June 2022 total debtors control impaired is R965 615 (Commercial debtors only)(2021:R2 240 986(Government and ITB debtors) were past due but not impaired.

## 4. VAT receivable

VAT	4 399 029	7 624 673

Maphumulo Municipality accounts for VAT on cash basis.

#### Long service award provision

In line with the guidelines of the Bargaining Council, the municipality remunerates its employees for the long service rendered to the municipality. The estimates of the present obligation are determined through the use of Actuarial expertise. Such estimates are reviewed annually at the end of each financial year

The municipality offers bonuses for every 5 years of completed service from 10 to 45 years. Long service accumulated leave must be taken within one year of receiving such leave or wholly or partially cashed. In most cases employees exercise the option to wholly convert their accumulative leave bonus days into cash

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2019. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

Property rates levied in terms of the Local Government: Municipal Property Rates Act No. 6 of 2004 with effect from 1 July 2009. The council approved randage for this financial year are; Commercial R0.050, Multi Purpose properties R0.050, PSI R0.030, Residential Properties R0.010, Places of worship and other PBO properties R0.010, Agricultural R0.025, Mining properties R0.040 and Vacant sites R0.040. All Public Service Properties receives 10% rebates and the residential properties receives R15 000 exemption and 40% rebate, Farming and Agriculture properties received 50% and residential properties received 40%.

The new general valuation will be implemented on 01 July 2023.

Conditions met	(16 378 604)	(8 987 844)
	628 784	

Maphumulo Municipality received Integrated National Electrification grant funding from Department of Mineral Resources and Energy, to address the electrification backlog for all residential dwelling with in municipal jurisdiction. Maphumulo Municipality does not have electricity distribution license therefore Maphumulo Municipality is acting as an Agent of the Principal, Department of Mineral Resources and Energy.

During the current financial year we've received a funding of R16 350 000 000 and this amount was full spent with in the current financial year.

Maphumulo Municipality received Integrated National Electrification grant funding from Human Settlement Kwa-Zulu Natal. These receipts are for the construction of 1000 rural housing units within Maphumulo Municipality The Department pays the grant to the municipality and the municipality pays over the grant to the contractor based on invoiced amount.

During the current financial year Department treansferedR17 007 388.33 to the municipality and the municipality had paid R16 378 604.19 to the contractor during the current financial year. Amount of R 630 784.14 was not paid to the contractor because the money was received on the last day of the financial year.

#### 44. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the and includes a note to the annual financial statements.

Goods and services of R481 687 were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the Council who considered them and subsequently approved the deviation from the normal supply chain management regulations..

#### 45. Employee benefit obligations

#### Defined benefit plan

#### Multi Employer Retirement Fund

All fulltime employees belong to the KwaZulu Natal Joint Municipal Pension Fund, which are made up by the Retirement, Superannuation and Provident Funds. Councillors have the option to belong to the Pension Fund for Municipal Councillors. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes

All of these aforementioned funds are multiemployer plans and are subject to either a triannual, biannual or annual actuarial valuation, details which are provided below.

Sufficient information is not available to use defined benefit accounting for the pension and retirement funds, due to the following reasons.

- (i) The assets of each fund are held in one portfolio and are not notionally allocated to each of the participating employers.
- (ii) One set of financial statements are compiled for each fund and financial statements are not drafted for each participating employer.
- (iii) The same rate of contribution applies to all participating employers and no regard is paid to differences in the membership distribution of the participating employers..

It is therefore seen that each fund operates as a single entity and is not divided into subfunds for each participating employer. The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions.

Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions..

The Retirement Funds have been valued by making use of the Discounted Cash Flow method of valuation. For both the Superannuation and Retirement Funds valuations making use of the Discontinuance Method Approach have been included as wellt

#### **Defined Benefit Plant**

#### Retirement Fund

The scheme is subject to a triannual actuarial valuation. The last interim actuarial valuation was performed as at 31 March 2018 by Argen actuarial solutions.

The interim actuarial valuation performed as at 30 March 2018 revealed that the fund had a increase of R174.2 (31 March 2017: increase of R 144.7) million, with a funding level of 90,2% (31 March 2015: 96.1%). The contribution rate, including the surcharges below, paid by the members (8,65%) and municipalities (28.37%) should be sufficient to eradicate the shortfall in the fund by 30 June 2018. However, the basic contribution payable is 2.95% less than the required contribution rate

The actuarial shortfall is taken into account by determining surcharges, to be met by increased contributions. These surcharges amount to 21.65% of Pensionable emoluments, of which 1,65% is payable by members and 20% is payable by the local authority. This surcharge is payable until 2020. It is necessary that the basic employer contribution be increased by 15.85% to 20 % and the surcharge be increased to 17.5% and extended by a further 3 years to 30 June 2020. This position will be monitored on an annual basis. Subsequently, notice has been served that the surcharge will be increased to 35% with effect from 1 July 2018 for a period of 8 year

The fund has effectively been closed to new members, and it is therefore assumed for the valuation, that no new members will join the fund. However, at present, members of the three Natal Joint Funds are permitted to transfer between the funds and this flow of members may affect the rate of contribution required to be paid to the Fund

#### **Long Term Services Awards**

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

#### **Notes to the Annual Financial Statements**

Figures in Rand	2022	2021

#### 45. Employee benefit obligations (continued)

A long term service awards is granted to municipal employees after the completion of fixed periods of continuous service with the Municipality. The provision represents an estimation of the awards to which employees in the service of the Municipality at 30 June 2022 may become entitled to in future, based on an actuarial valuation performed at that date

The most recent actuarial valuations of plan assets and the present value of the unfounded defined benefit obligation were carried out as at 30 June 2022 by the One Pangaea Expertise Solutions a member of the Actuarial Society of South Africa.

A summary of the actuarial valuation results is as follows:

Key financial assumptions used for the purposes of the actuarial valuation

#### **Defined Contribution Plan**

The scheme is subject to an annual actuarial valuation. The last statutory valuation was performed as at 31 March 2018. The interim valuation performed as at 31 March 2018 revealed that the assets of the fund amounted to R 1 483,786 381 (30 June 2010: R 1 123,672 020) million. The contribution rate paid by the members (13.75%) and the municipalities (15,00%) is sufficient to fund the benefits accruing from the fund in the future. As reported by the Actuaries, the Fund was in a sound financial condition as at 31 March 2018.

#### **Provident Fund**

The KwaZulu Natal Joint Municipal Provident Fund scheme is subject to a triannual actuarial valuation. The last interim actuarial valuation was performed as at 31 March 2018 by Argen Actuarial Solution.

The interim actuarial valuation performed as at 31 March 2018 revealed that the market value of the fund was R 4 105 682. The contribution rate payable (either 5,00%, 7,00% or 9,25% by the member and 6,00%, 9,90% or 14,25% plus an additional 3,75% by the employer), is sufficient to cover the cost of benefits and expenses and the fund was certified to be in sound financial condition as at 31 March 2018.

None of the above mentioned plans are State Plans.

#### Pension, Provident, Retirement Benefits and Group Life Scheme

The municipality provides retirement benefits for its employees in the form of both defined benefit and defined contribution. The municipality is no longer providing retirement benefits for the Councillors as they are now getting a total cost to company package.

A defined benefit plan is a plan that defines an amount of benefit that an employee will receive on retirement. A defined contribution plan is a plan under which the municipality pays a fixed contribution into a separate entity. The municipality has no legal or constructive obligation to pay further contribution if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior period.

The contributions to fund obligations for the payment of retirement benefits are charged against the revenue in the year they become payable. The defined benefit funds, which are administered on a provincial basis, are actuarially valued triennially on the projected unit credit method basis. Deficits identified are recognised as a liability and are recovered through lump-sum payments or increased future contributions on a proportional basis to all participating municipalities.

#### Movements in the defined benefit obligation is as follows:

Opening balance	2 306 000	1 378 832
Service Cost	255 000	168 714

#### 48. Contingencies

#### Maphumulo Municipality // Only If Management CC.

Litigation is in the process between the municipality and Only If Management CC under the case number 10108/2013 Plaintiff claims to have been appointed by the Municipality to do refuse removal within the Maphumulo area of jurisdiction. The claim is for R8 609 993.3.

#### Maphumulo Municipality // Sibgem Management & Consulting.

Attorney's was appointed by Maphumulo municipality to defend the claim of R1 864 476.11 for the non-payment of invoices for the electrification work at Ziqgayini, Mphise and Mzulwini ward.

Attorney's issued the appearance to defend and filed a plea in which they raised the points in limine as follows:

- 1. There had been no contract between the Municipality,
- 2. In terms of the letter of appointment dated 21 May 2014, there were conditions that had to be adhered to before the commencement of the work, which were not complied with.
- 3. Thereafter filed a claim in Reconvention for the amount of R1 628 357.34, after which plaintiff filed a plea to the Claim in Reconvention denying our claim.

#### 49. Segment information

#### **General information**

#### Identification of segments

The municipality is planning to organised and reports to management only the direct service delivery to the community as economic benefit and service potential. direct service delivery to the community as economic benefit and service potential. And for which separate financial information is available. during the current financial year no Segments were aggregated for reporting purposes because necessary information is not available and the cost to develop it would be excessive, but going forward we will budget to get these information and start to report all reportable segments.

#### 50. Risk management

#### Liquidity risk

At 30 June 2022

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, municipality treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

At 30 June 2021	Less than 1			

Payables from exchange transactions
 2 530 290

• Payables from exchange transactions 2 530 290 - -

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counterparty.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2022	2021
Trade and other receivables from exchange transactions	6 397 924	133 627
Cash and cash equivalents/bank balances	6 297 228	8 191 629

The municipality is exposed to a number of guarantees for the overdraft facilities of economic entities and for guarantees issued in favour of the creditors of A (Pty) Ltd. Refer to note for additional details.

#### Market risk

#### Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

(Registration number KZN294) Annual Financial Statements for the year ended 30 June 2022

#### **Notes to the Annual Financial Statements**

Figures in Rand	202	2 2021

#### 51. Going concern

We draw attention to the fact that at 30 June 2022, the municipality had an accumulated surplus (deficit) of R338 927 526 and that the municipality's total liabilities exceed its assets by R344 247 526.

The municipality's current liabilities are not secured against the municipal current assets as it can be seen that current assets are less than current liabilities and there is a deficit of R8 735 622 (R12 425 652 current assets less R21 161274 current liabilities). This shows an increase in deficit compared to last financial year where was a deficit of R2 405 037.

Included in the current liabilities are unspent conditional grants of R1 076 385 that always need to be cash backed. Current Assets includes VAT receivables of R4 269 833 which would be received from South African Revenue Services(SARS) during next financial year.

The going concern of the municipality is negative since the municipality relying on its cash and cash equivalents of R6 297 228 to settle the current liability of R21 161 274.

Although the going concern of the municipality is negative if we compare current assets and liabilities as at the end of June 2022. Current liabilities includes R10 292 829 for leave payables and retention which is not payable with in the period of 12 months. Leave is payable on the termination of contract and retention is payable after the completion of the project, 50% is due after 6 months and 50% after 12 months. under current liabilities there is also unspent grant liability of R1 076 385,we are hoping that Department of Arts and Culture will approve application of roll over.

Included in current assets is VAT receivable of R4 269 833 which there is no doubts that SARS will pay the municipality refund with in a period of 12 months.

Based on the above last two paragraphs, we have no doubts that the municipality will be financial sustainable and be able to provide service delivery in the next twelve months.

#### 52. Additional disclosure in terms of Municipal Finance Management Act (continued)

#### Councillors' arrear consumer accounts

There were no Councillors in arrears for more than 90 days at any time during the year ended 30 June 2022:

#### 53. Prior period errors

#### Extension of Offices: Reversal of Fruitless and Wasteful Expenditure and Impairment Loss

During the auditing the work in progress of the municipality for the year ended 30 June 2020, an amount of R 1,871,886.06 (excluding VAT) relating to payments made on the Maphumulo New Office Extension project was impaired due to the fact that there is no progress on the project. During 2022 audit municipality informed Auditor General that this project is still under way and we must reverse the prior year impairment. Therefore it is apparent that work-in-progress(Buildings) understated and impairment loss was was overstated in the prior year. to correct the error we Debit WIP buildings and credit Impairment loss reversal.

The correction of the error(s) results in adjustments as follows:

#### Statement of financial position

Property, plant and equipment - 1 871 886

#### Statement of financial performance

Accumulated surpus-Reversal of impaiment - (1 871 886)
