LEPELLE-NKUMPI MUNICIPALITY MAYOR'S FOREWORD

Section 46 of The Local Government: Municipal Systems Act 32 of 2000, requires municipality to compile an annual performance report. On behalf of Lepelle-Nkumpi local municipal council and officials I present to you the Annual Performance Report for the 2023/2024 financial year. Firstly the Integrated Development Plan (IDP) for the 2023/2024 financial year was informed by the needs of the community, stemming from consultation with community members and various stakeholders. The 2023/2024 IDP/Budget was mainly allocated to service delivery projects, where efforts were made to distribute it equitably as per the needs identified during the IDP process. The SDBIP is the Annual Performance Plan of the municipality which is made up of Key Performance Indicators with specific, measurable, achievable, reliable and time based targets per Key Performance Area and is directly derived from IDP / budget. The planning and implementation of the SDBIP was guided by legislation governing municipal environment which include the Constitution of the Republic of South Africa, circulars from National CoGHSTA, Treasury and municipal policies and By-laws.

The year under review was particularly not a good one for us specially when looking at challenges during the 2023/2024 financial year which hindered our quest for realization of the set objectives for the year. However, despite such challenges, the municipality remained resilient towards achieving its planned goals to ensure that the community is provided with an improved level of service delivery. New roads were tarred, new households were connected to electricity grid while waste collection service coverage was extended to more rural areas. We also received intentions to revitalize Zebediela Citrus Estate and Lebogakgomo Chicken abattoir while Zebediela Mall was extended to include more shops and in the process more jobs and business opportunities being created.

Lepelle-Nkumpi Municipality implemented cost saving measures and we adopted strict consequence management in a bid to ensure that this ship sails to its intended destination- "a place where service delivery is key and crucial to the livelihood of our people". We further note the work that was undertaken by CDM, sector departments, RAL, SANRAL and other sectors in our area. Among others, the Department of Rural Development provided the municipality with assistance on the development of wall-to-wall Land Use Management Scheme to control and manage the use of land within the municipality, the Department of CoGHSTA also provided with assistance on the development of infrastructure services within Lebogakgomo Township at unit H and R.CDM implemented a number of water and sanitation projects in various villages. Application for funding was done with the Development Bank of South Africa (DBSA) for development of Geographic Information System (GIS) and Roads Master Plan. I want to assure the community that Lepelle-Nkumpi Municipality is committed towards building a municipality that is efficient, effective, accountable and responsive in accelerating quality service delivery and supporting the vulnerable communities by promoting economic development and social development. However, in order to achieve the above it is imperative that the community, all stakeholders, Councilors and Officials work together with unity and synergy to ensure that Lepelle-Nkumpi will be a resilient, economically vibrant and promoting service excellence to its Citizens.

CLLR. DR. MOLALA M.M

MAYOR

LEPELLE-NKUMPI MUNICIPALITY ACTING MUNICIPAL MANAGERS FOREWORD

The Annual Performance Report for the 2023/2024 financial year has been compiled in accordance with section 46 of The Local Government Municipal System Act, No. 32 of 2000, Section 127 (2) of The Local Government Municipal Finance Management Act, No. 56 of 2003, as well as accompanying circulars, templates and guidelines. The annual Performance Report provides the community with a credible, reliable and accurate assessment of the municipality's progress in achieving its goals as set out in the integrated development plan and service delivery budget implementation plan. During the financial year the municipality encountered various challenges, none of which deterred us in achieving our targets as set out in the service delivery budget and implementation plan.

The Budget and Treasury Office has been implementing programs such as the revenue enhancement strategy to ensure that there is an increase in revenue and the collection rate. The municipality will continue with revenue strategies to build a resilient financial position and ensure that we further improve our financial health as an organisation. Efforts were made to improve collection rate through introduction of debt rebate scheme and following up on identified defaulters from government, business and residential consumers. Alternative funding methods were also used to deal with service delivery challenges and included applications for disaster relief funds which were approved and assisted with roads and storm water challenges in the township area.

Even though individual performance was not implemented for non-senior manager positions, administratively, we used departmental and management meetings to track performance and provide support in areas where there was a need. Such meetings and reporting included monitoring and evaluation in terms of departmental SDBP and that of service providers. These efforts have proven to be impactful but our aim is to cascade individual PMS to all employees once job evaluation process is completed.

Municipality implemented forward planning whereby attempts were made to procure panels of consultants and contractors at the beginning of the financial year. Although this process was not responsive on first attempt from procurement perspective, that is, the approach of turn-key was adopted and most projects are being delivered in that manner. The results of this will probably show in the new financial year as panels of consultants and contractors would have also been appointed for delivery of infrastructure projects including those not implemented from 2023/24 financial year. We also accept our shortcomings in relation to institutional development and are as such engaged in activities to increase our pace for recruitment and selection for new appointees in order to handle the mandate of the organization and for long-term sustainability of our plans and programmes. However, municipality received with appreciation support from CDM and MISA during the financial year whereby officials were seconded to the municipality to assist in various areas, including infrastructure department. Whereas this was a temporary measure yet effective intervention, municipality also undertook extensive recruitment process for filling of critical and service delivery positions, including senior management positions. Two senior management positions are filled while the financial year ended at the time others were already advertised and shortlisted. The 2023/24 APR detailed the successes and challenges of all our activities across all the six local government key performance areas and as per planned and reviewed indicators.

The report covers the information from 01 July 2023 to 30 June 2024 and focuses on the implementation of the SDBIP in relation to the objectives as encapsulated in the municipality's IDP. The format of the report will reflect the municipality's performance and a summary of overall performance of the municipality's key performance indicators per municipal key performance area.

This Annual Performance Report sets out the details of what was done by the municipality during the financial year 2023/2024. The report also contains the Service Provider's Performance Report.

MS. DIALE D.S

ACTING MUNICIPAL MANAGER

DATE

Vision:

"Be financially viable municipally, geared towards the improvement of quality of life of the people, by providing sustainable services".

Mission:

"To effectively and efficiently provide quality basic services and thus make a significant contribution to social and economic development of the community"

Values:

Honesty, Transparency, *Ubuntu*, Consultation, Value for Time and Money, Access to Information and Access to Services.

Legislations Governing Performance Management:

The Constitution of the Republic (1996)

Section 152 of the Constitution mandates local government, among others, to:

Provides democratic and accountable government for local communities

Encourage the involvement of communities and community organizations in the matters of local government.

The White Paper on Local Government of (1998)

The White Paper on Local Government (1998) puts forward for the new developmental Local Government system and identifies tools for realising a developmental local government through:

Integrated Development planning and budgeting;

Performance management, and working together with local citizens and partners.

Municipal Systems Act (No. 32 of 2000)

The Municipal Systems Act no 32 of 2000, Chapter 6 enforces the idea of local government PMS.

Municipal Planning and Performance Management Regulations (2001)

The Municipal Planning and Performance Regulations (2001) set out in detail requirements for municipal PMS. It entails a framework that describes and represent how the municipal cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed including the determining of the roles and responsibilities of different role players.

The Municipal Finance Management Act No 32 2003

The Municipal Finance Management Act states requirements for a municipality to include its annual municipal performance report with its financial statement in constituting its annual report. In essence, the Act requires that a municipality must, among other things:

Audit of performance measurement; and Annual Performance Reports

The Municipal Performance Management Regulations (2006)

The Local Government Municipal Performance Regulations for municipal managers and managers directly accountable to municipal managers sets out how the performance of Section 57 staff will be uniformly directed, monitored and improved. The regulations address both the employment contract and performance agreement of municipal managers and managers directly accountable to municipal managers. It further provides a methodology for the performance management system as well as criteria for performance bonus payments.

Powers and Functions

Specific Powers and Functions were assigned to Lepelle-Nkumpi Local Municipality in terms of Notice of Establishment (Notice No. 307) which was published in Limpopo Provincial Government Notice No. 307 of 2000.
