REVISED ANNUAL REPORT TEMPLATE

The purpose of this Annual Report is to provide for improved, consolidated content and quality of Municipal Annual Reports, which gives effect to the legal framework requirement, concepts and principals espoused in the White Paper on Local Government towards improving local government performance. It reflects the ethos of public accountability. The content gives effect to information required for better monitoring and evaluation of government programmes in support of policy decision making. This document provides an overview of municipal affairs by combining the annual performance report data required in terms of section 46 of the Municipal Systems Act, with annual report requirements as also referred to in the Municipal Finance Management Act (MFMA), 56 of 2003.

This Annual Report makes its contribution by attempting to forge linkages and reporting on information from the Integrated Development Plan (IDP), Service Delivery and Budget Implementation Plan (SDBIP), Budget Reform Regulations, In-year Reports, Annual Financial Statements and Performance Management information of a municipality. It relates to the Medium-Term Strategic Framework particularly through the IDP strategic objectives; the cross cutting nature of services offered by different spheres of government, municipal service outcome indicators; and the contextual information as set out in Chapters 3, 4 & 5. It also provides information on good management practices in Chapter 4; risk management in Chapter 2; and Supply Chain Management in Chapter 5. It also addresses the Auditor General's Report, dealing with financial and performance management arrangements in Chapter 6. This opens up greater possibilities for financial and non-financial comparisons between municipalities and improved value for money.

This document must provide information on probity, including anti-corruption strategies; disclosure of financial interests by officials and councillors; disclosure of grants from external parties and disclosure of loans and grants by municipalities. The appendices provide more detail including disaggregated information on municipal wards, and capital projects per ward among others.

The financial years contained in this template are explained and referred to as follows:

- Year -1: The previous financial year: **2023/2024**
- Year 0: The financial year of reporting: **2024/2025**
- Year 1: The following year, mostly requires future targets: **2025/2026**

Chapter 1

CHAPTER 1 – MAYOR'S FOREWORD AND EXECUTIVE SUMMARY

COMPONENT A: MAYOR'S FOREWORD

EXECUTIVE MAYOR'S FOREWORD

History is full of defining moments that continues to change the world, the way we see it and how we respond to it. Change demands much from us, requiring us to break from our regular routines and forcing us to rethink what and how we do things. Within the context of local government, it has become even more evident for the world in general and Lekwa Local Municipality in particular that change has become the order of the day.

The 2024/2025 financial year and beyond brought about changes that has again required that we stay true to the mandate received from our constituencies, constantly striving to do better for the communities we serve.

This is an opportunity for us to take responsibility and give an account to our communities and stakeholders on the progress made thus far and the state of affairs of the Municipality, for the period 1st July 2024 to 30 June 2025, noting that the Auditor-General has completed its audit.

As torch bearers to our electorate, we must remain vigilant when managing and spending the public purse in a transparent and accountable manner. We remain accountable to our principals and electorate, who have bestowed on us the responsibility to be the custodians for effective service delivery.

I herewith take the opportunity to present the 2024/2025 Annual Report to give account of the state of affairs of the Municipality.

The challenges faced by the Municipality, will not detract us from continuing to strive towards being a leading, people centred Municipality excelling in economic growth and governance, and continues to demand amongst other things, the following from us:

(a) Accelerated infrastructure renewal and upgrades
(b) Improved service provision with a reduction in water, electricity and refuse collection interruptions;
(c) Improved maintenance of cemeteries, parks, the CBD and all areas in general;
(d) A change in organisational culture where everyone strives towards ethical and professional conduct;
(e) The continued monitoring of the implementation of the Financial Recovery Plan.

For the year under review, the Municipality set strategic goals and objectives, contained in the Integrated Development Plan (IDP). Investment in infrastructure upgrades for improved service delivery remains critical. The following are the capital projects that were undertaken during the 2023/2024 financial year:

DRAFT

- Upgrading of Standerton Water Bulk System phase 2- Construction of Kieser Reservoir & Pressure Tower
- Refurbishment/Installation of boreholes in rural/farm areas
- Installation VIP toilets
- Installation of High mast lights
- Rehabilitation of Morgenzon Landfill site
- Construction of a 6km 11Kv electricity line
- Construction of switching station at Rooikoppen
- Development of Thuthukani cemetery
- Rehabilitation of Vry Street

The Municipality also managed to complete upgrading of the Standerton landfill site, noting the court order issued directing the Municipality to improve the health hazard conditions that were prevalent at the landfill site.

The intervention through the RBIG (Regional Bulk Infrastructure Grant) and WSIG (Water Services Infrastructure Gtant) as implemented by the Gert Sibande District Municipality as the implementing agency, have seen a number of projects being undertaken to amongst others address the service delivery matters through:

- Upgrading of Rooikoppen internal sewer reticulation
- Upgrading of TLC and Rooikoppen main sewer pump stations and pumping mains to the Standerton waste water treatment plant

The interventions by Department of Water and Sanitation (DWS) has also in progress.

The continued efforts through partnerships across all spheres of government has been instrumental in addressing our service delivery challenges. As we continue with our efforts to improve service delivery, making sure that all allocated grant funding is used where it is most needed. A major challenge remains the inconsistent water supply to some areas due to the water treatment plant infrastructure not working optimally, its design capacity no longer meeting demand and ageing infrastructure, resulting in pipe bursts and water supply interruptions. We need to especially address the challenge of certain areas in Sakhile not receiving water, which has been a matter that has been going on for far too long. In respect of sanitation services, the immediate challenge is that the Standerton waste water treatment plant capacity no longer meets effluent demand, with sewer spillages only being attended to within resource and capacity constraints.

It must be noted that the 2023/2024 financial position of the Municipality, had a total operating revenue amounting to R1.724 billion while the operating expenditure amounted to R 1.652 billion. This resulted in an operating surplus of R 68.898 million for the reporting period.

The Municipality in conjunction with National Treasury, Vodacom and the Development Bank of South

Chapter 1

Africa (DBSA) has initiated numerous revenue enhancement programs in order to improve the revenue of the Municipality whilst protecting the current revenue streams available to the Municipality. This includes but is not limited to:

- Valuation roll reconciliation to ensure completeness of property rates billing
- Tariff review to ensure that tariffs are realistic and the Municipality is able to recoup the cost for the provision of services
- Policy reviews to ensure adherence with applicable legislation
- Improved meter reading services through electricity smart meters
- Water meter replacement and exposing meters that are not easily accessible
- Billing reconciliations to ensure completeness of revenue generated
- Additional pay points to allow consumers to pay for services at various payment points
- Intensify indigent management in response to the socio-economic climate, to protect the poor from the severe economic impact
- Vigorous implementation of credit control and debt collection

Cost curtailment and austerity measures has been put in place and with the establishment of a cash flow management committee has been tasked with the responsibility of closely monitoring and reducing expenditures and the “nice-to-haves”. The Municipality is committed to reducing running overheads such as overtime, standby, telephone costs, printing and stationery, including the reduction of non-essential procurement and expenditure. Provision has been made, within budget constraints, towards necessary expenditures that can improve service delivery on water network, electricity and road maintenance.

The Municipality managed to maintain the audit outcome of a qualification. This indicates that the Municipality was able to adequately implement key activities as part of the post audit action plan which addressed findings raised by the Auditor General in the 2023/2024 financial year. The Municipality is committed to progressively improve its audit outcome, with the ultimate objective of obtaining a clean audit. This process will be closely monitored through the developed post audit action plan to address the all findings. The following key findings will be addressed in the 2024/2025 financial year:

- Irregular expenditure
- Property, plant and equipment
- Segment reporting
- Cash flow statement

The Municipality remains committed to maintain the highest standards of governance which is fundamental for the effective management of public finances and resources. Rest assured, the current political leadership remains committed to serve. Executive, governance and oversight structures are in place and continues to exercise its functions and responsibilities to monitor if resources are effectively, efficiently and economically utilized. I also wish to thank the political leadership and administration for their continued efforts, hard work and dedication. Lastly, to the employees and the community at large let us continue to be vigilant in our efforts to hold us accountable for a better tomorrow.

DRAFT

Chapter 1

We remain committed and want to re-assure all stakeholders and the entire Lekwa community that with the transition having been a smooth one, all stops will be pulled out to ensure service delivery is fast-tracked to reach all our residents.

I thank you

Signed by:
Executive Mayor
S. Mngemezulu

COMPONENT B: EXECUTIVE SUMMARY

1.1. MUNICIPAL MANAGER'S OVERVIEW

MUNICIPAL MANAGER'S OVERVIEW

The 2024/2025 Annual Report is herewith presented in order to give an account to our communities and stakeholders on the overall performance of the Municipality for the period 1st July 2024 to 30th June 2025.

Lekwa Local Municipality, being a Category B municipality situated within the Gert Sibande District in the Mpumalanga Province, is one of seven municipalities within the district. The Municipality exercises its powers and functions towards administrative and operational efficiency, having put checks and balances in place, in line with its constitutional mandate and other legislative requirements, policies and procedures, including a system of delegations as espoused in terms of section 59 of the Municipal Systems Act 32 of 2000.

The municipality does not have any entities under its control and also has not entered into any public private partnerships for the year under review. Shared powers and functions relate to environmental health inspections undertaken by the Gert Sibande District Municipality. Sector department functions that are shared with the municipality includes library services. Traffic law enforcement in respect of vehicle and drivers licence services is being provided by the Mpumalanga Department of Community Safety, Security and Liaison.

Noting the continued challenges faced by the Municipality for the year under review, there has also been very positive developments, within the current resource constraints.

For the reporting period, the Auditor General SA commenced as per schedule after the unaudited

Chapter 1

annual financial statements and annual performance report was submitted on 31st August 2025.

The 2023/2024 financial performance of the Municipality indicates that the total operating revenue amounted to R1. 724 billion while the operating expenditure amounted to R 1.652 billion, this resulted in an operating surplus of R 68.898 million for the period. The Municipality had a high provision for debt impairment and depreciation, amounting to R 274 million. The total revenue received from service charges contributed R 692 million and property rates contributed 217 million (12.6%), while grants and subsidies received contributed R 219 million.

The Municipality also took advantage and applied to participate in the Municipal debt relief programme, which was approved on 1 December 2023. As a result of the process Eskom wrote off interest amounting to R136 535 833. Moreover, in terms of section76(1)(e) and 76(4)(a) the Accounting Officer of the Provincial Department of Transport wrote-off a debt of R 75 333 825 owed by the municipality as irrecoverable debt, to the benefit of the Municipality. These write-offs further contributed to the increased revenue by R 211 869 657 (Debt Relief and Incentives), which is a new revenue line item which was not previously in the annual financial statements.

The Municipality had a total operating expenditure for the reporting period ending 30 June 2024 amounting to R 1 652 632 295. There was an increase in expenditure which amounted to R 240 629 469 when compared to the period ended 30 June 2023. The main contributors to this increase are the increase in Bad debt written off of R123 859 744, bulk purchases of R68 485 278, contracted services of R35 385 728, employee related costs of R10 519 115 and an increase in finance costs of R20 313 658. The Municipality was able to reduce Debt impairment by R40 812 964, this can be attributed to an improvement in collection rate and a change in impairment calculation methodology.

The following expenditures remains the highest cost drivers and have a significant impact on the revenue of the Municipality thus requiring the Municipality to vigorously implement the revenue enhancement strategy and continuous cost curtailment measures:

Bulk purchases R 544 068 888 million (33%)

Employee related costs R 282 231 288 million (17%)

Debt impairment R 214 613 319 million (13%)

Depreciation R 60 376 738 million (4%)

Finance costs R 181 672 963 million (11%)

Contracted services R 122 044 053 million (7%)

The Municipality has further implemented cost curtailment measures as well as the establishment of a

DRAFT

cash flow management committee in order to reduce expenditures. The Municipality is committed to reducing running overheads such as overtime, standby, telephone costs, printing and stationery, including the reduction of non-essential procurement and expenditure. Furthermore the municipality took an initiative to renegotiate contracts with its service providers to reduce their scopes to affordable levels. Adequate provision is made towards expenditure that can improve service delivery on water network maintenance, improved sanitation, electricity maintenance and road maintenance amongst other expenditure.

Having maintained the audit outcome, it is important to further strengthen internal controls and closely monitor the post audit action plan to address all audit findings as well as to improve any other identified internal control deficiencies. The following findings must be addressed in the 2024/2025 financial year which resulted in the qualified audit outcome :

- Irregular expenditure
- Property, plant and equipment
- Segment reporting
- Cash flow statement

The audit action plan will be monitored on a monthly basis, with quarterly reports being submitted to the various executive and governance structures as part of remaining accountable to sustain the current momentum of the qualified audit opinion. The Municipality will again request Auditor General (SA) to perform a status of records review. This assisted as an early warning to detect areas requiring attention to improve internal control shortcomings.

The implementation and reporting on the approved Financial Recovery Plan (FRP) is the responsibility of the entire management team in order to steadily improve the financial sustainability of the Municipality. Reports are submitted on a monthly basis and quarterly War Room meetings are held, facilitated by National Treasury, to track progress. Inroads have been made towards exiting the rescue phase of the FRP.

It must also be noted that for the year under review, with two vacant senior management positions, the appointed managers who filled these positions in an acting capacity, was equal to the task, which greatly assisted in creating senior management and administrative stability and the team is commended for their hard work and dedication.

The Municipality's risk management function, under direction of the accounting officer is critical in planning and implementing measures to manage and mitigate risks. The 2024/2025 financial year strategic risk assessment was conducted and all risks were identified at maximum, high and medium

Chapter 1

risks. With a functional Risk Management, Anti-Fraud and Anti-Corruption Committee (RMAFACC), risks were managed and mitigated and reported on to the Audit Committee and Council on a quarterly basis.

The year under review had its fair share of challenges and with it falling squarely on my shoulders as the accounting officer, maintained audit outcome also means that we are far from being out of the woods, we need to work much harder, crossing all the t's and dotting all the i's so that we do not drop the ball for the next audit season.

I would like to take the opportunity to express my gratitude to the political leadership, the management team and employees that against all odds and putting differences aside, doing what needed to be done within our current resource constraints and challenges to have completed the audit. The commitment remains to continue putting our shoulder to the wheel, noting the very pervasive challenges faced by the Municipality. It is only through working as a team and making sure that we get the basics right that we will ensure sustainable service delivery, that will improve the lives of our communities.

M. Jiyane
Acting Municipal Manager

T 1.1.1

1.2. MUNICIPAL FUNCTIONS, POPULATION AND ENVIRONMENTAL OVERVIEW

INTRODUCTION TO BACKGROUND DATA

The Lekwa Local Municipality is a Category B municipality situated within the Gert Sibande District in the Mpumalanga Province. It is one of seven municipalities in the district. It was established on the 5th of December 2000 after the amalgamation of three former Transitional Local Councils, namely Standerton, Sakhile and Morgenzon. It is located in the south-west of the district, with immediate entrances to KwaZulu-Natal, Gauteng and Free State Provinces. Newcastle, Heidelberg and Vrede are respective immediate entrances. Standerton serves as an urban node, whilst Morgenzon, which is 45km northeast of Standerton, serves as a satellite node. Lekwa, with an area of 4 557km² lies on the large open plains of the Highveld region, which is characterised by tall grass, and it is transversed by the Vaal River, which flows in a western direction. The municipality, named after the Vaal River is commonly known as Lekwa (the Sesotho name for the Vaal River).

Chapter 1

The data contained in this section, extracted from StatsSA's 2021 midyear population estimates report, and the latest Socio-Economic Review and Outlook (SERO) reports. In addition, data obtained from the Mpumalanga Department of Finance's economic development division as well as data collected by the Municipality has also been used to provide the statistical data. Wherever possible, comparative data has been provided in respect of contributions made by the Municipality towards satisfying the basic requirements for water, sanitation, electricity, solid waste removal, housing, local economic development, roads, stormwater and town planning. *T 1.2.1*

Table 1: Population Pyramid, Stats SA 2022 Census

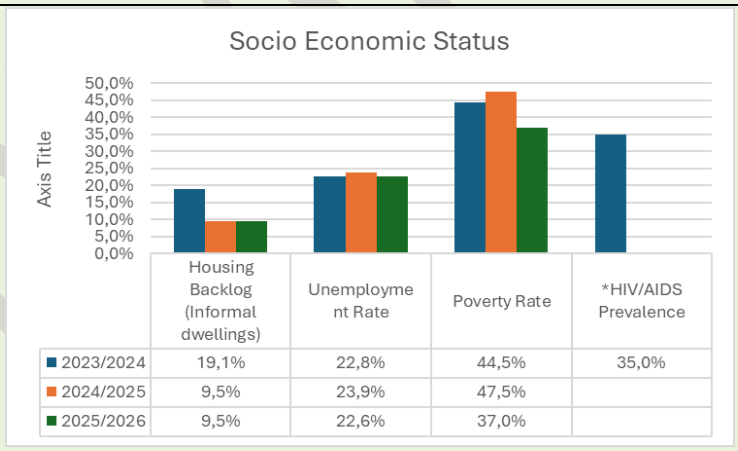

From the 2022 Census, the youth population (0-34 years) formed 60.1% of the local municipal area's population and the elderly population (60+ years) 9.6%. In 2022, the female population's share was 51.3% and that of males 48.7%. The age profile characteristic of the Lekwa LM skews more towards a decreasing population pyramid. It can be observed from the above pyramids that the population of Lekwa LM is slowly growing and that there is a relatively large portion of young individuals. This could have implications on future demographic trends, such as changes in workforce, demands on social services, and overall economic development. It also evident that in 2011, the bulk of the population fell within the 20-24 age group. In 2022, the female 30-34 age group is the largest. The 2022 pyramid also indicates that the municipality has a large base of working age population groups.

Chapter 1

	2023/2024	2024/2025	2025/2026

COMMENT ON BACKGROUND DATA:

From the 2022 Census, the youth population (0-34 years) formed 60.1% of the local municipal area's population and the elderly population (60+ years) 9.6%. In 2022, the female population's share was 51.3% and that of males 48.7%. The age profile characteristic of the Lekwa LM skews more towards a decreasing population pyramid. It can be observed that the population of Lekwa steadily growing, with a relatively large youth population. This could have implications on future demographic trends, such as changes in workforce, demands on social services, and overall economic development. It also evident that in 2011, the bulk of the population fell within the 20-24 age group. In 2022, the female 30-34 age group was the largest. The 2022 pyramid also indicates that the municipality has a large base of working age population group.

T 1.2.8

1.3. SERVICE DELIVERY OVERVIEW

SERVICE DELIVERY INTRODUCTION

In terms of water, sanitation, electricity and roads infrastructure as well as refuse removal services, the Municipality has been unable to cope with the demand for these basic services. Over a number of years, the situation has been compounded by inadequate infrastructure maintenance and has gradually deteriorated, subjecting communities to inconsistent water and electricity supply. The failing infrastructure may potentially expose communities to health and safety hazards. The current situation regarding water, sanitation, electricity and roads infrastructure is due to the following challenges:

- Inadequate maintenance of existing infrastructure
- Insufficient budget to adequately fund ongoing operations and maintenance
- Slow refurbishment and upgrade of aged infrastructure

- Lack of a comprehensive infrastructure master and maintenance plans
- Skills shortages in critical areas

It is of utmost importance to note that profitable local economies are driven by an efficient and functional infrastructure system of water, sanitation, electricity and roads management infrastructural services. In short, good infrastructure improves the quality of life and has economic spin-offs.

The Municipality will be receiving assistance through the Department of Water and Sanitation's (DWS) Water Services Infrastructure Grant (WSIG) and Regional Bulk Infrastructure Grant (RBIG) and Seriti to refurbish and upgrade water and sanitation infrastructure. The Municipality will also be procuring service providers to assist with the repairs and maintenance of water and sanitation infrastructure.

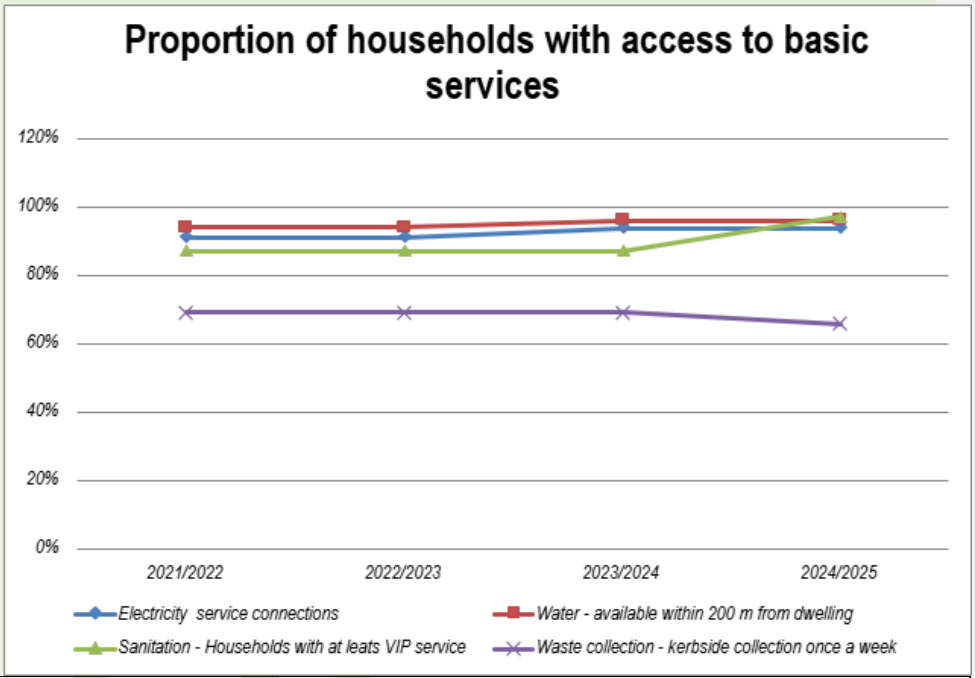

T 1.3.1

Proportion of Households with minimum level of Basic services

	2021/2022	2022/2023	2023/2024	2024/2025
Electricity service connections	91%	91%	94%	94%
Water - available within 200 m from dwelling	94%	94%	96%	96%
Sanitation - Households with at least VIP service	87%	87%	87%	97%
Waste collection - kerbside collection once a week	69%	69%	69%	66%

DRAFT

Chapter 1

T 1.3.2

COMMENT ON ACCESS TO BASIC SERVICES:

It is important to note that profitable local economic activities require efficient, optimally functioning systems of water, sanitation, electricity and roads management infrastructure services are available, including regular refuse removal services. In short, good infrastructure improves the quality of life of the residents of a municipality and creates opportunities for local economic growth.

Chapter 1

The major challenges relating to water provision includes the inconsistent water supply to some areas due to the water treatment plant infrastructure not working optimally and with the design capacity no longer meeting demand, as well as ageing infrastructure thus leading to pipe bursts and water supply interruptions. The backlogs and non-functional water infrastructure in the rural wards also results in water supply challenges.

In respect of sanitation services, the immediate challenge is that the Standerton waste water treatment plant capacity no longer meet effluent demand, with sewer spillages attended to within resource and capacity constraints. The Department of Water and Sanitation's 2023 Blue Drop Report indicates that the Lekwa Local Municipality received a "high" Blue Drop Risk Rating (BDRR). This rating reflects concerns about the quality of drinking water services in the municipality. Regarding wastewater management, the 2023 Green Drop Report reveals that 34% of wastewater systems nationally are in a critical state, the Standerton Wastewater Treatment Plant in Lekwa specifically is operating at 164% over capacity and received an overall score of 17%, placing it in the critical risk category. This overcapacity poses significant environmental and public health risks. While specific "No Drop" data for Lekwa Local Municipality is not available, the 2023 No Drop Watch Report highlights that non-revenue water (NRW) increased from 37% in 2014 to 47% in 2023 nationally. NRW includes water losses due to leaks, unauthorized consumption, and metering inaccuracies, indicating inefficiencies in water distribution systems. These findings underscore the need for urgent interventions to improve water and wastewater management in Lekwa Local Municipality.

The backlogs and the ablution facilities that need to be emptied in the rural wards results in sanitation challenges. The current sewer spillages into the Vaal River have been receiving attention, but efforts will be stepped up to find permanent and lasting solutions to these challenges as the extent of its negative environmental impact is significant. The risk rating for the municipality's Waste Water Treatment Plants are high as the plant capacities are overloaded and exceeded, thus requires upgrades, which the RBIG and WSIG funding seeks to begin addressing.

Electricity supply has experienced challenges relating to electricity supply including the exceeding of the notified maximum demand of 55MVA provided by Eskom, when current actual demand is at 67MVA. Electricity tariffs are still not fully cost reflective, which poses a challenge for the Municipality to service the Eskom account as well as to generate additional income for other service delivery matters. Illegal electricity connections and theft of electricity also negatively affects revenue generation from electricity sales. The current crisis remains that the Municipality has been unable to service its Eskom debt as per the repayment plan and the court order. Payments of about R2 million per week are made towards reducing the Eskom debt. 15% of the equitable share is also paid to Eskom with every tranche received.

Refuse removal services are provided to households but current challenges includes that the Morgenzon Landfill site has reached its design capacity lifespan and the Standerton landfill site is not

DRAFT

managed in terms of the its permit requirements. Insufficient refuse removal trucks and the occasional breakdown of these vehicles has also negatively impacted the delivery of refuse removal services on a weekly basis. Plans are afoot to procure additional refuse removal trucks in the 2022/2023 financial year.

T 1.3.3

1.4. FINANCIAL HEALTH OVERVIEW

FINANCIAL OVERVIEW

The financial health of Lekwa Local Municipality for the year ending 30 June 2025 shows significant improvement despite facing substantial financial challenges. Key highlights include a transition from a deficit in the previous year to a surplus, achieved through strategic interventions and relief measures.

Total operating revenue reached R1,282 433 841, a 20% decrease from the previous year is driven by reduction in public contributions and a new revenue stream in the 2023/2024 financial year from the Debt Relief and Incentives program. This programs contributed R211.9 million, including Eskom writing off R136.5 million in interest and the Provincial Department of Transport writing off R75.3 million as irrecoverable debt.

Grants receipts contributed R244 million (19%) of the total revenue, while revenue generated from property rates and service charges accounted for R811 (63%) of the total revenue mix. Although there are no specific norms and standards to measure grant dependency, this revenue mix indicates that the Municipality is not entirely dependent on grants and subsidies to finance its operations.

However, further improvements in own revenue generation are necessary. To address this, the Municipality is actively implementing various revenue enhancement programs aimed at reducing the operating deficit over the multi-year period.

Operating expenditure rose to R1,663 817 204, with major costs stemming from bulk purchases (33%), employee costs (17%), and debt impairment (13%). Despite this, the Municipality reduced debt impairment costs by R40.8 million through improved collections and refined methodologies. Cost-curtailment measures, including reducing overheads, renegotiating contracts, and prioritizing essential service delivery, are actively being implemented to manage expenditures.

The Municipality recorded a deficit of R358 million, ending the year with R16.2 million in cash and cash equivalents. While challenges remain, the notable revenue growth and strategic cost management

DRAFT

efforts signal progress in the Municipality's financial recovery and its commitment to sustainable operations and improved service delivery.

T 1.4.1

Financial Overview: 2024/2025			R' 000

* *Note: surplus/(deficit)*			*T 1.4.2*

Operating Ratios	
Detail	**%**
Employee Costs	19.6%
Repairs & Maintenance	4.7%
Finance Charges & Impairment	19.6%
	T 1.4.3

COMMENT ON OPERATING RATIOS

Employee-related costs accounted for **19.6%** of the total operating expenses, which remains within the accepted norm of **25-40%**. However, the Municipality faces a high vacancy rate, primarily due to delays in filling positions caused by inadequate cash flow. This high vacancy rate has significantly contributed to increased standby and overtime costs. To address this, the Municipality has reviewed its organizational structure, prioritizing the filling of critical positions that will have an immediate impact on service delivery.

Spending on repairs and maintenance amounted to **4. 7%** of the total operating costs for the reporting period, which is below the average norm of **8%**. The inadequate investment in this area is attributed to the unfunded position of the budget. To address this, the Municipality is developing a comprehensive maintenance plan to manage repairs and maintenance activities in a more structured manner.
The ratio for finance charges and impairment costs increased during the period, driven by the need to raise provisions for debt impairment due to insufficient cash flow and low revenue collection. Additionally, the rise in finance charges is linked to the interest incurred on Eskom debt. These factors underscore the importance of improving cash flow management and enhancing revenue collection to stabilize financial performance.

T 1.4.3

Total Capital Expenditure: 2022/2023- 2024/2025

T 1.4.4

DRAFT

Chapter 1

COMMENT ON CAPITAL EXPENDITURE:

The Municipal has significantly improved on the capital expenditure from 83% in the 2024/2025 financial year to 92% in the 2024/2025 financial year. The Municipality has spent 100% of conditional grants however, could not implement projects that are internally funded due to cash flow constraints. Additionally, the Municipality has enhanced its turnaround time for finalising the appointment of service providers for capital project implementation, further contributing to increased grant expenditure.

T 1.4.5.1

1.5. ORGANISATIONAL DEVELOPMENT OVERVIEW

Chapter 1

ORGANISATIONAL DEVELOPMENT PERFORMANCE

The human resource management of the municipality comprises of activities relating to the rendering of a comprehensive human resource management function to Council by ensuring an efficient personnel administration system, recruitment and selection, sound labour relations, human resources development, implementation of affirmative action measures, occupational health and safety of employees and compliance with all relevant labour legislation.

T 1.5.1

1.6. AUDITOR GENERAL REPORT

AUDITOR GENERAL REPORT: 2024/2025 FINANCIAL YEAR

The Municipality's audit opinion remained at a qualification for the 2024/2025 financial year. Maintaining this audit outcome indicates that the Municipality was once again able to adequately implement key activities in the post audit action plan to address the findings that the Auditor General raised in the 2023/2024 financial year. The Municipality is committed to further improving the audit, with the ultimate objective to obtain an unqualified audit opinion (Clean Audit). This process will be closely monitored through the developed post audit action plan to address the audit findings that remained. The following key findings will be addressed in the 2024/2025 financial year:

- Irregular expenditure
- Cash flow
- Impairment
- Vat output and Vat Input
- Contracted services
- Bad debt write off

The Municipality has developed an audit action plan that will be monitored on a quarterly basis in an effort to ensure that we are able to improve from the qualified audit opinion. The Municipality will again request the Auditor General (SA) to perform a status of records review, which has assisted as an early warning or alert system to enable the Municipality to take required steps to correct the control deficiencies that were identified. It will also assist that the implementation of the action plan be more insightful and relevant, ensuring greater impact towards an improved audit outcome for the 2025/2026 financial year.

The AGSA's basis for a qualified opinion were the following:

Chapter 1

1. Irregular expenditure

The municipality did not include all instances of irregular expenditure in the financial statements, as required by section 125(2)(d) of the MFMA, as the municipality did not have adequate systems to identify all prior year's irregular expenditure. I was unable to determine whether any further adjustments were necessary to the closing balance of irregular expenditure for the current and prior year. Consequently, I was unable to determine the full extent of the understatement of irregular expenditure stated at R1,07 billion (2023-24: R1,04 billion) in note 56 to the financial statements, as it was impracticable to do so.

2. Receivable from exchange transactions

The provision for impairment of debtors was not calculated in accordance with the Standards of GRAP 104, Financial Instruments. A general rate was applied for all the debtors in calculating the impairment provision, without assessing the credit risk for a group or subgroup of debtors. Additionally, the data used to calculate the impairment included accounts belonging to the municipality. Consequently, I was unable to determine the impact on debt impairment stated at R182,18 million (2023-24: R206,78 million) in note 35 to the financial statements and receivable from exchange transactions R579,58 million (2023-24: R459,33 million) in note 3 to the financial statements, as it was impracticable to do so.

3. Receivables from non-exchange transactions

The provision for impairment of debtors was not calculated in accordance with the Standards of GRAP 104, Financial Instruments. A general rate was applied for all the debtors in calculating the impairment provision, without assessing the credit risk for a group or subgroup of debtors. Additionally, the data used to calculate the impairment included accounts belonging to the municipality. Consequently, I was unable to determine the impact on debt impairment stated at R182,18 million (2023-24: R206,78 million) in note 35 and receivable from non-exchange transactions R301,46 million (2023-24: R289,53 million) in note 4, as it was impracticable to do so.

DRAFT

4. Bad debt written

The municipality did not account for bad debt written off in accordance with GRAP 1, Presentation of financial statements. The bad debt written off in the current and previous year was not accounted for and disclosed in the financial statement. As a result, the expenditure was understated by R19, 44 million (2023-24: R 123,96 million), and I was unable to determine the full extent of receivables from exchange and non-exchange transactions as it was impractical to do so. Additionally, there was an impact on the deficit for the period and the accumulated surplus.

5.Contracted services

The municipality did not have adequate systems to account for contracted services in accordance with GRAP 1, Presentation of financial statements, as contracted services was not recorded in correct accounting period. This resulted in contracted services being overstated by R22,28 million. Additionally, there was an impact on the deficit for the period.

5.1 VAT output accrual

The municipality did not have adequate systems to account for vat output accrual in accordance with GRAP 104, Financial Instrument. The municipality control accounts for the effects of receipts received and debt write-offs. Consequently, I was unable to determine the full extent of the overstatement of VAT output accrual stated at R 905, 81 million (2023-24: R 777, 79 million) in note 14 to the financial statements, as it was impracticable to do so.

5.2 VAT input accrual

9. The municipality did not have adequate systems to account for vat input accrual in accordance with GRAP 104, Financial Instrument. The municipality did not account for the effects of payments made. Consequently, I was unable to determine the full extent of the overstatement of VAT input accrual stated at R 905, 81 million (2023-24: R 777, 79 million) in note 6 to the financial statements, as it was impracticable to do so.

6.Cash flow statement

Service charges and property rates, other services

DRAFT

Chapter 1

The municipality's service charges and property rates, other services in the current and prior year were not correctly prepared and disclosed as required Standards of GRAP 2, Cash flow statements. This was due to multiple errors in the calculations. I was not able to determine the

full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Interest received from current and non-current asset

The municipality's interest received from current and non-current assets in the current and prior year were incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Employee costs

The municipality's employee costs were incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Suppliers

The municipality's suppliers in the current year and prior year were incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Purchase of property plant and equipment

The municipality's Purchase of property plant and equipment was incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.
Cash generated from operating activities

DRAFT

Chapter 1

Cash generated from operating activities note was not correctly disclosed as various movements were not correct accounted for due to state of accounting records, which constitute a departure from GRAP 2, Cash I/ow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Chapter 1

14	Oversight Committee (MPAC) assesses Annual Report	February - March 2026
15	Council adopts Oversight report	31st March 2026
16	Oversight report is made public	April 2026
17	Oversight report is submitted to relevant provincial councils	April 2026
18	Commencement of draft Budget/IDP finalisation for next financial year. Annual Report and Oversight Reports to be used as input into next planning phase	March/April 2026
		T 1.7.1

COMMENT ON THE ANNUAL REPORT PROCESS:

Adherence to the above timelines remains critical towards ensuring sufficient time is allocated for achieving key milestones within the cyclical nature of municipal performance planning, reporting, analysis and review processes. This continuous loop is important to ensure that it allows for a process of reflection, by looking at the year under review as it then creates the space to inform planning for the next financial year's cycle of planning and budgeting processes. The alignment between the IDP, Budget and the Performance Management System for reporting and monitoring against predetermined objectives as dealt with in terms of the approved process plan is critical. An annual report project implementation plan is developed with clear deadlines and responsible persons assigned to ensure the timely completion of the 1st draft of the annual performance report to be submitted with the unaudited AFS by the end August annually. For the year under review, the unaudited annual financial statements and the annual performance report was submitted on time. The audit was completed and the final management report and audit report was presented to management and also to the Audit Committee on 28th November 2025, whereafter other processes unfolded in respect of the drafting of the audit action plan and the annual report with audited financial and performance information.

DRAFT

Chapter 2

CHAPTER 2 – GOVERNANCE

INTRODUCTION TO GOVERNANCE

This Chapter is composed of the following four components:

Component A: Political and Administrative Governance
Component B: Intergovernmental Relations
Component C: Public Accountability and Participation
Component D: Corporate Governance

T 2.0.1

COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE

INTRODUCTION TO POLITICAL AND ADMINISTRATIVE GOVERNANCE

The Constitution section 151 (3) states that the council of a municipality has the right to govern on its own initiative, the local government affairs of the local community. This component reflects on both the political and administrative structures of the Municipality.

T 2.1.0

2.1 POLITICAL GOVERNANCE

INTRODUCTION TO POLITICAL GOVERNANCE

For the year under review, the Municipality had a number of key committees in place. The highest decision-making structure, being the municipal council held meetings throughout the year toward the facilitation of the administrative process of implementing programmes and projects as set out for the year in its IDP and SDBIP.

For the year under review, the executive leadership of the Municipality were comprised as follows:
(a) Members of the Mayoral Committee
- Councillor S. Mngemezulu (Executive Mayor)
- Councillor T. Motaung (MMC: Finance)
- Councillor S. W Masondo (MMC: Planning and Economic Development)
- Councillor D. Marago (MMC: Technical Services)
- Councillor M. Mthimkhulu (MMC: Corporate Services)

DRAFT

- Councillor M. Molaba (MMC: Community Services and Safety)

(b) The municipal council was under the leadership of Councillor P. C. Mahlaba as Speaker of Council. Councillor M. R. Motloung was the Whip of Council.

The Municipal Council also established both section 80 and 79 Committees to assist with the exercise of both executive and legislatively mandated functions and responsibilities. Council nominated Councillors to serve on the following committees of Council as listed below:

Councillors and Committees Allocated

The political situation within the municipality has become more stable, with the established committees having been functional for the period under review.

The Municipality also has a functional Audit Committee (AC) that provides guidance throughout the year on recommendations on the financial processes and performance of the Municipality. The Audit Committee, also serves as the Performance Audit Committee (PAC) which acts as an independent oversight structure of Council.
T2.1.1

COUNCILLORS

The Lekwa Municipal Council consists of 30 Councillors, made up of 15 ward councillors and 15 proportional representative (PR) councillors. For the 2023/2024 financial year, the following was the composition of the municipal council:

	Male	Female
ANC	9	4
DA	3	1
EFF	1	2
LCF	5	1
FF Plus	1	1
ATM	0	1
Independent	1	0

Appendix A consists of the complete list of Councillors, which distinguishes between ward councillors and those appointed on a proportional representation basis, including the status as either full time or part time as councillors.

DRAFT

Chapter 2

Appendix B sets out the various established committees and their functions, which were established for the year under review.

T2.1.1

POLITICAL DECISION-TAKING

Decisions making took place at Mayoral Committee and Council sittings. For the period under review, it must be noted that with the newly elected Council in place, the functionality of the Municipal Council had stabilized with council meetings sitting as per schedule to fully exercise its legislative and oversight responsibilities as required. Council had 10 sittings for the year under review.
In order to further strengthen the reporting on and tracking of the implementation of Council resolutions, council resolution implementation and tracking is a standing item on the agenda of ordinary council sittings.

T 2.1.3

2.2 ADMINISTRATIVE GOVERNANCE

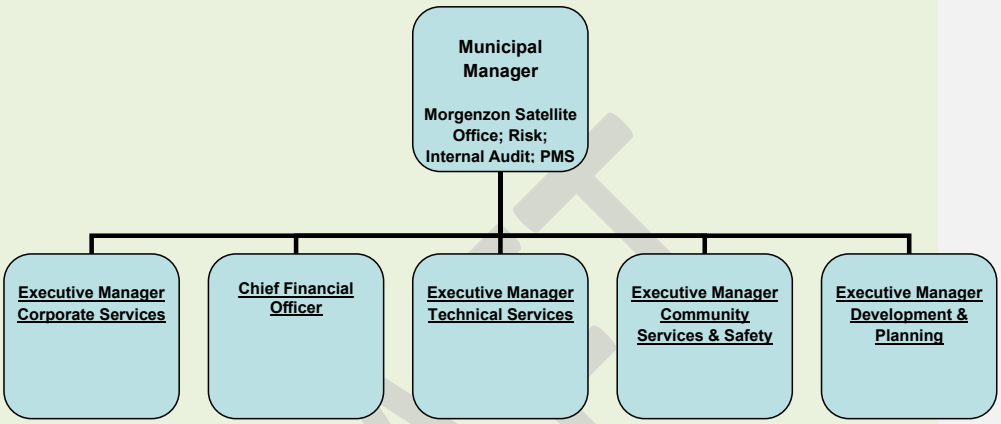

INTRODUCTION TO ADMINISTRATIVE GOVERNANCE

Section 60 (b) of the MFMA stipulates that the Municipal Manager of a municipality is the accounting officer of the municipality, and for the purposes of this Act and must provide guidance on compliance with this Act to political structures; political office bearers, and officials of the municipality and any entity under the sole or shared control of the municipality. This chapter deals with the highest levels of administrative leadership.
For the year under review, all senior management positions were filled which has assisted in creating greater administrative stability.

Chapter 2

COMPONENT B: INTERGOVERNMENTAL RELATIONS

INTRODUCTION TO CO-OPERATIVE GOVERNANCE AND INTERGOVERNMENTAL RELATIONS

Section 3 of the MSA requires that municipalities exercise their executive and legislative authority within the constitutional system of co-operative governance as envisaged in section 41 of the Constitution. This requires municipalities to establish and foster cooperative relations across all spheres of government, noting its interrelated yet independent nature.

T 2.3.0

2.3 INTERGOVERNMENTAL RELATIONS

NATIONAL INTERGOVERNMENTAL STRUCTURES

The President's Coordinating Council (PCC) is the main coordinating body at national level. It consists of the President, the Deputy President, key Ministers, Premiers and the South African Local Government Association (SALGA).
The PCC meets regularly to oversee the implementation of national policies and legislation, and to ensure that national, provincial and local development strategies are aligned to each other.
At national level, each department has an Inter-Governmental Forum where Ministers meet with MECs and SALGA. These forums are called MinMECs and are also attended by heads of departments, as technical advisors. The purpose of MinMECs is to consult, coordinate implementation and align programmes at national and provincial level.

T 2.3.1

PROVINCIAL INTERGOVERNMENTAL STRUCTURE

The Premier of the Province co-ordinate relationships between national, provincial and local government in the province through a Premier's Inter-governmental Forum (PIF) which consists of the Premier, the local government MEC, other MECs, Metro and District Mayors and other Mayors where necessary.
The PIF meets regularly and consults on broad development in the province, as well as on the implementation of national and provincial policy and legislation, such as
(i) The Mpumalanga Provincial Aids Council (MPAC);

DRAFT

(ii) The Mpumalanga Socio- Economic Consultation Council that seek to produce Socio Economic Review Outlook (SERO) Report for the province;
(iii) The Mpumalanga Arts and Culture Council (MACC);
(iv) Provincial Geographical Name Change Committee (PGNC)

T 2.3.2

RELATIONSHIPS WITH MUNICIPAL ENTITITIES

For the year under review, the Municipality did not have any municipal entities under its control.

T 2.3.3

DISTRICT INTERGOVERNMENTAL STRUCTURES

The mechanism used at district level is through a number of district forums that includes the following:

- The Executive Mayor's Forum;
- The Municipal Manager's Forum;
- The District Aids Council;
- The District Communication Forum;
- The District Disability Forum;
- The District Sports Council; and
- The District Arts and Culture Forum
- The District Elderly People Forum
- The District Women Forum

LOCAL INTERGOVERNMENTAL STRUCTURES

The local forums include the following:

- The Local Aids Council
- The Local Disability Forum
- The Local Sports Council
- The Local Arts and Culture Forum
- The Local Elderly Forum
- The Local Women Forum

Chapter 2

A multisectoral approach remains an effective mechanism in ensuring a coordinated approach to address social ills confronted by the community championed by civil society sectors, the private sector and government departments.
More emphasis has been put on Gender Based Violence campaigns to fight this endemic scourge. The Local Aids Councils have now incorporated GBVF as a permanent agenda item with pledges being made by all stakeholders on the commitment to fight GBVF.

T 2.3.4

DRAFT

Chapter 2

COMPONENT C: PUBLIC ACCOUNTABILITY AND PARTICIPATION

OVERVIEW OF PUBLIC ACCOUNTABILITY AND PARTICIPATION

Section 17 (2) of the MSA requires a municipality to establish and organise its administration to facilitate a culture of accountability amongst its staff. Section 16 (1) also states that a municipality must develop a system of municipal governance that compliments formal representative governance with a system of participatory governance, whilst section 18 (a) - (d) requires a municipality to supply its community with information concerning municipal governance, management and development. In line with the above, the Municipality has developed a system of participatory governance, management and development through the establishment of the following:

a) **Ward Committees** – establishment of ward committees with the purpose to enhancing participatory democracy in local government;

(b) **Community meetings** to discuss ward issues and report on matters raised;

As a legislative and democratic requirement at local level, ward committees are central to the effective community participation process. It should enhance the involvement in the affairs of the municipality in a collective and structured manner. Furthermore, to objectively achieve its public mandate and fulfil it in an inclusive manner, ward committees must work towards ensuring that community involvement in different development aspects within their locality to better the lives of its community in a non-partisan way is achieved. Community Development Workers (CDWs) are also deployed in the wards which can also assist in bringing other government services closer to the community.

T 2.4.0

2.4 PUBLIC MEETINGS

COMMUNICATION, PARTICIPATION AND FORUMS

Community participation is a fundamental principle that underpins the actions of democratic governance. According to the objects of local government as contained in Chapter 7, Section 152(e) of the Constitution, it is based on the understanding that communities must participate in all decision-making processes within local government on matters that affects them. It is for this reason that communities are encouraged to assist in building a sound and active partnership with the Municipality in order to fulfil the requirements of Section 152. This is done through the following:

a) Ward Committees and CDWs;
b) Mayoral Izimbizo (IDP and Budget consultation) and
c) Holding community meetings.

Communities are mobilised through the use of a loud hailing system, door-to-door distribution of notices, flyers and pamphlets to encourage their involvement during consultation and information sharing sessions. *T 2.4.1*

WARD COMMITTEES

Chapter 2

The Municipal Structures Act of 1998 and the Municipal Systems Act of 2000 provides the legislative framework for the establishment of Ward Committees to enhance participatory governance. Ward Committees were established in all 15 wards with the objectives to:

(a) Create formal communication channels and co-operative partnership between the Municipality and the communities within a Ward.
(b) Facilitate public participation in the process of development, review and implementation of the Integrated Development Plan of the Municipality.
(c) Acting as advisory bodies on Council policies and matters affecting communities in wards.
(d) Facilitate Council Programmes and make recommendations on matters affecting wards to the Ward Councillor;
(e) Express the needs and concerns of the residents within Wards.
(f) Identify development priorities within Wards through the involvement of ward residents and promoting accountability of the Municipality to the residents of every ward;

Ward Operational Plans were developed and approved by Council with all activities and programme of the wards implemented accordingly. A stipend is paid on a monthly basis to Ward Committee members, subject to the submission of monthly reports to the office of the Speaker, with issues identified in the wards, for further discussion at the Ward Councillors Forum. Quarterly reports are also submitted to Council on these activities as undertaken. Ward Committees were functional for the period under review.

T 2.4.2

COMMENT ON THE EFFECTIVENESS OF THE PUBLIC MEETINGS HELD:

Public and community meetings generally convened to keep communities informed regarding service delivery matters and to provide a platform for the community to raise issues and give inputs for the development of the Municipality. This consultation and engagement process assists the Municipality to plan and budget according to identified and prioritized needs. In community meetings, the Municipality also uses the platform to continuously encourage the community to pay for services and to actively participate in the affairs of the municipality.

The community benefits by submitting their development needs to be catered for within a specific financial year in the IDP and budget. It also provides an opportunity to directly interact with municipal administration on issues affecting service delivery. Ward Committee Meetings took place during the year under review although there was a delay with the induction of the ward committee members. Meetings were convened according to times that suited particular communities. In respect of the numbers of people attending meetings, it differs from ward to ward due to venues that are not central, sometimes lack of transport and the public opting not to attend due to one or other reason. T 2.4.3.1

2.5 IDP PARTICIPATION AND ALIGNMENT

IDP Participation and Alignment Criteria*	Yes/No
Does the municipality have impact, outcome, input, output indicators?	Partially. Impact and outcome indicators are captured in the IDP strategic goals and objectives. Annually, the SDBIP includes input and output indicators
Does the IDP have priorities, objectives, KPIs, development strategies?	Yes
Does the IDP have multi-year targets?	Yes
Are the above aligned and can they calculate into a score?	Yes
Does the budget align directly to the KPIs in the strategic plan?	Yes
Do the IDP KPIs align to the Section 56 Managers	Yes
Do the IDP KPIs lead to functional area KPIs as per the SDBIP?	Yes
Do the IDP KPIs align with the provincial KPIs on the 12 Outcomes	Partially. Alignment is in respect of outcomes relevant to local government mandate
** Section 26 Municipal Systems Act 2000*	*T 2.5.1*

COMPONENT D: CORPORATE GOVERNANCE

OVERVIEW OF CORPORATE GOVERNANCE

Corporate governance broadly refers to the mechanisms, processes and relations by which institutions and corporations are controlled, managed and directed. Governance structures and principles identify the distribution of rights and responsibilities among different participants in an organization and includes the rules and procedures for making decisions in corporate affairs.

All the governance structures individually and collectively must cultivate characteristics such as integrity, competence, responsibility, accountability, fairness, transparency and exhibit them in their conduct to advance ethical leadership and corporate citizenship.

T 2.6.0

2.6 RISK MANAGEMENT

Chapter 2

RISK MANAGEMENT

In terms of the Municipal Finance Management Act (MFMA), Act No. 56 of 2003, section 62(1)(c) states that the Accounting Officer must ensure that the municipality has and maintains an effective, efficient, and transparent system of risk management. In compliance with this requirement, the Municipal Manager has appointed a Risk Management, Anti-Fraud and Anti-corruption Committee (RMAFACC) to advise the Municipality on risks that can affect the achievement of the strategic (IDP) and operational (SDBIP) objectives for the Municipality.

The Committee constitutes of section 56 senior managers that are directly accountable to the Municipal Manager. Furthermore, the RMAFACC is chaired by an external independent Chairperson. Meetings are convened every quarter, the reports compiled are submitted to the Municipal Manager, Audit Committee and Municipal Council with quarterly progress on risk, compliance, and fraud management. Moreover, Risk Champions are appointed as departmental representatives to assume the responsibility of assisting with the implementation of risk management, compliance, and fraud management activities in their respective departments. The Risk Champions hold monthly meetings, chaired by the Chief Risk Officer and report quarterly to the RMAFACC.

The following strategic risk documents were in place and approved by Council during the year under review:
Risk Management Policy
Risk Management Strategy
Risk Management Implementation Plan
Fraud Prevention Policy
Fraud Prevention Plan
Whistleblowing Policy
Private Work and Declaration of Interest Policy

Based on the constitutional mandate of the Municipality and the applicable regulatory requirements, the following risk registers were developed, implemented, monitored, and reported on to relevant oversight committees on a quarterly basis:
- Strategic Risk Register
- ICT Risk Register
- Fraud Risk Register

The Risk management process is comprehensive and meetings are held as per the approved schedule. The effectiveness of the RMAFACC is evaluated annually against predetermined objectives for risk management, noting that attempts are being made towards a more matured level as far as risk management best practices are concerned.

DRAFT

Chapter 2

For the year under review, the Municipality conducted its assessments with Departments from the 2nd to the 10th May 2024. The draft Strategic Risk register was tabled to Top Management Manco on the 3rd June 2024. It was also tabled at the RMAFACC on 19th July 2024 and presented to Audit Committee on 26th July 2024.

The following were the identified strategic risks:

SR 1: Failure to sustain the current infrastructure and to provide additional required infrastructure (Maximum risk)
SR 2: Failure to provide needs for basic social, health and security services to the community (Medium risk)
SR 3: Municipal information lost and being misused (Maximum risk)
SR 4: Unskilled and insufficient human resources to achieve the municipality's operational and strategic objectives (High risk)
SR 5: Increased informal settlement and failure to provide land for business & recreational needs of the community (High risk)
SR 6: Misalignment between national and provincial housing allocation guidelines ((High risk)
SR 7: Increased levels of unemployment (High risk)
SR 8: Disruptions of the IDP budget consultations (High risk)
SR 9: Governance failure resulting in non-compliance to laws, policies, standards, best practices, and maladministration practices (Medium risk)
SR 10: Natural / Manmade /epidemics Disasters are not anticipated and planned for by the municipality (High risk)
SR 11: Expenditure commitment exceed available revenue (Maximum risk)
SR 12: Insufficient collections from revenue streams (Maximum risk)
SR 13: Receiving unfavourable audit opinion from AGSA (High risk)
SR 14: Inefficient contract management (Medium risk)
SR 15: Property vandalised, misuse of fleet, loss of assets (Medium risk)

In addition, the ICT and Fraud risk registers were reviewed, implemented, and monitored on a regular basis for the year.

In reality, the process of managing risks is inseparable from that of managing for success and within this context it is therefore not surprising that risk management is a central part of any organization's performance improvement initiatives. The 2024/2025 strategic risk assessment revealed the following risk levels:

Risk Magnitude	No of Risk per Magnitude	Percentage

DRAFT

Maximum Risk	4	27%
High Risk	7	46%
Medium Risk	4	27%
Low Risk	0	0%
Minimum Risk	0	0%
Total number of risks	15	100%

The above graph depicts the magnitude of risks identified from the strategic risk assessment conducted. From the strategic objectives identified as contained in the Municipality's IDP, risks classified as maximum were at 27%, areas of high risk were at 46%, with 27% risks identified at medium and zero low and minimum risk magnitude. Maximum and high risks are unacceptable and cannot be tolerated, therefore, action needs to be taken to reduce their impact. Management prioritized all the risks, especially those falling within the unacceptable risk appetite of Lekwa Local Municipality. Quarterly Risk Management meetings were held to report on and deal with the implementation of risk mitigation strategies. For the year under review, the risk mitigation plan has adequately reduced the risks that were identified as maximum and high. Some risks relating to service delivery were not reduced, mainly due to budgetary constraints.

It must be noted that with the appointment of senior managers, the effective management and reporting on risk mitigation has improved. The RMAFCC chaired by an independent, external Chairperson managed to attend to risk matters. The Internal Audit Unit used its professional judgment when evaluating and auditing the systems of internal controls for identified risks to ensure that such

controls are effectively implemented, which also informed their three-year rolling risk-based internal audit plan.

T 2.6.1

2.7 ANTI-FRAUD AND ANTI-CORRUPTION

ANTI-FRAUD AND ANTI-CORRUPTION STRATEGY

The primary responsibility for preventing and detecting fraud rests with management and those charged with governance. The MFMA and its regulations clearly stipulate that matters such as incurring unauthorized, irregular as well as fruitless and wasteful expenditure; the possible abuse of the SCM system (including fraud and improper conduct); and allegations of financial misconduct should be investigated and that disciplinary steps should be taken based on the results of the investigations.

As part of the anti-fraud and anti-corruption plan, awareness, workshops were conducted on an ongoing basis as part of raising awareness among employees and Councillors on matters relating to fraud and corruption. The availability of the Fraud Hotline is also communicated for the public to also have an opportunity to report any fraud or corruption.

2.8 SUPPLY CHAIN MANAGEMENT

OVERVIEW SUPPLY CHAIN MANAGEMENT

In terms of MFMA section 110 – 119 and the SCM Regulations of 2005 and other relevant MFMA circulars, its sets out required processes and guidance manuals to help ensure that SCM arrangements provide appropriate goods and services, offer best value for money and minimize the opportunities for fraud and corruption. Section 217 of the Constitution and 112 of MFMA requires that a procurement system which is transparent ensures cost effectiveness equity, that must be competitive and fair.

The challenges in the supply chain management include broadly the high historical irregular expenditure that have not been concluded after the matter had been tabled to Council for further investigation. The Municipality had incurred R 771 490 on expenditure that were not in terms of the SCM policies and regulations and R 29 594 543 related to the appointment of service providers that did not have contracts in place or contracts that have expired. The total irregular expenditure as at 30 June 2023 amounted to R 703 559 931. The expenditure has been reported to Council and is awaiting its outcome after the matter had been delegated to a committee of Council, the Municipal Public Accounts Committee (MPAC) for further investigation.

Chapter 2

The Constitutional Court Judgement of the 16th February 2022 regarding the Preferential Procurement Regulations of 2017 had an adverse effect on the procurement process as some of the bids that were not responsive had to be readvertised. The Municipality could not proceed until such time that a request for exemption was approved in terms of PPFA 3 c and Section 2 (1) a, b and c and its regulations. This further delayed the implementation of some capital projects.

The Municipality introduced various systems to curb the increase in irregular expenditure. This includes but is not limited to the following:
1) Restructuring the Supply Chain Management Unit to be in line with the SCM Pillars
2) Introduction of Standard Operating Procedures (SoPs) and checklists to ensure adherence to SCM policies & Regulations
3) Establishment and appointment of Bid Committees in line with SCM Regulations
4) Introduction of Request for Quotes register
5) Introduction of contract management policy.

In respect of building capacity within the supply chain management unit, one official has enrolled for a SCM Higher Certificate with MANCOSA. In addition, Provincial Treasury has also committed to assist the municipality with training of BID Committee members including the SCM staff. It is also a requirement that SCM staff also on an annual basis complete financial disclosure forms.
The Municipality has developed Unauthorised Irregular Fruitless and Wasteful expenditure reduction strategy. The centralisation of the supply chain management function will further strengthen the managing of service providers as well as the procurement of goods and services.

T 2.8.1

2.9 BY-LAWS

By-laws Introduced during 2024/2025				
Developed	**Public Participation Conducted Prior to Adoption of By-Laws (Yes/No)**	**Dates of Public Participation**	**By-Laws Gazetted* (Yes/No)**	**Date of Publication**
Municipal by-law relating to streets, public places and prevention of noise nuisance	Yes	18-24 June 2025	No	
Integrated Waste Management by-law	Yes	18-24 June 2025	No	
Integrated Waste Management Plan	Yes	18-24 June 2025	No	
Fire & Rescue by-law	Yes	18-24 June	No	

		2025		
Traffic by-law	Yes	18-24 June 2025	No	

**Note: See MSA section 13.* *T 2.9.1*

COMMENT ON BY-LAWS:

In line with section 11 (3) of the Municipal Systems Act 2000, municipal councils are given the legislative authority to pass and implement by-laws for the betterment of the community within the terms of the legislation. The Municipality has developed various by-laws with a view to regulate and administer all affairs in the Municipality.

T 2.9.1.1

2.10 WEBSITES

Public-private partnership agreements referred to in section 120 done during 2024/2025	N/A	N/A
All quarterly reports tabled in the council in terms of section 52 (d) during 2024/2025	Yes	Quarterly
Note: MFMA s75 sets out the information that a municipality must include in its website as detailed above. Municipalities are, of course encouraged to use their websites more extensively than this to keep their community and stakeholders abreast of service delivery arrangements and municipal developments.		

DRAFT

COMMENT MUNICIPAL WEBSITE CONTENT AND ACCESS:

The Municipality website has its own website as contemplated in section 21(b) of the Municipal Systems Act and all the documents mentioned in the table above have been uploaded on the website as directed by the Municipal Systems Act as well as the Municipal Finance Management Act.

The official website can be accessed on www.lekwalm.gov.za.

T 2.10.1.1

2.11 PUBLIC SATISFACTION ON MUNICIPAL SERVICES

PUBLIC SATISFACTION LEVELS

Public satisfaction surveys have not been conducted as a means to monitor the level of service provision by the Municipality to its communities. It must however be noted that over the past year, complaints and negative publicity received via the local newspaper, the Lekwa Facebook page and other social media platforms, it is evident that communities are dissatisfied with the level of services rendered. In order to ensure that the various service departments render effective and efficient services to the communities, Ward Committees through their ward operational plans, remain in touch with issues on the ground and with current community participation programmes further strengthening it. Interactions with communities through the Mayoral Izimbizo programme was resuscitated and both Ward Committees and Community Development Workers and community interactions has been ongoing.

T 2.11.1

COMMENT OF SATISFACTION SURVEYS

To support service delivery and promotion of access to our communities, the Municipality has procured the services of MUNSOFT which is responsible for deployment of Document Management System which contain various modules which includes amongst others the Customer Care System. Training has been conducted to the Supervisors at Technical Services including the frontline staff at Call-Centre which operates 24/7. In the spirit of co-operative governance, COGSTA has made a commitment to assist Municipalities in Mpumalanga in conducting community satisfaction surveys through the use of the GOVCHAT(iLivi Lemphakatsi Provincial Application) which is the complaints management tool designed to improve access and enhance service delivery. The Application contains functions to conduct the survey once the awareness campaigns are finalized, Provincial COGHSTA will provide support to Municipalities to automate and customize their surveys. The application can be downloaded on any cellphone network.

T 2.11.2.1

COMMENT ON PUBLIC SATISFACTION LEVELS:

The Municipal Service Standards and Charter as well as the Customer Care Policy is in the process of being reviewed, and to be finalized in the 2025/2026 financial year. In order to create a platform where communities can voice their suggestions and complaints, suggestion boxes have been procured and placed at strategic points throughout the municipality and are e utilized for receiving suggestion and complaints from our consumers. Upon receipt they are then dispatched promptly to the relevant Departments and daily monitor their speedy resolution and provide feedback to customers.

T 2.11.2.2

DRAFT

Chapter 3

CHAPTER 3 – SERVICE DELIVERY PERFORMANCE (PERFORMANCE REPORT PART I)

INTRODUCTION

The population of Lekwa has increased from 115 268 in 2011 to 140 970, according to StatsSA as further outlined in the Socio-Economic Review Outlook (SERO) report. It also indicates a decrease in informal settlement dwellings from 23.9% (7 414 in 2011) to 19.1% (7 129 in 2016). Noting the following levels of basic service provision for households, it is a clear indication that with the growing population, services must be upgraded and maintained commensurate with the said growth rate.

Proportion of Households with minimum level of Basic services

Service Delivery Area	2021/2022	2022/2023	2023/2024	2024/2025
Electricity service connections	91%	91%	93,8%	93,8%
Water - available within 200 m from dwelling	90%	94%	96%	93,7%
Sanitation - Households with at least VIP service	87%	87%	97%	97%
Waste collection - kerbside collection once a week	69%	69%	65,8%	77,7%

The challenges faced by the Municipality in respect of continuous, uninterrupted supply of water, electricity and refuse collection has been compounded by the current population growth and the further deterioration of infrastructure, without the commensurate regular repairs and maintenance being undertaken. With a clear mandate to focus on the priority areas of water, sanitation and electricity provision, the focus remained on trying to improve the provision of these services.
The following capital projects were completed in the year under review in order to address some of the basic service delivery challenges:

- Refurbishment of Standerton Water Treatment Plant
- Construction of Kieser Reservoir
- Installation of boreholes
- Refurbishment of boreholes
- Water Conservation and Demand Management Project

DRAFT

Chapter 3

This Chapter provides information per department and functional service delivery areas ranging from roads and transport, local economic development, town planning, human settlements, solid waste management, environmental health, safety and security and emergency services. A brief reference to service delivery performance in respect of the largest capital projects undertaken is included in **Appendix E**.
Critical to effective and sustainable service delivery is the need for a capacitated and skilled work force. With critical skills gaps having been identified, the workplace skills plan and relevant training programmes will be critical to deal with staff and skills shortages.

T 3.0.1

COMPONENT A: BASIC SERVICES

This component includes: water; waste water (sanitation); electricity; waste management; and housing services; and a summary of free basic services.

INTRODUCTION TO BASIC SERVICES

The 2024/2025 financial year continued to focus attention attending to service delivery challenges relating to infrastructure refurbishment and upgrade, by undertaking capital projects relating to water, sanitation, and electricity. It must however be noted that it included the conclusion of projects that were commenced in the 2023/2024 financial year.

The continued pressure on existing infrastructure as most of the bulk infrastructure is functioning at beyond its maximum capacity due to the expansion of especially residential developments without the commensurate upgrade and regular maintenance of existing infrastructure over the past few years, has placed additional strain on the infrastructure capacity.

The policy objectives as outlined in Chapter 3 is based on the service delivery targets set for the 2024/2025 financial year, in line with the approved SDBIP. The information as outlined, provide additional operational information as well as information that is in line with information contained in the chapter and Component K on organisational performance Report, in line with the Annual Performance Report (APR) which was prepared in terms of section 46 of the MSA, and submitted to the Auditor-General for auditing. Full details on the audited APR, is contained under Component K.
The Municipality does not have any entities under its management and a full list of functions of the Municipality are included in **Appendix C**.

T 3.1.0

DRAFT

Chapter 3

3.1. WATER PROVISION

INTRODUCTION TO WATER PROVISION

The Municipality has identified and implemented the projects of the refurbishment of the Standerton and Morgenzon Water Treatment Plants in order to improve water supply to the community.

The following is the current status in respect of the water treatment plants within Lekwa:

AREA	STANDERTON AND SAKHILE	MORGENZON AND SIVUKILE
WATER DEMAND	45ML/day	3.9 ML/day
PREVIOUS DESIGN CAPACITY	37 ML/day	2.2ML/day
CURRENT DESIGN CAPACITY	37ML/day	2.2 ML/day
EXCESS/DEFICIT	Deficit of 5 ML/day	Deficit of 1.7ML/day

The following challenges has been identified in respect of water supply:

* Inconsistent water supply to high lying areas of Sivukile, Sakhile, Standerton Extensions 6, 7 and 8;
* The existing configuration of the Standerton water supply system is affecting the efficient and equitable supply of water due to low pressure in supplyinhigh lying areas.
* The bulk pumping mains from the Standerton Water Treatment Works to the 3 reservoirs are connected directly to the water reticulation network which supplies Standerton town areas resulting in the reservoirs not filling up during peak periods of sufficient water supply from the water treatment works. Newer areas which are connected to the reservoirs and are only supplied from the reservoirs do not always get water during peak periods and when the reservoirs are low.
* During the 2023/2024 financial year, the following water services related project was implemented:
  - Construction of Kieser Reservoir
  - Water Conservation and Demand Management Project
  - Refurbishment/Installation of boreholes in rural/farm areas in Lekwa

The backlog on a constant supply of piped water in the rural wards 9, 12, and 13 remains and continues to be serviced through water tankers. The Municipality is a Water Services Authority and it did not have contracts with any water services providers during the 2023/2024 financial year. The Municipality depends on grants for the refurbishment and upgrade of water services and funds are insufficient to adequately address all such backlogs.

The water demand of the Municipality is higher than the design capacity of the Standerton Water Treatment Plant. As a mitigation measure Goldi has applied and has been granted a water use license which will enable them to abstract water from the Vaal River. This will then ease the water demand from the Standerton Water Treatment Plant. The Municipality has been delivering water to the community in the high lying areas, informal settlements rural which do not have access to water utilising six water trucks. The Municipality through the assisstance of GSDM and DWS has commenced the upgrade of the Standerton Water Treatment Plants and related bulk infrastructure in

order to address the water supply challenges. The Municipality also undertook the refurbishment of boreholes in the rural wards.

T3.1.1

Total Use of Water		
	Rand Value	Unaccounted water losses
2022/2023	37, 409, 075	69%
2023/2024	8, 866, 240	45%
2024/2025	19,520,000	

T 3.1.2

COMMENT ON WATER USE:

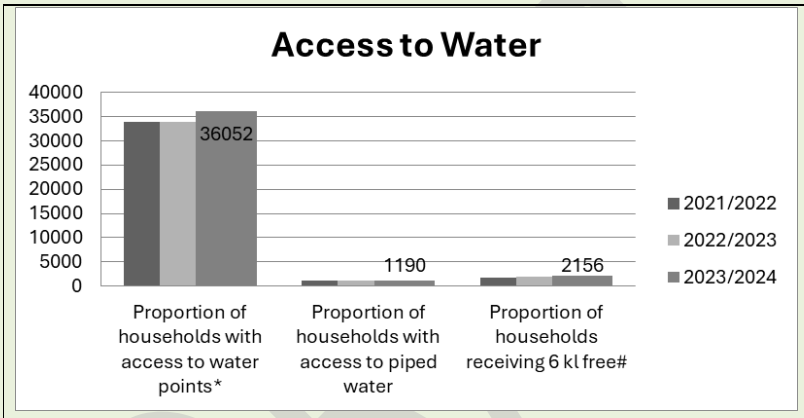

The extent of water losses are significant, noting the aging water infrastructure and insufficient maintenance of such infrastructure which has a direct impact on the increase in both technical and non-technical water losses. Another contributing factor is the supply of water through water tankers. The water tankers obtains water from municipal water sources, which forms part of indirect water losses.

T 3.1.2.2

Water Service Delivery Levels				Households
Description	2020/2021	2021/2022	2022/2023	2024/2025

DRAFT

Chapter 3

COMMENT ON WATER SERVICES PERFORMANCE OVERALL:

The backlog remains on the supply of piped water in the informal. rural wards 9, 12, and 13 and sufficient budget was not available to address all backlogs, however there is an ongoing programme for the refurbishment of boreholes, other rural areas are also provided with water on an ongoing basis using water tankers.
The Municipality is the Water Services Authority, and it did not have contracts with any water services providers during 2023/24. The Municipality depends on grants for the extension and provision of water services, but such funds are not adequate in addressing all backlogs and the complete refurbishment of existing water infrastructure.

T 3.1.10

3.2 WASTE WATER (SANITATION) PROVISION

INTRODUCTION TO SANITATION PROVISION

Providing adequate sanitation facilities remains one of the major challenges towards basic service delivery, especially among poor and rural communities. Households that do not have access to adequate sanitation facilities may be using a bucket system or unimproved pit toilets. In addition, poorly designed or operated water-borne sewerage systems, especially in urban areas, if it fails or if it is inadequate, impacts on the health of communities. The negative impact on the environment can also be extremely serious, especially when raw sewage begins to spill into rivers and streams. Concerted efforts have been made to address these challenges as it can adversely affect communities and the environment at large. The provision of a basic level of household sanitation to mainly rural communities and informal settlements, as areas with the greatest need must be attended to and requires an environmentally sound approach to providing sanitation services and addressing the need to protect surface and ground water resources from sanitation pollution through integrated environmental management practices. Inadequate sanitation facilities and infrastructure combined with unhygienic practices represent South Africa's sanitation problem that must be addressed.
In addressing these challenges, the following sanitation projects were undertaken during the 2023/2024 financial year:
- 100 VIP toilets installed
- Refurbishment of Johan, Steijn and Rooikppen sewer pump stations

COMMENT ON SANITATION SERVICES PERFORMANCE OVERALL:

Challenges relating to efficient sanitation service delivery can be addressed by means of the following strategic interventions:

- facilitating the participation of communities to be fully involved in projects that relate to their health and well being;
- promoting health and hygiene awareness and practices;
- development and use of local resources
- upgrading of existing facilities
- adopting an integrated environmental management approach;
- developing a common approach to implementation; and
- undertaking specific programmes to clear the backlog.

The projects as implemented during the 2023/2024 financial year has not dealt with the extent of the backlogs, but has been critical towards beginning to address these challenges. Understanding that sanitation provides dignity to human life, will also require that more sustainable solutions to sanitation services be considered, especially within rural areas, where septic tanks should be considered in future instead of the current VIP toilet systems.

T 3.2.10

COMMENT ON SANITATION SERVICES PERFORMANCE OVERALL:

Challenges relating to efficient sanitation service delivery can be addressed by means of the following strategic interventions:

* facilitating the participation of communities to be fully involved in projects that relate to their health and well being;
* promoting health and hygiene awareness and practices;
* development and use of local resources
* upgrading of existing facilities
* adopting an integrated environmental management approach;
* developing a common approach to implementation; and
* undertaking specific programmes to clear the backlog.

DRAFT

The projects as implemented during the 2023/2024 financial year has not dealt with the extent of the backlogs, but has been critical towards to address these challenges, noting the intervention by the Department of Water and Sanitation.

T 3.2.10

3.3 ELECTRICITY

INTRODUCTION TO ELECTRICITY

The Notified Maximum Demand (NMD) remains a challenge within the Municipality, which means that once the 55MVA maximum has been exceeded during any period, Eskom imposes penalties. The upgrading of the existing electricity network is a major priority since the network is ageing. The major challenges are distribution losses, illegal connections, meter bridging, breakdowns, service interruptions and limited capacity with the increased electricity demand. The upgrading of the entire electricity network still requires attention, noting especially the potential that it has to attract investors if consistent electricity supply can be provided.

COMMENT ON ELECTRICITY SERVICES PERFORMANCE OVERALL:

The capital project implemented was the phase 1 upgrade of A sub. Managing Eskom loadshedding received attention through the ongoing engagement with Eskom regarding the application on increased NMD.

T 3.3.9

3.4 WASTE MANAGEMENT (THIS SECTION TO INCLUDE: REFUSE COLLECTIONS, WASTE DISPOSAL, STREET CLEANING AND RECYCLING)

INTRODUCTION TO WASTE MANAGEMENT

The waste management division renders waste management services within the municipality. The services rendered are waste collection (household and business), street cleaning, maintenance and operation of landfill sites, and clearing illegal dumping spots. Waste is collected in ten (10) wards, and the remaining three wards do not have the service due to insufficient resources.

Waste collection is divided into six zones: five zones for residential areas and one zone for businesses.
According to the 2022 census, Lekwa municipality has 38583 households, of which 31320 have access to the weekly waste collection schedule. Due to insufficient resources, waste is collected on weekends to provide residents equal access to services. Currently, the municipality has six waste collection trucks, which are insufficient to cover all areas during the week and extend the service to unserviced areas. Rural areas have no access to waste collection services.

On a daily basis, street-cleaning services are rendered within the Central Business District (CBD), open spaces and main entrances/exits through town. Due to resource and capacity constraints, street-cleaning services cannot currently be extended to all areas within Lekwa. The Community Works programme has also been utilised to clean identified areas.

The municipality has two landfill sites: Standerton, which is operational, and Morgenzon, which is closed and due for rehabilitation.

The following are critical challenges faced by the solid waste management division:

- Insufficient personnel in respect of solid waste management and street cleaning services;

- Inaccessibility of roads by refuse collection vehicles due to bad road conditions especially during rainy season;
- Refuse vehicles being used excessively due to limited number of vehicles, which shortens the lifespan of the vehicles, yet vehicles are insufficient to render services in all areas;
- The municipality is operating with six refuse collection trucks, while eleven refuse trucks are required to service all registered households and businesses.
- The extending of waste management services has not been realised due to limited resources;
- Littering and illegal dumping in all sections of Lekwa remains a challenge as the result of inconsistence waste removal;

COMMENT ON WASTE MANGEMENT SERVICE PERFORMANCE OVERALL:

The upgrading of the Standerton landfill site has been completed. The following were part of the upgrading scope:
1.Installation of 4221 metres clear view fence, access control, two high mast lights with solar panels for alternative energy
2.Construction of office block and ablution facilities
3.Supply and installation of 30-ton weighbridge
4.Drilling and equipping of two boreholes

T 3.4.10

3.5 HOUSING

INTRODUCTION TO HOUSING

The need for integrated residential housing programmes is evident in the ever-increasing number of informal settlements mushrooming especially along the periphery of Lekwa's residential areas within Sakhile and its extensions.

DRAFT

There is also still a noticeable increase in the number of residents who are in need of serviced residential stands. The need to acquire residential properties is in order to build houses for their families. There are also residents who fall within what is often referred to as the "gap housing market". These are residents who do not qualify to receive low-cost government subsidised houses (RDP) and often find it difficult to receive housing finance from financial institutions. The municipality has requested the Department of Human Settlements to service 500 residential stands in Standerton Ext.8 which some of them can be made available to people who may want to build houses for their families.

The Mpumalanga Department of Human Settlements did not allocate any new projects to the municipality in both 2022/2023 and 2023/2024. Nevertheless, the municipality has indicated to the department that housing units for the 109 approved beneficiaries are still outstanding. These are beneficiaries who have been waiting for their houses since 2018. Also outstanding are 200 free standing housing units which must be built for 200 beneficiaries who are residing in the flats at Standerton Ext.8.

A request by the municipality in November 2020, was honoured by the Department of Human Settlement in August 2021, to move 163 housing subsidies from the project of 500 units in Standerton Ext 8 to an in-situ project, due to the unavailability of serviced sites, with 163 beneficiaries approved thus far. The 163 in-situ units plus the 109 of Standerton Extension 8 remains incomplete.

The following are projects that were still in progress during the 2023/2024 financial year:

a) The upgrading of informal settlements programme (UISP) which afford communities housing development in places where they already reside (in situ development). The project for the 200 housing units as well as the newly allocated 163 housing units fall under this programme.

b) Community Hall Project in Standerton Ext.8
Messrs Prodipix 212 JV Mrazane Pumzi Trading were appointed by the Department of Human Settlements (DoHS) to implement this project in September 2019. This project should have been completed in February 2021. This project has come to a halt several times due to cash flow constraints experienced by the contractor which has hampered progress on the completion of the project. At a meeting held on 2022-02-15 convened on site by the DoHS and the Project Managers the services of the contractor were terminated. According to the information given by the Department of Human Settlements, the tender for the project was re-advertised in September 2023.

c) 200 Housing Units Project
Messrs TGI (Pty) Ltd were appointed by the DoHS to implement this project. 189 housing units spread across 10 wards have been completed with beneficiaries having taken occupation of their houses. This project was implemented in the townships of Sakhile, Azalea, Standerton Extensions 6 and 7 and Sivukile. In February 2022 the DoHS informed the contractor about its intention to terminate its

appointment in respect of this project in view of its failure to complete the outstanding 10 housing units. The project was to be continued with, once DoHS gave written confirmation that the remaining units will be built with the new subsidy quantum as well as the availability of budget to build all the housing units allocated to it including the 163 housing units. To date, under this project, 4 houses in Morgenzon, 1 in Standerton Ext 6, 1 in Standerton Ext 7 and 2 in Sakhile have not yet been constructed and the 2 that were previously at roofing stage in Sakhile have been completed.

d) 163 housing units project
This allocation is the remainder from the 500 that was allocated for Extension 8, with 391 approved for Extension 8 and the 163 was moved to in-situ. Potential beneficiaries extracted from the pool of the National Housing Needs Register (NHNR) were prioritised for this project. However, it subsequently transpired that most of these beneficiaries have actually built their own houses and therefore are no longer in need of RDP houses. This meant that more beneficiaries had to be extracted from the pool. 163 beneficiaries have been approved to receive housing units under this project. The contractor has commenced with construction work but moving in a very slow pace.

e) 60 Community Residential Units
This project is at a halt currently following the invasion of the incomplete units by illegal dwellers which took place in 2020. In 2021 the DoHS appointed a firm of attorneys to undertake the task of obtaining an eviction order to have the illegal dwellers evicted from the units. The Divisional Manager: Human Settlements was requested by the lawyers to depose to a confirmatory affidavit concerning to the facts that led to the illegal occupation of the units. The matter is being litigated by the parties.

f) Transfer of ownership of RDP houses in Standerton Ext.8
The ownership of 389 RDP houses built in Standerton Ext.8 was successfully concluded with their title deeds being handed over. 186 title deeds have since been applied for and collected by the conveyancer for registration with the deed's office.

The need for integrated residential housing programmes is evident from the ever-increasing mushrooming of informal settlements, especially along the periphery of Lekwa's residential areas within Sakhile and its extensions.

There is also still a noticeable increase in the number of residents who are in need of serviced residential stands. The need to acquire residential properties for individual development. There are also residents who fall within what is often referred to as the "gap housing market". These are residents who do not qualify to receive low cost government subsidised houses (RDP) and often find it difficult to receive housing finance from financial institutions. The municipality has requested the Department of Human Settlements to service 500 residential stands in Standerton Ext.8 which can also be made available for this purpose.

*Totals should equate to those included in the Chapter 4 total employee schedule. Employees and Posts numbers are as at 30 June. *Posts must be established and funded in the approved budget or adjustments budget. Full-time equivalents are calculated by taking the total number of working days lost (excluding weekends and public holidays) while a post remains vacant and adding together all such days lost by all posts within the same set (e.g. 'senior management') then dividing that total by 250 to give the number of posts equivalent to the accumulated days.* *T 3.5.4*

COMMENT ON THE PERFORMANCE OF THE HOUSING SERVICE OVERALL:

The mandate in respect of the delivery of houses resides with the National and Provincial departments of Human Settlements, while the Municipality only plays a facilitating role by making land available and identifying potential beneficiaries as well as to ensure that necessary infrastructure is installed. The township of Standerton Ext.8 is facing a myriad of challenges. In as much the 1650 housing units that have been built are appreciated since they have provided a secured accommodation to 1650 families, the issue of the shoddy infrastructure and workmanship has become a blight to these projects. The inadequate water supply as well as sewer spillages are negatively affecting the residents. This is coupled with the unstable electricity supply due to inadequate electrical infrastructure.

Great effort has gone into ensuring that some of these matters are attended to. The Mpumalanga Department of Human Settlements has erected two sewer pumping units in this township. This will go a long way in alleviating the sanitation challenges. The Department of Energy has, through the INEP electrified all the RDP housing units in Standerton Ext.8. A switching station has also been erected.

The above gives hope that indeed a genuine effort is being made to attend to the matters that are of serious concern to the residents of this township.

T 3.5.7

Chapter 3

3.6 FREE BASIC SERVICES AND INDIGENT SUPPORT

INTRODUCTION TO FREE BASIC SERVICES AND INDIGENT SUPPORT

Due to the level of unemployment and resultant inequality and high levels of poverty within the municipal area, there are households that are unable to pay for their municipal services. The Municipality therefore adopted an indigent management policy to ensure that these households have access to at least a basic level of municipal services. For the 2023/2024 financial year, 2156 households registered for indigent support. The Municipality held public awareness campaigns to encourage consumers to register for indigent support.

Qualifying indigent households with an earning threshold capped at R4400 per month was eligible to apply and qualify for an indigent subsidy that is funded for the equitable share as provided and allocated through the annual Division of Revenue Act (DORA).

An indigent household is defined, as a household where the total combined monthly household income does not exceed a predetermined amount per month, equivalent to two old age pensions' income. This is determined annually for pensioners by the Department of Social Development. The allowance for free usage of electricity services is limited to 50 kilowatt unit hours per month and for water services of 6 kilolitres per month. Such qualifying indigent households must also have at least a 20 ampere circuit breaker with pre-paid electricity metering installed.
T 3.6.1

2023/2024	48 108	48 108	2 156	4%	2 156	4%	2 156	4%	2 156	4%

T 3.6.3

COMMENT ON FREE BASIC SERVICES AND INDIGENT SUPPORT

The Municipality provide basic services to indigent household within the municipal area. The total quantum for qualification for indigent support is R4400 total gross per household income per month. This is based on 50 KWA free electricity per month, 6 kilolitres free water per month. A rebate on the basic charge for refuse removal, sewerage and assessment rates per household, at the applicable rate per month is granted to qualifying and approved households.

There has been an increase in the number of registered indigents, but efforts will be stepped redoubled to increase the indigent registration process, considering the dire statistics of the unemployment and inequality rates within the Municipality. The indigent grant is a means to assist communities and consumers who cannot afford to pay for their municipal services, subsidised from the equitable share allocation.

T 3.6.6

COMPONENT B: ROAD TRANSPORT

This component includes: roads; transport; and waste water (stormwater drainage).

INTRODUCTION TO ROAD TRANSPORT

Urban road transport infrastructure is facing many problems in South Africa. The Government acknowledges the challenges facing road transport and infrastructure. To this end, the drafting of new policy is underway which will eliminate or at least alleviate many of the problems being experienced. The Land Transport Act of 2000, the Land Transport Bill of 2008 and the 3 “way win” Strategy of 2006 which saw all three spheres of government working together to improve road infrastructure. Currently the South African Department of Transport is drawing up a National Transport Master Plan (NATMAP) intended to guide government policy up to 2050, some of the issues to be addressed by NATMAP includes the development of suitable facilities and road infrastructure to facilitate efficient transport services.

T 3.7

3.7 ROADS

INTRODUCTION TO ROADS

Implementation of the Pavement Management System for maintenance and upgrading of streets, and through the intervention of Gert Sibande District Municipality on the development of RAMS "Road Asset Management System", indicates that the Municipality has 422.9km of roads of which 237.6km is gravel and 157.7km paved or asphalt. The Municipality strives to eliminate all gravel roads, although with the assistance from other sectors department, such as Public Works Roads and Transport (DPWR&T) and SANRAL, main arterial roads were upgraded. This includes the Secunda (R546), Bethal Rd (R39), and the Standerton to Leandra (R50) road, including the R23 towards Greylingstad and Volkstrust. This will improve accessibility and drivability of these major routes through Standerton. The routes function as urban connectors for the various national roads passing through Standerton town. The scope of work entails repair and resurfacing of the existing pavement to restore the streets' structural and functional condition. With SANRAL's assistance, existing tar roads were resheeted, which involved removing the top layer of the existing tar road and replacing it with a new asphalt layer. It is a more intensive process than re-tarring because it ensures a completely new surface is laid down. This is done when the road has more significant wear and tear, but the base layer is still intact, which has extended the lifespan of the roads. Maintenance was done on the following road sections:

- Beyers Naude Street
- R546 (Walter Sisulu Drive)
- Krogh Street
- R546 (Vrede)
- R50 (Viljoen Road)
- R39 (Viljoen Road
- R38 (R39 intersection)

Although the Municipality is faced with many challenges on road maintenance due to budget constraints, ageing road infrastructure, an obsolete road maintenance fleet and constrained human resource capacity as vacant positions are not being filled. The Municipality undertook maintenance and blading of roads, assisted by the Gert Sibande District for pothole patching.

Total project value represents the estimated cost of the project on approval by council (including past and future expenditure as appropriate. *T 3.7.9*

COMMENT ON THE PERFORMANCE OF ROADS OVERALL:

Due to budgetary constraints and the reprioritisation of water and sanitation projects, the Municipality could not sufficiently maintain its roads infrastructure. This is evident in the gradual decline in spending on road infrastructure over the past years. With the assistance of GSDM, road surface maintenance with their pothole patching programme continued. With SANRAL's assistance, existing tar roads were resheeted, which involved removing the top layer of the existing tar road and replacing it with a new asphalt layer. It is a more intensive process than re-tarring because it ensures a completely new surface is laid down. This is done when the road has more significant wear and tear, but the base layer is still intact, which has extended the lifespan of the roads.

T 3.7.10

3.8 TRANSPORT (INCLUDING VEHICLE LICENSING & PUBLIC BUS OPERATION)

INTRODUCTION TO LICENSING AND TRANSPORT

The Licensing section's main functions previously included the registering and licensing of vehicles and drivers for the purpose of maintaining order and legality on the road and to promote road safety in general. The section has been faced with challenges which include the following:

With the revenue generated from licensing not being paid over by the Municipality on a 20:80 basis to the Department of Safety, Security and Liaison as per the MoU, the service reverted back to the Department during the 2017/2018 financial year. This was preceded by extensive engagements at both provincial and municipal level. The Department is currently operating from the municipal premises and certain employees opted to be transferred whilst others preferred to remain with the Municipality and were accordingly placed.

With the service being transferred, no services under the component was rendered.

T 3.8.1

COMMENT ON THE PERFORMANCE OF TRANSPORT OVERALL:

For the year under review, no capital projects were undertaken in respect of licensing and road transport as this activity was handed over to the Provincial Department. With the service having reverted back to the Department of Security, Safety and Liaison, the Municipality will no longer be reporting in respect of this component.

T 3.8.7

DRAFT

3.9 WASTE WATER (STORMWATER DRAINAGE)

INTRODUCTION TO STORMWATER DRAINAGE

The implementation of the Municipality's Stormwater Master Plan by upgrading all natural streams and wetlands and maintenance of 170km of stormwater structures including catch pits has been hindered as a result of budgetary constraints the Municipality is facing, thus it is unable to meet its targets on the implementation of the Stormwater Master Plan.

Chapter 3

COMMENT ON THE PERFORMANCE OF STORMWATER DRAINAGE OVERALL:

No capital funding was directed for upgrading of storm water structures in the 2023/2024 financial year and only operational activities were implemented which included the maintenance and cleaning of stormwater channels with the assistance of the Community Works Programme initiative.

T3.9.9

COMPONENT C: PLANNING AND DEVELOPMENT

INTRODUCTION TO PLANNING AND DEVELOPMENT

The Town Planning, building regulation and enforcement unit deals with all matters relating to improved spatial planning. There were no major service delivery priorities undertaken for the year under review.

The Land & Planning Department deliver the following services to the community:

•**Building Control and Regulation** – All building plans are submitted to the unit and circulated to the Town Planning Unit & Fire Department. If compliant with the National Building Regulations & Land Use Scheme & Fire Regulations, it is approved by the Head of the Department. Regular inspections are carried out on all construction sites and where there are contraventions, the necessary letters are issued. The control over the Built environment, record keeping and inspections on construction sites is an ongoing key activity within the unit.

•**Outdoor Advertising** – All outdoor advertising is managed by this department. This includes temporary advertising signs such as auctions and real estate boards. All other outdoor advertising has been contracted out on a 3 year basis

Geomatics – This section deals with issues of land encroachment and the identification of stand boundaries as per the relevant Surveyor-General diagrams. Stands are re-pegged where required to avoid boundary disputes.

•**GIS -** This Department is also responsible for the Geographic Information System (GIS) which is the custodian of all the municipalities spatial data.

T 3.10

3.10 PLANNING

INTRODUCTION TO PLANNING

INTRODUCTION TO PLANNING AND DEVELOPMENT

The Town Planning unit together with Land and Planning Unit deals with all matters concerning Spatial Planning and land use Management.

The Town Planning Unit and the Land and Planning Unit delivers the Following Services to the community.

- **Building Control and Regulation** – All building plans are submitted to the unit and if compliant with the National Building Regulations, it is approved. Regular inspections are carried out on all construction sites and where there are contraventions, necessary letters are issued. Building plans and inspections on construction sites is an ongoing key activity within the unit.
- **Town Planning –** The Town Planning unit is responsible for the implementation of the SDF in and ensuring compliance of the land use scheme to realise the municipal spatial vision. This includes all land use changes and transgressions as well as the enforcement thereof. The unit also guides current and future development in Lekwa through the SDF in line with the National Development Plan SPLUMA. Currently a moratorium has been placed by council on land use change/ Rezoning applications that may have an impact on bulk infrastructure
- **Geomatics** – This section deals with issues of land encroachment and the identification of stand boundaries as per the relevant Surveyor-General diagrams and stands are repegged where required to avoid boundary disputes.
- **Geographic Information Systems** (GIS)- this function provides geographic data in terms of locations/space and tools used to analyse and visualise spatial data. The function was established recently and thus requires capacity.

COMMENT ON THE PERFORMANCE OF PHYSICAL PLANNING OVERALL:

With the ever-increasing demand for land required for both residential, commercial and mixed used residential development, there has been a dramatic increase over the last few years. The densification of urban areas has put a strain on available bulk infrastructure supply and this must be balanced against the investment and local economic growth opportunities that can be created through such developments. With the Spatial Development Framework in place and with the Land Use Management System, the future spatial planning and integrated development planning will see much more integrated well-structured development nodes.
Since the Lekwa SDF was adopted. Spatial Planning and Land Use Management Act (SPLUMA), the following actions listed in the Implementation Framework has been achieved:
1) Approval of SDF
2) The SDF was incorporated into the Lekwa IDP
3) A Land Use Management System has been compiled by National Government and was adopted in November 2020
4) Council has introduced a Performance Management System as required by the Municipal Systems Act of 2000
5) Standerton Extension 8 was established and will be the first mixed income housing development in Lekwa.
6) The following by-laws are in draft format and has been distributed for comments: Open Space Plan, Urban Edge Policy and Encroachment Policy
7) In line with SPLUMA, a Spatial Planning and Land Use Management by-law was developed and adopted by Council
8) At district level, a Joint Municipal Planning Tribunal (JMPT) has been established to deal with the land use and development applications classified under Category B in terms of SPLUMA
9) The Municipality conducted a Land Audit to guide Council regarding the alienation of properties under the area of jurisdiction within Lekwa.

The following are challenges faced by the unit:
1) The enforcement of the Town Planning Scheme, National Building Regulations and dealing with such related transgressions are not effective. This is mainly due to the minimal fines that are currently in place that may be imposed. It is suggested that the penalties for transgressions be of such a magnitude that it will discourage anyone from not complying with all legislation. The said penalties were approved by Council

2) Council informed the public, in the past via the local papers, regarding all legislation related to building control and land uses. This exercise of educating the community should be done on a regular basis.
3) Town Planning and Land & Planning unit should also be in equipped with of a "Law Enforcement Officers"/ land use inspectors accreditation status to assist them with their daily duties to deal with transgressions.
4) The fact that this Department is not prioritised when capital funds are allocated via the budget makes it impossible to address issues mentioned in the implementation framework of the Lekwa SDF.
5) Currently the Municipality does not have a fully functional GIS in operation. It is currently being addressed via the SLA between Council and the Gert Sibande District Municipality. The position of GIS Operator has been vacant for a number of years and was filled in April 2020.
6) With the implementation of SPLUMA and the wall-to-wall land use scheme for Lekwa, the need of land use inspectors will become critical. There is some improvement with the capacitating the unit. A fully function has enabled the unit to attend to land use management as well as to reduce illegal land invasions and pressure on overloaded infrastructure.
7) There is a huge demand for stands for Residential, Business and Church stands.

3.11 LOCAL ECONOMIC DEVELOPMENT (INCLUDING TOURISM AND MARKET PLACES)

INTRODUCTION TO ECONOMIC DEVELOPMENT

Local Economic Development (LED) within Municipality, is established to fulfil the constitutional as required by section 152 (c) of the constitution of Republic of South Africa Act 108 of 1996, this section compels Local Government to promote Social and economic development, The Municipality is expect to create a conducive environment for economic Growth. The Collaboration between Lekwa and other social Partners had made a difference in creating a conducive environment, however it worth mentioning that a lot need to be done in order attract new investment and support the existing investors to support Local economic Growth.

T 3.11.1

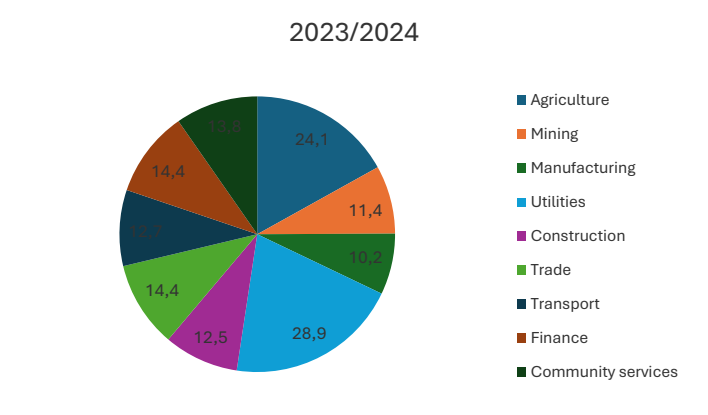

Census 2011		**Community survey by Stats SA 2016**	
Poverty Headcount	Intensity of Poverty	Poverty Headcount	Intensity of Poverty
4,5%	41,5%	5,0%	42,8%

Transport	12.1%	12.7%
Finance	14.1%	14.4%
Community services	13.3%	13.8%

Chapter 3

The municipality's dominant contributions to Gert Sibande's economy includes utilities (28.9%) (mainly electricity), & agriculture industries (24.1%), with substantial contributions to finance (14.4%), trade (14.1%), & community services (13.8%).

- Lekwa holds comparative advantages in agriculture, mining, and utilities

COMMENT ON LOCAL JOB OPPORTUNITIES

Unemployment remains a serious concern for South Africa as a whole as well as for Lekwa Municipality, creation of job opportunities is a priority for the Municipality and all other social partners, the Municipality had facilitated creation of job opportunities, the construction of R23 road within Lekwa contribute on job creation, the implementation of Community Works project (CWP) and Siyathuthuka Project also made an impact on job creation for the community of Lekwa.

In 2021, 25.7% of the employed worked in the trade industry. According to Stats SA, the trade industry comprises of wholesale, motor, accommodation, food, and beverages (i.e., restaurants and catering),

and retail. This means that most economic activity within the municipality is related to goods rather than services. The mining industry only employs approximately 2.3% of people in Lekwa LM.
The Implementation of Social labour Plan (SLP) projects by both Seriti Coal and Sasol Mining contributed on job opportunities; the on-going Maintenance of Tutuka Power Station and Sasol had created temporary work opportunities for the Community of Lekwa .

COMMENT ON LOCAL ECONOMIC DEVELOPMENT PERFORMANCE OVERALL:

Lekwa Local Municipality was able to achieve the following:

- Local Business indaba was held successfully
- Business licensing policy was developed and implemented
- Agricultural development strategy was developed
- Tourism Development Strategy was develop
- Training intervention were provided to local SMMEs
- Local Economic Development forum was launched
- Enterprise Development was provided to local SMME through Siyathuthuka enterprise development programme.
- Various Social Labour Projects were implemented by the two mining companies(Sasol & Seriti)
- Work opportunities were created through Community works project (CWP) and Siyathuthuka

Chapter 3

COMPONENT D: COMMUNITY & SOCIAL SERVICES

This component includes libraries and archives; museums arts and galleries; community halls; cemeteries and crematoria; childcare; aged care; social programmes, theatres.

3.12 LIBRARIES; ARCHIVES; MUSEUMS; GALLERIES; COMMUNITY FACILITIES; OTHER (THEATRES, ZOOS, ETC)

INTRODUCTION TO LIBRARIES; ARCHIEVES; MUSEUMS; GALLERIES; COMMUNITY FACILITIES

Lekwa Local Municipality through an Affiliation Agreement entered into with Mpumalanga Department of Culture, Sports and Recreation provides library and information services. The aim of the public library services is to provide an opportunity for a lifelong reading, education and development of individuals and groups within the community.

This service is provided by Lekwa Local Municipality through five Public Libraries namely:Standerton Public Library, Sakhile Public Library, Morgenzon Public Library, Stanwest Public Library and Thuthukani Public Library

Lekwa Public Libraries bridge the gap in the community between the rich and the poor by providing free access to computers, free internet connectivity through (WI-FI), and free access to digital resources.
This access to information and technology ensures that everyone has the opportunity to benefit from the Fourth Industrial Revolution.

Lekwa Public Libraries are strategically positioned to bring service near the community and are visible and easily accessible to all members of the public.
Sakhile Public Library has a Mini-Lib for the Blind that ensures that library services are available and accessible to the blind and visually impaired members of the community.
The floor in the library is divided according to book shelves and books are classified into fiction and non-fiction to cater for the Children and Adult members of the community.
In order to improve access and create library awareness we carry out numbers of library promotions as per the calendar of events such as South African Library Week, World Book Day, International Literacy Day etc.

COMMENT ON THE PERFORMANCE OF LIBRARIES; ARCHIVES; MUSEUMS; GALLERIES; COMMUNITY FACILITIES; OTHER (THEATRES, ZOOS, ETC) OVERALL:

Performance of the library and information services of Lekwa Local Municipality has continued to impact the lives of the community during the year 2024/25. The use of libraries is relevant in the 4th Industrial Revolution (4IR), libraries are in a position to cater for all users according to their needs which include those who are more interested in eBooks and usage of search engines where libraries provide Free WIFI and Computer access for the users to access those services. Library awareness campaigns and exhibitions are conducted to promote libraries especially targeting calendar of events where members are reminded of the meaning and importance of such events. The Provincial Department of Culture, Sport and Recreation has also added a Mini-Lib for the Blind at Sakhile Public Library to assist those who are living with disabilities to access library services. The support is in accordance with the Affiliation Agreement entered into between Lekwa Local Municipality and Mpumalanga Department of Culture, Sports and Recreation.

The book clubs and friends of the library are gradually introduced in all our public libraries. Local primary and high schools are participating in reading, book reviews and spelling bee competitions. The aim is to instill a culture of reading and improved literacy, while also promoting South Africa's language diversity to encourages citizens to read, write, converse and value ideas and thoughts of others. Department of Culture, Sport and Recreation has also added a Mini-Lib for the Blind at Sakhile Public Library to assist those who are living with disabilities to access library services. The support is in accordance with the Affiliation Agreement entered into between Lekwa Local Municipality and Mpumalanga Department of Culture, Sports and Recreation.

T 3.12.7

3.13 CEMETORIES AND CREMATORIUMS

INTRODUCTION TO CEMETORIES & CREMATORIUMS

Lekwa Local Municipality (MP305) provides cemetery services to the communities of Standerton, Sakhile, Morgenzon and Thuthukani. The municipality is focused on enhancing maintenance standards and ensuring long-term burial capacity across its facilities.

South Africa's growing urbanization is having a negative influence on local municipalities' ability to deliver appropriate social services to all inhabitants. Lekwa Local Municipality, with its location and mineral wealth, is no exception to these migration tendencies. The town's population is predicted to be expanding at a rate of about 2% each year. The competing demand for human settlements significantly outweighs the requirement and urgency to supply burial grounds within the municipal urban limit. The municipality has developed 1.5-hectare cemetery in Thuthukani.Lekwa Municipality has 13 cemeteries, two of which are active and eleven of which are inactive. One crematorium is not operating. This will boost available capacity by providing extra burial locations. Each year, around 288 persons are buried in all municipal cemeteries. The municipality must investigate the potential of obtaining investment in a crematorium and locating land for a regional cemetery. There are hints that cultural constraints are disappearing as people become increasingly urbanized and open-minded about cremation. Walter Sisulu cemetery is running out of burial space, alternative burial site is needed to augment the Walter Sisulu cemetery.

COMMENT ON THE PERFORMANCE OF CEMETORIES & CREMATORIUMS OVERALL:

The burial space currently available within the Municipality is depleting at a rate much faster than anticipated and projected. The current crisis of limited burial space will require the identification of additional burial space which will be finalized in the 2025/2026 financial year, with progress well underway towards establishing additional burial space. The Municipality is facing resistance from the members of the community in using the new cemetery in Sakhile Extension 4, Rooikoppen that have been fenced and made ready for operation.

T 3.13.7

3.14 CHILD CARE; AGED CARE; SOCIAL PROGRAMMES

INTRODUCTION TO CHILD CARE; AGED CARE; SOCIAL PROGRAMMES

Within the Community Services and Safety Department, the Transversal unit has been responsible for implementing social programmes focusing on children, the aged and persons with disabilities. These social programmes are aimed at specific target groups, through a number of projects throughout the year. Another focus area is also to embark on the gender-based violence programme through awareness. The section has developed the quarterly targets aiming at reaching the various focus groups.

Chapter 3

COMPONENT E: ENVIRONMENTAL PROTECTION

This component includes: pollution control; biodiversity and landscape; and costal protection.

INTRODUCTION TO ENVIRONMENTAL PROTECTION

Environmental health is the science and practice of preventing human injury and illness, promoting well-being by identifying and evaluating environmental sources and hazardous agents, limiting exposures to hazardous physical, chemical, and biological agents in air, water, soil, food, and other environmental media or settings that may adversely affect human health.
Environmental Health Services within the Province is being rendered at District level. The Provincial Environmental Health Practitioners provide support mostly were a challenge still remains in the devolution of the function to Municipalities due to human resource constraints. The District is responsible for environmental pollution control through municipal health and environmental services and provide support to sector departments in terms of biodiversity and landscape.

T 3.14

3.15 POLLUTION CONTROL

INTRODUCTION TO POLLUTION CONTROL

The Gert Sibande District Municipality is responsible for monitoring water quality on a monthly basis, within the Municipality. Compliance to SANS 241 standards for drinking water is tested. Surveillance of surface water and sampling of boreholes for possible pollution by heavy metals or other chemical or biological contaminants is conducted. The District, as a licensing authority manages air pollution through regulatory services and compliance monitoring services, including environmental pollution control, incident management and pollution prevention through awareness campaigns. The impact of the service has seen increased awareness and community participation in pollution prevention.

3.16 BIO-DIVERSITY; LANDSCAPE (INCL. OPEN SPACES); AND OTHER (EG. COASTAL PROTECTION)

INTRODUCTION BIO-DIVERSITY AND LANDSCAPE

Lekwa Local Municipality addresses biodiversity and landscape management including open spaces as part of its environmental protection function.Biodiversity and landscape are fundamentally interconnected; the variety of life in a habitat shapes the physical landscape, while the landscape's structure its topography, vegetation, and land use determines which species can survive and thrive.

Within the South African context, ecological infrastructure refers to naturally functioning ecosystems that deliver valuable services to people, such as healthy mountain catchments, rivers, wetlands, coastal dunes, and nodes and corridors of natural habitat, which together form a network of interconnected structural elements in the landscape. Investing in ecological infrastructure has its foundation in simultaneously identifying critical services flowing from naturally functioning ecosystems, and identifying those organisations that would benefit from or have a key responsibility for investing in these naturally functioning systems. The ecosystem services that are primarily being focused on for attracting investment in South African are largely related to water and disaster risk reduction, with climate change adaptation elements in both of these. The primary stakeholders that would be interested in these services are government related, although this should not discount the potential for private sector stakeholder involvement.

The entire economy relies to some extent on services flowing from ecological infrastructure – clean water flowing from healthy catchments being one obvious example. Unless this infrastructure is secured, the economy will suffer. Investing in ecological infrastructure should be seen as a means of risk reduction.

Water is South Africa's most critical natural resource, and is a vital element for sustainable economic growth - supporting agriculture, energy generation, industry and forestry, as well as domestic use. The effects of climate change are expected to place additional pressures on the country's already stretched water resources. South Africa is a developing country facing a number of challenges relating to poverty, unemployment and inequality. Investing in ecological infrastructure has the potential to contribute to national development goals, including job creation, poverty alleviation and rural development.

Mainstreaming biodiversity into land-use planning and decision-making, resource management and biodiversity stewardship is critical. The mandate for managing ecological infrastructure is shared between all three spheres of government in South Africa. For example, land use decisions made at the municipal level affect the existence and state of ecological infrastructure, such as the maintenance of healthy wetlands that provide a disaster risk reduction role for human settlements, while the enforcement of buffers along river stretches on agricultural land by provincial agricultural departments has a direct impact on river health and water quality.

The private sector also has a critical role to play in investing in ecological infrastructure both as an investor, and as a landowner. There are a number of motivations for private sector investment in ecological infrastructure, and one of the main motivators is to manage risk. Within the Municipality, not enough has been done to date to mainstream this critical element towards sustainable environmental health.

Invasive alien plant control will form part of the EPWP programme, with teams focusing on clearing waterways and municipal owned land with dense growth of invasive plants. The Department of Forestry, Fisheries and Environment will also be approached for assistance with cleaning and greening programmes. In respect of environmental education, interventions will also be undertaken, involving the local communities with themes that will include, dealing with invasive alien plants, biodiversity, conservation and animal well-being.

T 3.16.1

COMPONENT F: HEALTH

INTRODUCTION TO HEALTH

This component includes clinics, ambulance services and health inspections, which are all functions that are not directly provided by the Municipality. These services are rendered by the Department of Health and the District respectively.

T 3.17

3.17 CLINICS

INTRODUCTION TO CLINICS

Clinic services and primary health care is no longer under the control of the Municipality. This service is provided by the Department of Health. The following table provides some critical statistics in respect of clinic services within the Municipality and as a proportion of clinic services within the District.

T 3.17.1

PUBLIC HEALTH FACILITIES	2024/2025
Number of clinics	27
Number of community health centres (CHC)	1
Number of hospitals	1

3.18 AMBULANCE SERVICES

INTRODUCTION TO AMBULANCE SERVICES

Emergency Medical Services (EMS) or ambulance services consists of teams of healthcare professionals who are responsible for providing pre-hospital emergency care and transportation of the sick and injured. Medical care is usually provided within three components, namely operations, specialised standby services and hospital inter-facility transfers. Within Lekwa, this service is provided by the Department of Health and thus the Municipality does not have any competence in rendering this service. *T 3.18.1*

3.19 HEALTH INSPECTION; FOOD AND ABBATOIR LICENSING AND INSPECTION; ETC

INTRODUCTION TO HEALTH INSPECTIONS; FOOD AND ABATTOIR LICENCING AND INSPECTIONS, ETC

Municipal Health Services has been extended by the District through compliance inspections for the following services, namely food control, environmental pollution control, water quality monitoring, health surveillance including premises. Monthly inspections to premises, including targeted food and water sampling is conducted. Through training and awareness campaigns, communities and stakeholders are capacitated. There is a continuous campaigning to do licensing of all food premises with regular and continuous compliance monitoring and enforcement.

The District, being mandated to provide municipal health services, has extended compliance inspection in the areas of food control, environmental pollution control, water quality monitoring and health surveillance of business premises. A significant number of inspections are done on a monthly basis, targeting food and water sampling. Awareness and training campaigns are done to capacitate communities and stakeholders. There is a continuous campaigning to do licensing of all food premises with continuous compliance monitoring and enforcement. It being a District function, it has managed to increase its monitoring and licensing regime and programme, including the number of awareness programmes to capacitate communities and stakeholders and be actively involved in municipalities within the District.

COMPONENT G: SECURITY AND SAFETY

INTRODUCTION TO SECURITY & SAFETY

This component includes: traffic law enforcement; fire; disaster management, licensing and control of animals, and control of public nuisances, etc.

T 3.20

3.20 TRAFFIC LAW ENFORCEMENT

INTRODUCTION TO TRAFFIC LAW ENFORCEMENT

The function of the municipal traffic department is to ensure the safety of all road users within the Lekwa Local Municipal area by, the policing of all moving violations, speed management by means of cameras and the inspection of vehicles in terms of roadworthiness and vehicle safety. During this period, the Traffic Department increased visibility in all areas. Additional roadblocks were held during this period.

Some of the safety & security challenges experienced by the community of Lekwa include the following:

- Limited visible policing
- Inadequate resources for effective and efficient combatting of crime
- Limited partnerships between SAPS and municipal stakeholders
- Poor lighting in certain areas

Shortage of equipment to conduct special road blocks for the collection of outstanding fines

Shortage of personnel specially on funeral escorts over weekends.

*Totals should equate to those included in the Chapter 4 total employee schedule. Employees and Posts numbers are as at 30 June. *Posts must be established and funded in the approved budget or adjustments budget. Full-time equivalents are calculated by taking the total number of working days lost (excluding weekends and public holidays) while a post remains vacant and adding together all such days lost by all posts within the same set (e.g. 'senior management') then dividing that total by 250 to give the number of posts equivalent to the accumulated days.*
T 3.20.4

3.21 FIRE

INTRODUCTION TO FIRE SERVICES

Fire and Disaster Management Services are an important public service. It forms part of the social fabric of all our communities. The services provided is critical to preventing fires and responding quickly and effectively to incidents. In terms of the Fire Brigade Services Act, No. 9 of 1987, the service is responsible for: a) preventing the outbreak or spread of a fire; b) fighting or extinguishing a fire; c) the protection of life or property against a fire or other threating danger; d) the rescue of life or property from a fire or other danger; and subject to the provisions of the Health Act, 1997, the rendering of an ambulance service as an integral part of the fire brigade service.

Within the Municipality, fire and disaster management falls within the same unit. Disaster management is a service that is run on an agency basis by the Municipality on behalf of the Gert

Sibande District Municipality. There are critical challenges within the unit especially in respect of adequate staff, safety gear, equipment and the requisite fleet to effectively and efficiently perform its functions. The Fire, Rescue and Disaster Management service is operating on a four-shift system, 24/7, with a minimum of 8 Senior Fire Fighters, 45 Fire Fighters and 6 Control Room Attendants which is still far less than the required standard for manning a fire station. In addition, there is also vehicle shortages as most of the fire fighting vehicles have been scrapped due to being beyond its reasonable life expectancy. These vehicles require replacing and those that are still operational, suffer breakdowns and remains out of service for extended periods of time at the workshop for repairs due to its use beyond its reasonable lifespan. Service delivery is also hampered, and the lives of the fire fighters are at risk in instances when work is performed where smoke or chemicals is inhaled, due to lack of proper equipment. For the year under review, the component has responded to all reported emergency calls. Fire hydrant inspections are also undertaken on a regular basis with the total number of fire hydrants being 318, 40 are non-operational due to stolen and damaged heads.

T 3.20.4

COMMENT ON THE PERFORMANCE OF FIRE SERVICES OVERALL:

The Fire, Rescue and Disaster Management unit operates on a two-shift system and four shift rotation, 24 hours a day and seven days a week. Each shift operates with a minimum of three Fire Fighters and a Control Room Attendant which is far less than the required standard for effectively manning a fire station per shift.

The problem is also compounded by the fact that most of the fire fighting vehicles have been scrapped due to it being beyond its useful lifespan, while other vehicles have not been repaired either from involvement in accidents or due to maintenance and repairs. Maintenance and repairs to these vehicles have become a very costly exercise due to the age of these vehicles.

DRAFT

The Morgenzon Fire Station does not meet minimum requirement standards. Noting that disaster management is a district shared service, future plans must include the upgrade of the existing premises.

Service delivery is hampered and the lives of fire fighters are at times at risk due to protective clothing not being replaced on a regular basis as it becomes damaged.

The above has a negative impact in the ability to ensure that in all instances the average turnaround time to respond to incidents in both urban and rural is not always within the specified acceptable standard to reach an emergency incident. The unit however always strives to respond to their call of duty with utmost dedication and commitment.

T 3.21.2.1

3.22 OTHER (DISASTER MANAGEMENT, ANIMAL LICENCING AND CONTROL, CONTROL OF PUBLIC NUISANCES AND OTHER)

INTRODUCTION TO DISASTER MANAGEMENT, ANIMAL LICENCING AND CONTROL, CONTROL OF PUBLIC NUISANCES, ETC

The Disaster Management function is mandated by the Disaster Management Act (57 of 2002) and other supporting legislation has been devolved as a District function. Measures aimed at preventing or reducing risks associated with hazards prevailing within the district is being implemented. It is a continuous and integrated multi-sectoral, multi-disciplinary process of planning and implementation of projects and programmes aimed at improving capacity to deal with disasters and emergencies.
The District supports local municipalities and other stakeholders with firefighting training in order to improve their capacity to prevent, reduce and or respond to the fire incidents and emergencies. The Municipality relies on the District for assistance in rendering Disaster management services.

T 3.22.1

COMMENT ON THE PERFORMANCE OF DISASTER MANAGEMENT, ANIMAL LICENCING AND CONTROL OF PUBLIC NUISANCES, ETC OVERALL:

The GSDM has a functional Disaster Management Advisory Forum, which holds quarterly meetings. The Forum consists of stakeholders from diverse sectors to advise and assist the District in the planning and implementation of programmes that are aimed at prevention and reduction the risk of disasters, mitigating the severity of disasters, preparedness, responding to incidents and post disaster recovery and rehabilitation. The Municipality participates in District and Provincial Disaster

COMPONENT H: SPORT AND RECREATION

INTRODUCTION TO SPORT AND RECREATION

This component includes community parks; sports fields; sports halls; stadiums; swimming pools; and camp sites. The main objective of this section within the Community Services and Safety are the following:

The Division strives to maintain and keep environment, parks and gardens clean, tidy and organised.
- The Division cleans and maintains sport facilities in suitable conditions.
- The Division cleans and maintain recreational facilities to the acceptable standards.

SERVICE DELIVERY OBJECTIVES
- To clean and maintain environment, parks and gardens
- To clean and preparation of sports and recreational facilities

CHALLENGES
- Old and redundant machinery and equipment
- Lack of additional and up to date machinery and equipment
- Additional land for burial purposes
- Insufficient personnel staff members to cater for three sections in the division

ACHIEVEMENTS
- Ability to clean and maintain facilities as per weekly programme

COMPONENT I: CORPORATE POLICY OFFICES AND OTHER SERVICES

This component includes: corporate policy offices, financial services, human resource services, ICT services, property services.

INTRODUCTION TO CORPORATE POLICY OFFICES, Etc

Key stakeholders responsible for oversight and governance and to communicate matters relating to assurance includes Council, the Executive Mayor and the Municipal Manager. The Leadership and those charged with governance continuously contribute to the credibility of financial and performance information and compliance with legislation by ensuring that adequate internal controls are implemented and effectively monitored.

The establishment of Council Committees, Section 79 and 80 strengthen in line with the Local Government: Municipal Structures Act 117 of 2008, specifically established to oversee the

implementation of measures Policies and strategies are being implemented as intended as well as the key risks are identified, monitored, and mitigated. The Councils provided the platform of accountability to create an enabling environment for good governance and to promote accountability through oversight role of political committees.

Council committees monitor and ensure compliance with the duties and objectives; and investigate and make suggestions on how to address the underlying causes of socio-economic inequality in the municipality. Poor functional of Section 79 Committees due to lack of attendance by members resulted to lack of oversight and accountability leads to the continued disregard of key local government legislation which hampers administrative oversight and accountability. The Executive Mayor with the support of the Mayoral Committee members overseeing the administration of the municipality to ensure effectiveness and efficiency in service delivery. The Municipal Manager, as the Head of the municipality's administration has ensure proper administrative internal controls are in place to promote administrative accountability to ensure that proper administrative reporting arrangements are in place to promote accountability of the administrative function of the municipality through the development of a system of delegation to promote administrative and operational efficiency.

T 3.24

3.24 EXECUTIVE AND COUNCIL

This component includes: Executive office (mayor; councilors; and municipal manager).

INTRODUCTION TO EXECUTIVE AND COUNCIL

The following highlights key findings in respect of leadership, financial and performance management and governance that can only be addressed and corrected as a collective:
a) Effective leadership based on a culture of honesty, ethical business practices and good governance, and protecting and enhancing the best interests of the entity
b) Exercise oversight responsibility regarding financial and performance reporting and compliance as well as related internal controls
c) Implement effective human resource management to ensure that adequate and sufficiently skilled resources are in place and that performance is monitored and that policies and internal controls are in place
d) Establish information technology governance framework that supports and enables the Municipality to deliver value and improves performance

e) Implement proper record keeping in a timely manner to ensure that complete, relevant and accurate information is accessible to support financial and performance information
f) Review and monitor compliance with applicable legislation and design and implement formal controls over information technology systems to ensure the reliability of the systems and the availability, accuracy and protection of information;
g) implement appropriate risk management activities to ensure that regular risk assessments, are conducted and that the risk strategy is implemented and monitored through an adequately resourced and functional internal audit unit;
h) ensure that the audit committee promotes accountability and service delivery through evaluating and monitoring responses to risks and overseeing the effectiveness of the internal control environment, including financial and performance reporting and compliance with legislation.

T 3.24.1

SERVICE STATISTICS FOR THE EXECUTIVE AND COUNCIL

In exercising its executive and legislative mandate the institution has, through leadership collective, financial and performance management and governance, ensured effective oversight and accountability by considering and reviewing all legislative reporting requirements in various committees of Council for the provision of services.

Chapter 3

Employees: The Executive and Council					
Job Level	2022/2023	2023/2024			
	Employees	Posts	Employees	Vacancies (fulltime equivalents)	Vacancies (as a % of total posts)
	No.	No.	No.	No.	%
0 - 3	1	1	13	2	200%
4 - 6	3	3	8	7	233%
7 - 9	6	8	12	10	125%
10 - 12	7	15	8	8	53%
13 - 15	9	15	0	0	0%
16 - 18	11	21	18	7	33%
19 - 20	18	30	0	0	0%
Total	55	93	59	34	37%

*Totals should equate to those included in the Chapter 4 total employee schedule. Employees and Posts numbers are as at 30 June. *Posts must be established and funded in the approved budget or adjustments budget. Full-time equivalents are calculated by taking the total number of working days lost (excluding weekends and public holidays) while a post remains vacant and adding together all such days lost by all posts within the same set (e.g. 'senior management') then dividing that total by 250 to give the number of posts equivalent to the accumulated days.*

Chapter 3

COMMENT ON THE PERFORMANCE OF THE EXECUTIVE AND COUNCIL:

As highlighted above and noting the findings of the Auditor General, specifically relating to providing assurance and the political administrative will to effectively deal with consequence management, clear plans will be put in place through the audit action plan to address such. In addition, relevant Treasury guidelines and circulars will be utilized to strengthen the implementation, monitoring and reporting of such matters.
In exercising its executive and legislative mandate the institution has, through leadership collective, financial and performance management and governance, ensured effective oversight and accountability by considering and reviewing all legislative reporting requirements in various committees of Council for the provision of services in addressing the socio-economic inequalities and challenges.

Various projects as outlined in the IDP to address water, sanitation, electricity, roads, human settlements and human capital development have been undertaken to ensure sustainable supply of services.

Chapter 3

3.25 FINANCIAL SERVICES

INTRODUCTION FINANCIAL SERVICES

The established Budget and Treasury office's main focus is to provide accounting services for all directorates in the Municipality. Key functions include revenue management, credit control, debt collection, supply chain and asset management. Revenue management deals with debtors' management, which includes billing and the collection of consumer debt. The average collection rate was 67% for the year under review. The asset management section deals with movable and immovable assets in terms of various GRAP standards. Creditors and payroll management deals with the payment of creditors through procurement processes and direct payment. In addition, it deals with the remuneration of salaries and councillors allowances. At the reporting date, there were no issues in terms of salaries and allowances. Matters raised by the Auditor General were in terms of major creditors such as Eskom, Department of Transport, and the Department of Water and Sanitation. The supply chain management section deals with the storage of goods and stock for use by various departments. This among others include fuel and oil, material for water, electrical, refuse, sewerage and stationary. This section also deals with procurement processes that deals with competitive bidding as well as quotations. The component of accounting management services deals with budget management and reporting to various structures as required in terms of inter alia MFMA sections 71,72, 52, 121, 122, 123,124,125 126, 131 and 132.

The challenges that needs to cleared out are procurement maters dealing with irregular, unauthorised, fruitless and wasteful expenditure. The other matter that in most instances complicate budget management is that the budget is not realistic and not cash backed. An audit recovery action plan had been developed to address matters raised by the Auditor General.

Chapter 3

COMMENT ON THE PERFORMANCE OF FINANCIAL SERVICES OVERALL

Total operating revenue reached R1,724,775,815, a 65% increase from the previous year, driven by higher public contributions, service charges, property rates, and a new revenue stream from the Debt Relief and Incentives program. This program contributed R211.9 million, including Eskom writing off R136.5 million in interest and the Provincial Department of Transport writing off R75.3 million as irrecoverable debt.

Grants receipts contributed R219 million (12.7%) of the total revenue, while revenue generated from property rates and service charges accounted for R911,227,795 (52.8%) of the total revenue mix. Although there are no specific norms and standards to measure grant dependency, this revenue mix indicates that the Municipality is not entirely dependent on grants and subsidies to finance its operations.

However, further improvements in own revenue generation are necessary. To address this, the Municipality is actively implementing various revenue enhancement programs aimed at reducing the operating deficit over the multi-year period.

Operating expenditure rose to R1,652,632,295, with major costs stemming from bulk purchases (33%), employee costs (17%), and debt impairment (13%). Despite this, the Municipality reduced debt impairment costs by R40.8 million through improved collections and refined methodologies. Cost-curtailment measures, including reducing overheads, renegotiating contracts, and prioritizing essential service delivery, are actively being implemented to manage expenditures.

The Municipality recorded a surplus of R68.9 million, ending the year with R14.9 million in cash and cash equivalents. While challenges remain, the notable revenue growth and strategic cost management efforts signal progress in the Municipality's financial recovery and its commitment to sustainable operations and improved service delivery.
reducing the operating deficit over the multi-year period.

T 3.25.7

3.26 HUMAN RESOURCE SERVICES

INTRODUCTION TO HUMAN RESOURCE SERVICES

The impact of human resource services on the Municipality can especially be seen in the efforts made to ensure that both Councillors and officials are skilled through the various learning and skills development programmes. This ensures that the Municipality produces a well-capacitated leadership and management team for improved service delivery.

T 3.26.1

SERVICE STATISTICS FOR HUMAN RESOURCE SERVICES

Support services to the following departments have been rendered to ensure a capable administration in prudent utilisation of minimal resources:
Office of the Municipal Manager
Budget and Treasury
Corporate Services
Community Services and Safety
Technical Services
Planning and Economic Development
Services:
Recruitment and Selection
Training and Development
Employee Administration
Leave Administration
Health and Safety

DRAFT

Chapter 3

COMMENT ON THE PERFORMANCE OF HUMAN RESOURCE SERVICES OVERALL

The priority within human resource services remains to ensure that the organizational structure of the Municipality is aligned to the IDP in order to achieve the Municipality's strategic objectives. Sound employee relations are critical to ensuring that the organization meets its objectives.

T 3.26.7

3.27 INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) SERVICES

This component includes: Information and Communication Technology (ICT) services.

INTRODUCTION TO INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) SERVICES

Information and Communications Technology (ICT) is an extended term for information technology (IT) which stresses the role of unified communications and the integration of telecommunications (telephone lines and wireless signals), computers as well as necessary enterprise software, middleware, storage, and audio-visual systems, which enable users to access, store, transmit, and manipulate information.

ICT Framework and Policies were approved by Council to guide on the governance of the Information Communication Technology (ICT). The municipality has appointed the service provider to implement the internet connection and telephones system.

T 3.27.1

SERVICE STATISTICS FOR ICT SERVICES

The following ICT services are aimed at enhancing IT connectivity and were provided to ensure continuous and effective organisational performance.

Communication – Emails, Teams, Zoom, and Telephone system
Security – Updated Anti-virus & Firewall (Network security).
The installation of software and hardware.
Upgrades to current systems – VIP System, Munsoft and Mun-Admin.
IT Governance – ICT Steering Committee
The following ICT policies and procedures were also approved for the period under review: 11 Policies were approved by 31 July 2023, 07 Policies were reviewed and awaiting Council approval.
* Lekwa Local Municipality ICT Policy Framework
* Lekwa Local Municipality ICT Strategy
* Lekwa Local Municipality ICT Continuity Policy
* Lekwa Local Municipality Disaster Recovery & Business Continuity Plan for ICT Services

* Electronic Communications Policy
* Backup and Recovery Policy
* Change Management Policy
* Firewall Policy
* Laptop Security Management Policy
* ICT Security Policy
* Information Security Policy
* Patch Management Policy
* Physical and Environmental Security Policy
* User Access Management Policy
* Virus and Malware Management Policy
* Change Management Procedure
* Access Control Procedure
* Directory User Account Managements Standards and Procedure

Internet connectivity at all municipal administrative offices has been completed, as well as telephones. This will in future also assist in work efficiency, especially once an intranet service is activated, which is in the future plans of the Municipality.

COMMENT ON THE PERFORMANCE OF ICT SERVICES OVERALL:

The performance of the ICT services has improved in aligning with the business needs brought about by the move to the Fourth Industrial Revolution (4IR). Municipal buildings' telephone and internet connectivity has been completed. The has also commenced the process of fibre connectivity to stabilize internet connection in all municipal offices. The Municipal website has been resuscitated with the intention to be internally responsible for managing the website. The ICT is in the process of digitalizing the administrative processes by introducing Employee Self Service (ESS) for leave management, electronic document management for online records management, thereby reducing paper costs. The appointment of a service provider for the upgrade of the server room had non-responsive bids and was re-advertised. This project was finalized in the 2023/2024 financial year.

3.28 PROPERTY; LEGAL; RISK MANAGEMENT AND PROCUREMENT SERVICES

This component includes: property; legal; risk management and procurement services.

INTRODUCTION TO PROPERTY; LEGAL; RISK MANAGEMENT AND PROCUREMENT SERVICES

Within the Municipality, the components of property, legal, risk management and procurement services falls under Corporate Services, office of the Municipal Manager and Budget and Treasury respectively. Noting that the Municipality is required to establish and maintain effective, efficient and transparent systems of financial and risk management, internal controls and internal audit operating procedures in accordance with any prescribed norms and standards, the Auditor General's findings relating to these requires attention. It is evident from the findings that these areas are interrelated and internal controls must be strengthened in order to ensure improved compliance to regulatory frameworks.
Dealing with litigation matters is ongoing as there has been a number of cases brought against the Municipality that has escalated the contingent liability provision.

T3.28.1

SERVICE STATISTICS FOR PROPERTY; LEGAL; RISK MANAGEMENT AND PROCUREMENT SERVICES

In respect of service statistics for legal, risk management and procurement services, the Municipality strives to provide these services in accordance with applicable legislative and regulatory frameworks.

COMMENT ON THE PERFORMANCE OF PROPERTY SERVICES OVERALL:

Property services is divided into property administration through the development of leases, deeds of sale, etc under the auspices of the Manager Legal Services within the Corporate Services department. The component dealing with the alienation of property falls within the ambit of the Municipality's Planning and Economic Development's Department under the human settlements unit. Capital projects undertaken relies largely on external grant funding as the Municipality does not have sufficient cash reserves to undertake property development. Partnerships have been created for both residential and commercial property development.

T 3.28.7

Chapter 3

COMPONENT J: MISCELLANEOUS

INTRODUCTION TO MISCELLANEOUS

This component includes the provision of airports, abattoirs, municipal courts and forestry as municipal enterprises. The Municipality does not provide any of these services within its area of jurisdiction.

COMPONENT K: ORGANISATIONAL PERFOMANCE SCORECARD

The 202/202 Annual Performance Report was compiled in compliance with the requirements of section 46 (1) of the Local Government: Municipal Systems Act of 2000.

The purpose of this report is to provide feedback regarding the performance of Lekwa Local Municipality, noting that the information included in this report is based on the IDP and the approved Adjusted SDBIP for the 2024/2025 financial year. The annual performance report is based on the overall cumulative performance for the period 1 July 2024 to 30 June 2025.

It is against this backdrop that the 2024/2025 Annual Performance Report of Lekwa Local Municipality was prepared and submitted in terms of the Municipal Systems Act of 2003. This report covers the performance information and focuses on the operationalization and implementation of the approved Service Delivery Budget and Implementation Plan (SDBIP) objectives as encapsulated in the Municipality's 2024/2025 Integrated Development Plan (IDP), as approved by the Municipal Council on 4th June 2024. The report seeks to reflect on actual performance of the Municipality as measured against the performance indicators and targets, in line with the six (6) Key Performance Areas (KPAs) which are:

- ✓ Service Delivery and Infrastructure Development
- ✓ Municipal and Institutional Development and Transformation
- ✓ Financial Viability and Management
- ✓ Good Governance and Public Participation
- ✓ Local Economic Development
- ✓ Spatial Rationale

Each KPA has a strategic goal and objectives which were developed to help focus the Municipality on its developmental role in a more coherent manner. The IDP was developed and approved for the 2022-2027 term and was reviewed approved for the 2024/2025 financial year.

The 2024/2025 Annual Performance Report (APR) is presented in terms of section 46 (1) and (2) of the Municipal Systems Act (MSA), Act 32 of 2000, read together with the MFMA Circular 63 on annual reporting and sections 121 (3) (c) and 127(2) of the Local Government: Municipal Finance Management (MFMA) Act 56 of 2003. Every municipality and municipal entity must prepare and adopt an annual report for each financial year in accordance with the MFMA. Section 46 of the MSA

provides that an annual performance report must be submitted to the municipal council, which will eventually form part of and be included in the final annual report to be prepared in terms of the MFMA.

This Annual Performance Report has been compiled in compliance with the requirements of section 46 (1) of the Local Government: Municipal Systems Act, 2000; which stipulates the following:

"(1) A municipality must prepare for each financial year a performance report reflecting—
(a) the performance of the Municipality and each external service provider during that financial year;
(b) a comparison of the performance referred to in paragraph (a) with targets set for performance in the previous financial year; and
(c) measures taken to improve performance. "

In addition, Regulation 7 (1) of the Local Government: Municipal Planning and Performance Management Regulations of 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determining the roles of the different role players.

Performance management is not only relevant to the organisation as a whole, but also to the individuals employed within the organisation and external service providers. The Performance Management System (PMS) Framework, which was adopted on by Council under Resolution A96 on 30 July 2024 by the Municipality inter alia, reflects the linkage between the IDP, Budget, the organisational SDBIP and individual performance.

This report serves as the Annual Performance Report for the 2024/2025 financial year ended 30 June 2025, also taking into account the adjusted SDBIP which was approved by Council under Resolution A45 on 27 March 2025. In the case of underperformance and deviations from meeting set targets, challenges to achieving targets and details pertaining to the relevant measures taken to address these challenges, are also provided. The overall cumulative organisational performance achieved for the period 2024/2025, is at 75% compared to the 2023/24 financial year performance which was at 78%.

For the period under review, the Municipality was still under the mandatory section 139 intervention. On a monthly basis, progress on implementation of the FRP is submitted to National Treasury and on a quarterly basis, progress is tracked and implementation discussed in War Room meetings. The continued effective implementation of the FRP is critical towards the turnaround in the financial and service delivery challenges faced by the Municipality.

Key successes under very trying and challenging circumstances include a senior management team which key towards ensuring that every Department is fully accountable towards the achievement of performance targets. This, supported by a more stable political environment enhances strategic decision making towards service delivery and an improved financial position.

Chapter 3

Sincere gratitude and appreciation is herewith extended to the Honourable Executive Mayor, Mayoral Committee, MPAC, Section 79 and 80 Committees, the Audit and Performance Audit Committee and Council for their strategic direction and leadership during the financial year and our extended management team who remains hands on and take responsibility and accountability towards the preparation of the APR.

According to the provisions of chapter 6 of the Municipal Systems Act, 32 of 2000, municipalities must monitor and measure the progress of their performance by preparing quarterly, mid-year and annual performance reports. These quarterly and mid-year reports make up the municipality's section 46 annual performance report, which is submitted to the Auditor-General South Africa (AGSA), along with the annual financial statements and annual report for auditing. This report is based on information received from each department for assessment of their performance for the cumulative annual performance for the 2024/2025 financial year which ended on 30 June 2025. This is a high-level report based on actual performance per key performance area (KPA), key performance indicators (KPIs) and annual targets in line with the adjusted and approved 2024/2025 SDBIP. The Organisational Performance is evaluated at an organisational level through the Top-layer SDBIP as informed by Departmental targets cutting across the following six KPAs:

- ✓ KPA: Service Delivery and Infrastructure Development
- ✓ KPA: Financial Viability and Management
- ✓ KPA: Local Economic Development
- ✓ KPA: Municipal Institutional Development and Transformation
- ✓ KPA: Good Governance and Community Participation
- ✓ KPA: Spatial Rationale

For the period under review, the Municipality had to address the following key disclaimer audit findings as it related to the 2023/2024 audit of performance objectives:

AUDIT FINDING	CORRECTIVE ACTION TAKEN
Various indicators which are not measurable (Finding 85 COMAF 25)	Management revised indicator definitions, business processes, including data sources and the means of verification. With the assistance of Chapu Chartered Accountants, submitted information has been reviewed to test consistency of the verifiability and measurability to support reported annual performance.
Municipal council did not adopt the oversight annual report within two (2) months after the date in which the annual report for the 2022/2023 financial year-end was tabled in municipal	The Municipal council has adopted without reservation the 2023/2024 Oversight Report by 27th March 2025.

council in terms of Section 129(1) of the Municipal Finance Management Act, 2003 (Act no. 56 of 2003).	
During the audit of performance information, the auditor identified that the Municipality did not disclose and present the annual performance report as required by Municipal System Act 46(1), the actual performance for the indicators below is not compared to prior year performance in the APR.	Consolidated quarterly reports used to prepare APR. Review of consolidated draft APR includes comparative 2023/24 and 2024/25 actual performance. This finding was cleared during the 2023/24 audit. The 2024/2025 APR also includes comparative performance.

On a quarterly basis, the SDBIP performance report was prepared and reviewed by the Performance Management System (PMS) unit, prior to the report being submitted to Internal Audit for auditing. The assessment of performance reports and supporting portfolios of evidence by the PMS-unit provides an initial review processes, whereafter the final quality assurance is provided by the Internal Audit unit. These audited performance reports are subsequently submitted at the various platforms which include Top Management Committee and the Mayoral Committee. These reports are ultimately presented through the Audit Committee Chairperson to Council.

The overall performance of Lekwa Local Municipality is based on the Departmental Performance scorecards which is aligned to the IDP and approved Adjusted SDBIP KPI's applicable to each department in terms of their respective contribution thereto. The departmental scorecard information is, for the purpose of annual performance reporting reconfigured into reporting per KPA, in line with the approved and adjusted 2024/2025 SDBIP. Results are presented in the form of an audited score of whether a target was achieved or not achieved. The total number of targets that are achieved and not achieved are counted and a total is allocated to determine the overall level of performance.

For the 2024/2025 period under review, both administrative and governance structures were in place. In respect of the Audit Committee, as per the provisions of the Municipal Planning and Performance Management Regulation 14(2)(c), the Municipality utilised its established Audit Committee as its Performance Audit Committee. The following are the members and invited representatives who served on the Audit Committee for the year under review:

- Mr. P. Rambuda (Audit Committee Chairperson)
- Mr. S Dube (Audit Committee member)
- Mr. I Motala (Audit Committee member)

The Audit Committee held meetings on the following dates:

- 2024-07-26
- 2024-08-23
- 2024-10-24
- 2025-01-24
- 2025-04-25

Under the guidance and leadership of the Municipal Manager, Mr M.J. Lamola, the senior management team was constituted as follows:

(a) Executive Manager Community Services & Safety: T Mtshiselwa

(b) Executive Manager Technical Services: MS Jiyane

(c) Chief Financial Officer: Ms. V Nkatha

(d) The positions of Executive Manager Corporate Services and Executive Manager Planning and Economic Development was vacant during the period under review, with these position being filled in acting capacities for the remainder of the financial year. The appointed senior managers all signed their performance agreements within the required 30 days of the commencement of the financial year.

The Local Government: Municipal Staff Regulations promulgated in 2020 which objectives inter alia provides for a local public administration that is fair, effective and transparent and to create a development oriented local administration that is governed by accountable and ethical standards, the cascading of individual performance reviews have been implemented within the Municipality. An implementation plan has been put in place towards fully implementing the said Regulations.

This Annual Performance Report provides an overview of performance information, based on progress made against predetermined objectives towards meeting set targets in line with the approved SDBIP. Every effort has been made to ensure that the Annual Performance Report (APR) reflects accurate non-financial performance information that provides a reflection on achievements against predetermined objectives and KPIs, in line with the SDBIP targets for the year under review. Through the reporting on and auditing of performance information governance and oversight structures are afforded an opportunity to account to communities and stakeholders on organisational municipal performance, from an independent source, the Auditor General of South Africa.

The audit of predetermined objectives is regarded as an annual procedure for reporting on actual performance against set predetermined objectives of the Municipality to provide assurance to Council, members of the public and other relevant stakeholders that the “actual performance reported” is useful, reliable and accurate. The objective of an audit of predetermined objectives is to enable AGSA to conclude whether the reported performance against predetermined objectives is useful and reliable, in

all material respects, based on predetermined audit criteria. This audit is executed as an integral part of the annual regularity audit, to confirm compliance with applicable laws and regulations as well as the usefulness and reliability of the reported performance information to be published in the annual report of the Municipality. Through the independent auditing of predetermined objectives, quality assurance is aimed at giving effect to the economical procurement and efficient and effective utilisation of resources. To this end the following key concepts are critical in this regard:

1. Economy: for the procurement of resources of the right quality in the right quantities at the right time and place at the lowest possible cost;
2. Efficiency: To achieve the optimal relationship between the output of goods, services or results and the resources used to produce them;
3. Effectiveness: To achieve policy objectives, operational goals and other intended outcomes.

Through the audit of predetermined objectives, democracy is strengthened by enabling oversight, accountability and good governance in the public sector following which such findings are reported accordingly.

The AGSA had the responsibility to report on the usefulness and reliability of the reported performance information against predetermined objectives for a selected development priority presented in the annual performance report. Procedures were performed to identify material findings. The usefulness and reliability of the reported performance information was evaluated in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected development priority presented in the municipality's annual performance report for the year ended 30 June 2024. From the audit of performance information, the accuracy of various reported achievements could not be determined, as indicators were not well defined, and could thus not verify the methods and processes used to measure the achievements. Consequently, the reported achievements might be more or less than reported and were not reliable for determining if the targets have been achieved.

Development priorities	Opinion	Movement
Basic Service Delivery	Qualification	Improved

The following was noted in respect of the material findings on the audit of performance information:

(a) The accuracy of 10 indicators could not be determined as the indicators were not well-defined and the methods and processes used to measure reported achievements could not be verified;
(b) Four indicators, reported achievement did not agree to actual achievement reported;
(c) Three indicators, measured provided aimed at improving underperformance, adequate supporting evidence was not provided
(d) In respect of material misstatements, in the annual performance report, were not all corrected and thus reported as material findings in the management report.

Chapter 3

The 2024/2025 annual performance report was prepared based on the institutional Performance Scorecard (SDBIP) of the Municipality. The report was submitted in line with section 126 (1) (a) of the MFMA, within two months after the end of the financial year to which the financial statements relate, to the Audit Committee, Mayoral Committee and Council. The Annual Performance Report was submitted to the Auditor-General for auditing together with the unaudited 2024/2025 Annual Financial Statements.

The 2024/2025 annual performance report, as audited is incorporated into the 2024/2025 Annual Report, as provided for by section 121 (3) (c) of the MFMA which stipulates that the annual report must inter alia include the audited Annual Performance Report of the Municipality as prepared in terms of section 46 of the MSA.

The organisational performance report relates to achievements for the financial year under review as well as corrective measures to be taken to improve areas of under achievement. This section of the Annual Performance Report will reflect the Municipality's actual performance against the planned targets as contained in the Municipality's SDBIP as per the six (6) KPA's based on the approved SDBIP.

7.1 The following table below is a breakdown of performance per KPA in line with its KPIs:

7.2 The following provides a general summary of performance achievements and areas for improvement per KPA:

Key Performance Areas	Significant Highlights	Areas of underperformance
Basic Service Delivery and Infrastructure Development	Capital project implementation and expenditure was on track, with projects complete in line with planned targets. Operation and maintenance plans, which were long outstanding have been developed for sanitation services; electricity, an energy efficiency and demand management strategy as well as a fleet maintenance plan	Some operational activities were not implemented as planned.
Municipal Transformation and Institutional Development	The implementation of individual performance management is being implemented and has been cascaded to all levels below senior managers	The overall implementation and conducting of performance reviews still requires attention for improved individual accountability towards

Key Performance Areas	Significant Highlights	Areas of underperformance
	Automation of the leave management and document management systems for improved administrative efficiency	overall improved organisational performance
Spatial Rational	Implementation of spatial development framework for approval of land use applications	Slow progress has been made on the implementation of human settlements projects, considering the dire need for low-income residential developments
Local Economic Development	The municipality is actively involved in CSI and SLP projects	The non-functionality of the LED Forum also impacted the planned Economic development summit
Good Governance and Public Participation	Governance structures, both the Risk Management and Audit Committee are fully functional and is a great value add towards organisational accountability	Council and committees of council not convening meetings according to the approved schedule impacts on legislative compliance
Financial Viability and Management	Improved contract management to reduce UIFW expenditure	Low cost coverage and revenue collection remains a concern towards the long term financial sustainability of the Municipality

7.8 Comparative 2022/2023 and 2023/2024 Annual Report

As part of strengthening governance, accountability and oversight, Council delegated the Municipal Public Accounts Committee (MPAC) to exercise an oversight role in respect of the annual report. The 2022/2023 Annual Report was tabled by MPAC to Council at a sitting on 2 July 2024 under Council Resolution A68, where the report was adopted without reservation. The late tabling of the Oversight Report resulted in a legislative non-compliance finding. In respect of the 2023/2024 Oversight Report, MPAC tabled the report, which was adopted without reservation under Council Resolution A47 on 27 March 2025. In comparison, Council has steadily improved and gained political stability in the 2024/25 period.

Chapter 3

The performance of service providers is monitored through a signed Service Level Agreement (SLA). It remains the responsibility of a department, to ensure that the necessary SLA is in place and the performance of a service provider is monitored. In addition, the end user department provides monthly reports to the Supply Chain Management (SCM) unit. Appointed service providers who fail to perform are reported to SCM and the necessary remedial action follows, including, but not limited to, the termination of the contract.

In view of the fact that the previous year's APR did not include information on external service provider performance, the following provides a general reflection in respect thereof, based on the assessment by user departments, as follows:

(a) Service provider performance was found to be acceptable across the board;
(b) Instances where the service was not at a satisfactory level, was largely due to key timelines not being met;
(c) Certain suppliers were appointed on an as and when required basis for operational reasons. The aforementioned service providers' performance will therefore be assessed when such service is utilised.

The reporting on credible performance information plays a significant role in good governance and accountability within any organisation.

The greater the focus therefore is on the quality and timely auditing of performance information to provide assurance that the performance information is reliable, relevant and accurate.

Performance information and reporting focuses the attention of the public and oversight bodies on whether public institutions such as municipalities are delivering value for money, by comparing their performance against their budgets and service delivery plans. It is also intended to alert managers to areas where corrective action is required. The most important reason for measuring performance is that what gets measured gets done. If an institution knows that its performance is being monitored, it is more likely to perform the required tasks and perform them well. This can greatly enhance the level of public confidence that communities and other stakeholders can once again have in the Municipality.

DRAFT

Chapter 3

The organisational performance report relates to achievements for the financial year under review as well as reflecting corrective measures taken to improve areas of under achievement, as contained below:

Municipal KPA: Basic Service Delivery and Infrastructure Development

Municipal Priority:

Improve water and sanitation provision

Provide reliable electricity supply

Provision of safe and dependable roads

Provision of efficient and effective fleet services

SCADA installation to perform internal Eskom load shedding to keep water treatment works on during Eskom load shedding periods

SCADA installation on water and sewer networks to monitor water losses and limit sewer spillage into Vaal River system

Provision of efficient and effective solid waste management services, law enforcement, fire and rescue services, disaster management, parks and recreational facilities, library services

Revenue generation through traffic control.

Strategic Objective:

Provision of basic services (water 100%, sanitation 100%, electricity 100% and roads 100%)

Provision of basic services (solid waste removal by 100%, emergency fire, traffic control, disaster management, parks and recreational facilities and libraries

Impact Statement:

Improved quality of life and safe living

MTSF Target:

Improved access to basic services (water 100%, sanitation 100%, electricity 100% and roads 207 km of Roads paved/tarred)

Improved access to basic services such as waste 100% emergency fire, traffic control, disaster management, parks and recreational facilities and libraries

CHAPTER 4 – ORGANISATIONAL DEVELOPMENT PERFORMANCE (PERFORMANCE REPORT PART II)

INTRODUCTION

The human resource management of the Municipality comprises of activities relating to the rendering of a comprehensive human resource management function to Council by ensuring an efficient personnel administration system, recruitment and selection, sound labour relations, human resources development, implementation of affirmative action measures, occupational health and safety of employees and compliance with all relevant labour legislation.
The employees of the Municipality is informed and supportive of the Municipality's vision, mission and strategic direction.
The composition of people with disabilities and gender within the Municipality remains a challenge as reflected by the workplace profile of the institution. Recruitment of black females and people with disabilities remains our priority; however, it has been a challenge to recruit from the disabled designated group
An Employment Equity Plan has been developed and approved, which continues to have a bias towards the above stated challenges, i.e. gender and people with disabilities. Monitoring, implementing and reporting on the Employment Equity Plan (EEP) continues to be a priority for the institution. The recruitment of top and divisional managers has been aligned to the current EEP to close the gaps. The Municipality will continuously align the EEP and the recruitment plan to eliminate gaps.

2023/2024	44	19	43%
2024/2025	33	29	88%
** Divide the number of employees who have left the organisation within a year, by total number of employees who occupied posts at the beginning of the year*			*T 4.1.3*

COMMENT ON VACANCIES AND TURNOVER:

For the year under review, the position of the municipal manager and the entire senior management team were filled for the year under review. The fast-tracking of processes for the filling of vacancies has improved with the developed recruitment plan. A relatively higher turnover rate was experienced mainly due to resignations, deaths and employees reaching retirement age.

T 4.1.4

COMPONENT B: MANAGING THE MUNICIPAL WORKFORCE

INTRODUCTION TO MUNICIPAL WORKFORCE MANAGEMENT

The human resource management of the municipality comprises of activities relating to the rendering of a comprehensive human resource management function to Council by ensuring an efficient personnel administration system, recruitment and selection, sound labour relations and human resources development. The implementation of affirmative action measures, occupational health and safety of employees and compliance with all relevant labour legislation is also adhered to.

The policies in the table below were approved by 30 June 2023, for implementation in the 2023/2024 financial year.
The staff of the municipality is informed and supportive of municipality's vision, mission and strategic direction. The gender composition and people with disabilities continues to be a challenge as reflected

by the workplace profile of the institution. Recruitment of black females and people with disabilities remain priority however, the appointment in these categories of people still is a challenge.

DRAFT

Chapter 4

COMMENT ON WORKFORCE POLICY DEVELOPMENT:

The Draft Succession Planning Policy came as a result of the findings of the Skills Audit process. The Draft has gone through consultation process with labour, TOPMANCO and the section 80 Committee. The Draft Succession Planning Policy shall be tabled to Council together with other financial related policies in the 25/26 FY. Specific human resource policies as specified above were approved during the year under review. Other policies have been developed while others are due for review. Noting the need to regularly review policies, policies are reviewed annually.

T 4.2.1.1

T 4.3.3

COMMENT ON INJURY AND SICK LEAVE:

The municipality is monitoring and reports on injuries on duty to the Compensation Commission as required by legislation. All types of leave is monitored using VIP Payroll system. The Occupational Health and Safety (OHS) Committee is functional and all related health and safety issues are deliberated on, including the monitoring of the mitigation plans of the OHS Risk Register.

T 4.3.4

Disciplinary Action Taken on Cases of Financial Misconduct			
Position	**Nature of Alleged Misconduct and Rand value of any loss to the municipality**	**Disciplinary action taken**	**Date Finalised**
Superintendent	Dishonesty	2023-12-07	Matter not yet finalized
Cashier	Gross Dishonesty	Jun-24	Awaiting outcome from the Presiding Officer

T 4.3.6

COMMENT ON SUSPENSIONS AND CASES OF FINANCIAL MISCONDUCT:

For the year under review, two cases of financial misconduct were still under investigation. Disciplinary processes have taken longer than usual to finalise due to postponement for various reasons relating to but not limited to the unavailability of the Presiding Officer and the employee representative. It is worth mentioning though that the matter of the Manager Income has been concluded. Again, an observation is made that its almost four months since the matter was concluded and the municipality is consulting on a recourse as it is obvious that the Presiding Officer is not in compliance with the disciplinary collective agreement. It must be further noted that the municipality,

with the Manager Legal Services also assisted in presiding on disciplinary matters which has made a huge difference in handling and fast tracking the finalisation of cases.

T 4.3.7

4.4 PERFORMANCE REWARDS

The performance management system has not yet been cascaded to levels below section 56 employees, no performance rewards were paid during the year under review.

COMMENT ON PERFORMANCE REWARDS:

For the year under review, performance rewards were not paid to any municipal employees, including the Municipal Manager and section 56 managers. It must be noted that performance reviews were not conducted. Efforts are continually being made to strengthen the performance review processes. Adherence to scheduled review sessions in line with the signed performance agreements will be strengthened.

The cascading of individual performance management started and all staff below section 56 managers signed their performance compacts in the 24/25 FY. To complement the approved IPMDS Policy Framework, the SOP for IPMDS was developed and approved by TOPMANCO for smooth introduction and implementation of IPMDS. The IPMDS cycle was followed starting from the review (Q1) and the mid-year assessment (Q2) and the subsequent review (Q3) until the final annual assessment (Q4). The policy does not make any provision for monetary incentives due to financial constraints. A manual calculator is used whilst the municipality is still in quest for SALGA to assist with the automation of IPMDS.

T 4.4.1.1

COMPONENT C: CAPACITATING THE MUNICIPAL WORKFORCE

INTRODUCTION TO WORKFORCE CAPACITY DEVELOPMENT

In line with the MSA 2000 S68 (1) human resource policies were customized line with the South African Local Government Association's generic policies that enables the institution to perform its functions and exercise its powers in an economical, effective, efficient and accountable way. A critical function within the Human Resources division is the implementation of training interventions for human capital development. The following is a breakdown of training interventions undertaken during the 2023/2024 financial year:

COMMENT ON SKILLS DEVELOPMENT AND RELATED EXPENDITURE AND ON THE FINANCIAL COMPETENCY REGULATIONS:

Skills audit conducted through the support from COGHSTA. A provision of 1% of the total wage bill of the municipality is made available for skills development as required by the MSR. Performance compacts covers the PDPs of officials which is incorporated into the WSP The WSP for 2024/25 FY was submitted and approved by LGSETA. The mandatory grant was received from LGSETA confirming compliance with SARS.

T 4.5.4

COMPONENT D: MANAGING THE WORKFORCE EXPENDITURE

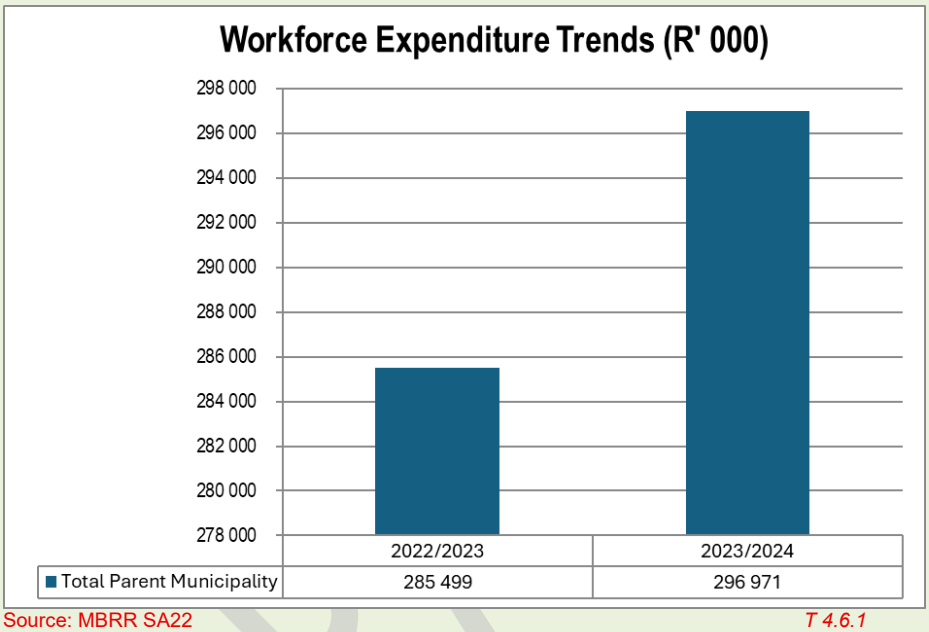

INTRODUCTION TO WORKFORCE EXPENDITURE

It is critical to manage workforce expenditure. Pressures to fill vacancies within budgetary constraints placed a strain on the certain components of the workforce, especially in essential services areas of fire and rescue services, water and sanitation, electricity and refuse collection. The vacancy rate within these components saw a substantial increase in expenditure on overtime. This is still to ensure that services are still rendered within the limited human resources employed and available. Concerted efforts must still be made to reduce overtime and to employ additional staff to address human resource shortages.

T 4.6.0

DRAFT

4.6 EMPLOYEE EXPENDITURE

Source: MBRR SA22 *T 4.6.1*

COMMENT ON WORKFORCE EXPENDITURE:

Employee cost to total operating expenditure measures the total employment cost to total operating expenditure and the norm is between 25% - 40%. Lekwa Local Municipality is within the acceptable norm, it is on the increase and if not monitored, it will approach the upper end of the norm. It must also be noted that total workforce expenditure decreased due to the municipality being placed under administration, thus reducing overall councillor remuneration costs.

T 4.6.1.1

DISCLOSURES OF FINANCIAL INTERESTS

Annually, Councillors as political office bearers, senior officials and Supply Chain Management officials are required to complete declarations indicating financial interest, thus a disclosure form is completed.

It is also a requirement that section 56 senior management must declare their financial interest and other interest when signing their annual performance agreements with the Municipal Manager. The Municipal Manager also signs a declaration for financial interest and submits it to the Executive Mayor with the signed performance agreement. Appendix J tabulated the disclosures made.

T 4.6.6

Chapter 5

CHAPTER 5 – FINANCIAL PERFORMANCE

INTRODUCTION

Chapter 5 contains information regarding financial performance and highlights specific accomplishments and reports on financial matters. The chapter comprises of three components:

- Component A: Statement of Financial Performance
- Component B: Spending Against Capital Budget
- Component C: Other Financial Matters

T 5.0.1

COMPONENT A: STATEMENTS OF FINANCIAL PERFORMANCE

INTRODUCTION TO FINANCIAL STATEMENTS

The statement is assessed by summarizing how the municipality incurs its revenues and expenses through both operating and non-operating activities. It also shows the net profit or loss incurred over a specific accounting period. These include service charges and the various expenses incurred during the processing as well as the rendering the services.

Revenue management, and particularly revenue assurance, should be high up on the list of priorities.
Debt owed to municipality was R 2 231 070 037 with R 1 416 977 571 impaired as a result of non-payment of services. In addition, the municipality had payables from exchange transactions amounting to R 3 814 935 193. Effective revenue assurance could rescue the municipality and underpin improved financial management, especially at a time where more challenges are forecast for the South African economy, already caught in the grip of stagnant economic growth. As the economy continues to decline, the municipality will face even bigger challenges in generating revenue. The continued restructuring and closure of businesses, which lead to job losses, would have far reaching effects for the municipality.

Revenue generated from rates, taxes, and service charges will also dwindle and the ratio of indigents compared to paying customers is likely to increase.

The equitable share from national government is expected to be under pressure going forward. So, while communities deserve and continue to demand quality and timely services, some members of communities cannot afford to pay for the services rendered.

It is, therefore, imperative that the municipality develop a comprehensive revenue assurance system. Financial sustainability can be achieved through appropriate funding, financial viability, revenue generation capability, and revenue management processes.

Auditor General fees is the service for the external audit provided by the Auditor General of South Africa. The total cost was R 9.2 million.

The operating deficit is attributed mainly to bulk purchases, employee related costs, debt impairments and write off of irrecoverable debt as well as depreciation incurred during the financial period under review. The Municipality has put in place systems to address the deficit and to ensure that the Municipality is financially sustainable. This includes revenue enhancement, cost curtailment, ensuring that trading services are operating efficiently in order to reduce the trading losses.

The table below reflects the performance of trading services. The real picture is that comparing the actual revenue to expenditure, all services are running at a deficit. These services are yet to yield profit. The attributes to the deficits are the following factors:

1) Tariffs are not cost reflective
2) Billing that is inaccurate
3) High operating costs such as bulk purchases and employee related costs.

The Municipality in conjunction with National Treasury, Vodacom and the Development Bank of South Africa (DBSA) has initiated numerous revenue enhancement programs in order to improve the revenue of the Municipality whilst protecting the current revenue streams available to the Municipality. This includes but is not limited to:

Valuation roll reconciliation to ensure completeness of property rates billing

DRAFT

Tariff review to ensure that tariffs are realistic and the Municipality is able to recoup the cost for the provision of services
Policy reviews to ensure adherence with applicable legislation
Improve meter reading
Installation of electricity smart meters
Water meter replacement and exposing meters that are not easily accessible
Performance of monthly billing reconciliation to ensure completeness of revenue generated
Increase access to pay point and receipt management to allow consumers to pay for services at various payment points
Intensification of indigent registration and management in response to the socio-economic climate, to protect the poor from the severe economic impact
Vigorous implementation of credit control and debt collection
The Municipality has finalized a project to secure electricity kiosks to avoid tampering with electricity infrastructure.

Remedies to these challenges will be to strictly applied and adhered to ensure austerity and cost curtailment measures.

Chapter 5

DRAFT

COMMENT ON FINANCIAL PERFORMANCE

The Municipality had a total operating revenue for the reporting period ending 30 June 2025 which amounted to R 1 282 433 841 which shows an decrease of R 298 471 028 when compared to the operating revenue for the period ended 30 June 2024 where the operating revenue amounted to R1 563 679 251 (Restated). The decrease was mainly due to a decrease in Public Contributions and donations of R 221 989 737. The municipality applied to participate in the DWS Municipal debt relief programme and was approved on 14 August 2025.

Grants receipts contributed R 219 million (19.3%) of the total revenue while revenue generated from property rates as well as service charges contributed R 840 311 755 million (66.4%) to the total revenue mix.

Although there are no specific norms and standards set to measure grant dependency, given the revenue mix outcome, this indicates that the Municipality is not entirely dependent on grants and subsidies to finance its operations, but more can be done to improve own revenue generation. The municipality is implementing various revenue enhancement programs that will assist in reducing the operating deficit over the multi-year period.

The total revenue of the Municipality at the end of June 2025 has reduced by R 298 million (19%) when compared to the reporting period ended 30 June 2025.

The main sources of revenue excluding Grants and Subsidies for the 2024/25 financial year were as follows:
Electricity R 459 million (35.8%)
Property Rates R 201 million (15.6%)
Water R 83 million (6.4%)
Sanitation R 68 million (5.3%)
Refuse R 20 million (1.5%)

The revenue generated from sales of electricity contributed 26.5% (R 459 million) of the total revenue mix, thus indicating that the electricity business unit should be nurtured and operated efficiently to ensure increased revenue from this service. This includes ensuring revenue protection by removing illegal connections, replacing bridged and tampered meters, ensuring accuracy of billing by effecting correct tariffs that are billed on time and accurate meter readings being taken.

The Municipality had a total operating expenditure for the reporting period ending 30 June 2025 amounting to R 1 663 817 204. There was an increase in expenditure which amounted to R 131 544 255 when compared to the period ended 30 June 2024. The main contributors to this increase are the increase in bulk purchases of R126 984 522, contracted services of R27 494 294 and employee related costs of R48 404 803. The Municipality was able to reduce Debt impairment by R24 596 961, this can be attributed to an improvement in collection rate and a change in impairment calculation methodology.

DRAFT

The following expenditures remains the highest cost drivers and have a significant impact on the revenue of the Municipality thus requiring the Municipality to vigorously implement the revenue enhancement strategy and continuous cost curtailment measures:
Bulk purchases R 651 million (39%)
Employee related costs R 327 million (19.6%)
Debt impairment R 182 million (10.9%)
Depreciation R 63 million (3.7%)
Finance costs R 144 million (8.6%)
Contracted services R 156 million (9.3%)

The Municipality has further implemented cost curtailment measures as well as the establishment of a cash flow management committee in order to reduce expenditures. The Municipality is committed to reducing running overheads such as overtime, standby, telephone costs, printing and stationery, including the reduction of non-essential procurement and expenditure. Furthermore the municipality took an initiative to renegotiate contracts with its service providers to reduce their scopes to affordable levels. Adequate provision is made towards expenditure that can improve service delivery on water network maintenance, improved sanitation, electricity maintenance and road maintenance amongst other expenditure.

The municipality had a deficit for the year of R358 904 192 for the period ending June 2025. The Municipality had cash and cash equivalents amounting to R16 240 927 at the end of June 2025.

COMMENT ON GRANTS

Grants receipts contributed R244 million (19%) of the total revenue mix. This further affirms that the Municipality does not depend entirely on grants to finance its operations.

Although there are no specific norms and standards set yet to measure grants dependency, given the revenue mix outcome it is evident that the Municipality is not dependent on grants and subsidies to finance the operations. The municipality endeavors to implement various revenue enhancement programs that will assist in reducing the operating deficit over the multi-year period.

The Municipality had unspent conditional grants amounting to R 10 million for the Disaster Management Relief Grant in the 2023/2024 Financial year. The unspent grant mainly relates to the timing when the funds were transferred to the Municipality, which was in March 2024. The unspent grant was fully spent in 2024/2025 financial year. The allocation was earmarked for projects to be implemented in the 2023/2024 and 2024/2025 financial years.
In an effort to ensure that projects are completed in time and all conditional grants are spent by the end of the financial year, the Municipality has streamlined the appointment of consultants and contractors. The Municipality concluded multiyear appointment of consultants and contractors.

The non-conditional equitable share grant was utilized for indigents' free basic services and to cover other operational expenses. The Finance Management Grant as a conditional grant was used for its intended purposes.

T 5.2.2

COMMENT ON CONDITIONAL GRANTS AND GRANT RECEIVED FROM OTHER SOURCES:

The Municipality received R 11 million as part of the Municipal Disaster Relief Grant for the 2023/2024 financial year. Though the grant was unspent as 30 June 2024, the funding was earmarked for projects to be implemented in the 2024/2025 financial year.

T 5.2.4

5.3 ASSET MANAGEMENT

INTRODUCTION TO ASSET MANAGEMENT

The Municipality made significant strides in ensuring that assets are verified periodically. All assets that required bar codes were bar coded and those that required GPS co-ordinates had been provided. The assets are annually recorded in the Annual Financial Statement in terms of GRAP standards, Council's assets management policy and accounting policy. Recognition also take effect of depreciation and impairment where it is applicable.

The Asset Management Policy was developed to comply with all relevant legislative requirements and complies with the standards specified by the Accounting Standards Board. Asset management within the municipality is overseen by the Chief Financial Officer.

The Chief Financial Officer established and maintained an asset register containing key financial data on each item of property, plant, or equipment that satisfies the criterion for recognition.

Organizing Asset Management, Staff Involved, and Delegations

The CFO is responsible to the Municipal Manager and needs to ensure that the financial investment in the municipality's assets is safeguarded and maintained.
The Asset Manager must ensure that appropriate physical management and control systems are established and maintained for all assets in their area of responsibility and that the municipal resources assigned to them are utilized effectively, efficiently, economically, and transparently.
The Asset Champion must assist the Asset Manager in performing his/her functions and duties in terms of asset management.

T 5.3.1

COMMENT ON ASSET MANAGEMENT

There are three major types of assets that the municipality has focused on:

Water: the municipality has and is focusing on a drive to ensure that there is adequate water supply as well as ensuring that the quality standards of water supply are always maintained.

Waste water treatment plant and sewer: The sewer pump stations which were not functional have been refurbished to ensure transmission of sewer to the Standerton WWTW. It is noted that the capacity of the Standerton waste water treatment works is unable to meet the current effluent demand. This might lead to processes of litigations against the municipality, which will result in high provision on contingencies.

Electricity: A number of projects have been undertaken towards improved electricity supply.

T 5.3.3

Repair and Maintenance Expenditure: 2024/2025				
				R' 000
	Original Budget	Adjustment Budget	Actual	Budget variance
Repairs and Maintenance Expenditure	65 801	71 069	79 268	20%
				T 5.3.4

COMMENT ON REPAIRS AND MAINTENANCE EXPENDITURE

Repairs and maintenance expenditure amounted to R79 million in 2024/2025. A larger portion was spent on the electricity network, water and sanitation. The R79 million expenditure on repairs and maintenance represent 4.7% of the total operating expenditure compared to the 8% norm. It should be noted that this reflect a 1.7% increase when compared to the expenditure incurred during the 2023/2024 reporting period. The Municipality has prioritized expenditure towards repairs and maintenance in an effort to improve service delivery.

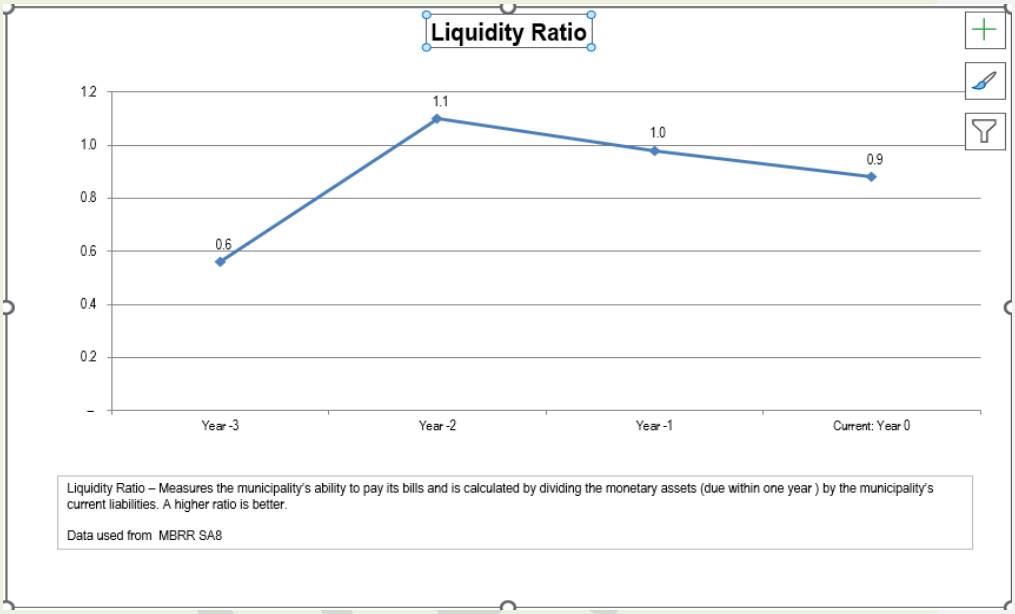

The aging infrastructure of the municipality in actual fact requires that larger amounts be made available for the maintenance and replacement of especially water pipes and electricity network.

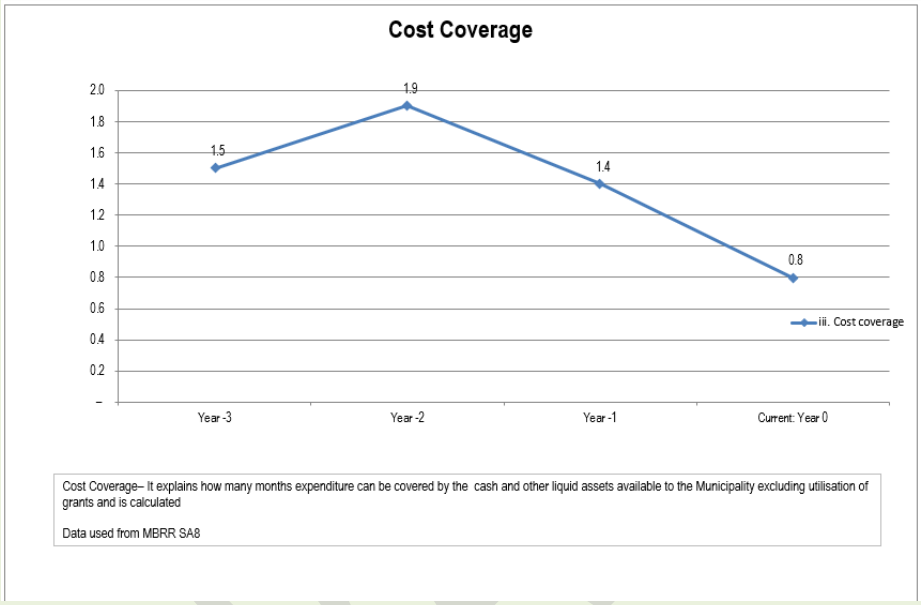

However, the pressure placed on budget provision for the extension of infrastructure to cater for new developments limits the availability of funds for maintenance purposes. The intention is to substantially increase maintenance expenditure in future budgets. The amount spent on repairs and maintenance is for materials only and decline proportionate to the budget considering the increases in other expenditures.

T 5.4.8

COMMENT ON FINANCIAL RATIOS

The **liquidity ratio** measures the extent to which the municipality has cash and short term investments available to settle short-term liabilities. The ratio has not increased, meaning the municipality is less able to settle its short-term liabilities with cash and short-term investments.

The **cost coverage ratio** indicates the time taken to pay for expenditure incurred to be paid; this has increased. It thus indicates that the Municipality takes longer to pay its creditors faster.

Total **outstanding service debtors to revenue** has increased. This indicates that fewer accounts are recoverable in proportion to billed revenue.

Repairs and maintenance is gradually increasing, which highlights the intension of the municipality to repair and maintain service delivery assets. The municipality must persistently repair these assets to ensure quality services to communities.

These ratios are derived from table **SA8 of the MBRR.**

T 5.4.9

COMPONENT B: SPENDING AGAINST CAPITAL BUDGET

INTRODUCTION TO SPENDING AGAINST CAPITAL BUDGET

Capital expenditure relates mainly to the construction of assets that will have value, lasting over many years. Capital expenditure is funded from grants, borrowings, and operating expenditures and surpluses.

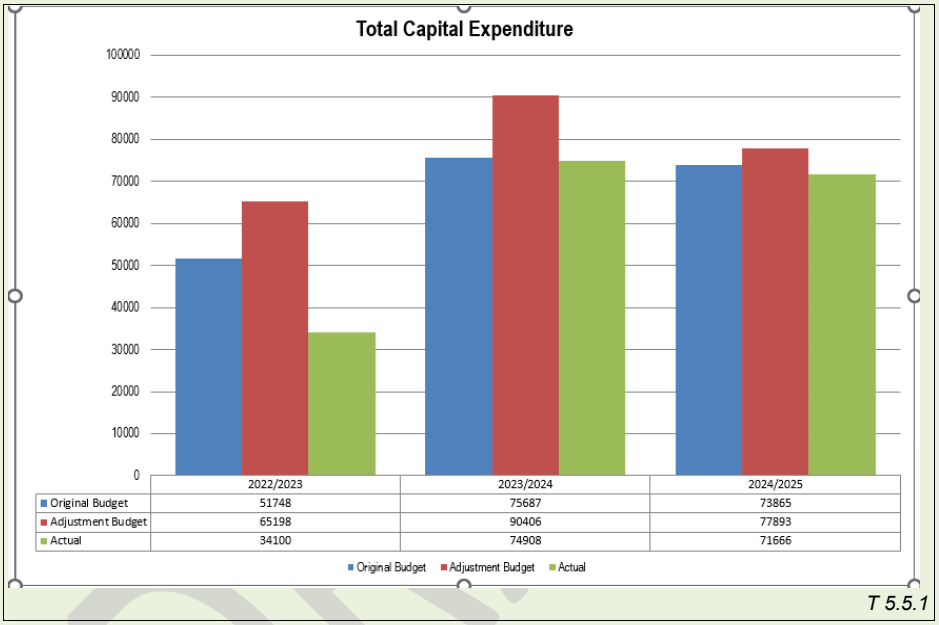

The five largest projects implemented were the Installation of high mast lights, rehabilitation of Vry Street, development of Thuthukani cemetery, construction of a 6 km electricity supply line and construction of a switching station.

The budget provision to complete projects in the are limited as the MIG allocation is insufficient to complete the projects within a one-year financial cycle. Other sources of funding are to be explored in order to ensure that projects are completed within a reasonable period. These projects were implemented to ensure that Council priorities were attended to.

T 5.7.1

COMMENT ON CAPITAL PROJECTS:

The five largest projects implemented were the Installation of high mast lights, rehabilitation of Vry street, development of Thuthukani cemetery, construction of a 6 km electricity supply line and construction of a switching station.

DRAFT

The budget provision to complete projects in the are limited as the MIG allocation is insufficient to complete the projects within a one-year financial cycle. Other sources of funding are to be explored in order to ensure that projects are completed within a reasonable period. These projects were implemented to ensure that Council priorities were attended to.

T 5.7.1.1

5.8 BASIC SERVICE AND INFRASTRUCTURE BACKLOGS – OVERVIEW

INTRODUCTION TO BASIC SERVICE AND INFRASTRUCTURE BACKLOGS

Masterplans need to developed or revised and costed per infrastructure service in order to correctly allocate financial resources where mostly needed and in terms of reprioritizing the needs of the municipality. Assets that are not properly maintained will cost the user and municipality more in the future. Proper planning based on the plans will improve service delivery.

T 5.8.1

Service Backlogs as at 30 June 2024

Households (HHs)

	*Service level above minimum standard		**Service level below minimum standard	
	No. HHs	% HHs	No. HHs	% HHs
Water	36236	93,92	2347	6,08
Sanitation	37337	96,77	1246	3,23
Electricity	34645	89,79	2130	10,21
Waste management	23862	63,91	13472	36,09
Housing	34145	88,50	4438	11,50

*% HHs are the service above/below minimum standard as a proportion of total HHs. 'Housing' refers to * formal and ** informal settlements.* *T 5.8.2*

COMMENT ON BACKLOGS:

MIG and INEP grants were used to address the backlogs, although the available funding is insufficient to completely address all backlogs, thus the phased approach as multi-year projects to ensure he eventual upgrade and refurbishment of such backlogs.

T 5.8.4

COMPONENT C: CASH FLOW MANAGEMENT AND INVESTMENTS

INTRODUCTION TO CASH FLOW MANAGEMENT AND INVESTMENTS

Proper cash flow management is a critical element to ensure the municipality meets its obligations. A stable positive cash flow balance relative to the growth of the municipality is a good indication of the municipality financial position and health. Cash flow projections are done on a monthly basis, and cash not immediately required are invested for a better return on the short term.

5.11 PUBLIC PRIVATE PARTNERSHIPS

PUBLIC PRIVATE PARTNERSHIPS

The Municipality did not have any public private partnerships for the year under review.

T 5.11.1

COMPONENT D: OTHER FINANCIAL MATTERS

5.12 SUPPLY CHAIN MANAGEMENT

SUPPLY CHAIN MANAGEMENT

Supply chain management (SCM) is the oversight function of materials, information, and finances as they move in a process from supplier to the Municipality. Supply chain management involves coordinating and integrating these flows. It is said that the ultimate goal of any effective supply chain management system is to reduce stock levels, with the assumption that products are available when needed.

The department (usually abbreviated to SCM) manages the supply and acquisition of goods and services to the Municipality or on behalf of the Municipality. This includes construction works and consultant services, the disposal of goods no longer needed, and the selection of contractors to assist in the provision of municipal services.

DRAFT

SCM is responsible for ensuring a sound, sustainable and accountable supply chain process that promotes black economic empowerment and local economic development, and encourages small businesses and joint venture partnerships. This procurement system must be fair, equitable, transparent, competitive and cost effective, in accordance with the Constitution of South Africa. The composition of SCM consists of Demand, Acquisition and Logistic Management. The Unit has 7 permanent employees and 2 vacancies.

The Municipality has established 3 Committees, namely: Specifications Committee, Evaluation Committee and the Adjudication Committee. No councillors are members of any committee of the committees dealing with supply chain processes.

The Council has approved a Supply Chain Management (SCM) Policy with practises in compliance with the guidelines set down by the Supply Chain Management Regulations, 2005, which was approved with effect from 1 March 2006. The new Preferential Procurement Regulations, 2011, with effect from 7 December 2011 has been incorporated into the policy as adopted. The SCM policy is reviewed annually with other budget-related policies to incorporate any changes that were not covered in the previous policy, taking into consideration legislative and regulatory circulars and provisions.

The Auditor General indicated significant issues regarding the SCM Unit which included:

Some of the goods and services of a transaction value above R200 000 were procured without inviting competitive bids, as required by SCM Regulation 19(a). Deviations were approved by the accounting officer even though it was not impractical to invite competitive bids, in contravention of SCM Regulation 36(1).

Some of the quotations were accepted from bidders who did not submit a declaration on whether they are employed by the state or connected to any person employed by the state, as required by SCM Regulation 13(c). Similar non-compliance was also reported in the prior year.

Some of the invitations for competitive bidding were not advertised for a required minimum period of days, in contravention of SCM Regulation 22(1) and 22(2).

The invitation to tender for procurement of commodities designated for local content and production, did not stipulate the minimum threshold for local production and content as required by the 2017 Preferential Procurement Regulation 8(2). Similar non-compliance was also reported in the prior year. Similar non-compliance was also reported in the prior year.

The performance of some of the contractors or providers was not monitored on a monthly basis, as required by section 116(2) (b) of the MFMA. Similar non-compliance was also reported in the prior year.

DRAFT

The Municipality has introduced various systems to curb the increase in irregular expenditure. This includes but not limited to:
1) Restructuring the Supply Chain Management Unit to be in line with the SCM Pillars
2) Introduction of SoPs and checklists to ensure adherence to SCM policies and Regulations
3) Establishment and appointment of Bid Committees in line with the SCM Regulations
4) Introduction of Request for Quotes register
5) Introduction of contract management policy.

The Municipality has developed Unauthorised Irregular Fruitless and Wasteful expenditure reduction strategy. The centralisation of the supply chain management function will further strengthen the managing of service providers as well as the procurement of goods and services.

T 5.12.1

5.13 GRAP COMPLIANCE

GRAP COMPLIANCE

GRAP is the acronym for **G**enerally **R**ecognized **A**ccounting **P**ractice and it provides the rules by which municipalities are required to maintain their financial accounts. Successful GRAP compliance also ensures that municipal accounts are comparable and more informative for the Municipality. It also ensures that the municipality is more accountable to its citizens and other stakeholders. Information on GRAP compliance is needed to enable National Treasury to assess the pace of progress and consider the implications.

The Municipality has not deviated from applicable GRAP Standards applicable to Municipalities

In the current year, the Municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

The following GRAP standards have been approved and effective to the municipality for the 2024/2025 financial year:

GRAP 1 (amended) Presentation of Financial Statements (materiality) – effective 1 April 2023
GRAP 21 The effect of past decisions on materiality – effective 1 April 2023
GRAP 25 (as revised) Employee Benefits – effective 1 April 2023
GRAP 2020 Improvements to the standards GRAP 2020 – Effective 1 April 2023
Guideline: Guideline on accounting for landfill sites

Chapter 6

CHAPTER 6 – AUDITOR GENERAL AUDIT FINDINGS

INTRODUCTION

Note: The Constitution S188 (1) (b) states that the functions of the Auditor-General includes the auditing and reporting on the accounts, financial statements and financial management of all municipalities. MSA section 45 states that the results of performance measurement… must be audited annually by the Auditor-General. Every municipality must for each financial year prepare annual financial statements which fairly presents the state of affairs of the municipality, its performance against its budget, its management of revenue, expenditure, assets and liabilities, its business activities, its financial results, and its financial position as at the end of the financial year; and disclose the information required in terms of sections 123, 124 and 125 of the MFMA.

Annual financial statements must be prepared within two months after the end of the financial year to which those statements relate and submit the statements to the Auditor-General for auditing. The accounting officer is responsible to at least once per year measures and reviews the performance of the municipality. The results of the performance measurement must be audited annually by the Auditor-General.

Therefore the performance results are submitted with the annual financial statements.

The responsibility of the Auditor-General is to express an opinion on the financial statements based on the audit. The audit is conducted in accordance with International Standards on Auditing. Those standards require that the Auditor-General comply with ethical requirements, a plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the municipality's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in circumstances, but not for the purpose of expressing an opinion on the effectiveness of the municipality's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Chapter 6

The Auditor-General must audit the financial statements and performance results and submit an audit report to the accounting officer within three months of receipt of the statements.

Non-Compliance Issues	**Remedial Action Taken**
Non-compliance issues and the remedial action plan is being attended to. The audit recovery action plan is attached as Appendix T6.2	

** This table will be completed prior to the publication of the Annual report but following the receipt of the Auditor- General Report on Service Delivery Performance Year 0*

*** Inclusion of "Status" depends on nature of AG's remarks on Performance Data.*

T 6.2.2

AUDITOR GENERAL REPORT ON THE ANNUAL FINANCIAL STATEMENTS: 2024/2025

The following is the 2024/2025 Audit Report as received from AGSA:

In my opinion, except for the effects of the matters described in the basis for qualified opinion section of this auditor's report, the financial statements present fairly, in all material respects, the financial position of the Lekwa Local Municipality as at 30 June 2025, and financial performance and cash flows for the year then ended in accordance with the Standards of Generally Recognised Accounting Practise (GRAP), the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) the Division of Revenue Act 5 of 2023 (Dora).

1. Basis for qualified opinion

Irregular expenditure

2. The municipality did not include all instances of irregular expenditure in the financial statements, as required by section 125(2)(d) of the MFMA, as the municipality did not have adequate systems to identify all prior year's irregular expenditure. I was unable to determine whether any further adjustments were necessary to the closing balance of irregular expenditure for the current and prior year. Consequently, I was unable to determine the full extent of the understatement of irregular expenditure stated at R1,07 billion (2023-24: R1,04 billion) in note 56 to the financial statements, as it was impracticable to do so.

Receivables from exchange transactions

3. The provision for impairment of debtors was not calculated in accordance with the Standards of GRAP 104, Financial Instruments. A general rate was applied for all the debtors in calculating the impairment provision, without assessing the credit risk for a group or subgroup of debtors. Additionally, the data used to calculate the impairment included accounts belonging to the municipality. Consequently, I was unable to determine the impact on debt impairment stated at R182,18 million (2023-24: R206,78 million) in note 35 to the financial statements and receivable from exchange transactions R579,58 million (2023-24: R459,33 million) in note 3 to the financial statements, as it was impracticable to do so.

Receivables from exchange transactions

4. Receivables from non-exchange transactions the provision for impairment of debtors was not calculated in accordance with the standards of GRAP 104, financial instruments. a general rate was applied for all the debtors in calculating the impairment provision, without assessing the credit risk for a group or subgroup of debtors. additionally, the data used to calculate the impairment included accounts belonging to the municipality. consequently, I was unable to determine the impact on debt impairment stated at r182,18 million (2023-24: R206,78 million) in note 35 and receivable from non-exchange transactions r301,46 million (2023-24: R289,53 million) in note 4, as it was impracticable to do so.

Bad deft written off

5. The municipality did not account for bad debt written off in accordance with GRAP 1, Presentation of financial statements. The bad debt written off in the current and previous year was not accounted for and disclosed in the financial statement. As a result, the expenditure was understated by R19, 44 million (2023-24: R 123,96 million), and I was unable to determine the full extent of receivables from exchange and non-exchange transactions as it was impractical to do so. Additionally, there was an impact on the deficit for the period and the accumulated surplus.

Contracted Services

6. The municipality did not have adequate systems to account for contracted services in accordance with GRAP 1, Presentation of financial statements, as contracted services was not recorded in correct accounting period. This resulted in contracted services being overstated by R22,28 million. Additionally, there was an impact on the deficit for the period.

VAT output accrual

7. The municipality did not have adequate systems to account for vat output accrual in accordance with GRAP 104, Financial Instrument. The municipality control accounts for the effects of receipts received and debt write-offs. Consequently, I was unable to determine the full extent of the overstatement of VAT output accrual stated at R 905, 81 million (2023-24: R 777, 79 million) in note 14 to the financial statements, as it was impracticable to do so.

VAT input accrual

8. The municipality did not have adequate systems to account for vat input accrual in accordance with GRAP 104, Financial Instrument. The municipality did not account for the effects of payments made. Consequently, I was unable to determine the full extent of the overstatement of VAT input accrual stated at R 905, 81 million (2023-24: R 777, 79 million) in note 6 to the financial statements, as it was impracticable to do so.

Cash flow statement

9. Service charges and property rates, other services

The municipality's service charges and property rates, other services in the current and prior year were not correctly prepared and disclosed as required Standards of GRAP 2, Cash flow statements. This was due to multiple errors in the calculations. I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Interest received from current and non-current asset

10. The municipality's interest received from current and non-current assets in the current and prior year were incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Employee costs

11. The municipality's employee costs were incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Suppliers

12. The municipality's suppliers in the current year and prior year were incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Purchase of property and equipment

13. The municipality's Purchase of property plant and equipment was incorrectly disclosed due to multiple errors in the calculation which constitute a departure from GRAP 2, Cash flow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

Cash generated from operating activities

14. Cash generated from operating activities note was not correctly disclosed as various movements were not correct accounted for due to state of accounting records, which constitute a departure from GRAP 2, Cash I/ow statement. Consequently, I was not able to determine the full extent of the errors in the net cash flows from operating activities, as it was impracticable to do so.

COMMENTS ON AUDITOR GENERAL'S OPINION: 2023/2024

The Municipality is committed to further improving the audit where the ultimate objective is to obtain an unqualified Audit Opinion (Clean Audit). This process will be closely monitored through the developed post audit action plan to address the audit findings that remained. The following key findings will be addressed in the 2025/2026 financial year:

- Irregular expenditure
- Receivable from exchange and non - exchange
- Cash flow statement
- Vat output and input Accrual
- Contracted services
- Bad debt written off

The Municipality has developed an audit action plan that will be monitored on a quarterly basis in an effort to ensure that we are able to improve from the qualified audit opinion. The Municipality will again request Auditor General (SA) to perform a status of records review, which has assisted as an early warning or alert system to enable the Municipality to take required steps to correct potential control

deficiencies. It will also assist in the implementation of the action plan to be more insightful and relevant, ensuring greater impact towards an improved audit outcome for the 2025/2026 financial year.

In order for the Municipality to improve the audit outcome, it will be important to constantly look at ways to further improve systems and the key drivers of internal control in order to move from the recently obtained qualified audit outcome in the 2024/2025 financial year, to an unqualified audit outcome for 2025/2026.

Emphasis will also be placed on improving areas for the audit of performance against predetermined objectives by ensuring that findings raised in respect consistency between planned and reported Indicators and targets as well as consistency between planning and reporting documents to ensure that indicators are well defined and additional reviews of reported achievements in the annual performance report will be undertaken.

The Municipality will continue to strive to improve in respect of the following key aspects:
a) Governance.
• A functional Internal Audit unit
• Quarterly performance reviews.
• Functional Audit Committee.
• Compliance with legislation.
b) Financial Management.
• Records keeping and document management.
• Adherence to reporting requirements.
• Compliance to Generally Recognized Accounting Practice (GRAP) accounting standards.
• Monthly balancing of registers and control accounts.

COMMENTS ON MFMA SECTION 71 RESPONSIBILITIES:

Section 71 of the MFMA requires municipalities to return a series of financial performance data to the National Treasury at specified intervals throughout the year. The Chief Financial Officer confirms that these data sets have been returned according to the reporting requirements.

Signed (Chief Financial Officer)…….... Dated

GLOSSARY

GLOSSARY

Accessibility indicators	Explore whether the intended beneficiaries are able to access services or outputs.
Accountability documents	Documents used by executive authorities to give *"full and regular"* reports on the matters under their control to Parliament and provincial legislatures as prescribed by the Constitution. This includes plans, budgets, in-year and Annual Reports.
Activities	The processes or actions that use a range of inputs to produce the desired outputs and ultimately outcomes. In essence, activities describe *"what we do"*.
Adequacy indicators	The quantity of input or output relative to the need or demand.
Annual Report	A report to be prepared and submitted annually based on the regulations set out in Section 121 of the Municipal Finance Management Act. Such a report must include annual financial statements as submitted to and approved by the Auditor-General.
Approved Budget	The annual financial statements of a municipality as audited by the Auditor General and approved by council or a provincial or national executive.
Baseline	Current level of performance that a municipality aims to improve when setting performance targets. The baseline relates to the level of performance recorded in a year prior to the planning period.
Basic municipal service	A municipal service that is necessary to ensure an acceptable and reasonable quality of life to citizens within that particular area. If not provided it may endanger the public health and safety or the environment.
Budget year	The financial year for which an annual budget is to be approved – means a year ending on 30 June.
Cost indicators	The overall cost or expenditure of producing a specified quantity of outputs.
Distribution indicators	The distribution of capacity to deliver services.
Financial Statements	Includes at least a statement of financial position, statement of financial performance, cash-flow statement, notes to these statements and any other statements that may be prescribed.
General Key performance	After consultation with MECs for local government, the Minister may prescribe general key performance indicators that are appropriate and

GLOSSARY

indicators	applicable to local government generally.
Impact	The results of achieving specific outcomes, such as reducing poverty and creating jobs.
Inputs	All the resources that contribute to the production and delivery of outputs. Inputs are "what we use to do the work". They include finances, personnel, equipment and buildings.
Integrated Development Plan (IDP)	Set out municipal goals and development plans.
National Key performance areas	• Service delivery & infrastructure • Economic development • Municipal transformation and institutional development • Financial viability and management • Good governance and community participation
Outcomes	The medium-term results for specific beneficiaries that are the consequence of achieving specific outputs. Outcomes should relate clearly to an institution's strategic goals and objectives set out in its plans. Outcomes are "what we wish to achieve".
Outputs	The final products, or goods and services produced for delivery. Outputs may be defined as "what we produce or deliver". An output is a concrete achievement (i.e. a product such as a passport, an action such as a presentation or immunization, or a service such as processing an application) that contributes to the achievement of a Key Result Area.
Performance Indicator	Indicators should be specified to measure performance in relation to input, activities, outputs, outcomes and impacts. An indicator is a type of information used to gauge the extent to which an output has been achieved (policy developed, presentation delivered, service rendered)
Performance Information	Generic term for non-financial information about municipal services and activities. Can also be used interchangeably with performance measure.
Performance Standards:	The minimum acceptable level of performance or the level of performance that is generally accepted. Standards are informed by legislative requirements and service-level agreements. Performance standards are mutually agreed criteria to describe how well work must be done in terms of quantity and/or quality and timeliness, to clarify the

GLOSSARY

	outputs and related activities of a job by describing what the required result should be. In this EPMDS performance standards are divided into indicators and the time factor.
Performance Targets:	The level of performance that municipalities and its employees strive to achieve. Performance Targets relate to current baselines and express a specific level of performance that a municipality aims to achieve within a given time period.
Service Delivery Budget Implementation Plan	Detailed plan approved by the mayor for implementing the municipality's delivery of services; including projections of the revenue collected and operational and capital expenditure by vote for each month. Service delivery targets and performance indicators must also be included.
Vote:	One of the main segments into which a budget of a municipality is divided for appropriation of money for the different departments or functional areas of the municipality. The Vote specifies the total amount that is appropriated for the purpose of a specific department or functional area. Section 1 of the MFMA defines a "vote" as: *a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the municipality; and* *b) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned*

APPENDIX B – COMMITTEES AND COMMITTEE PURPOSES

APPENDIX B - COMMITTEES AND THEIR PURPOSES	
Committees (other than Mayoral / Executive Committee) and Purposes of Committees	
Municipal Committees	**Purpose of Committee**
AUDIT COMMITTEE	
1.Audit and Performance Audit Committee	The purpose of the Audit Committee is to advice the municipal Council, the political office-bearers, the accounting officer and Management staff of the municipality on matters relating to:
	1. Internal financial control and internal audits;

DRAFT

	2. Risk Management;
	3. Accounting Policies;
	4. The adequacy, reliability and accuracy of financial reporting and information;
	5. Performance management;
	6. Effective governance;
	7. Compliance with the MFMA, Division of Revenue Act (DoRA) and other applicable legislation;
	8. Performance evaluation; and
	9. Any other issues referred to it by the Municipality.
	In terms of Regulation 14 (c) of the Municipal Planning and Performance Management Regulations, 2001, the Municipality has opted to utilise the established Audit Committee as the Performance Audit Committee and is required to inter alia do the following:
	1. Review the quarterly reports submitted to it by the Internal auditors on the performance measurements of the municipality;
	2. Review the municipality's performance management system and make recommendations in this regard to the municipal council;
	3. At least twice during a financial year submit an audit report to the municipal council;
	4. Any other issues referred to it by the Municipality
MUNICIPAL PUBLIC ACCOUNTS COMMITTEE	
2. Municipal Public Accounts Committee (MPAC)	MPAC performs an oversight function on behalf of Council and is not a duplication of and should not be confused with the role played by the Audit Committee or that of the Finance Committee.
	The primary function of the MPAC is to assist Council to hold the executive and the municipal administration to account and to ensure the effective and efficient use of municipal resources. It executes this function by reviewing the accounts and financial statements of the municipality and exercising oversight on behalf of Council and to report to council on its activities.
	MPAC acts independently has the right to refer or receive matters and reports from other committees.
	MPAC may inter alia consider the following:
	To examine the annual financial statements;
	Any audit reports issued on the Annual Financial Statements;
	Any reports issued by the Auditor-General on the affairs of the municipality;
	Receive reports from the Audit Committee;
	Any other report referred to the Committee by Council;
	As an Oversight Committee, review the Annual Report on behalf of Council and make recommendations to Council thereafter;
	MPAC may also:
	Table reports with findings and recommendations on any financial statements or reports to Council;
	Initiate and develop the annual oversight report based on the annual report;
	Recommend and initiate any investigation in its area of competence;
	Seek information from any councillor, employee or any person outside council when conducting an investigation;
	Perform any other functions assigned to it by resolution of Council;
	When examining financial statements and audit reports, the committee to consider improvements from previous statements and must monitor the extent to which the committee's and the Auditor General's recommendations are implemented.
	The outcomes and the resolutions taken by the MPAC must be reported to Council and must be made public.
COUNCIL OVERSIGHT COMMITTEES	
3. Council section 79 Oversight Committees	The Council had established the following committees in terms of section 79 of the Municipal Structures Act, 117 of 2008 in order to allow an oversight role to be exercised in respect of service delivery and budget implementation:

	a) Corporate Services and Community Services and Safety
	b) Technical Services and Planning
	c) Budget and Treasury
RULES, ETHICS, BY-LAWS AND POLICIES COMMITTEE	
4. Rules, Ethics, By-laws & Policies Committee	Foster and maintain discipline among the Councillors
	Monitor the implementation of rules and ethical behaviour of Councillors
	Attend to petitions and motions
	Monitor the implementation of Council resolutions
	Review the standing orders
	Propose the establishment of a particular committee
	Review the delegations register
	Initiate the development, rationalisation and review of by-laws and policies
	Perform any other functions assigned to it by resolution of Council
LOCAL GEOGRAPHICAL NAMES COMMITTEE (LGNC)	
5. Local Geographical Names Committee (LGNC)	To identify or help to identify geographical features for possible name standardisation;
	To receive and process submissions/applications from individuals and or organisations regarding the standardization of geographical names;
	To conduct public participation programmes in which proposed name changes will be discussed by the relevant stakeholders;
	To ensure that the standardization of geographical names takes place within a municipal area of jurisdiction area in line with guidelines published by the Mpumalanga Provincial Geographical Names Committee (MPGNC);
	Create an atmosphere and mechanisms including sub structures, suitable for the participation of all stakeholders;
	To conduct awareness raising activities about the programme of standandising geographical names and to ensure that the public is adequately informed about such processes;
	Receive and strive to resolve any objections related to the process of standardizing geographical names in line with MPGNC guidelines for handling objections;
	Prepare and submit reports on a regular basis to Council, the Regional Geographical Names Committee and the MPGNC;
	Monitor the implementation of standardized geographical names in its jurisdictional area and report any failure to implement to Council and the MPGNC;
	Ensure that all the administration related to the process of standardizing geographic names in its jurisdictional area is properly addressed;
	Ensure correspondence with all parties concerned especially the applicants and identifiable objectors as per the applicable MPGNC guidelines;
	Interface and interact with the Town Planning, property developers and residents on the naming of any new settlements, streets, public spaces or any related geographic features;
	Implement provisions of the SAGNC Act, SAGNC Regulations, Provincial policy and related provincial regulations on the standardisation of geographic names as may be promulgated from time to time.

APPENDIX C –THIRD TIER ADMINISTRATIVE STRUCTURE

Within the Municipality, the next tier of the administrative structure consists of managers across the various departments. This tier of management is permanently employed and are not required to sign performance agreements on an annual basis. They are however bound by their approved and signed job descriptions as a means to hold them accountable for duties that ought to be performed. It is envisaged that the implementation of individual performance management and with the signing of

some kind of a commitment to hold this tier of management more responsible to fulfil their employment obligations will also be introduced.

Material Irregularities Status update							

DRAFT

2	That managemet SHOULD report on a quarterly basis on the MIS, they must give indication of what the two departments are doing in order to assit in implementing of the finding	The Municipality, through its appointed Consultant, initiated a process during the **2024/2025 financial year** to address the environmental non-compliance through the **Rehabilitation and Closure of the Morgenzon Landfill Site**. Accordingly, the Consultant, acting on behalf of the Municipality, **submitted an application for a closure licence to the Department of Agriculture, Rural Development, Land and Environmental Affairs (DARDLEA)**.Subsequently, **DARDLEA referred the application to the Department of Water and Sanitation (DWS)** for the issuance of a **Record of Decision (ROD)** as required under applicable environmental legislation. The **DWS reviewed the application and issued a Record of Decision dated 31 July 2025** (attached hereto as **Annexure A**).However, DWS later deemed the application **incomplete** and consequently **closed the file**, indicating that a **new, comprehensive application** must be submitted to ensure	Executive Manager : Community services	In progress			On-going

DRAFT

		full compliance with the relevant environmental and water legislation. The Municipality, in consultation with the appointed Consultant, has since **initiated internal processes** to compile and **resubmit a complete application to DARDLEA**, which will in turn be forwarded to DWS for consideration and issuance of a new Record of Decision.					
FINANCIAL REPORTS							

DRAFT

APPENDIX O – CAPITAL PROGRAMME BY PROJECT BY WARD

Capital Expenditure of 5 largest projects*					R' 000
Name of Project	**Current: 2023/2024**			**Variance: 2023/2024**	
	Original Budget	**Adjustment Budget**	**Actual Expenditure**	**Original Variance (%)**	**Adjustment variance (%)**
Construction of Kieser reservoir and pressure tower	27 952	27 545	27 545	1%	1%
Upgrade of Standerton Landfill site	18 000	18 000	18 000	0%	0%
Upgrade of A Sub (Phase 1)	7 000	7 000	7 000	0%	0%
Installation of VIP toilets	2 000	1 329	1 329	34%	34%
Installation of boreholes	1 000	998	998	0%	0%
Construction of Kieser reservoir and pressure tower					
Objective of Project	Improve storage and reduce water losses				
Delays	Delays in commissioning				
Future Challenges	None				
Upgrade of Standerton Landfill site					
Objective of Project	Improve landfill site operations				
Delays	None				
Future Challenges	Tariff enforcement				
Anticipated citizen benefits	Reduction in pollution				

Upgrade of A Sub (Phase 1)	
Objective of Project	Improved reliability of electricity supply
Delays	Delays in appointment of consultant and resultant delay in appointment of contractor
Future Challenges	Insufficient capacity due to densification
Anticipated citizen benefits	Improved access to electricity supply
Installation of VIP Toilets	
Objective of Project	Installation of rural sanitation
Delays	None
Future Challenges	None
Anticipated citizen benefits	Improved rural sanitation services
Installation of boreholes	
Objective of Project	Installation of boreholes in rural/farm areas
Delays	None
Future Challenges	None
Anticipated citizen benefits	Improved rural water services

T O

APPENDIX P – SERVICE CONNECTION BACKLOGS AT SCHOOLS AND CLINICS

Service Backlogs: Schools and Clinics					
Establishments lacking basic services	**Water**	**Sanitation**	**Electricity**	**Solid Waste Collection**	**Other**
Schools (NAMES, LOCATIONS)					
Madi School					Fencing
Ngobangolwazi School					General maintenance
Clinics (NAMES, LOCATIONS)					
Thuthukani					Currently mobile clinic service

Names and locations of schools and clinics lacking one or more services. Use 'x' to mark lack of service at appropriate level for the number of people attending the school/clinic, allowing for the proper functioning of the establishment concerned.

APPENDIX Q – SERVICE BACKLOGS EXPERIENCED BY THE COMMUNITY WHERE ANOTHER SPHERE OF GOVERNMENT IS RESPONSIBLE FOR SERVICE PROVISION

APPENDICES

Service Backlogs Experienced by the Community where another Sphere of Government is the Service Provider (where the municipality whether or not act on agency basis)		
Services and Locations	**Scale of backlogs**	**Impact of backlogs**
Clinics:		
Thuthukani (Ward 12)	Mobile Clinic that does not adhere to schedule	Preventable and curable illnesses not attended to, resulting in loss of lives from potentially preventable and curable illnesses. Traveling of long distances to get to available clinic and medical services
Morgenzon (Ward 14)	Available clinic does not provide 24-hour service	Preventable and curable illnesses not attended to, resulting in loss of lives from potentially preventable and curable illnesses. Traveling of long distances to get to available clinic and medical services
Housing:		
Shortage of RDP Housing (Various wards)	7129 informal dwellers	Illegal invasion of unserviced land places extra demand on municipal infrastructure
Police Stations		
Thuthukani (Ward 12)	Area expanding and insufficient policing with closest police station in Standerton	Increase in crime levels; Delay in reporting and responding to crimes
Eskom Service Centre		
Morgenzon (Ward 14)	Eskom as electricity provider do not have local office for fault reporting and other queries	Turnaround time to attend to reported faults and dealing with other queries takes longer.
Community Halls and Thusong Centres		
Ward 3	Community halls in need of major repairs and maintenance	Available community facilities not being utilised due to disrepair. Leads to vandalism
Ward 14	Community halls in need of major repairs and maintenance	Available community facilities not being utilised due to disrepair. Leads to vandalism
Schools (Primary and High):		
Primary School (Ward 14)	1 existing school in the area	Overcrowding of classes; learners traveling long distances to get to existing schools
High School (Ward 11)	1 existing school in the area	Overcrowding of classes; learners traveling long distances to get to existing schools
Sports Fields:		
Morgenzon (Ward 14)	Only 1st phase of sports precinct completed	Available facility incomplete and thus being underutilized
Various wards	Recreational facilities not safe with no security fencing	Recreational facilities and parks not safe for children to play in
Other:		
Agrivillages and grazing land	Land for small scale farming not available	Livestock grazing in and around town which can cause safety and health hazards
Burial space	Rate at which burial space is utilized increasing	Unavailability of burial space may create backlogs in burials
		T Q

DRAFT

APPENDICES

APPENDIX R – DECLARATION OF LOANS AND GRANTS MADE BY THE MUNICIPALITY

The Municipality had no loans and grants that were made to any organisation or person for the 2023/2024 financial year.

APPENDIX S – NATIONAL AND PROVINCIAL OUTCOMES FOR LOCAL GOVERNMENT

National and Provincial Outcomes for Local Government		
Outcome/Output	**Progress to date**	**Number or Percentage Achieved/Comment**
Output: Improving access to basic services	The following are findings as indicated in the final management report as issued by the Auditor General:	Development of infrastructure master plans is crucial for the timely implementation of maintenance programmes
	The municipality did not have an approved policy to address routine maintenance of water infrastructure.	
	The municipality did not plan for the maintenance of water infrastructure by setting specific time frames and targets	
	Targets and time frames for routine maintenance of water infrastructure were not achieved.	
	Conditional assessments were not done on water infrastructure to inform the routine water infrastructure maintenance plan and budget.	
	The municipality did not have an approved roads maintenance plan (RMP) for the renewal and routine maintenance of roads infrastructure.	
	The municipality did not perform condition assessments for all roads infrastructure under its control to inform the roads maintenance plan.	
	There was no approved priority list of roads infrastructure for the renewal and routine maintenance projects, which is used as a basis for the RMP.	
	The municipality had not implemented corrective actions to address all findings raised in the previous year.	
Output: Implementation of the Community Work Programme	1023 CWP workers as at 30 June 2024	100% achieved. Anticipated increase in number of CWP workers for the 2022/2023 financial year
Output: Deepen democracy through a refined Ward Committee model	Ward Committee model implemented with ward committee members earning monthly stipend. The establishment of war rooms has further strengthened and deepened democracy within the Municipality	Non-functional ward committees and war rooms to be revived as not all ward committees and war rooms are fully functional
Output: Administrative and financial capability	As per the audit findings and the management letter, the municipality is unable to meet its financial obligations due to cash flow constraints. In addition, in respect of providing effective leadership based on a culture of honesty, ethical business practices and good governance and protecting and enhancing the interest of the municipality, it has remained unchanged from the previous year, thus there is room for improvement.	Internal controls and standard operation procedure implementation must be strengthened to improve the administrative and financial capabilities.
