## **Accounting Officer's Responsibilities and Approval**

The accounting officers are required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officers to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officers acknowledge that they are ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officers to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officers are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officers have reviewed the municipality's cash flow forecast for the year to 30 June 2023 and, in the light of this review and the current financial position, they are satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's external auditors.

The annual financial statements set out from page 7, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2022 and were signed by:

Mr. B Maseloane Acting Municipal Manager

Annual Financial Statements for the year ended 30 June 2022

## **Audit Committee Report**

We are pleased to present our report for the financial year ended 30 June 2022.

#### Audit committee members and attendance

The audit committee consists of the members listed hereunder and should meet atleast 6 times per annum as per its approved terms of reference. During the current year 9 meetings were held.

Name of member	Number of meetings attended
Mr B Seabela (Chairperson)	9
Mr T Zororo	9
Ms L Moyo	9
Mr I Mogotsi	9

#### Audit committee responsibility

The audit committee reports that it has complied with its responsibilities arising from section 38(10)(1) of the MFMA and Treasury Regulation 3.1.

The audit committee also reports that it has adopted appropriate formal terms of reference as its Audit Committee charter, which codifies specific responsibilities entrusted and delegated to it by the municipal Council, and details the manner in which the Audit committee operates.

We confirm that the Audit committee has reviewed the unaudited Annual Financial Statements and Annual Perfomance report for the 2021/2022 financial year.

The Audit committee is satisfied that the Internal audit is operating efficiently and effectively, and that they were involved in adressing the risks pertinent to the municipality. The Internal audit activity was also afforded the opportunity to review the unaudited Annual Financial Statements and Annual Performance report.

Chairperson of the Audit Committee

Date.	

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Officer's Report**

The accounting officers submit their report for the year ended 30 June 2022.

#### 1. Review of activities

#### Main business and operations

The municipality is engaged in local service delivery to the surrounding community of Moses Kotane and operates under the Bojanala Platinum District Municipality.

Net surplus of the municipality is 6 207 997 (2021: surplus 151 321 846).

#### 2. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officers continue to procure funding for the ongoing operations for the municipality.

#### 3. Subsequent events

The accounting officers are not aware of any matter or circumstance arising since the end of the financial year.

#### 4. Accounting policies

The annual financial statements prepared in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury.

#### 5. Accounting Officer

The accounting officers of the municipality during the year and to the date of this report are as follows:

Name Mr. B Maseloane Changes
Appointed on

Mr. B Maseloane Mr V Letsoalo Appointed on 01 August 2022 Contract ended on 31 July 2022

#### 6. Corporate governance

#### General

The accounting officer is committed to business integrity, transparency and professionalism in all its activities. As part of this commitment, the accounting officer supports the highest standards of corporate governance and the ongoing development of best practice.

The municipality confirms and acknowledges its responsibility to excercise the Municipality's executive and legislative authority withing the constitutional system of cooperative governance envisaged in Section 41 of the Constitution, as stated in the Local Government Municipal Systems Act . The accounting officer discuss the responsibilities of management in this respect, at Council meetings and monitor the municipality's compliance with the MSA on a three monthly basis.

#### Remuneration

The upper limits of the remuneration, allowances and benefits of the Accounting Officer, the Head of Departments and the Councillors of the municipality, as disclosed in note 26 and in note 27 of the financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution, read with the Remuneration of the Public Office Bearers Act and the Minister of the Provincial and Local Governments determination in accordance with the Act.

Mr. B Maseloane Acting Municipal Manager

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

Figures in Rand Note(s) 2022 2021

#### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Other significant judgements, sources of estimation uncertainty and/or relating information, have been disclosed in the relating notes.

#### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 16 - Provisions.

#### **Employee Benefit Obligation**

The present value of the Employee benefit obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of employee benefit obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the long serveice award obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for employee benefit obligations are based on current market conditions. Additional information is disclosed in Note 7.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Impairment of statutory receivables

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures and impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, are reduced, either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

#### 1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

#### Derecognition

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Annual Financial Statements for the year ended 30 June 2022

## Accounting Policies

#### 1.4 Investment property (continued)

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

#### 1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land		Infinite
Buildings	Straight-line	5 - 100 years
Infrastructure - Electricity	Straight-line	10 - 100 years
Infrastructure - Roads	Straight-line	5 - 100 years
Infrastructure - Water	Straight-line	5 - 100 years
Infrastructure - Stormwater	Straight-line	5 - 50 years

Annual Financial Statements for the year ended 30 June 2022

## Accounting Policies

#### 1.5 Property, plant and equipment (continued)

Infrastructure - Sewerage	Straight-line	15 - 100 years
Infrastructure - ICT	Straight-line	10 - 50 years
Infrastructure - Airports	Straight-line	20 years
Access control security measures	Straight-line	3 - 5 years
Recreation facilities	Straight-line	10 - 100 years
Furniture and Fittings	Straight-line	7 years
Motor Vehicles	Straight-line	5 - 15 years
Office equipment	Straight-line	5 - 7 years
Plant and Equipment	Straight-line	4 - 15 years

For the detailed useful lives of assets, refer to the municipality's asset management policy.

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements.

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements.

### 1.6 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.6 Intangible assets (continued)

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the
  asset
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software	Straight-line	1 - 15 years

Intangible assets are derecognised:

- on disposal: or
- when no future economic benefits or service potential are expected from its use or disposal.

#### 1.7 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

### Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.7 Heritage assets (continued)

#### **Initial measurement**

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

#### Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

After recognition as an asset, a class of heritage assets, whose fair value can be measured reliably, is carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase is credited directly to a revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

#### Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

#### Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised.

#### 1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.8 Financial instruments (continued)

- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash:
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as
  forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.8 Financial instruments (continued)

• a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- contingent consideration of an acquirer in a transfer of functions between entities not under common control to which
  the Standard of GRAP on Transfer of Functions Between Entities Not Under Common Control (GRAP 106) applies
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.8 Financial instruments (continued)

#### Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

#### Class

Receivables from exchange transactions Receivables from non exchange transactions Consumer debtors

Cash and cash equivalents

#### Category

Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

#### Class

Other financial liabilities
Trade and other payables from exchange transactions

### Category

Financial liability measured at amortised cost Financial liability measured at amortised cost

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.8 Financial instruments (continued)

#### Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

#### Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

#### Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

#### Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset<sub>i</sub>'s carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset<sub>i</sub>'s original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

#### Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

#### Derecognition

#### Financial assets

The Municipality derecognises financial assets using trade date accounting.

The Municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the Municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
  - derecognise the asset; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.8 Financial instruments (continued)

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

#### Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived. The obligation for retentions is considered to have expired when the retention is unclaimed for more than 3 years from the date the defect liability period expired.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

#### Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

#### 1.9 Statutory receivables

#### Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

#### Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- If the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the
  receivable is recognised when the definition of an asset is met and, when it is probable that the future economic
  benefits or service potential associated with the asset will flow to the entity and the transaction amount can be
  measured reliably.

#### **Initial measurement**

The municipality initially measures statutory receivables at their transaction amount.

#### Subsequent measurement

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

### 1.9 Statutory receivables (continued)

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- · impairment losses; and
- · amounts derecognised.

#### **Accrued interest**

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

#### Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- Significant financial difficulty of the debtor, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- It is probable that the debtor will enter sequestration, liquidation or other financial re-organisation.
- A breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- Adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

In estimating the future cash flows, an municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk-free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

#### Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has
  transferred control of the receivable to another party and the other party has the practical ability to sell the receivable
  in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose
  additional restrictions on the transfer. In this case, the entity:
  - derecognise the receivable; and
  - recognise separately any rights and obligations created or retained in the transfer.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.9 Statutory receivables (continued)

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

#### 1.10 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

#### 1.11 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.11 Inventories (continued)

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

#### 1.12 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

#### Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

#### Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.12 Impairment of cash-generating assets (continued)

#### Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

#### Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

#### 1.13 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.13 Impairment of non-cash-generating assets (continued)

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

#### Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or an asset or cash-generating unit as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, that
  are expected to be significantly higher than the cost of the asset.

The municipality designates an asset as non-cash-generating when its objective is not to use the asset to generate a commercial return but to deliver services.

An asset used with the objective of generating a commercial return and service delivery, is designated either as a cashgenerating asset or non-cash-generating asset based on whether the municipality expects to use that asset to generate a commercial return. When it is not clear whether the objective is to use the asset to generate a commercial return, the municipality designates the asset as a non-cash-generating asset and applies this accounting policy, rather than the accounting policy on Impairment of Non-cash-generating assets.

#### Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.13 Impairment of non-cash-generating assets (continued)

#### Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

#### Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

### 1.14 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Vested employee benefits are employee benefits that are not conditional on future employment.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.14 Employee benefits (continued)

#### Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the
  absences is due to be settled within twelve months after the end of the reporting period in which the employees
  render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting
  period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
  undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent
  that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

#### 1.15 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.15 Provisions and contingencies (continued)

Provisions are not recognised for future operating surplus.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of an activity/operating unit concerned;
  - the principal locations affected:
  - the location, function, and approximate number of employees who will be compensated for services being terminated:
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 39.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.15 Provisions and contingencies (continued)

#### Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy 1.12 and 1.13.

If the related asset is measured using the revaluation model:

- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
  - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
  - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;
- in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the
  asset been carried under the cost model, the excess is recognised immediately in surplus or deficit;
- a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying
  amount does not differ materially from that which would be determined using fair value at the reporting date. Any
  such revaluation is taken into account in determining the amounts to be taken to surplus or deficit and net assets. If
  a revaluation is necessary, all assets of that class is revalued; and
- the Standard of GRAP on Presentation of Financial Statements requires disclosure on the face of the statement of
  changes in net assets of each item of revenue or expense that is recognised directly in net assets. In complying with
  this requirement, the change in the revaluation surplus arising from a change in the liability is separately identified
  and disclosed as such.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

#### 1.16 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Capital commitments are disclosed in the financial statements and they represent the balance committed to capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date.

Commitments for which disclosure is necessary to achieve a fair presentation are disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost; and
- Contracts should relate to something other than the routine, steady, state business of the municipality therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

#### 1.17 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.17 Revenue from exchange transactions (continued)

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

The amount of revenue arising on a transaction which is statutory (non-contractual) in nature is usually measured by reference to the relevant legislation, regulation or similar means. The fee structure, tariffs or calculation basis specified in legislation, regulation or similar means is used to determine the amount of revenue that should be recognised. This amount represents the fair value, on initial measurement, of the consideration received or receivable for revenue that arises from a statutory (non-contractual) arrangement (see the accounting policy on Statutory Receivables).

### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

## Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight-line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by .

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.17 Revenue from exchange transactions (continued)

#### Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the
  municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

### 1.18 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

#### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.18 Revenue from non-exchange transactions (continued)

#### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Receivables that arise from statutory (non-contractual) arrangements are initially measured in accordance with this accounting policy, as well as the accounting policy on Statutory Receivables. The entity applies the accounting policy on Statutory Receivables for the subsequent measurement, derecognition, presentation and disclosure of statutory receivables.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

#### **Taxes**

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for income tax is the earning of assessable income during the taxation period by the taxpayer.

The taxable event for value added tax is the undertaking of taxable activity during the taxation period by the taxpayer.

The taxable event for customs duty is the movement of dutiable goods or services across the customs boundary.

The taxable event for estate duty is the death of a person owning taxable property.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

#### **Fines**

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

#### Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.19 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

#### 1.20 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

#### 1.21 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

Unauthorised expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

#### 1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

#### 1.23 Irregular expenditure

Irregular expenditure is defined in section 1 of the MFMA as follows:

- "irregular expenditure", in relation to a municipality or municipal entity, means-
- (a) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of this Act, and which has not been condoned in terms of section 170;
- (b) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of that Act;
- (c) expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or
- (d) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or entity or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law, but excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure".

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the MFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.24 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that
  activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

#### 1.25 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

Annual Financial Statements for the year ended 30 June 2022

## **Accounting Policies**

### 1.25 Budget information (continued)

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2021/07/01 to 2022/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

### 1.26 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

#### 1.27 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date);
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

# **Accounting Policies**

## 1.27 Events after reporting date (continued)

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

# **Notes to the Annual Financial Statements**

### 3. Investment property (continued)

## Pledged as security

Investment property was not pledged as security for financial liabilities.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

#### **Details of valuation**

The value indicated is established by comparing the subject property with similar properties, called comparable sales. Comparable sales are recent property transactions of property that were sold in accordance with the definition of market value.

These comparable sales are judged as being the most comparable to the subject property to indicate a range of value in which the subject property's value could be determined. The subject property is then measured against the comparable sales, in various elements of comparison that might influence and ultimately determine the value of the subject property.

## Expenditure incurred to repair and maintain property, plant and equipment

The municipality's amount is R39 952 271 ((2020-21) R53 468 293) for the financial reporting year. In determining the repairs and maintenance amount the municipality has exclusively disclosed amounts charged by service providers.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

#### 7. Employee benefit obligations

## The amounts recognised in the statement of financial position are as follows:

_		
Ca	rrvine	g value

	(19 034 000)	(17 814 000)
Non-current liabilities Current liabilities	(17 014 000) (2 020 000)	(15 705 000) (2 109 000)
Present value of the defined benefit obligation-wholly unfunded	(19 034 000)	(17 814 000)

The municipality's obligation for Long Service Awards is a defined benefit plan. This plan is wholly unfunded as no contributions are made by the municipality into funds that are legally separate from the municipality and from which the employee benefits are paid (each subsequent financial year's expected payments of long service bonuses are budgeted for). The municipality, in substance, underwrites the actuarial and investment risks associated with the plan.

Consequently, the expense recognised for the defined benefit plan is the full additional liability accrued due to additional benefit entitlement. The municipality's net obligation in respect of the defined benefit long service allowances is the present value of the defined benefit obligation less the fair value of any plan assets, together with adjustments for unrecognised actuarial gains or losses and past service cost.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows of the benefits that will be paid to employees and using suitable interest rates.

The calculation is performed by registered actuaries using the projected unit credit method. The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 30 June 2022.

There are 563 employees that are currently entitled to Long Service Awards.]

## Changes in the present value of the defined benefit obligation are as follows:

Opening balance Benefits paid Net expense recognised in the statement of financial performance	17 814 000 (2 121 275) 3 341 275	16 651 000 (2 025 000) 3 188 000
	19 034 000	17 814 000

Current service cost Interest cost Actuarial (gains) losses	1 711 000 1 544 000 86 275	1 539 000 1 138 000 511 000
	3 341 275	3 188 000

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

<u> </u>		
Figures in Rand	2022	2021

### 7. Employee benefit obligations (continued)

#### Key assumptions used

Assumptions used at the reporting date:

Discount rates used	11,03 %	9,20 %
General earnings inflation rate (long term)	7,33 %	5,78 %
Net discount rate	3,45 %	3,23 %

The earnings are inclusive of the corresponding 1 July general increase. The next general earnings increase was assumed to take place on 1 July 2023.

In estimating the unfunded liability for LSA of Moses Kotane Local Municipality a number of assumptions are required. GRAP 25 requires the actuarial assumptions to be unbiased (i.e. neither imprudent nor excessively conservative) and mutually compatible (i.e. reflective of the economic relationships between factors such as return on assets and inflation rates).

#### **Discount Rate**

GRAP 25 stipulates that the choice of this rate should be derived from government bond yields consistent with the estimated term of the employee benefit liabilities. However, where there is no deep market in government bonds with a sufficiently long maturity to match the estimated term of all the benefit payments, current market rates of the appropriate term should be used to discount shorter term payments, and the discount rate for longer maturities should be estimated by extrapolating current market rates along the yield curve.

Consequently, a discount rate of 11.03% per annum has been used. The corresponding liability-weighted index-linked yield is 3.95%. These rates do not reflect any adjustment for taxation, and were deduced from the interest rate data obtained from the JSE after the market close on 30 June 2022. These yields were obtained by calculating the duration of the total liability and then taking the fixed-interest and index-linked yields from the respective yield curves at that duration using an iterative process (because the yields depend on the duration, which in turn depends on the liability). The duration of the total liability was estimated to be 9 years.

## **Earnings Inflation Rate**

This assumption is required to reflect the estimated growth in earnings of the eligible employees until retirement. It is important in that the LSA are based on an employee's earnings at the date of the award.

The assumption is traditionally split into two components, namely General Earnings Inflation and Promotional Earnings Escalation.

## **General Earnings Inflation**

This assumption is more stable relative to the growth in Consumer Price Index (CPI) than in absolute terms. In most industries, experience has shown, that over the long-term, earnings inflation is between 1.0% and 1.5% above CPI inflation.

The expected CPI inflation assumption of 6.33% was obtained from the differential between market yields on index-linked bonds (3.95%) consistent with the estimated terms of the liabilities and those of nominal bonds (11.03%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). Therefore, expected inflation is determined as ((1+11.03%-0.50%)/(1+3.95%))-1.

Thus, a general earnings inflation rate of 7.33% per annum over the expected term of the liability has been assumed, which is 1.00% higher than the estimate of CPI inflation over the same term. This assumption reflects a net discount rate of 3.45%. It was assumed that the next general earnings increase will take place on 1 July 2023.

#### **Demographic Assumptions**

Demographic assumptions are required about the future characteristics of current employees who are eligible for LSA. <u>Promotional Earnings Scale</u>

The annual inflation rates below are in addition to the General Earnings Inflation assumption of 7.33% per annum for all employees.t

### Age band Additional promotional scale

20 – 24	5.0%
25 - 29	4.0%
30 - 34	3.0%
35 - 39	2.0%
40 - 44	1.0%
> 44	0.0%

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

Figures in Rand	2022	2021

## 7. Employee benefit obligations (continued)

#### **Average Retirement Age**

The normal retirement age of employees is 65. It has been assumed that employees will retire at age 62 on average, which then implicitly allows for expected rates of ill-health and early retirement. Employees who have passed the assumed average retirement age, have been assumed to retire at their next birthday.

## Withdrawal from Service

If an employee leaves, the employer's liability in respect of that employee ceases. It is therefore important not to overstate withdrawal rates. A sample of the assumed rates is set out below.

<u>Age</u>	<u>Females</u>	<u>Male</u> s
20	9%	9%
25	8%	8%
30	6%	6%
35	5%	5%
40	5%	5%
45	4%	4%
50	3%	3%
55+	0%	0%

## Other assumptions

Defined benefit obligation

Assumed discount rate have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed discount rate would have the following effects:

19 034 000

			perce point	ntage increase	percentage point decrease
Effect on the aggregate of the service cost and interest Effect on defined benefit obligation	est cost		(1	(46 000) 028 000)	51 000 1 143 000

## 10. Receivables from non-exchange transactions (continued)

#### Statutory receivables general information

## Transaction(s) arising from statute

Fines are issued in terms of the National Road Traffic Regulations of 2000 and the National Road Traffic Act 93 of 1996.

#### **Determination of transaction amount**

All fines are governed by the specific regulation which is applicable to the offence.

#### Interest or other charges levied/charged

Fines - No interest or other charges are charged on outstanding fines.

No discount rate is applied on the above mentioned statutory receivables to estimate future cash flows.

#### Basis used to assess and test whether a statutory receivable is impaired

Fines - Payment percentage of fines is used to assess whether fines are impaired.

There are no trade and other receivables from non exchange pledged as security during the year.

## 11. VAT receivable/payable (continued)

The Municipality claims VAT in terms of the VAT Act 89 of 1991

VAT output is charged on taxable services and VAT input is claimed for goods and services received from suppliers who are registered as VAT vendors. The VAT receivable or payable at the end of the financial year is based on the difference between input VAT charged on operational goods and services supplied to the Municipality, input VAT charged on capital goods and services and the output VAT charged for services rendered by the Municipality.

The current VAT rate used, as determined by National Government is, 15% The municipality is registered for VAT on the Payment Basis

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

Figures in Rand 2022 2021

#### 12. Consumer debtors (continued)

#### Statutory receivables general information

### Transaction(s) arising from statute

Municipal Property Rates Act (MRP Act) section 2 states that a metropolitan or local municipality may levy a rate on property in its area.

#### **Determination of transaction amount**

Rates amounts are determined in terms of section 11 of the MRP Act and the approved rates policy of the municipality

## Interest or other charges levied/charged

Interest is charged on past due balancest

#### Basis used to assess and test whether a statutory receivable is impaired

Payment history of receivables is used to assess whether the receivable is impaired

## Discount rate applied to the estimated future cash flows

No discount rate is applied on above mentioned statutory recievables to estimate future cash flow

#### Credit quality of consumer debtors

Consumer debtors are payable within 30 days. This credit period granted is considered to be consistent with the terms used in the public sector, through establised practices and legislation. Discounting of trade and other recievables on initial recognition is not deemed necessary.

Concerntrations of credit risk with respect to trade receivables are limited due to the municipality's large number of customers. The municipality's historical experience in collection of trade receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's trade receivables.

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

Figures in Rand 2022 2021

#### 16. Provisions (continued)

#### **Environmental rehabilitation provision**

In terms of the licensing of the landfill refuse sites, the municipality will incur rehabilitation costs to restore the site at the end of its useful life. Provision has been made for the net present value of the restoration costs.

#### Financial assumptions used

#### **Unit Costs**

Unit costs for each of the cost elements are obtained annually by means of a commercial quotation. Details of this are provided separately.

### **CPI**

The CPI is used for determining the future value of current costs in the year when the cost is projected to be incurred. The CPI figure used in the GLCCM is based on the three-month average CPI for the quarter that includes the financial year-end date. The average of the CPI for the last quarter amounted to 6.6085%.

#### **Discount Rate**

GRAP 19 states that where the effect of the time value of money is material, the amount of the provision shall be the present value of the expenditures expected to be required to settle the obligation. In view of the long operational life of landfills, the time value of money is considered material. GRAP 19 prescribes that the discount rate shall be the pre-tax rate that reflects current market assessments of the time value of money, and the risks specific to the liability. Normally corporate bond rates are used to determine the discount rate. In line with GRAP 25 Defined benefit plans,government bond rates may also be used to determine the discount rate. The liability for this purpose is in most cases determined for a government entity (municipality). Therefore, government bond rates are considered a more appropriate indicator of the risk associated with the entity than corporate bond rates to determine the discount rate. The government bond rate most consistent with the estimated term of the liability should be used. As inflation-linked RSA retail bond rates have longer terms than fixed RSA retail bond rates, inflation-linked rates are used.

The rate most consistent with the remaining life of the landfills published at the end of the quarter that includes the financial year-end date was used.

- For landfills with an expected remaining life of three years or less, the rate associated with a maximum period of 3 years is used
- For landfills with an expected remaining life of four of five years, the rate associated with a maximum period of 5 years is
- For landfills with an expected remaining life of more than five years, the rate associated with a maximum period of 10 years is used.

## **Assumption**

CPI 6.6085% Discount rate 10.6085% Net effectivediscount rate 4.0000%

Assessment rates are levied on the total value of property of which the valuation must be performed every four years in terms of the Municipal Property Rates Act. Interim valuations are processed on a monthly basis to take into account changes in individual property value due to alterations, completions, consolidations and subdivisions.

Rates are levied monthly on property owners and are payable at the end of each month. Owners are allowed to pay the 12 monthly instalments annually by 30 September each year. Interest is levied on outstanding rates amounts.

The new general valuation was implemented on 01 July 2021.

#### In-kind benefits

The Mayor, Speaker, Single Whip and Mayoral Executive Committee Members are full-time. Each is provided with an office and secretarial support at the cost of the Council.

The Mayor is entitled to stay at the mayoral residence owned by the Municipality The Executive Mayor has use of a Council owned vehicle for official duties.

The Council has complied with the provision of Section 7(3) of the Remuneration of Public Office Bearers Act, and in line with the government gazette number 45420, dated 2 November 2021. It should be noted that there was no increase of councillor allowances therefore gazette no 43246 dated 24 April 2020 is still applicable while still awaiting concurrence.

#### Norman Montshiwa & 33 others V MKLM

Claim for payment in respect of leave encashment, the matter is pending before Labour Court. The claim against the municipality is estimated to being above R12 million however, there are no prospects of success.

#### Sandra Mafisa V MKLM

Claim of unfair dismissal, the employee seek reinstatement. The matter is pending before the Labour Court. There is no prospects of success. The employee concerned has reached retirement age. The financial exposure is estimated at R2,4 million

### SAMWU obo TKL Matlapeng V MKLM

Claim for unfair Labour Practice. The matter is pending before the Labour Court. Employee does not have prospects of success, however the municipality is exposed to a financial claim in excess of R300 000.

#### Tsholo Moloi V MKLM

Claim for unfair dismissal. The matter is before the Labour Appeal Court. The claim could be estimated as per her salary from the period of dismissal. However there are no prospects of success

### Wageng Mokgosi and 1 7 others (HOU's) V MKLM

Claim is of non payment of the 13th cheque and other benefits. The matter is at the final stage of the grievance resolution process. The financial exposure for the municipality if successful is extensive and may well be in excess of RI0 million.

### Employees affected by the review of 2020 structure

Claim emanating the review of organisational structure resulting in the split of positions. The claim is legitimate and may expose the municipality to financial claim in excess of R5 million.

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

Figures in Rand 2022 2021

#### 39. Contingencies (continued)

#### Van Heerden Construction

Van Heerden Construction is a sub-contractor of Lefika La Thaba, a contractor that was appointed by the Municipality. Van Heerden is claiming R 1 078 782. Van Heerden obtained a Court order and Writ of execution against Lefika La Thuba, Dr. Mokgothu, the owner of Lefika La Thuba as well as the Municipality.

It was established that the Municipality has an amount of R 833 000 left on the project. The amount was paid over to the trust account of Sakkie Smith Attorneys for safekeeping pending finalisation of the matter. The case is handled by Sakkie Smith Attorneys in Mogwase and is still in progress.

#### Mr. P.N. Makganya

Claim by Mr. Makganya for damages sustained due to alleged accident with municipal employee, Mr. Z. Mooketsi, to the mount of R 34 763.73. Sheriff with execution order at Moses Kotane municipal offices – attached assets but not removed. Case defended on basis that last correspondence was received in 2016 and no notices were since delivered to the execution debtors, MKLM and Mooketsi. The case is handled by Sakkie Smith Attorneys in Rustenburg. In the curret year the possibility of outflow of resources has been considered to be remote because there were was no movement on the case for the last 3 years.

#### Mogaki Civils

Flowing from the Van Heerden case above, a further claim was received from Mogaki Civils for an amount of R 470 426.30. This is a legitimate claim since the Municipality entered into a cession agreement to this amount with Lefika La Thaba and Mogaki Civils. They were informed of the situation and have not taken any action. Municipality has filed all necessary papers but no correspondence in last two years. Van Heerden (Dominus Litis) needs to make the next move. The Municipality will incur costs after the exact amounts due to the following parties had been established. Still in progress. The case is handled by Sakkie Smith Attorneys in Mogwase.

#### **Enigma Chartered Accountants**

Claim by Enigma for R 5 211 872.84. The Municipality appointed Enigma to investigate and claim back VAT paid. Enigma would then be entitled to 20% commission on recovered amount. Notice of Motion received in October 2019. Proposal for settlement is under review. Case has some probability of succeeding. The case is beibg handled by Setshedi, Makgale and Matlapeng Attorneys in Rustenburg.

#### **Department of Local Government and Human Settlements**

In the past the municipality received funds from the Department of Local Government and Human Settlements to be utilised for the Housing Subsidy System. Of the funds received the department has concluded that there is an unspent portion of R 32 591311 by the municipality. The municipality is challenging this claim.

### **MTN**

MTN claims an amount of R 90 484.06 for unpaid services. They allege that there was a contract which the Municipality has breached. More information has been requested. No legal action taken yet.

#### **Mafoko Brothers**

Received letter of demand, related Tender 004/MKLM/2015/2016. The letter of demand states a claim amount, as at 12 November 2018, for R 319 919.34. Municipality defended on basis that claim is for unauthorised work done and that the consultant should be held responsible for payment. Consultant was however liquidated. Mafoko Brothers instituted legal action and obtained cost order against municipality. LM Pretorius Attorneys is defending the case.

#### **Intelligence Trading**

Claim by Intelligence Trading for R 3 525 398.31 for outstanding monies on Tender 020/MKLM/2015/2016. Letter of demand received from DupWest Inc on 19 August 2020. No legal action taken yet.

#### 41. Change in accounting estimate

#### Property, plant and equipment

The remaining useful life (RUL) is an estimation of the amount of years that the asset will be able to safely perform its intended function. During the 2021/2022 financial year physical verification of assets occurred and part of the procedures regarding physical verification is the condition assessment of assets. The condition of an asset has a direct impact on the remaining useful life of an asset. The impact of the condition assessment performed resulted in decrease in depreciation by R1 112 507.

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

Figures in Rand 2022 2021

#### 42. Prior period errors and reclassifications

Presented below are those items contained in the statement of financial position, statement of financial performance and cash flow statement that have been affected by prior-year adjustments:

#### **Expenditure Reclassification**

In the current year we noted that repairs and maintance was overstated due to classification error. Correction of the error resulted in decrease in repairs and maintanace by R 53 468 293, increase in contracted services by R 47 038 087 and an increase in general expenses by R 6 430 206. This error did not affect the Statement of Financial Position

#### **Interest from bank Reclassification**

A classification error interest received from the bank was identified during the year. Interest income from cash received from grantsincorrectly included Interest from exchange transactions instead of being classified as interest from non exchange transactions. The error has the following effect in the Statement of Financial Perfomance: Understatement of Interest from non exchange by R 2 167 171 and overstatement of Interest from exchange transactions by the same amount. The error does not affect the Statement of Financial Position

#### **Investment property**

#### Error 1

There were corrections made to investment property land sizes based on the relevant title deeds. The land sizes for two properties were adjusted to agree to the land size per the title deed for the relevant properties. The effect of the adjustment is the decrease in investment property value by R8 817 135. 18

#### Error 2

During the current year it was discovered that Informal Trader Stalls were incorrectly classified as Property, Plant and Equipment instead of being classified as Investment Property because they were built with the intention of renting them out. The error resulted in understatement of the cost of Investment property by R13 349 653 and the understatement of the fair value of investment property by R6 721 243 and understatement of fair value adjustment expense of R 6 625 613.

### **Employee grievances**

In the current year it was noted that the municipality lost a court case during the 2021 finannoial year. This was not accounted for in prior year financial statements and as a result payables were understated by R5 244 918 and the accumulated surplus was overstated by the same amount.

#### Sundry debtors reclassification

In the prior year, sundry debtors were incorrectly classified as receivables from non exchange instead of receivables from exchange transactions. The reclassication error was corrected in the current financial year

#### Interest income receivable

During the current financial year, it was discovered that interest receivable from standard bank was not raised and accounted for. The ommision resulted in understatement of interest received from exchange transactions and accumulated surplus by R4 986. The receivables from exchange transactions was also understated by the same amount.

## **Property, Plant and Equipment**

### Error 1

During the current year it was discovered that Informal Trader Stalls were incorrectly classified as Property, Plant and Equipment instead of being classified as Investment Property because they were built with the intention of renting them out. As a result PPE was overstated with cost R13 349 653 and accumulated depreciation was overstated by R 222 797

#### Error 2

During physical verification it was dicovered that highmast lights were erreneously omitted in the asset register resulting in understatement of cost R 11 157 076 and accumulated depreciation R 5 370 736.96, understatement of community assets cost R 397 726 and accumulated depreciation of R41 750.

#### Error3

During physical verification it was identified that ICT Towers were incorrectly componentized resulting in understated accumulated depreciation of R 1 826 325.

#### Error4

During physical verification a reclassification was made from community assets to buildings, cost R 378 466 and accumulated depreciation of R 75 693.

#### **VAT Receivable**

During the year it was identified that VAT input of R30 940 relating to May 2021 was not claimed during 2021 financial year

#### Prior period errors on disclosure notes

The following prior period errors adjustments occurred:

#### Contingent liability - Employee grievances

During the current year it was noted that employee grievances were ommitted from contigencies disclosures. Hence the contingent disclosures were incomplete. The employee grievances have been included in the current year contigencies disclosures and the comparatives have been restated. The error resulted in the understatement of contingent liabilities by R30 454 481.

#### **Financial Instruments**

During the year under review, it was noted that statutory and other receivables were included and disclosed as financial intstruments despite the fact that they do not meet the definition of a financial asset. The error resulted in the overstatement of financial assets by R 73 835 924

#### Irregular expenditure

Opening balance	1 360 046 938	-
Adjustments made	30 321 273	-
Restated opening balance	1 390 368 211	

## Adjustment made to opening balance of irregular expenditure is due to omissions made on the irregular expenditure register of R 30 321 273

#### **Unauthorised Expenditure**

Opening balance	232 530 644	-
Adjustments made	1 925 560	-
Restated opening balance	234 456 204	

#### Fruitless and wasteful expenditure

Restated opening balance	129 592 073	-
Adjustments made	14 826 205	=
Opening balance	114 765 868	=

Adjustment made to opening balance of fruitless and wasteful expenditure is due to errors and ommissions made on the fruitless and wasteful register in the prior year. Correction of these errors resulted in increase in fruitless and wasteful expenditure by R 14 826 205.

Annual Financial Statements for the year ended 30 June 2022

### **Notes to the Annual Financial Statements**

Figures in Rand	2022	2021

#### 43. Risk management

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

#### Liquidity risk

Liquidity risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet it's liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liabilities are managed by ensuring that all contractual payments met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities. The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2022	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Total

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

Figures in Dand	2022	2024
Figures in Rand	2022	2021

#### 43. Risk management (continued)

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2022	2021
Receivable from non exchange	3 508 937	3 000 567
Consumer Debtors	64 695 808	57 161 831
Receivables from exchange	178 369	8 107

#### Market risk

#### Interest rate risk

Interest rate risk is defined as that fair value of future cashflows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are subtantially independent of changes in market interest rates.

#### Price risk

The effect of any price risk in the foreseeable future is regarded as minimal given the fact that amounts receivable from the municipality's customers are levied in terms of the relevant statutes. It is not anticipated that given the nature of the municipality's business that changes in market prices will have a material impact on the trading results of the municipality.

There has been no change, since the previous financial year, to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

Post-tax surplus for the year would increase/decrease as a result of gains or losses on equity securities classified as at fair value through surplus or deficit. Other components of equity would increase/decrease as a result of gains or losses on equity securities classified a available-for-sale.

## 44. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The municipality is experiencing cashflow challenges as a result of low debtors collection rate which has an impact on the municipality's ability to pay creditors timeously. This will not result in any material uncertainty for the municipality to continue as going concern since it also relies on grants from national government in order to fund its operations. The municipality is a service delivery vehicle of government and there has not been any indication from National Government to discontinue the operation of the municipality and the medium term revenue and expenditure framework has made allocations to the municipality. The most significant of these is that the accounting officer will continue to procure funding for the ongoing operations of the municipality.

--	-----------------	--	------	------

#### 46. Fruitless and wasteful expenditure (continued)

Expenditure identified in the current year include those listed below:

IT Expenditure	114 938 123	98 788 737
Interest on overdue accounts	11 476 500	12 524 338
Community hall condtruction expenditure	385 825	385 825
Fines	20 000	20 000
Reversal of recovarable amount	1 218 685	1 218 685
Penalties	3 077 448	1 828 283
	131 116 581	114 765 868

IT expenditure relates to expenditure that is currently under investigation to determine if value derived match the expenditure incured. At the conclusion of the investigation, if the contract is established as fruitless and wasteful expenditure, were the value derived does not match up with the payments made, a receivable will be created for the recovery of the loss from the person/s responsible.

The municipality incurred interest as a result of late payments on Magalies Water, Telkom and Eskom accounts. Construction expenditure relates to expenditure incurred on the construction of a Hall in an area reserved for mining expansion during 2014/15 financial year.

Fruitless and wasteful expenditure was reported to Council and referred to MPAC for further investigation.

### 48. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

#### 50. Segment information

#### **General information**

#### Identification of segments

The segments were organised based on the type and nature of service delivered by the Municipality. These services are delivered in various municipal departments, which for reporting purposes are allocated to a standarised functional area (guided by mSCOA regulations). Budgets are prepared for each functional area and the budget versus actual amounts are reported on a monthly basis. Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

#### Reporting on segment assets and liabilities

The Municipality has assessed that assets and liabilities associated with each segment is not used by management for decision making purposes, and neither is it being reported on. Assets and liabilities are utilised by management to assess key financial indicators for the Municipality as a whole. Accordingly, the assets and liabilities per segment are not required to be disclosed.

#### Types of goods and/or services by segment

The Municipality has several departments/functional areas and accordingly the segments were aggregated for reporting purposes as set out below:

#### Reportable segment

Unallocated

Finance & Administration

**Economic & Environmental Services** 

Roads

Community & Public Safety

**Energy Sources** 

#### Goods and/or services

Provision of overall governance to other segments of the municipality.

Provision of financial and administrative services to other segments of the municipality.

Provision of economic development activities in the municipality.

Construction and maintenance of roads owned by the municipality.

Construction and maintenance of community facilities owned and ensuring safety and security to the communities.by the municipality.

Construction of street lights and highmast lights.

### Reporting on segment assets and liabilities

The Municipality has assessed that assets and liabilities associated with each segment is not used by management for decision making purposes, and neither is it being reported on. Assets and liabilities are utilised by management to assess key financial indicators for the Municipality as a whole. Accordingly, the assets and liabilities per segment are not required to be disclosed.

#### Information about geographical areas

Annual Financial Statements for the year ended 30 June 2022

## **Notes to the Annual Financial Statements**

Figures in Rand	2022	2021
riquies ili Raliu	2022	2021

#### 50. Segment information (continued)

The Municipality covers an area of approximately 5220km² and is mostly rural in nature, comprising of 107 villages and 2 formal towns of Mogwase and Madikwe. The necessary information per geographical area is not available and the cost to develop it will be to excessive. All geographical information are indicated under Mogwase.

#### 2022

	External revenues from exchange transactions	External revenues from non exchange transactions	Total expenditure	Non-current assets*
Mogwase	280 808 394	848 405 157	(1 123 005 554)	3 119 643 302
2021				
	External revenues from exchange transactions	External revenues from non exchange transactions	Total expenditure	Non-current assets*
Mogwase	223 515 305	933 538 632	(1 005 732 091)	3 102 265 309

#### 51. Budget differences

#### Material differences between budget and actual amounts

- 51.1 The variance is mainly due to the over provision for free basic services on the budget resulted in the reducing on the sale of water, Only registerred indigents qualifies for the 6 kiloliters of water.
- 51.2 The variance is mainly due to the over provision for free basic services as well as the increase in the billing state owned properties. The implementation of a new valuation roll as from July 2021 aslso contributed to the provision for property rates on the budget
- 51.3 The variance is due to the provision for long service awards amounts to R 3 341 276 which is calculated by an Actuaris at year end no provision on the budget was provided for the provision. The calculation for accumulated for employees accrued leave contributes an amount of R2 385 138 to the difference. Provision on the budget was not made for this increase as employees should take leave. The payment of overtime also contributed to the difference between the budget and the actual expenditure. The payment of overtime should be controlled
- 51.4 The decrease in the provision for depreciation of municipal assets is due to the non completion of projects which will only be depreciated once completed.
- The provision for debt impairment is due to the non payment of services renderred to the community. The implementation of the lockdown were employees were retrenched or lost there jobs and are now at home and cannot afford to the pay for services renderred. The increase in the unemployment rate also contributed to the non payment for services as more and more consumers are now qualifies as indigents
- 51.6 The variance in bulk purchase for water is due to the insufficient provision on the budget as well as the increase in water consumption as more consumers are now at home.
- 51.7 The reason for the variance of 100% is due to the loss on disposal of assets which was not budgeted for.
- 51.8 The reason for the variance is mainly due to the re classification of expenditure between contracted services and general expenditure. The overspending on the provision for consultants for the compilation of the financial statements . unbundling of assets, recovering of outstanding debt and VAT recovery also contributed to the variance.
- , unbundling of assets, recovering of outstanding debt and VAT recovery also contributed to the variance.

  The reason for the variance is mainly due to the re classification of expenditure between contracted services and general expenditure. The transfer of the construction of VIP toilets from capital expenditure to general expenditue contributes an amount of R15 3888 019 to the variance. Telephone, software and fuel expenses and insifficient budget also contributes to the variance between the budget and the actual expenditure.
