Proportional	Cllr CJ Grootboom
Proportional	Cllr D September
Proportional	Cllr M Gertse

Approval of Annual Financial Statements

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the Accounting Officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and were given unrestricted access to all financial records and related data.

The annual financial statements were prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) as well as relevant interpretations, guidelines and directives issued by the Accounting Standards Board. The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I, as the Accounting Officer acknowledge that I am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable me to meet these responsibilities, I have set standards for internal control aimed at reducing the risk of error or deficit in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is of identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

I have reviewed the municipality's cash flow forecast for the year to 30 June 2024 and, in the light of this review and the current financial position, I am satisfied that the municipality has access to adequate resources to continue in operational existence for the foreseeable future. The annual financial statements are prepared on the basis that the municipality is a going concern and that the Langeberg Local Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although, I am primarily responsible for the financial affairs of the municipality, this is supported by the municipality's external auditors. I would like to bring to your attention the following material matters to your attention:

I certify that the salaries, allowances and benefits of councillors as disclosed in note 36 to these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act, Act 20 of 1998 and the Minister of Provincial and Local Government's determination in accordance with the Act.

The external auditor, being the Auditor General of South Africa, is responsible for independently reviewing and reporting on the municipality annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 7.

The annual financial statements for the year ended 30 Ju	une 2023, wh	hich have been pr	epared on the go	ing concern basis
were approved on 31 August 2023.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

1. BASIS OF PRESENTATION

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP), as approved by the Minister of Finance, including any interpretations, guidelines and directives issued by the Accounting Standards Board and in accordance with the requirements of Section 122(3) of the Municipal Finance Management Act, 2003 (Act No. 56 of 2003).

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

The Statement of Financial Performance has been prepared to classify expenses by nature, whilst revenue is classified in a manner appropriate to the municipality's operations. The Cash Flow Statement has been prepared using the Direct Method.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

1.1 Presentation Currency

Amounts reflected in the financial statements are in South African Rand (which is the functional currency of the municipality) and at actual values. Financial values are rounded to the nearest Rand. No foreign exchange transactions are included in the statements.

1.2 Critical Judgements, Estimations and Assumptions

In the application of the municipality's Accounting Policies, which are described below, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

These estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the critical judgements and estimations that management have made in the process of applying the municipality's Accounting Policies and that have the most significant effect on the amounts recognised in Annual Financial Statements:

1.2.1 Revenue Recognition

Accounting Policy on Revenue from Non-Exchange Transactions and Accounting Policy on Revenue from Exchange Transactions describes the conditions under which revenue will be recognised by management of the municipality.

In making their judgement, management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and GRAP 23: Revenue from Non-Exchange Transactions. Specifically, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been performed. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

1.2.2 Provision for Landfill Sites

The provision for rehabilitation of the landfill site is recognised as and when the environmental liability arises. The provision is calculated by a qualified environmental engineer. The provision represents the best estimate or net present value of the expected future cash flows to rehabilitate the landfill site at year-end. To the extent that the obligations relate to an asset, it is capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset are charged to the Statement of Financial Performance.

- a) Professional engineers were utilised to determine the cost of rehabilitation of landfill sites as well as the remaining useful life of each specific landfill site.
- b) Interest rates (investment rate) linked to prime was used to calculate the effect of time value of money.

1.2.3 Provision for Staff Leave

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total amount of leave days due to employees at year-end and also on the total remuneration package of the employee.

Accumulated leave is carried forward and can be used in future periods if the current period's entitlement is not used in full. All unused leave will be paid out to the specific employee at the end of that employee's employment term.

Accumulated leave is vesting.

1.2.4 Impairment of Statutory Receivables

Accounting Policy 5.3 on Impairment of Statutory Receivables describes the process followed to determine the value at which Statutory Receivables should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment and used its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of the reporting period. The management of the municipality is satisfied that impairment of Statutory Receivables recorded during the year is appropriate.

The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk-free rate and any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

1.2.5 Provision for Performance Bonuses

The provision for performance bonuses represents the best estimate of the obligation at year-end and is based on historic patterns of payment of performance bonuses. Performance bonuses are subject to an evaluation by Council.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

1.2.6 Useful lives of Property, Plant and Equipment, Intangible Assets and Investment Property

Property, Plant and Equipment

The useful lives of property, plant and equipment are based on management's estimation. Infrastructure's useful lives are based on technical estimates of the practical useful lives for the different infrastructure types, given engineering technical knowledge of the infrastructure types and service requirements. For other assets and buildings, management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and residual values of property, plant and equipment:

- The useful life of movable assets was determined using the age of similar assets available for sale in the active market. Discussions with
 people within the specific industry were also held to determine useful lives.
- Local Government Industry Guides was used to assist with the deemed cost and useful life of infrastructure assets.
 The municipality referred to buildings in other municipal areas to determine the useful life of buildings.
 The municipality also consulted with engineers to support the useful life of buildings, with specific reference to the structural design of buildings.

For deemed cost applied to other assets as per adoption of Directive 7, management used the depreciated replacement cost method which was based on assumptions about the remaining duration of the assets.

The cost for depreciated replacement cost was determined by using either one of the following:

- Cost of items with a similar nature currently in the municipality's asset register.
- Cost of items with a similar nature in other municipalities' asset registers, given that the other municipality has the same geographical setting as the municipality and that the other municipality's asset register is considered to be accurate.
- Cost as supplied by suppliers.

For deemed cost applied to land and buildings as per adoption of Directive 7, management made use of on independent valuator. The valuator's valuation was based on assumptions about the market's buying and selling trends and the remaining duration of the assets.

Intangible Assets

The useful lives of intangible assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate.

Reference was made to intangibles used within the municipality and other municipalities to determine the useful life of the assets.

For deemed cost applied to intangible assets as per adoption of Directive 7, management used the depreciation cost method which was based on assumptions about the remaining duration of the assets.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

Investment Property

The useful lives of investment property are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their economic lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and valuation of investment property:

- The municipality referred to buildings in other municipal areas to determine the useful life of buildings.
- The municipality also consulted with professional engineers and qualified valuators to support the useful life of buildings.

For deemed cost applied to Investment Property as per adoption of Directive 7, management made use of an independent valuer. The valuer's valuation was based on assumptions about the market's buying and selling trends and the remaining duration of the assets.

1.2.7 Pre-paid Electricity Estimation

Pre-paid electricity is only recognised as income once the electricity is consumed. The prepaid electricity balance (included under payables) represents the best estimate of electricity sold at year-end, which is still unused. The average pre-paid electricity sold per day during the year under review is used and the estimate is calculated using between 5 and 10 days' worth of unused electricity.

1.2.8 Post-retirement medical obligations, long service awards and ex gratia gratuities

The cost of post-retirement medical obligations, long service awards and ex-gratia gratuities are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Major assumptions used are disclosed in note 21 of the Annual Financial Statements. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

1.2.9 Provisions and Contingent Liabilities

Management judgement is required when recognising and measuring provisions and when measuring contingent liabilities. Provisions are discounted where the time value effect is material.

1.2.10 Componentisation of Infrastructure Assets

The municipality assesses whether it is a party to any principal-agent arrangements by considering the principles contained in GRAP 109. When the municipality is a party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

1.2.11 Impairment of Loans and Receivables

The calculation in respect of the impairment of debtors is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per service-identifiable categories across all classes of debtors.

The impairment for loans and receivables is considered first for individually significant loans and receivables and then calculated on a portfolio basis for the remaining balance, including those individually significant loans and receivables for which no indicators of impairment were found. For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

On loans and receivables, an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the loan's or receivable carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition (if practically determinable). Where the effective interest rate at initial recognition is not practically determinable, the government bond rate is used as the risk-free rate and adjusted for any risks specific to the loans and receivables.

1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Conceptual Framework for General Purpose Financial Reporting states that users are assumed to have a reasonable knowledge of the municipality's activities and the environment in which it operates, to be able and prepared to read annual financial statements and to review and analyse the information presented with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

Materiality is determined as 1% of total operating expenditure. This materiality is from management's perspective and does not correlate with the auditor's materiality.

1.4 Going Concern Assumption

The Annual Financial Statements have been prepared on a Going Concern Assumption.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

1.5 COMPARATIVE INFORMATION

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated, unless a standard of GRAP does not require the restatements of comparative information. The nature and reason for the reclassification are disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

The Municipal Regulations on Standard Chart of Accounts (mSCOA) came into effect on 1 July 2017. The mSCOA Charts are updated annually by National Treasury. The municipality has realigned items in the financial statements with the Item Segment of mSCOA Version 6.7, on which the municipality was required to transact for periods after 1 July 2020. The result of this process was a reclassification and naming of items in the annual financial statements.

2. BUDGET INFORMATION

The presentation of budget information is prepared in accordance with GRAP 24, and are consistent with the Accounting Policies adopted by the Council for the preparation of these Annual Financial Statements. The comparison of budget and actual amounts are disclosed as a separate statement, namely Statements of Comparison of Budget and Actual amounts.

Budget information is presented on the accrual basis by nature classification. Explanatory comment is provided in the Statement of Comparison of Budget and Actual Amounts giving reasons for overall growth or decline in the budget and motivations for over-or under spending on line items. These figures are those approved by the Council at the beginning and during the year following a period of consultation with the public as part of the Integrated Development Plan.

The approved budget covers the period from 1 July 2022 to 30 June 2023.

3. INVENTORIES

3.1 Recognition and Initial Measurement

Inventories comprise current assets held-for-sale, current assets for consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the Inventories to their current location and condition. Where Inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Water inventory is measured by multiplying the cost per kilolitre of purified water by the amount of water in storage.

Where Inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Direct costs relating to properties that will be sold as Inventory are accumulated for each separately identifiable development. Costs also include a proportion of overhead costs.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

3.2 Subsequent Measurement

Inventories, consisting of consumable stores, finished goods, housing stock, land, materials and supplies, water and work-in-progress, are measured at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed unless that cost qualifies for capitalisation to the cost of another asset.

In general, the basis of allocating cost to inventory items is the weighted average method or first-in-first-out method. The first- in-out-method is applied to maintenance material inventory items. The weighted average method is applied to compost, low- cost housing, water for distribution and the remaining inventory items which are not maintenance related.

Water inventory is measured annually at the reporting date by way of dip readings and the calculated volume in the distribution network.

4. FINANCIAL INSTRUMENTS

The municipality has various types of Financial Instruments and these can be broadly categorised as Financial Assets, Financial Liabilities or Residual Interests in accordance with the substance of the contractual agreement.

Initial Recognition

Financial Assets and Financial Liabilities are recognised when it becomes party to the contractual provisions of the instrument.

The municipality does not offset a Financial Asset and a Financial Liability unless a legally enforceable right to set off the recognised amounts currently exist and the municipality intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

4.1 Financial Assets - Classification

The municipality has the following types of Financial Assets:

Type of Financial Asset	Classification in terms of GRAP 104	
Investments – Listed Shares	Financial Assets at Fair Value	
Investments – Unlisted Shares	Financial Assets at Amortised Cost	
Long-term Receivables	Financial Assets at Amortised Cost	
Receivables from Exchange Transactions	Financial Assets at Amortised Cost	
Receivables from Non-exchange Transactions	Financial Assets at Amortised Cost	
Bank, Cash and Cash Equivalents - Fixed Deposits	Financial Assets at Amortised Cost	
Bank, Cash and Cash Equivalents – Call Deposits	Financial Assets at Amortised Cost	
Bank, Cash and Cash Equivalents – Cash	Financial Assets at Amortised Cost	

Trade and Other Receivables exclude Value Added Taxation, Prepayments and Operating Lease Receivables are classified as Financial Assets at Amortised Cost.

Cash includes cash-on-hand (including petty cash) and cash with banks (including call deposits). For the purposes of the Cash Flow Statement, Cash and Cash Equivalents comprise cash-on-hand and deposits held on call with banks, net of bank overdrafts.

Auding to build public conlidence

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

4.2 Financial Liabilities - Classification

The municipality has the following types of Financial Liabilities:

Type of Financial Liability	Classification in terms of GRAP 104	
Borrowings	Financial Liabilities at Amortised Cost	
Payables from Exchange Transactions	Financial Liabilities at Amortised Cost	
Payables from Non-exchange Transactions	Financial Liabilities at Amortised Cost	
Unspent Conditional Grants	Financial Liabilities at Amortised Cost	
Bank Overdraft	Financial Liabilities at Amortised Cost	

Bank Overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

4.3 Initial and Subsequent Measurement

4.3.1 Financial Assets:

Financial Assets measured at Amortised Cost

Financial Assets at Amortised Cost are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the Financial Asset. Subsequently, these assets are measured at amortised cost using the Effective Interest Method less any impairment, with interest recognised on an Effective Yield Basis.

Financial Assets measured at Cost

Financial Assets at Cost are initially measured at the transaction amount and transaction costs that are directly attributable to the acquisition or issue of the Financial Asset. Subsequently, these assets are measured at cost less any impairment.

Financial Assets measured at Fair Value

Financial Assets at Fair Value are initially measured at fair value, excluding directly attributable transaction costs. They are subsequently measured at fair value with unrealised gains or losses recognised directly in Surplus or Deficit.

4.3.2 Financial Liabilities:

Financial Liabilities measured at Fair Value

Financial Liabilities at Fair Value are stated at fair value, with any resulted gain or loss recognised in Surplus or Deficit.

Financial Liabilities held at Amortised Cost

Any other Financial Liabilities are classified as Other Financial Liabilities (All Payables, Loans and Borrowings are classified as Other Liabilities) and are initially measured at fair value, net of transaction costs. Trade and Other Payables, Interest-bearing Debt including Finance Lease Liabilities, Non-interest-bearing Debt and Bank Borrowings are subsequently measured at amortised cost using the Effective Interest Rate Method. Interest expense is recognised in Surplus or Deficit by applying the effective interest rate.

Bank Borrowings, consisting of interest-bearing short-term bank loans, repayable on demand and overdrafts are recorded at the proceeds received. Finance costs are accounted for using the Accrual Basis and are added to the carrying amount of the bank borrowing to the extent that they are not settled in the period that they arise.

Prepayments are carried at cost less any accumulated impairment losses.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

4.4 Impairment of Financial Assets

Financial Assets, other than those at fair value, are assessed for indicators of impairment at the end of each reporting period. Financial Assets are impaired where there is objective evidence of impairment of Financial Assets (such as the probability of insolvency or significant financial difficulties of the debtor). If there is such evidence the recoverable amount is estimated and an impairment loss is recognised through the use of an allowance account.

4.4.1 Financial Assets at Amortised Cost

A provision for impairment of Accounts Receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The provision is made whereby the recoverability of accounts receivable is assessed individually and then collectively after grouping the assets in financial assets with similar credit risk characteristics. The amount of the provision is the difference between the Financial Asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Future cash flows in a group of Financial Assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Cash flows relating to short-term receivables are not discounted where the effect of discounting is immaterial.

4.4.2 Financial Assets at Cost

If there is objective evidence that an impairment loss has been incurred on an investment in a Residual Interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the Financial Asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses shall not be reversed.

4.5 Derecognition of Financial Assets

The municipality derecognises Financial Assets only when the contractual rights to the cash flows from the asset expires or it transfers the Financial Asset and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of Financial Assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred Financial Asset, the municipality continues to recognise the Financial Asset and also recognises a collateralised borrowing for the proceeds received.

4.6 Derecognition of Financial Liabilities

The municipality derecognises Financial Liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

The municipality recognises the difference between the carrying amount of the Financial Liability (or part of a Financial Liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, in Surplus or Deficit.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

5. STATUTORY RECEIVABLES

Statutory Receivables are receivables that arise from legislation, supporting regulations, or similar means and require settlement by another entity in cash or another financial asset.

Statutory receivables arise from the following legislation:

- Property Rates Municipal Property Rates Act (6 of 2004)
- Fines Criminal procedures Act (51 of 1977)

5.1 Recognition and Initial Measurement

The municipality recognises statutory receivables as follows:

- a) If the transaction is an exchange transaction, using the policy on revenue from exchange transactions,
- b) If the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers)
- c) If the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

The municipality recognises Statutory Receivables when they arise.

Statutory Receivables are initially measured at their transaction amount. The transaction amount would be the amount that is determined on initial measurement in accordance with the relevant Standard of GRAP.

The transaction amounts of the Statutory Receivables of the municipality are determined as follows:

- Assessment Rates are levied in terms of the stipulations contained in the Local Government: Municipal Property Rates Act, 2004 (Act No. 6 of 2004) at rates determined each year by Council.
- Fines Criminal procedures Act (51 of 1977)

5.2 Subsequent Measurement

Statutory Receivables are measured after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- Interest or other charges that may have accrued on the receivable, where applicable;
- Impairment losses; and
- · Amounts derecognised.

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

5.3 Impairment

The municipality assesses at each reporting date whether there is any indication that a statutory receivable may be impaired. In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- Significant financial difficulty of the debtor, which may be evidenced by an application for debt counselling, business rescue or an
 equivalent.
- It is probable that the debtor will enter sequestration, liquidation or other financial reorganisation.
- A breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- Adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable is reduced, through the use of an allowance account. The amount of the loss is recognised in the Statement of Financial Performance. In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk-free rate and any risks specific to the statutory receivable for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows. Any previously recognised impairment loss is adjusted by adjusting the allowance account. The amount of any adjustment is recognised in the Statement of Financial Performance.

5.4 Derecognition

The municipality derecognises a statutory receivable when:

- a)The rights to the cash flows from the receivable are settled, expire or are waived.
- b)The municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable.
- c)The municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer.

In this case, the municipality:

- d) derecognises the receivable; and
- e) recognises separately any rights and obligations created or retained in the transfer.

Au Discourse de la confidence
30 November 2023

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

6. CONSTRUCTION CONTRACTS

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by either the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs or surveys of work done or completion of a physical proportion of the contract work.

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

7. PROPERTY, PLANT AND EQUIPMENT

7.1 Initial Recognition and Measurement

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and the cost or fair value of the item can be measured reliably.

Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment,

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the assets acquired is initially measure at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

Where an asset is acquired through a non-exchange transaction, any transaction cost incurred is recognised as part of the cost of the asset.

26

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

7.2 Subsequent Measurement - Cost Model

Property, Plant and Equipment, excluding Buildings and Land

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset

7.3 Depreciation and Impairment

Depreciation on assets other than land is calculated on cost, using the Straight-line Method, to allocate their cost or revalued amounts to their residual values over the estimated useful lives of the assets. Each part of an item of Property, Plant and Equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation rates are based on the following estimated useful lives:

Asset Class	Years	Asset Class	Years
Buildings		Community	
Improvements	1 - 105	Community Facilities	5 - 50
•		Recreational Facilities	7 - 100
Infrastructure		Security	5
Electricity	1 - 80	Halls	1 - 105
Roads and Paving	1 - 100	Libraries	1 - 100
Sewerage / Solid Waste	1 - 100	Parks and gardens	1 - 100
Water	1 - 125	Other assets	7 - 100
Housing	1 - 105		
-		Other	
		Computer Equipment	2 - 20
		Specialised vehicles	10 - 20
		Furniture and Fittings	1 - 100
		Transport Assets	4 - 45
		Office Equipment	2 - 22
		Plant and Equipment	1 - 40
		Other Assets	2 - 22
		Quarries	25
		Landfill sites	1-15

Changes to the useful life of assets are reviewed if there is an indication that a change may have occurred in the estimated useful life. If the expectation differs from the previous estimates, the change is accounted for in accordance with GRAP 3 either prospectively as a change in the accounting estimate or retrospectively as a prior period error depending on the specific circumstances.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

Property, plant and equipment are reviewed at each reporting date for any indication of impairment. If any such indication exists, the asset's recoverable service amount is estimated. The impairment charged to the Statement of Financial Performance is the difference between the carrying value and the recoverable service amount.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of impairment is recognised in the Statement of Financial Performance.

7.4 Land

Land is stated at historical cost and is not depreciated as it is deemed to have an indefinite useful life.

7.5 Derecognition

Items of property, plant and equipment are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance. Gains are not classified as Revenue.

8. INTANGIBLE ASSETS

8.1 Initial Recognition and Measurement

Identifiable non-monetary assets without physical substance are classified and recognised as Intangible Assets.

Intangible Assets are initially recognised at cost.

Where an Intangible Asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an Intangible Asset acquired in exchange for non-monetary assets or monetary assets, or a combination of monetary and non-monetary assets, is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. If the acquired item could not be measured at its fair value, its cost is measured at the carrying amount of the asset given up. If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

8.2 Subsequent Measurement, Amortisation and Impairment

After initial recognition, Intangible Assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Amortisation is charged on a Straight-line Method over the Intangible Assets' useful lives. The residual value of Intangible Assets with finite useful lives is zero, unless an active market exists. Where Intangible Assets are deemed to have indefinite useful lives, such Intangible Assets are not amortised. However, such Intangible Assets are subject to an annual impairment test.

The amortisation rates are based on the following estimated useful lives:

Asset Class	Years	Asset Class	Years
Computer Software Purchased	Indefinite	Servitudes	Indefinite

Changes to the useful life of assets are reviewed if there is an indication that a change may have occurred in the estimated useful life. If the expectation differs from the previous estimates, the change is accounted for in accordance with GRAP 3 either prospectively as a change in the accounting estimate or retrospectively as a prior period error depending on the specific circumstances.

8.3 Derecognition

Intangible assets are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance. Gains are not classified as Revenue.

9. INVESTMENT PROPERTY

9.1 Initial Recognition and Measurement

Investment property is recognised as an asset when and only when:

- It is probable that the future economic benefits or service potential that are associated with the investment property will flow to the
 municipality and
- The cost or fair value of the investment property can be measured reliably.

Investment property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations. Property with a currently undetermined use is also classified as investment property.

At initial recognition, the municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition. The cost of self-constructed investment property is measured at cost. Where an asset is acquired through a non-exchange transaction, any transaction cost incurred are recognised as part of the cost of the asset.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the municipality accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Repairs and Maintenance are expenses incurred through servicing equipment or repairing of existing assets. These expenses are not recognised in the carrying value of the asset, but directly recognised in Surplus or Deficit and measured at cost against the attribution segments of the Municipal Standard Chart of Accounts (mSCOA).

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

9.2 Subsequent Measurement - Cost Model

Subsequent to initial recognition, items of investment property are measured at cost less accumulated depreciation and accumulated impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life. Depreciation is calculated on cost, using the Straight-line Method over the useful life of the property, which is estimated at 1 - 100 years. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

The gain or loss arising on the disposal of an Investment Property is recognised in Surplus or Deficit.

9.3 Derecognition

Investment property is derecognised when it is disposed or when there are no further economic benefits expected from the use of the investment property. The gain or loss arising on the disposal or retirement of an item of investment property is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

The annual depreciation rates are based on the following estimated useful lives:

Asset Class	Years	Asset Class	Years
Buildings	1-100	Land	Indefinite

10, HERITAGE ASSETS

Heritage Assets are not depreciated owing to uncertainty regarding to their estimated useful lives. The municipality assess at each reporting date if there is an indication of impairment.

10.1 Initial Recognition

Heritage Assets are initially recognised at cost.

A heritage asset is recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

A heritage asset that qualifies for recognition as an asset is measured at its cost. Where a heritage asset is acquired through a non-exchange transaction, its cost is deemed to be its fair value as at the date of acquisition.

10.2 Subsequent Measurement

Subsequently all Heritage Assets are measured at cost, less accumulated impairment losses.

Heritage assets are reviewed at each reporting date for any indication of impairment. If any such indication exists, the asset's or recoverable service amount is estimated. The impairment recognised in the Statement of Financial Performance is the excess of the carrying value or recoverable service amount.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of impairment is recognised in the Statement of Financial Performance.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

10.3 Derecognition

Heritage assets are derecognised when it is disposed or when there are no further economic benefits expected from the use of the heritage asset. The gain or loss arising on the disposal or retirement of a heritage asset is determined as the difference between the sales proceeds and the carrying value of the heritage asset and is recognised in the Statement of Financial Performance.

11, LIVING AND NON-LIVING RESOURCES

Living Resources are defined as living organisms such as animals and plants that are used or held for the delivery or provision of goods and services, research, conservation, recreation, agricultural activities, education and training and rehabilitation or breeding processes.

Agricultural Assets are excluded from the scope of this Standard and are accounted for by the municipality in accordance with GRAP 27 (Agricultural Assets).

Living Resources are assets that undergo biological transformation and are those organisms that can grow, reproduce and degenerate. These assets include fruit trees, cattle and seed-bearing plants.

Non-living Resources are those resources, other than living resources, that occur naturally and have not been extracted from their source. These assets includes minerals, oils, etc.

Agricultural Assets are assets that are produced from living resources through agricultural activity and biological transformation through growth, degeneration and procreation. These assets are fruit from fruit-bearing plants, eggs from feathered animals and seeds from seed-bearing plants.

11.1 Initial Recognition and Measurement

A Living Resource shall be recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and when the cost or fair value of the asset can be measured reliably.

A Living Resource that qualifies for recognition as an asset shall be recognised at its cost.

Where a Living Resource is acquired through a non-exchange transaction, its cost shall be recognised at its fair value as at the date of the acquisition.

12. IMPAIRMENT OF ASSETS

The municipality classifies all assets held with the primary objective of generating a commercial return as Cash Generating Assets. All other assets are classified as Non-cash Generating Assets.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

12.1 Impairment of Cash Generating Assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

An impairment loss is recognised for cash generating units if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

12.2 Impairment of Non-cash Generating Assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the non-cash generating unit to which the asset belongs is determined. An impairment loss is recognised immediately in surplus or deficit.

The recoverable service amount of a non-cash generating asset is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in Surplus or Deficit.

An impairment loss is recognised for non-cash generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

13. CONSUMER DEPOSITS

Consumer deposits are partial security for a future payment of an account. All consumers are therefore required to pay a deposit equal to two months of consumption of electricity and water services. Deposits are considered a liability as the deposit is only refunded once the service is terminated. No interest is paid on deposits.

14. PROVISIONS

Provisions are reviewed at reporting date and adjusted to reflect the current best estimate of future outflows of resources. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met:

- The municipality has a detailed formal plan for the restructuring identifying at least:
 - the business or
 - the principal
 - the location.
 - the expenditures
 - when the plan
- The municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the reporting date.

If it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, the provision is derecognised.

15. LEASES

15.1 The Municipality as Lessee

15.1.1 Finance Leases

Property, plant and equipment or intangible assets subject to finance lease agreements are capitalised at amounts equal to the fair value of the leased asset or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Corresponding liabilities are recognised at equal amounts. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments to the fair value of the asset, plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment, investment property or intangibles assets. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

15.1.2 Operating Leases

The municipality recognises operating lease rentals as an expense in Surplus or Deficit on a Straight-line Basis over the term of the relevant lease. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability. Any lease incentives are included as part of the net consideration agreed.

15.2 The Municipality as Lessor

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined revenue and actual payments received will give rise to an asset or liability. The municipality recognises the aggregate cost of incentives as a reduction of rental revenue over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern over which the benefit of the leased asset is diminished.

16. BORROWING COSTS

All borrowing costs are treated as an expense in the period in which they are incurred.

17. EMPLOYEE BENEFIT LIABILITIES

17.1 Short-term Employee Benefits

When an employee has rendered service to the municipality during a reporting period, the municipality recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- As a liability (accrued expense), after deducting any amount already paid.
 If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund.
- As an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

17.1.1 Provision for Staff Leave

Staff leave is accrued to employees according to collective agreements. Provision is made for the full cost of accrued leave at reporting date. This provision will be realised as employees take leave or when employment is terminated.

17.1.2 Staff Bonuses Accrued

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year-end is based on bonus accrued at year-end for each employee.

17.1.3 Provision for Performance Bonuses

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrues to Section 57 employees. The performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

17.2 Post-employment Benefits

The municipality provides retirement benefits for its employees and councillors, and has both defined benefit and defined contribution post-employment plans.

17.2.1 Defined Contribution Plans

In measuring its defined benefit liability, the municipality recognises past service cost as an expense in the reporting period in which the plan is amended. For defined contribution plans, the municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

17.2.2 Defined Benefit Plans

Post-retirement Health Care Benefits

The municipality provides post-retirement medical benefits by subsidising the medical aid contributions of certain retired staff according to the rules of the medical aid funds. Council pays 60% as a contribution and the remaining 40% is paid by the members. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The present value of the defined benefit liability is actuarially determined in accordance with GRAP 25 Employee benefits (using a discount rate applicable to high-quality government bonds). The plan is unfunded.

These contributions are charged to the Statement of Financial Performance when employees have rendered the service entitling them to the contribution. The interest cost of the defined benefit obligation is recognised as finance cost in the Statement of Financial Performance, as it meets the definition of Interest Cost in GRAP 25. The liability was calculated by means of the projected unit credit actuarial valuation method.

The liability in respect of current pensioners is regarded as fully accrued and is therefore not split between a past (or accrued) and future inservice element. The liability is recognised at the fair value of the obligation. Payments made by the municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically by independent qualified actuaries.

Past-service costs are recognised immediately in Surplus or Deficit.

Long-service Allowance

Long service awards are provided to employees who achieve certain predetermined milestones of service within the municipality. The municipality's obligation under these plans is valued by independent qualified actuaries periodically and the corresponding liability is raised.

Payments are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as finance cost upon valuation, as it meets the definition of interest cost in GRAP 25.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically by independent qualified actuaries.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

Ex-Gratia Pension Benefits

Ex-gratia gratuities are provided to employees that were not previously members of a pension fund. The municipality's obligation under these plans is valued by independent qualified actuaries and the corresponding liability is raised. Payments made by the municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as financial cost upon valuation as it meets the definition of interest cost in GRAP 25.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically by independent qualified actuaries.

18. NET ASSETS

Included in the Net Assets of the municipality are the following items that are maintained in terms of specific requirements:

18.1 Accumulated Surplus

Included in the Accumulated Surplus of the municipality are the following Reserves that are maintained in terms of specific requirements.

18.1.1 Capital Replacement Reserve (CRR)

In order to finance the provision of Infrastructure and other items of Property, Plant and Equipment from internal sources, amounts are transferred from the Accumulated Surplus/(Deficit) to the CRR in terms of delegated powers.

The following provisions are set for the creation and utilisation of the CRR:

- The cash funds that back up the CRR are invested until utilised. The cash may only be invested in accordance with the Investment Policy of the municipality.
- The CRR may only be utilised for the purpose of purchasing items of Property, Plant and Equipment and may not be
 used for the maintenance of these items.
- Whenever an asset is purchased out of the CRR, an amount equal to the cost price of the asset is transferred from the CRR and the Accumulated Surplus/(Deficit) is credited by a corresponding amount.
- If a profit is made on the sale of assets other than land, the profit on these assets is reflected in Surplus or Deficit and is then transferred, via the Statement of Changes in Net Assets, to the CRR, provided that it is cash backed. Profit on the sale of land is not transferred to the CRR as it is regarded as revenue.

19. REVENUE RECOGNITION

19.1 Revenue from Non-Exchange Transactions

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

Revenue from property rates is recognised when the legal entitlement to this revenue arises. At the time of initial recognition, the full amount of revenue is recognised. If the municipality does not enforce its obligation to collect the revenue, this would be considered as a subsequent event. Collection charges are recognised when such amounts are legally enforceable. Rebates and discounts are offset against the related revenue, in terms of IGRAP 1, as there is no intention of collecting this revenue.

Fine Revenue constitutes both spot fines and summonses. Fine revenue is recognised when the spot fine or summons is issued. In cases where fines and summonses are issued by another government institute, revenue will only be recognised by the municipality when the receivable meets the definition of an asset. All unpaid receivables relating to traffic fines as at 30 June 2022 was written off in the 2022/2023 financial year.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment when such items of property, plant and equipment qualify for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

Revenue from third parties i.e. insurance payments for assets impaired, are recognised when it can be measured reliably and is not being offset against the related expenses of repairs or renewals of the impaired assets.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualify for recognition and become available for use by the municipality.

All unclaimed deposits are initially recognised as a liability until 36 months expires when all unclaimed deposits into the municipality's bank account will be treated as revenue. This policy is in line with the prescribed debt principle as enforced by the law.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the MFMA (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Revenue is measured at the fair value of the consideration received or receivable.

When, as a result of a non-exchange transaction, a municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability.

Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the present obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue.

When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability will be recognised as revenue.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

Services in-kind that are significant to the municipality's operations are recognised as assets and the related revenue when:

- It is probable that the future economic benefits or service potential will flow to the Municipality and
- The fair value of the assets can be measured reliably.

If the services in-kind are not significant to the municipality's operations or does not satisfy the above-mentioned criteria, the municipality only discloses the nature and type of services in-kind received during the reporting period. When the criteria for recognition is satisfied, services in-kind are measured on initial recognition at their fair value as at the date of acquisition. Services in-kind include services provided by individuals to the municipality and the right to use assets in a non-exchange transaction. These services meet the definition of an asset because the municipality controls the resource from which future economic benefits or service potential is expected to flow to the municipality. The assets are immediately consumed and a transaction of equal value is also recognised to reflect the consumption of these services in-kind, resulting in a decrease of the asset and an increase in an expense. The municipality therefore recognises an expense and related revenue for the consumption of services in-kind.

19.1.1 Rates and Taxes

Revenue from property rates is recognised when the legal entitlement to this revenue arises. At the time of initial recognition, the full amount of revenue is recognised. If the municipality does not enforce its obligation to collect the revenue, this would be considered as a subsequent event. Collection charges are recognised when such amounts are legally enforceable. Rebates and discounts are offset against the related revenue, in terms of IGRAP 1, as there is no intention of collecting this revenue.

19.1.2 Fines

Fine Revenue constitutes both spot fines and summonses. Fine revenue is recognised when the spot fine or summons is issued. In cases where fines and summonses are issued by another government institute, revenue will only be recognised by the municipality when the receivable meets the definition of an asset.

19.1.3 Government Grants and Receipts

Equitable share allocations are recognised in revenue at the start of the financial year if no time-based restrictions exist.

Conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in Surplus or Deficit in the period in which they become receivable

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest, it is recognised as interest earned in Surplus or Deficit.

19.1.4 Public Contributions

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment when such items of property, plant and equipment qualify for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

19.1.5 Other Donations and Contributions

Donations are recognised on a cash receipt basis or where the donation is in the form of property, plant and equipment, when such items of property, plant and equipment are available for use.

19.1.6 Rentals Received

Revenue from the rental of facilities and equipment is recognised on a Straight-line Basis over the term of the lease agreement.

19.1.7 Tariff Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

19.2 Revenue from Exchange Transactions

19.2.1 Service Charges

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable.

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

At the time of initial recognition, the full amount of revenue is recognised where the municipality has an enforceable legal obligation to collect, unless the individual collectability is considered to be improbable. If the municipality does not successfully enforce its obligation to collect the revenue this would be considered a subsequent event.

Service charges relating to electricity and water are based on consumption and a basic charge as per Council resolution. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale. It is estimated that pre-paid electricity is consumed within 5 to 7 days after the date of purchase. The pre-paid electricity sold, but not consumed yet at year-end is disclosed under Payables from Exchange Transactions in the Statement of Financial Position.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage and are levied monthly based on the recorded number of refuse points per property.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

Service charges relating to sanitation (sewerage) are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage. In the case of residential property, a fixed monthly tariff is levied and in the case of commercial property, a tariff is levied based on the number of sewerage connection on the property. Service charges based on a basic charge as per Council resolution.

Interest revenue is recognised using the effective interest rate method.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Dividends are recognised on the date that the municipality becomes entitled to receive the dividend.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff. This includes the issuing of licences and permits.

The amount of revenue arising on a transaction is usually determined by agreement between the municipality and the purchaser or user of the asset or service. It is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the municipality.

In most cases, the consideration is in the form of cash or cash equivalents and the amount of revenue is the amount of cash or cash equivalents received or receivable. However, when the inflow of cash or cash equivalents is deferred, the fair value of the consideration may be less than the nominal amount of cash received or receivable. When the arrangement effectively constitutes a financing transaction, the fair value of the consideration is determined by discounting all future receipts using an imputed rate of interest. The imputed rate of interest is the more clearly determinable of either:

- The prevailing rate for a similar instrument of an issuer with a similar credit rating or
- A rate of interest that discounts the nominal amount of the instrument to the current cash sales price of the goods or services.

The difference between the fair value and the nominal amount of the consideration is recognised as interest revenue.

When goods or services are exchanged or swapped for goods or services which are of a similar nature and value, the exchange is not regarded as a transaction that generates revenue. When goods are sold or services are rendered in exchange for dissimilar goods or services, the exchange is regarded as a transaction that generates revenue. The revenue is measured at the fair value of the goods or services received, adjusted by the amount of any cash or cash equivalents transferred. When the fair value of the goods or services received cannot be measured reliably, the revenue is measured at the fair value of the goods or services given up, adjusted by the amount of any cash or cash equivalents transferred.

19.2.2 Prepaid Electricity

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale. It is estimated that pre-paid electricity is consumed within 5 to 7 days after the date of purchase. The pre-paid electricity sold, but not consumed yet at year-end is disclosed under Payables from Exchange Transactions in the Statement of Financial Position.

19.2.3 Rentals Received

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

19.2.4 Interest Earned

Interest revenue is recognised using the effective interest rate method.

Interest earned on the following investments is not recognised in Surplus or Deficit:

- Interest earned on Trust Funds is allocated directly to the fund.
- Interest earned on unutilised Conditional Grants is allocated directly to the Creditor: Unutilised Conditional Grants,
 if the grant conditions indicate that interest is payable to the funder.

19.2.5 Dividends

Dividends are recognised on the date that the municipality becomes entitled to receive the dividend in accordance with the substance of the relevant agreement, where applicable.

19.2.6 Royalties

Royalties are recognised on an Accrual Basis in accordance with the substance of the relevant agreement. Royalties determined on a time basis are recognised on a Straight-line Basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.

19.2.7 Tariff Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

20. GRANTS-IN-AID

The municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the municipality does not:

- (a) Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- (b) Expect to be repaid in future; or
- (c) Expect a financial return, as would be expected from an investment.

These transfers are recognised in Surplus or Deficit as expenses in the period that the events giving rise to the transfer occurred.

21. ACCOUNTING BY PRINCIPALS AND AGENTS

21.1 Identifying whether an entity is a principal or an agent

When the municipality is a party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether the municipality is the principal or the agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or its own benefit.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

21.2 Binding arrangement

The municipality assesses whether it is the agent or the principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as the principal or the agent.

Assessing which entity benefits from the transactions with third parties

The municipality is the agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- . It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

The municipality is an agent for the Western Cape Provincial Department and receives a commission of 12% per signed agreement.

21.3 Recognition

The municipality, as the agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

22. SEGMENT REPORTING

A segment is an activity of a municipality:

- a) that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- b) whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- c) for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

22.1 Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the municipality's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management.

Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the municipality's financial statements.

23. UNAUTHORISED EXPENDITURE

Unauthorised Expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state, and expenditure in the form of grant that is not permitted in terms of the Municipal Finance Management Act (Act No 56 of 2003).

All expenditure relating to Unauthorised Expenditure is accounted for as an expense in Surplus or Deficit in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in Surplus or Deficit.

24. IRREGULAR EXPENDITURE

Irregular Expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No 56 of 2003), the Municipal Systems Act (Act No 32 of 2000), the Public Office Bearers Act (Act No 20 of 1998), or is in contravention of the Municipality or Municipal Entities' Supply Chain Management Policies. Irregular Expenditure excludes Unauthorised Expenditure.

Irregular Expenditure is accounted for as an expense in Surplus or Deficit in the period it occurred and where recovered, it is subsequently accounted for as revenue in Surplus or Deficit.

25. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and Wasteful Expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to Fruitless and wasteful expenditure is accounted for as expenditure in Surplus or Deficit in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in Surplus or Deficit.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

26. COMMITMENTS

- Items are classified as capital commitments when the municipality has committed itself to future transactions that will normally result in the outflow of cash.
- Disclosures are required in respect of unrecognised contractual future capital commitments relating to property, plant and equipment, investment property, intangible assets and heritage assets, as applicable. Refer to note Commitments.
- Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements if both the following criteria are met:
 - Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services).
 - Contracts should relate to something other than the routine, steady, state business of the municipality therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.
- Capital commitments disclosed in the financial statements represent the balance committed to capital projects on
- reporting date that will be incurred in the period subsequent to the specific reporting date.

27. RELATED PARTIES

The objective of this Standard is to ensure that a reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this Standard referred to as the reporting entity) shall apply this Standard in:

- a) Identifying related party relationships and transactions;
- b) Identifying outstanding balances, including commitments, between an entity and its related parties;
- c) Identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- d) Determining the disclosures to be made about those items

This Standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This Standard also applies to individual annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The Standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

A person or a close member of that person's family is related to the reporting entity if that person:

- a) has control or joint control over the reporting entity;
- b) has significant influence over the reporting eis a member of the management of the entity or its controlling entity.
- c) is a member of the management of the entity or its controlling entity.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

An entity is related to the reporting entity if any of the following conditions apply:

a) the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);

One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);

- a) both entities are joint ventures of the same third party;
- b) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
- c) the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity

Related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;

- a) the entity is controlled or jointly controlled by a person identified in (a); and
- b) a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The Standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

28. CONTINGENT ASSETS AND CONTINGENT LIABILITIES

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality. A contingent liability could also be a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to the obligation or the amount of the obligation cannot be measured with sufficient reliability.

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the probability of an outflow of resources embodying economic benefits or service potential is remote. A contingent asset is disclosed where the inflow of economic benefits or service potential is probable.

29. EVENTS AFTER THE REPORTING DATE

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

The events after the reporting date that are classified as Non-adjusting Events after the Reporting Date have been disclosed in Notes to the Annual Financial Statements.

- Those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date).
- Those are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

If non-adjusting events after the reporting date are material, the municipality discloses the nature and an estimate of the financial effect.

30. VALUE ADDED TAX

Revenue, expenses and assets are recognised net of the amounts of value added tax. The net amount of value added tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2022

1. GENERAL INFORMATION

Langeberg Local Municipality is a local government institution in Ashton, Western Cape, and is one of five local municipalities under the jurisdiction of the Cape Winelands District Municipality. The address of its registered office and principal place of business are disclosed under "General Information" included in the Annual Financial Statements and in the introduction of the Annual Report. The principal activities of the municipality are disclosed in the Annual Report and are prescribed by the Municipal Finance Management Act (MFMA, Act no 56 of 2003).

2. INVENTORIES

Total Inventories	13 043 832	19 074 281
Water - At Cost	213 398	181 973
Materials and Supplies	5 479 628	6 236 040

In determining the recoverability of Receivables, the municipality has placed strong emphasis on verifying the indigent status of consumers. Provision for impairment of Receivables has been made for all consumer balances outstanding based on the payment ratio over 12 months per service type. No further credit provision is required in excess of the Provision for Impairment.

No provision has been made in respect of government debt as these amounts are considered to be fully recoverable. The municipality holds collateral over these balances in the form of Consumer Deposits / Guarantees, which are not covering the total outstanding debt and vacant property respectively.

The Provision for Impairment on Receivables exists predominantly due to the possibility that these debts will not be recovered. The Provision for Impairment was calculated after grouping all the financial assets of similar nature and risk ratings and assessing the recoverability.

No Provision for Impairment has been made in respect of government debt as these amounts are considered to be fully recoverable. The municipality holds collateral over these balances in the form of Rates Assessment Deposits / Guarantees, which are not covering the total outstanding debt and vacant property respectively.

25. PROPERTY RATES

Total Property Rates 96 635 339 92 757 614

The above property rates includes

Property Rates are levied on the value of land and improvements, which valuation is performed every five years. The last valuation came into effect on 1 July 2021.

Approval in terms of Section 32(2) (b) (ii) of the Municipal Property Rates Act, 2004, (no 6 of 2004) was granted for the extension of the current valuation roll of Langeberg Municipality to six (6) financial years. The implementation of the valuation roll of Langeberg Municipality will be 1 July 2021.

Valuations

Rateable Land and Building

Business and Commercial Property	1 846 508 160	1 861 185 660
Municipal Properties	675 129 501	571 204 361
Residential Properties	8 611 500 493	8 405 463 993

Agricultural Properties	7 499 961 650	7 943 784 250
Other Categories	984 490 581	513 791 981
Total Value	19 985 308 085	19 660 055 945

Interim valuations are processed on a continuous basis to take into account changes in individual property values due to alterations and subdivisions.

Tariffs	2023	2022
Residential	0.0070c	0.0067c
Commercial, Industrial & Government	0.0040c	0.0133c
Public Benefit Organisation	0.0018c	0.0017c
Agriculture	0.0018c	0 0017c

Rebates were granted on land with buildings used solely for dwellings purposes as follows:

In terms of the Rates Policy of the municipality the first R80 000.00 of the market value of a property is exempted from paying rates. The first R15 000 on the valuation is exempted in terms section 17(1)(h) of the Municipal Property Rates Act, the subsequent R65 000 is a discretionary rebate.

Rebates can be defined as any income that the Municipality is entitled by law to levy, but which has subsequently been foregone by way of rebate or remission.

54.1.7 Deviation from, and ratification of minor breaches of, the Procurement Processes

In terms of section 36(1) of the Municipal Supply Chain Management Policy approved by the Council, any deviation from the Supply Chain Management Policy needs to be approved / condoned by the Municipal Manager, noted by Council and bids where the formal procurement processes could not be followed must be noted in the Annual Financial Statements.

The following deviations from the tender stipulations in terms of the municipality's Supply Chain Management Policy were ratified by the Municipal Manager and reported to Council:

54.1.8)(d)(i) of the MFMA

Material Electricity and Water Losses were as follows and are not recoverable:

Electricity:

	Lost Units	Tariff	Value
30 June 2023	10 595 405	2.1400	22 674 167
30 June 2022	21 417 789	1.9578	41 931 747

Electricity Losses occur due to *inter alia*, technical and non-technical losses (Technical losses - inherent resistance of conductors, transformers and other electrical equipment; Non-technical losses - the tampering of meters, the incorrect ratios used on bulk meters, faulty meters and illegal electricity connections). The problem with tampered meters and illegal connections is an ongoing process, with regular action being taken against defaulters. Faulty meters are replaced as soon as they are reported.

Current Borrowings	Development Bank of South Africa	4 079 506	4 062 325
Total Financial Liabilities	<u> </u>	162 395 900	160 287 094

No Financial Instruments of the municipality have been reclassified during the year.

56.2 Capital Risk Management

The capital structure of the municipality consists of debt, which includes Cash and Cash Equivalents and Equity, comprising Funds, Reserves and Accumulated Surplus as disclosed in Note 24. and the Statement of Changes in Net Assets.

Gearing Ratio

	2023 R	2022 R
The gearing ratio at the year-end was as follows:		
Debt Cash and Cash Equivalents	49 100 421 (365 039 040)	36 615 473 (358 389 829)
Net Debt	(315 938 619)	(321 774 356)
Equity	1 020 046 429	958 720 636
Net debt to equity ratio	30.97%	33.56%

Debt is defined as Long-term Liabilities, together with its Short-term Portion.

Equity includes all Funds and Reserves of the municipality, disclosed as Net Assets in the Statement of Financial Performance and Net Debt as described above.

56.3 Financial Risk Management Objectives

The Accounting Officer has overall responsibility for the establishment and oversight of the municipality's risk management framework. The municipality's risk management policies are established to identify and analyse the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits.

Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. Financial Instruments play a much more limited role in creating or changing risks that would be typical of listed companies to which the IAS's mainly apply. Generally, Financial Assets and Liabilities are generated by day-to-day operational activities and are not held to manage the risks facing the municipality in undertaking its activities.

The Department Financial Services monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity risk. Compliance with policies and procedures is reviewed by the internal auditors on a continuous basis, and annually by external auditors. The municipality does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports periodically to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function.

Further quantitative disclosures are included throughout these Annual Financial Statements.

56.4 Significant Risks

It is the policy of the municipality to disclose information that enables the user of its Annual Financial Statements to evaluate the nature and extent of risks arising from Financial Instruments to which the municipality is exposed on the reporting date.

The municipality has exposure to the following risks from its operations in Financial Instruments:

- Credit Risk;
- Liquidity Risk; and
- Market Risk.

Risks and exposures are disclosed as follows:

Market Risk

Market Risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the municipality's income or the value of its holdings in Financial Instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Credit Risk

Credit Risk is the risk of financial loss to the municipality if a customer or counterparty to a Financial Instrument fails to meet its contractual obligations and arises principally from the municipality's receivables from customers and investment securities.

Liquidity Risk

Liquidity Risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash or another financial asset. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liquidity Risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

A maturity analysis for Financial Liabilities (where applicable) that shows the remaining undiscounted contractual maturities is disclosed in Note 56..8 to the Annual Financial Statements.

56.5 Market Risk

The municipality's activities expose it primarily to the financial risks of changes in interest rates (see Note 56.7 below). No formal policy exists to hedge volatilities in the interest rate market.

There has been no change to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

56.5.1 Foreign Currency Risk Management

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

56.5.2 Interest Rate Risk Management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with Absa Bank, First National Bank, Nedbank, Investec and Standard Bank. No investments with a tenure exceeding twelve months are made.

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality is not exposed to credit interest rate risk as the municipality has no borrowings.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

Interest Rate Sensitivity Analysis

The sensitivity analysis has been determined based on the exposure to interest rates at the Statement of Financial Position date. The analysis is prepared by averaging the amount of the investment at the beginning of the financial year and the amount of the investment at the end of the financial year. A 25 basis point increase or decrease was used, which represents management's assessment of the reasonably possible change in interest rates. The short and long-term financial instruments at year-end with variable interest rates are set out in Note 56..8 below:

Cash and Cash Equivalents:

If interest rates had been 25 basis points higher / lower and all other variables were held constant, the municipality's:

• Surplus for the year ended 30 June 2023 would have increased / decreased by R904 263 (30 June 2022: R801 783). This is mainly attributable to the municipality's exposure to interest rates on its variable rate investments.

102

56.6 Credit Risk Management

Credit Risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances

Investments/Bank, Cash and Cash Equivalents

The municipality limits its counterparty exposures from its money market investment operations (financial assets that are neither past due nor impaired) by only dealing with Absa Bank, First National Bank, Nedbank and Standard Bank. No investments with a tenure exceeding twelve months are made.

Trade and Other Receivables

There were no material changes in the exposure to credit risk and its objectives, policies and processes for managing and measuring the risk during the year under review. The municipality's maximum exposure to credit risk is represented by the carrying value of each financial asset in the Statement of Financial Position, without taking into account the value of any collateral obtained. The municipality has no significant concentration of credit risk, with exposure spread over a large number of consumers, and is not concentrated in any particular sector or geographical area.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of trade and other receivables.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

The table below shows the balance of the 5 major counterparties at the balance sheet date. Management is of the opinion that, although these parties are the 5 counterparties with highest outstanding balances, no significant credit risk exposure exists based on the payment history of the parties, except for Northern Province Academy of Sport and Department of Water and Forestry Affairs for which there is uncertainty about the collectivity. They have been included in the Provision for Impairment of Consumer Debtors.

	2023 R	2022 R
	K	K
The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:		
Investments	137 205	137 205

Credit quality Groupings:

High - High certainty of timely payment. Liquidity factors are strong and the risk of non-payment is small.

Medium - Reasonable certainty of timely payment. Liquidity factors are sound, although ongoing funding needs may enlarge financing requirement. The risk of non-payment is small.

Low - Satisfactory liquidity factors and other factors which qualify the entity as investment grade. However, the risk factors of non-payment are larger.

None of the financial assets that are fully performing, have been renegotiated in the last year.

external credit ratings (if available) or to historical information about counterparty default rates:

56. FINANCIAL INSTRUMENTS (Continued)

56.7 Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

Liquidity and Interest Risk Tables

The municipality ensures that it has sufficient cash on demand or access to facilities to meet expected operational expenses through the use of cash flow forecasts.

The following tables detail the municipality's remaining contractual maturity for its non-derivative financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the municipality can be required to pay.

Description	Note ref in	Average effective	Total	6 Months	6 - 12	1 - 2	2 - 5	More than

The municipality does not have any financing facilities and expects to meet its obligations from operating cash flows and proceeds of maturing financial assets and to maintain current debt to equity ratio.

56.8 Other Price Risks

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

57. MULTI-EMPLOYER RETIREMENT BENEFIT INFORMATION

The Municipality requested detailed employee and pensioner information as well as information on the Municipality's share of the Pension and Retirement Funds' assets from the fund administrator. The fund administrator confirmed that assets of the Pension and Retirement Funds are not split per participating employer. Therefore, the Municipality is unable to determine the value of the plan assets as defined in GRAP 25.

As part of the Municipality's process to value the defined benefit liabilities, the Municipality requested pensioner data from the fund administrator. The fund administrator claims that the pensioner data is confidential and was not willing to share the information with the Municipality. Without detailed pensioner data the Municipality was unable to calculate a reliable estimate of the accrued liability in respect of pensioners who qualify for a defined benefit pension.

The municipality makes provision for post-retirement benefits to eligible councillors and employees, who belong to different pension schemes. All councillors belong to the Pension Fund for Municipal Councillors, whilst employees belong to a variety of approved Pension and Provident Funds as described below.

57.1 DEFINED BENEFIT SCHEMES

LA Retirement Fund (Previously Cape Joint Pension Fund):

	Last actuarial valuation	Total assets	Total liabilities	Contributing members	
LA Retirement Fund	June 2022	1 391 841.00	1 218 360.00	1	
Contributions paid recognised in	2023 R	2022 R			
LA Retirement Fund				52 225.56	49 785.84

The contribution rate payable is 9%, by the members and 18% by Council. The last actuarial valuation performed for the year ended 30 June 2022 revealed that the fund has a funding level of 111,6% (30 June 2021: 104,9%).

The contribution rate payable is under the defined benefit section is 27%, 9% by the members and 18% by their councils. The actuarial valuation report at 30 June 2022 disclosed an actuarial valuation amounting to R1,391,841, 000 (30 June 2021: R1, 486,856,110), with a nett accumulated surplus of R144,158,000 (2021: R69, 420,000), with a funding level of 111.6% (30 June 2021: 104.9%).

It is to be noted that :

- (i) The value of assets is the fair value of the net assets of the Fund after deduction of current liabilities and any liabilities arising from the pledging, hypothecation or other encumbering of the assets of the Fund. The actuarial value of the assets is equal to the fair value of the assets.
- (ii) Pensioner liabilities include DB deferred member liabilities and a provision for future expenses related to these categories of membership.
- (iii) The funding level is determined by dividing the value of the assets of the pensioner account by the sum of the pensioner liabilities and the Solvency Reserve
- (v) The processing error reserve account held a positive balance of R15.938 million as at 30 June 2022 representing 1.3% of the DC section liabilities. The Trustees may allocate the balance of the processing error reserve account to members' shares and living annuitants' accounts

The nature of the assets is suitable for the fund, except that the proportion of direct property underlying the pensioner liabilities may represent an over-concentration of assets in this class. The assets are appropriately matched relative to the term and nature of the active member liabilities. The Fund's investment strategy is suitable. Finally the risk benefits are partially re-insured and this is appropriate for the size and nature of the Fund.

The contribution rate payable is 9%, by the members and 18% by Council. The last actuarial valuation performed for the year ended 30 June 2021 revealed that the fund has a funding level of 111,6% (30 June 2021 - 104,9%).

Cape Retirement Fund:

	Last actuarial valuation	Total assets	Total liabilities	Contributing members

Contributions paid recognised in the	2023 R	2022 R			
Cape Retirement Fund				23 683 607	20 905 366

The contribution rate payable is 9% by members and 18% by Council.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

57.2 DEFINED CONTRIBUTION SCHEMES

Council contribute to the Government Employees Pension Fund, Municipal Council Pension Fund, IMATU Retirement Fund and SAMWU National Provident Fund which are defined contribution funds. The retirement benefit fund is subject to the Pension Fund Act, 1956, with pension being calculated on the pensionable remuneration paid. Current contributions by Council are charged against expenditure on the basis of current service costs.

	Last actuarial valuation	Total assets	Total liabilities	Contributing members
South African Local Authorities Pension Fund Municipal Workers Retirement fund (previously SAMWU National Provident	July 2018	14 298 600 7 720 948	14 899 800 7 569 557	18 55
Fund)	July 2015	22 019 548	22 469 357	

58. RELATED PARTY TRANSACTIONS

All Related Party Transactions are conducted at arm's length, unless stated otherwise.

58.1 Compensation of Related Parties

Compensation of Close Family Members of Councillors and/or Key Management. Refer to note 35 and 36 for key management and councillors

63. EVENTS AFTER THE REPORTING DATE

Fees as compensation to agents (Vendors)

Non-Adjusting Event After the Reporting Date - Flooding Incident

Nature of the Event

Third Party Vendor

A significant non-adjusting event occurred after the financial reporting date of 30 June 2023. Specifically, a severe flood occurred during the long weekend of the 22nd to the 25th of September 2023, which resulted in extensive damage to Municipal Infrastructure.

Financial Impact

The financial impact of this flooding incident on Langeberg Municipality's infrastructure is estimated to be approximately R20 000 000. This estimate is based on preliminary assessments of the damage and may be subject to further adjustments as more information becomes available.

Disclosure of Non-Adjusting Event

The financial statements of Langeberg Municipality for the year ended 30 June 2023 do not reflect the effects of this flooding incident, as the event occurred after the financial reporting date. Therefore, the financial statements have not been adjusted for this non-adjusting event.

Disclosure of Materiality

In accordance with GRAP 14, Management has assessed the materiality of this event, taking into consideration its size and nature. The estimated financial impact of approximately R20 000 000 is considered material to the financial statements of the Municipality.

Events Subsequent to the Reporting Date

In compliance with GRAP 14, this event is disclosed as an event subsequent to the reporting date. It is important to note that this disclosure is made to ensure that the financial statement users are informed about significant events that occurred after the reporting date but before the issuance of the financial statements.

Uncertainty and Further Disclosures

At the time of preparing these financial statements, there may be uncertainties surrounding the exact extent of the damage and the related costs of repair or replacement of Municipal Infrastructure. Management is actively monitoring the situation, and further disclosures will be made as more information becomes available and as the impact of this event on the financial statements becomes more certain.

Going Concern Considerations

Management in assessing the implications of this non-adjusting event on the Municipality's ability to continue as a going concern has noted that the Municipality is still able to provide basic services to its residents and foresees that the Municipality will still be operating as a going concern in the foreseeable future. If the event raises concerns about the Municipality's ability to continue its operations, further disclosures may be necessary in accordance with GRAP 14.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

64. COVID-19 EXPENDITURE

COVID Pandemic in South Africa

Although the coronavirus was international news since December 2019, it was only on 5th March 2020 that the South African National Institute for Communicable Diseases confirmed that a suspected case of COVID-19 had tested positive. On 23rd March 2020 President Cyril Ramaphosa announced the nationwide lockdown. On 30th March 2020 the Minister of Finance issued a conditional Exemption Notice in terms of section 177(1)(b) of the Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), in order to facilitate and enable the performance of legislative responsibilities by municipalities and municipal entities during the national state of disaster.

The table below indicates the total COVID-19 response expenditure (excluding VAT) for the period ending 30 June 2023:

	2023 R	2022 R
Project Description		
Sanitisation of taxi ranks/ public facilities/ inner cities	-	52 709
PPE	=	128 493
Sanitisation of office building	-	18 234
Total COVID-19 Expenditure		199 436
The table below indicates the Funding Sources for the total COVID-19 response expenditure (excluding VAT) for the period ending 30 June 2023:		
COVID-19 FUNDING		
Funding Sources for COVID-19 Expenditure		
Libraries Municipal Replacement fund	=	18 967
Own Revenue	=	180 469
Total Funding for COVID-19 Expenditure		199 436

For the period ending 30 June 2023, there has been no COVID-19 Expenditure incurred by the municipality

65. GOING CONCERN ASSESSMENT

Langeberg Municipality continued to generate accounting and operating surpluses in FY2023.

Based on the long-term liquidity forecasts and projections, management believe that there is a reasonable basis to conclude that the municipality will be able to continue with its service delivery operations and to meet its financial commitments in the medium and long term.

The municipality also obtains significant amounts of government grants annually to finance operating and capital expenditure.

Taking the aforementioned into account, management has prepared the Annual Financial Statements on the Going Concern Basis.

LANGEBERG LOCAL MUNICIPALITY NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

66. SEGMENT REPORTING

For management purposes the municipality is broadly organised into business units based on the nature of operations and the services they provide. The municipality has five primary reportable segments:

The segment for Community Services:-

This segment consists of all services for community & social development and and sport & recreation.

The segment for Road Transport:-

This segment consists of all services for the providing of road transport to the community

The segment for Trading Services:

This segment consists of the following infrastructure services delivered to the community.

Energy Sources:-

This segment consists of all services for energy supply to the community.

-- Waste Management:-

This segment consists of all services for the management of solid waste in the municipal area

-- Wastewater Management:-

This segment consists of all services for the management of waste water, including sewage, in the municipal area.

Water Management:-

This segment consists of all services for water supply to the community.

The segment for Other Services:-

This segment consists of other variance services rendered in the municipal jurisdiction area.

No individually material operating segments have been aggregated to form the above reportable operating segments.

Segment performance is evaluated based on non-financial metrics and the segment's operating surplus or deficit, measured consistently with the accounting policies applied in the Annual Financial Statements. However, the municipality's financing (including finance costs and finance income) and revenue from taxes are managed on a group Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment.

Inter-business unit services are not valued and are deemed to have been supplied for no consideration, and are therefore not eliminated. However, the quality of services provided internally is monitored as part of the non-financial service performance information.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

The municipality operates within the following geographical areas:

WARDAREAWard 1RobertsonWard 2RobertsonWard 3RobertsonWard 4Bonnievale (Happy Valley)Ward 5McGregorWard 6RobertsonWard 7MontaguWard 8BonnievaleWard 9AshtonWard 10Ashton ZolaniWard 11Ashton RuralWard 12Montagu

The municipality does however not monitor operating results for these geographical segments, and operational results are only monitored within the business units as previously disclosed.
