Annual Financial Statements for the year ended 30 June 2022

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and were given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2023 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's external auditors.

The external auditors are responsible for independently auditing and reporting on the municipality's annual financial statements.

The annual financial statements set out on pages 5 to 114, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2022 and were signed on its behalf by:

Mr & Butler Acting Municipal Manager

uditing to build public confidence

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Municipal Finance Management Act (MFMA) and effective Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality and are rounded to the nearest South African Rand.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decision or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatements judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor. Materiality is determined as 1% of total expenditure. This materiality is from management's perspective and does not necessarily correlate with the external auditor's materiality.

1.4 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements in conformity with GRAP, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Impairment of receivables

The calculation in respect of the impairment of debtors is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per service-identifiable categories across all classes of debtors.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Property, plant and equipment

The useful lives of property, plant and equipment are based on management's estimation. Infrastructure's useful lives are based on technical estimates of the practical useful lives for the different infrastructure types, given engineering technical knowledge of the infrastructure types and service requirements. For other assets and buildings management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and residual values of property, plant and equipment:

- The useful life of movable assets was determined using the age of similar assets available for sale in the active market. Discussions with people within the specific industry were also held to determine useful lives.
 - Local Government Industry Guides were used to assist with the deemed cost and useful life of infrastructure assets.
- The Municipality referred to buildings in other municipal areas to determine the useful life of buildings. The Municipality also consulted with engineers to support the useful life of buildings, with specific reference to the structural design of buildings.

Componentisation of Infrastructure assets

All infrastructure assets are unbundled into their significant components in order to depreciate all major components over the expected useful lives. The cost of each component is estimated based on the current market price of each component, depreciated for age and condition and recalculated to cost at the acquisition date if known or to the date of initially adopting the standards of GRAP.

Intangible assets

The useful lives of intangible assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate.

Reference was made to intangibles used within the Municipality and other municipalities to determine the useful life of the assets.

Post-retirement medical obligations, long service awards and ex-gratia pension benefits

The cost of post retirement medical obligations, long service awards and ex-gratia gratuities are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 21.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Management judgement is required when recognising and measuring provisions and when measuring contingent liabilities. Provisions are discounted where the time value effect is material. Additional disclosure of these estimates of provisions and contingent liabilities are included in note 22 - Provisions and note 46 - Contingencies.

Provision for Landfill Sites

The provision for rehabilitation of the landfill site is recognised as and when the environmental liability arises. The provision is calculated by a qualified environmental engineer. The provision represents the net present value at the reporting date of the expected future cash flows to rehabilitate the landfill site. To the extent that the obligations relate to an asset, it is capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset are recognised in the Statement of Financial Performance.

Management referred to the following when making assumptions regarding provisions:

- Professional engineers are utilised annually to determine the cost of rehabilitation of landfill sites as well as the remaining useful life of each specific landfill site.
- Interest rates linked to appropriate government bond rates were used to calculate the effect of time value of money.

Pre-paid electricity estimation

Pre-paid electricity is only recognised as income once the electricity is consumed. The pre-paid electricity balance (included under payables) represents the best estimate of electricity sold at year-end that is still unused. The average prepaid electricity sold per day during the year under review is used and the estimate is calculated using between 5 and 10 days' worth of unused electricity.

IGRAP 18 Recognition and Derecognition of land

In some instances the municipality is not the legal owner or the custodian of land appointed in terms of legislation, but assessed that it controls such land. Key judgements made and assumptions applied to conclude that it controls such land, are as follows (IGRAP 18 par 40):

Land controlled by the municipality as a result of a past event and from which future economic benefit or service potential is expected to flow to the entity are recognised by the municipality. Control is evidenced by the municipality's ability to use, or direct others to use the land and also by the right to direct access to the land, and to restrict or deny access of other to the land.

In some instances the municipality is the legal owner, or the custodian of land appointed in terms of legislation, but concludes that it does not control such land. Key judgements made and assumptions applied to conclude that it does not control such land, are as follows (IGRAP 18 par 41):

Land not controlled by the municipality as a result of a past event and from which future economic benefit or service potential will not flow to the entity. The municipality does not have the ability to use, or direct others to use the land. The municipality does not have right to direct access to the land, and to restrict or deny access of other to the land. There are various housing scheme land where the municipality are still the legal owner per the deeds office, but control and substantive rights were transferred. These land are not recognised by the municipality.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Segment reporting

The municipality is structured in terms of core functions mandated in legislation. Information regarding progress in the performance of mandated functions, is reported to management for the purpose of evaluating segment performance and the allocation of resources to various activities in lieu of strategic objectives. Where more than one set of segments has been identified, management may report such information separately or as a matrix. In addition, management may choose to adopt a primary and secondary reporting structure with limited disclosures made about secondary segments.

The segment information has been prepared on the accrual basis of accounting in accordance with the historical cost convention, unless specified otherwise.

GRAP 18 permits the aggregation of two or more segments into a single segment where segments have similar economic characteristics and share a majority of the following:

- a.) the nature of the goods and/or services delivered;
- b.) the type or class of customer or consumer to which goods and services are delivered;
- c.) the methods used to distribute the goods or provide the services; or
- d.) the nature of the regulatory environment that applies to the segment.

In accordance with section 153 of the Constitution of South Africa, the municipality's administration, budget and planning processes are structured in order to give priority to the basic needs of the community, as well as to promote the social and economic development of the community. Management has thus decided to organise segments around the nature of goods and/or services delivered in accordance with the objects of local government as stipulated in section 152(1) of the Constitution.

1.5 Investment property

Initial Recognition

Investment property shall be recognised as an asset when, and only when:

- it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the entity, and
- the cost of the investment property can be measured reliably.

Investment property includes property (land or a building, or part of a building, or both land and buildings held under an operating lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations. Property with a currently undetermined use is also classified as investment property.

At initial recognition, the Municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition. The cost of self-constructed investment property is measured at cost.

Transfers are made to or from investment property only when there is a change in use.

Subsequent Measurement - Cost model

Subsequent to initial recognition, items of investment property are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Cost model

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value over the useful life of the property, which is as follows:

Item Property - land Property - buildings Useful life indefinite 100 years

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.5 Investment property (continued)

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (refer to note 12).

Investment property is not used as security unless stated otherwise in the notes.

1.6 Property, plant and equipment

Initial recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and servicing equipment qualify as property, plant and equipment when the Municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

Subsequent Measurement - Cost Model

Subsequent to initial recognition, items of Property, plant and equipment are carried at cost less accumulated depreciation and any impairment losses.

Where the Municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits or service potential associated with the asset.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.6 Property, plant and equipment (continued) Depreciation and impairment

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life	
Land	None	Indefinite	
Buildings	Straight line	100 years	
Infrastructure - Sewerage	Straight line	10 - 100 years	
Infrastructure - Electricity	Straight line	10 - 100 years	
Infrastructure - Water	Straight line	10 - 182 years	
Infrastructure - Roads	Straight line	7 - 100 years	
Infrastructure - Security measures	Straight line	5 - 80 years	
Community asset	Straight line	5 - 100 years	
Leased assets	Straight line	2 - 6 years	
Other assets - Bins and containers	Straight line	15 years	
Other assets - Other	Straight line	3 - 100 years	
Other assets - Office Equipment	Straight line	2 - 35 years	
Other assets - Vehicles and specialised vehicles	Straight line	7 - 50 years	

Should the useful life of an asset be adjusted after review, annual depreciation will be calculated on the carrying value divided by the opening balance of the remaining useful life of that asset for the reporting period.

The residual value, and the useful life and depreciation method of each asset are assessed based on the occurrence of certain indicators. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in the Statement of Financial Performance unless it is included in the carrying amount of another asset.

Property, plant and equipment are reviewed for any indication of impairment. If any such indication exists, the accounting policy as disclosed under 1.15 or 1.16 (which ever is relevant) is applied.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of an impairment is recognised in the Statement of Financial Performance.

De-recognition

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in the Statement of Financial Performance when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.7 Intangible assets

Initial Recognition

An intangible asset is an identifiable non-monetary asset without physical substance.

An asset meets the identifiability criterion in the definition of an intangible asset when it:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost of the asset can be measured reliably.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are initially recognised at cost.

Subsequent Measurement - Cost model

Intangible assets are subsequently carried at cost less any accumulated amortisation and any accumulated impairment losses.

The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

Amortisation

Amortisation is charged so as to write-off the cost of intangible assets over its estimated useful lives using the straight line method. Amortisation of an asset begins when it is available for use, i.e. when it is in the condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are amortised separately. The estimated useful lives, residual values and amortisation method are assessed based on the occurrence of certain indicators, with the effect of any changes in estimate accounted for on a prospective basis.

The annual amortisation rates are based on the following estimated useful lives:

ItemUseful lifeComputer software and website5-10 years

Derecognition

Intangible assets are derecognised:

on disposal; or

when no future economic benefits or service potential are expected from its use or disposal.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.7 Intangible assets (continued)

The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.8 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

The municipality separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (refer to note 15).

Initial recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost of the asset can be measured reliably.

Initial measurement

Heritage assets are initially measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement - Cost model

After recognition as an asset, a class of heritage assets is carried at cost less any accumulated impairment losses.

Heritage assets are not depreciated.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising on the disposal or retirement of a heritage asset is determined as the difference between the sales proceeds and the carrying value of the heritage asset and is recognised in the Statement of Financial Performance.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.9 Financial instruments

Financial instruments recognised on the Statement of Financial Position include receivables, cash and cash equivalents, annuity loans and payables and non-current investments.

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Long-term investments and receivables	Financial asset measured at amortised cost
Receivables from exchange transactions	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	
Long-term liabilities	
Trade and other payables from exchange transactions	

Category Financial liability measured at amortised cost Financial liability measured at amortised cost

Initial recognition

- - -

The municipality recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

Financial instruments at amortised cost.

All financial assets measured at amortised cost, are subject to an impairment review.

Receivables

Receivables are classified as financial assets at amortised cost, and are initially measured at fair value and subsequently measured at amortised cost using the effective interest rate method.

For amounts due from receivable carried at amortised cost, the Municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant at the end of each reporting period. Objective evidence of impairment includes significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 90 days overdue). If the Municipality determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.9 Financial instruments (continued)

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in surplus or deficit. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the municipality. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a previous write-off is later recovered, the recovery is recognised in the surplus or deficit.

The present value of the estimated future cash flows is discounted at the original effective interest rate, if material. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the original effective interest rate.

Payables and long term liabilities

Financial liabilities consist of payables and long term liabilities. They are categorised as financial liabilities held at amortised cost, and are initially recognised at fair value and subsequently measured at amortised cost using an effective interest rate, which is the initial carrying amount, less repayments, plus interest.

Cash and cash equivalents

Cash and Cash Equivalents are initially measured at fair value. Cash includes cash on hand (including petty cash) and cash with banks. Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, highly liquid deposits and net of bank overdrafts. The Municipality categorises cash and cash equivalents as financial assets carried at amortised cost.

Non-Current Investments

Investments which include fixed deposits invested in registered commercial banks, are stated at amortised cost.

Gains and losses

For financial assets and financial liabilities measured at amortised cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Derecognition

Financial assets

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has
 transferred control of the asset to another party and the other party has the practical ability to sell the asset in its
 entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose
 additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Municipality could be required to repay.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.9 Financial instruments (continued)

Financial liabilities

A financial liability (or a part of a financial liability) is derecognised from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Financial Performance.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance note 1.24

Offsetting of financial instruments

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

1.10 Statutory receivables

Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset. Statutory receivables can arise from both exchange and non-exchange transactions.

Initial Recognition

Statutory receivables are recognised when the related revenue is recognised or when the receivable meets the definition of an asset when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the losses are recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

AUDITOR-GENERAL SOUTH AFRICA Auditing to build public confidence

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.10 Statutory receivables (continued)

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

1.11 Taxes - Value Added Tax

Revenue, expenses and assets are recognised net of the amounts of value added tax. The net amount of Value Added Tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

From 1 April 2018 value added tax is levied at the standard rate of 15% on the supply of goods and services.

Value added tax is recognised on the payments basis.

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased assets or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of return on the remaining balance of the liability. The accounting policies relating to de-recognition of financial instruments are applied to lease payables.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the straight-lined revenue and actual payments received will give rise to an asset or liability.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.12 Leases (continued)

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

1.13 Inventories

Initial measurement

Inventories comprise of current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the Municipality, and the cost of the inventories can be measured reliably.

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Cost generally refers to the purchase price, plus non-recoverable taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Subsequent measurement

Inventories, consisting of consumable stores, maintenance materials and water are subsequently measured at the lower of cost and net realisable value.

Water inventory is being measured by multiplying the cost per kilo litre of purified water by the amount of water in storage.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.14 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

Cost plus or cost based contract is a construction contract in which the contractor is reimbursed for allowable or otherwise defined costs and, in the case of a commercially-based contract, an additional percentage of these costs or a fixed fee, if any.

Fixed price contract is a construction contract in which the contractor agrees to a fixed contract price, or a fixed rate per unit of output, which in some cases is subject to cost escalation clauses.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

The entity assesses the terms and conditions of each contract concluded with customers to establish whether the contract is a construction contract or not. In assessing whether the contract is a construction contract, an entity considers whether it is a contractor.

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by completion of a physical proportion of the contract work.

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected deficit is recognised as an expense immediately.

1.15 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

In assessing whether there is any indication that an asset may be impaired, the Municipality considers the following indications:

(a) External sources of information

- During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
- Significant changes with an adverse effect on the Municipality have taken place during the period, or will take place
 in the near future, in the technological, market, economic or legal environment in which the Municipality operates or
 in the market to which an asset is dedicated.
- Market interest rates or other market rates of return on investments have increased during the period, and those
 increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's
 recoverable amount materially.

(b) Internal sources of information

- Evidence is available of obsolescence or physical damage of an asset.
- Significant changes with an adverse effect on the Municipality have taken place during the period, or are expected to
 take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used.
 These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset
 belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an
 asset as finite rather than indefinite.
- Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.16 Impairment of non-cash-generating assets

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

In assessing whether there is any indication that an asset may be impaired, the Municipality considers the following indications:

(a) External sources of information

- Cessation, or near cessation, of the demand or need for services provided by the asset.
- Significant long-term changes with an adverse effect on the Municipality have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the Municipality operates.

(b) Internal sources of information

- Evidence is available of physical damage of an asset.
- Significant long-term changes with an adverse effect on the Municipality have taken place during the period, or are
 expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected
 to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to
 which an asset belongs, or plans to dispose of an asset before the previously expected date.
- A decision to halt the construction of the asset before it is complete or in a usable condition.
- Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.16 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approaches, depending on the nature of the asset in question:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

Restoration cost approach

Restoration cost is the cost of restoring the service potential of an asset to its pre-impaired level. The present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment. The latter cost is determined as the depreciated reproduction or replacement cost of the asset, whichever is lower.

Service units approach

The present value of the remaining service potential of the asset is determined by reducing the current cost of the remaining service potential of the asset before impairment, to conform to the reduced number of service units expected from the asset in its impaired state. The current cost of replacing the remaining service potential of the asset before impairment is determined as the depreciated reproduction or replacement cost of the asset before impairment, whichever is lower.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

1.17 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.18 Employee benefits

Employee benefits are all forms of consideration given by the entity in exchange for service rendered by employees.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the
 absences is due to be settled within twelve months after the end of the reporting period in which the employees
 render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting
 period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cell phones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
 undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent
 that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Long service awards

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the Municipality. The Municipality's obligation under these plans is valued by independent qualified actuaries annually and the corresponding liability is raised. Payments are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are recognised in the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is recognised in the Statement of Financial Performance in the period that it occurs.

Accrual for staff leave

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total amount of leave days due to employees at year-end and also on the total remuneration package of the employee for compulsory leave and basic salary for accumulated non-compulsory leave.

Accumulating leave is carried forward and can be used in future periods if the current period's entitlement is not used in full. All unused leave will be paid out to the specific employee at the end of that employee's employment term.

Accumulated leave is vesting.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.18 Employee benefits (continued)

Staff bonuses accrued

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year end is based on bonus accrued at year-end for each employee.

Provision for performance bonuses

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrues to Section 57 employees. The Municipality's performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-retirement medical obligations

The Municipality provides post-retirement medical benefits by subsidizing the medical aid contributions of certain retired staff according to the rules of the medical aid funds. Council pays 70% as contribution and the remaining 30% is paid by the members. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The present value of the defined benefit liability is actuarially determined in accordance with GRAP 25 – "Employee Benefits" (using a discount rate applicable to high quality government bonds). The plan is unfunded.

These contributions are recognised in the Statement of Financial Performance when employees have rendered the service entitling them to the contribution. The liability was calculated by means of the projected unit credit actuarial valuation method. The liability in respect of current pensioners is regarded as fully accrued, and is therefore not split between a past (or accrued) and future in-service element. The liability is recognised at the present value of the defined benefit obligation at the reporting date, minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly, plus any liability that may arise as a result of minimum funding requirements. Payments made by the Municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are recognised in the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is recognised in the Statement of Financial Performance in the period that it occurs. These obligations are valued annually by independent qualified actuaries.

Ex gratia gratuities

Ex gratia gratuities are provided to employees that were not previously members of a pension fund. The Municipality's obligation under these plans is valued by independent qualified actuaries and the corresponding liability is raised. Payments made by the Municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are recognised in the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is recognised in the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically, unless circumstances change significantly in which case it is done annually, by independent qualified actuaries.

Pension and retirement fund obligations

The Municipality provides retirement benefits for its employees and councillors. Defined contribution plans are postemployment benefit plans under which the Municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are recognised in the Statement of Financial Performance in the year they become payable. The defined benefit funds, which are administered on a provincial basis, are actuarially valued tri-annually on the projected unit credit method basis. Deficits identified are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities. The contributions and lump sum payments are recognised in the Statement of Financial Performance in the year they become payable.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.18 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The entity determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.19 Unspent grants and receipts

Conditional grants and receipts are subject to specific conditions. If these specific conditions are not met, the monies received are repayable.

A liability for unspent conditional grants and receipts is recognised only to the extent that the conditions attached to the grant have not been satisfied and are separately reflected on the Statement of Financial Position. They represent unspent government grants, subsidies and contributions from the public.

Unspent conditional grants and receipts are not considered to be financial instruments as there are no amount to be settled through cash or another financial instrument as required per GRAP 104. Once the conditional grant becomes repayable to the donor due to conditions not met, the remaining portion of the unspent conditional grant is reclassified as payables, which is considered to be a financial instrument.

This liability always has to be asset-backed. The following provisions are set for the creation and utilisation of this liability:

- Unspent conditional grants are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met is transferred to revenue in the Statement of Financial Performance.
- The cash which backs up the liability is invested as individual investment or part of the operating account of the Municipality until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is
 recorded as part of the liability. If it is the Municipality's interest it is recognised as interest earned in the Statement
 of Financial Performance.

1.20 Unpaid grants and receipts

Unpaid conditional grants are assets in terms of GRAP that are separately reflected on the Statement of Financial Position. The asset is recognised when the municipality has an enforceable right to receive the grant or if it is virtually certain that it will be received based on that grant conditions have been met. They represent unpaid government grants, subsidies and contributions from the public.

1.21 Provisions and contingencies

Provisions

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an finance cost.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for deficits arising from future operating activities.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Auditing to build public confidence

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.21 Provisions and contingencies (continued)

Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Municipality. A contingent liability could also be a present obligation that arises from past events, but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

A contingent asset is a possible asset that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Contingent assets and contingent liabilities are not recognised. A contingent liability is disclosed unless the probability of an outflow of resources embodying economic benefits or service potential is remote. A contingent asset is disclosed where the inflow of economic benefits or service potential is probable. Contingencies are disclosed in note 46.

Management judgement is required when recognising and measuring contingent liabilities.

1.22 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Capital commitments disclosed in the financial statements represents the contractual balance committed to capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date.

1.23 Revenue from exchange transactions

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable.

At the time of initial recognition the full amount of revenue is recognised where the Municipality has an enforceable legal obligation to collect, unless the individual collectability is considered to be improbable. If the Municipality does not successfully enforce its obligation to collect the revenue this would give rise to an impairment of the receivable and a separate expense to be recognised.

Measurement

The amount of revenue arising on a transaction is usually determined by agreement between the Municipality and the purchaser or user of the asset or service. It is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the Municipality.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.23 Revenue from exchange transactions (continued)

Service charges

Service charges relating to electricity and water are based on consumption and a basic charge as per Council resolution. Meters are read on a monthly basis and are recognised as revenue when invoiced. Where the Municipality was unable to take the actual month's reading of certain consumers, a provisional estimate of consumption for that month will be created based on past patterns. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Service charges relating to refuse removal are recognised on an annual basis in advance by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage.

Service charges from sanitation (sewerage) are recognised on an annual basis in advance by applying the approved tariff to each property that has improvements.

Pre-paid electricity

Revenue from the sale of electricity prepaid meter cards is initially recognised at the point of sale. It is estimated that prepaid electricity is consumed within 5 to 7 days after date of purchase. Subsequently, the pre-paid electricity sold, but not consumed yet at year-end is disclosed under Payables from Exchange Transactions in the Statement of Financial Position in order to only recognise pre-paid electricity consumed.

Interest earned

Interest revenue is recognised in surplus and deficit as it accrues, using the effective interest rate method.

Rentals received

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Tariff charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff. This includes the issuing of licences and permits.

Agency services

Revenue arising out of situations where the Municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

Third party payments

Revenue from third parties i.e. insurance payments for assets impaired, are recognised when it can be measured reliably and it is probable that inflow will occur and it is not being offset against the related expenses of repairs or renewals of the impaired assets.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.23 Revenue from exchange transactions (continued)

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.24 Revenue from non-exchange transactions

Revenue from non-exchange transactions refers to transactions where the Municipality received value from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Rates and taxes

Revenue from property rates is recognised when the legal entitlement to this revenue arises. At the time of initial recognition the full amount of revenue is recognised. If the Municipality does not enforce its obligation to collect the revenue, this would be considered as a subsequent event. Collection charges are recognised when such amounts are legally enforceable. Rebates and discounts are offset against the related revenue, as there is no intention of collecting this revenue.

Penalty interest on unpaid rates is recognised on a time proportionate basis.

Rates are levied both monthly and annually and payable by the last day of the following month. Interest is levied at the prime rate plus one percent on outstanding monthly instalments.

Fines

Fine Revenue constitutes both spot fines and summonses. Fine revenue is recognised when the offence occurs to the extent that the municipality expects legal entitlement.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.24 Revenue from non-exchange transactions (continued)

Public donations and contributions

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the Municipality. Where public contributions have been received, but the Municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the Municipality.

Revenue from recovery of unauthorised, irregular and fruitless and wasteful expenditure

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Unconditional grants

Grants without any conditions attached are recognised as revenue when the grant is receivable.

Conditional grants and receipts

Income received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

The liability is transferred to revenue as and when the conditions attached to the grant are met.

Other receipts

All unclaimed deposits are initially recognised as a liability. After 12 months all unclaimed deposits into the Municipality's bank account will be treated as revenue. Historical patterns have indicated that minimal unidentified deposits are reclaimed after a period of twelve months. This assessment is performed annually at 30 June. Therefore the substance of these transactions indicate that even though the prescription period for unclaimed monies is legally three years, it is reasonable to recognise all unclaimed monies older than twelve months as revenue.

1.25 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.26 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.26 Accounting by principals and agents (continued)

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether an municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.27 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in a form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003).

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance

1.28 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.28 Fruitless and wasteful expenditure (continued)

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.29 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure is recorded in the notes to the financial statements when confirmed. The amount recorded is equal to the value of the irregular expenditure incurred, unless it is impractical to determine, in which case reasons therefore must be provided in the notes.

Irregular expenditure receivables are measured at the amount that is expected to be recovered and are de-recognised when settled or written-off as irrecoverable.

1.30 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.31 Budget information

The Municipality is subject to budgetary limits in the form of a council approved budget, which is given effect through authorising legislation.

The approved budget is prepared on an accrual basis and presented by functional classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2021/07/01 to 2022/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.31 Budget information (continued)

Explanations for material variances between the final budget amounts and comparable actual amounts are included the Notes to the Financial Statements. Material variances are being defined by Management as 10% of a specific line-item with a minimum threshold of R1 million.

Explanations for variances between the approved and final budget are included in the Notes to the Financial Statements as well as the Statements of Comparison of Budget and Actual Amounts.

1.32 Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions or if the related party entity and another entity are subject to common control.

The Municipality previously resolved to adopt the disclosure requirements as per GRAP 20 - "Related Party Disclosures".

A related party is a person or entity:

- with the ability to control or jointly control the other party;
- or exercise significant influence over the other party in making financial and operating decisions;
- or if the related party entity and another entity are subject to common control.

Related parties include:

- Entities that directly, or indirectly through one or more intermediaries, control, or are controlled by the reporting entity;
- Individuals owning, directly or indirectly, an interest in the reporting entity that gives them significant influence over the entity, and close members of the family of any such individual;
- Key management personnel, and close members of the family of key management personnel; and
- Entities in which a substantial ownership interest is held, directly or indirectly, by any person described in the 2nd and 3rd bullet, or over which such a person is able to exercise significant influence.

Key management personnel include:

- All directors or members of the governing body of the entity, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee.
- Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting entity being the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that members of management in their dealings with the municipality.

Remuneration of management includes remuneration derived for services provided to the Municipality in their capacity as members of the management team or employees. Benefits derived directly or indirectly from the Municipality for services in any capacity other than as an employee or a member of management do not meet the definition of remuneration. Remuneration of management excludes any consideration provided solely as a reimbursement for expenditure incurred by those persons for the benefit of the Municipality.

1.33 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

Effective date:

2. New standards and interpretations

2.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2022 or later periods:

Standard/ Interpretation:

•	GRAP 104 (amended): Financial Instruments	Years beginning on or after Unknown
•	Guideline: Guideline on Accounting for Landfill Sites	Unknown
•	Guideline: Guideline on the Application of Materiality to Financial Statements	Unknown
•	GRAP 25: Employee benefits	Unknown
•	iGRAP 7: The limit on a defined benefit asset, minimum funding requirement and their interaction	Unknown
•	iGRAP 21: The Effect of Past Decisions on Materiality	Unknown

The impact of the new standards and interpretations issued, but not yet effective is currently being assessed.

3. Inventories

4.

Consumable stores Maintenance materials	2,602,069 10,425,846	2,920,622 8,970,454

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

5. Receivables from exchange transactions (continued)

Credit quality of receivables from exchange transactions

Consumer debtors are payable within 30 days. This credit period is considered to be consistent with the terms used in the public sector, through established practices and legislation.

Concentrations of credit risk with respect to trade receivables are limited due to the customer base being large and unrelated. The municipality's historical experience in collection of receivables transactions falls within recorded allowances. Accordingly, management believes no further credit provisions are required in excess of the present allowance for doubtful debts.

Receivables from exchange transactions past due but not impaired

All services are payable within 30 days from the invoice date. At 30 June 2022, R 23,968,285 (2021: R 20,409,476) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	7,294,976	6,289,381
2 months past due	16,673,309	14,120,095

Receivables from exchange transactions impaired

As of 30 June 2022, consumer debtors of R 202,869,800 (2021: R 163,271,124) were impaired and provided for.

Reconciliation of allowance for impairment of receivables from exchange transactions

Opening balance	163,271,124	113,277,680
Allowance for impairment	59,219,910	50,887,234
Amounts written off as uncollectible	(19,621,232)	(893,791)
	202,869,800	163,271,124

Knysna Municipality Annual Financial Statements for the year ended 30 June 2022

		2022	2021
6.	Receivables from non-exchange transactions (continued) Total		
	Current (0-30 days)	20,836,697	, ,
	31 - 60 days 61 - 90 days	9,749,893 7,790,555	, ,
	91+ days	225,798,133	202,533,585
	Less: Allowance for impairment		248,245,627 (160,707,443)
		78,048,338	87,538,184

Availability fees were classified as receivables from exchange transactions in the prior year. The availibility fees relating to vacant land are reclassified to receivables from non-exchange transactions to correctly reflect the nature thereof, hence a change in comparative figures from the signed financial statements.

Availability fees with regards to rates, are grouped under "rates" in this note.

Credit quality of receivables from non-exchange transactions

Consumer debtors are payable within 30 days. This credit period is considered to be consistent with the terms used in the public sector, through established practices and legislation.

Concentrations of credit risk with respect to trade receivables are limited due to the customer base being large and unrelated. The municipality's historical experience in collection of trade receivables falls within recorded allowances. Accordingly, management believes no further credit provisions are required in excess of the present allowance for doubtful debts.

Receivables from non-exchange transactions past due but not impaired

All rates are payable within 30 days from the invoice date. At 30 June 2022, R 86,458,713 (2021: R 70,391,440) were past due but not impaired.

The ageing of rates, availability fees and fines past due but not impaired is as follows:

1 month past due	11,966,996	3,895,029
2 months past due	74,491,717	66,496,411
2 months past due	74,491,717	00,490,411

Receivables from non-exchange transactions impaired

As of 30 June 2022, other receivables from non-exchange transactions of R 186,126,940 (2021: R 160,707,443) were impaired and provided for.

Reconciliation of provision for impairment of receivables from non-exchange transactions

		160,707,443
Amounts written off as uncollectible	(73 126 295)	(92,817,738)
Provision for impairment	98,545,792	96,944,915
Opening balance	160,707,443	156,580,266

In terms of the requirements of GRAP 23 and IGRAP1, all fines issued during the year less any cancellations or reductions identified are recognised as revenue. The outstanding fine receivable balance at year end is reduced to its recoverable amount by recognising a provision for impairment against the receivable raised. The provision for impairment is based on current and past collection rates applicable to fines. Any fine reductions or cancellations subsequent to the financial year-end is recorded as a write off against the provision raised.

All Non-Government debtors were either specifically impaired or subject to collective impairment.

Debts are required to be settled after 30 days. Interest is charged on all classes of receivables except fines and other receivables at prime +1%.

7. Statutory receivables

The entity had the following statutory receivables where the Framework for the Preparation and Presentation of Financial
Statements have been applied, for the initial recognition:Consumer debtors - Rates57,420,37264,222,505Fines14,329,41014,867,552VAT27,378,76626,379,75599,128,548105,469,812

Statutory receivables general information

Transaction(s) arising from statute

Rates - Municipal Property Rates Act (MPR Act) section 2 states that a metropolitan or local municipality may levy a rate on property in its area.

Fines - Fines are issued in terms of the National Road Traffic Regulations of 2000 and the National Road Traffic Act 93 of 1996.

VAT - VAT is received and paid as required per the Value Added Tax Act No 89 of 1991.

Determination of transaction amount

Rates - Rates amount are determined in terms of section 11 of the MPR act and the approved rates policy of the municipality.

Fines - All fines are governed by the specific regulation which is applicable to the offence.

VAT - VAT is applied to all relevant goods or services as stated in the VAT act and the amount thereof is determined in terms of the VAT act.

Interest or other charges levied/charged

Rates - Interest is charged on outstanding rates.

Fines - No interest or other charges are charged on outstanding fines.

VAT - VAT is submitted and paid on a monthly basis thus no interest is charged on outstanding VAT amounts.

No discount rate applied on the above mentioned statutory receivables to estimate future cash flows.

Statutory receivables past due but not impaired

Rates - Payment percentage of receivables are used to assess whether the receivable is impaired. Refer to note 6 for more detail on the impairment and ageing of statutory receivable past due not impaired.

Fines - Payment percentage of fines are used to assess whether the fines are impaired. Refer to note 6 for more detail on the impairment provision and ageing of statutory receivables past due not impaired.

VAT - VAT receivables from SARS is not impaired as South African Receiver of Revenue has sufficient funds to pay any outstanding amounts. VAT on output provision is assessed with the debtors impairment provision and included therein. Refer to note 8 for more detail on the impairment provision.

	2,744,697	4,110,902
Non-current assets		
At amortised cost	2,744,697	4,110,902

Fixed Deposits

Included in Non-Current Investments is the Investec Fixed Deposit (Acc 021941500) of R 2,742,283 (2021: R 4,108,488) which have been pledged to DBSA as guarantees on external loans taken up. Refer to note 17. These loans are non-current and consequently it is highly unlikely that the Investment will be redeemable in the following financial year.

Investments are made in terms of the municipality's Cash Management and Investment Policy, as required by means of Regulation R 308 of 1 April 2005 gazetted in the Government Gazette No 27431 of 1 April 2005 and issued by the Minister of Finance.

Staff Housing Loans

Staff housing loans are no longer granted. The outstanding amount relates to prior years and is impaired.

Old Age Homes / Creche

New loans are not granted to organisations. The loans are repayable over periods up to forty years at a rate of 1% per annum, with the last loan redeemable in 2032.

Financial assets at amortised cost impaired

The allowance for impairment on financial assets exists due to the possibility that not all these debts will be recovered. Financial assets and amortised cost were assessed individually and grouped together at the Statement of Financial position date as financial assets with similar credit risk characteristics and collectively assessed for impairment.

As of 30 June 2022, financial assets of 434,497 (2021: 434,497) were impaired and provided for.

Reconciliation of provision for impairment of financial assets at amortised cost

Land appointed in terms of legislation which entity controls without legal ownership or custodianship (IGRAP 18 par 40)

In some instances the municipality is not the legal owner or the custodian of land appointed in terms of legislation, but assessed that it controls such land. Key judgements made and assumptions applied to conclude that it controls such land, are disclosed in note 1.4. The land of the municipality are under the control of the municipality due to a vesting substantive right over the land. These land represents mainly public open spaces and roads vesting to the municipality.

Carrying value of land included in the carrying value of investment properties	11,189,000	11,189,000

		4,011,136	6,585,518

It is municipality policy to lease certain equipment under finance leases. The office equipment is leased from Konica Minolta and the other machinery and equipment (wheelie bins) from Impact Plastic Containers.

The average lease term was 3 years and the effective borrowing rate was 9.09% to 9.66%.

Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

The maturity date of the leases is 30 June 2024 for the office equipment and 31 December 2022 for the other machinery and equipment.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. Refer note 13.

19. Payables from exchange transactions

Accrued Interest on Loans	1,868,523	654,497
Trade payables	114,836,032	78,956,655
Payments received in advanced	17,720,692	19,514,554
Retentions	14,437,646	15,887,130
Hoarding fees	14,164,401	11,890,000
Other payables	10,731,374	11,265,315
Deposits: Other	356,824	270,011
	174,115,472	138,438,173

Payables are being paid within 30 days as prescribed by the MFMA. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of trade and other payables on initial recognition is not deemed necessary.

All payables are unsecured.

Included in other payables is unidentified traffic fines paid, group scheme accruals and salary accruals.

Other deposits include Hall and Tender Deposits.

Post-retirement medical aid benefit liability

The Post-retirement benefit plan is a wholly unfunded defined benefit plan, of which the members are made up as follows:

In-service (Employees) members	346	354
In-service (Employees) non-members	319	317
Continuation members	70	71
Total members	735	742
In-service members	45,310,000	42,356,000
Continuation members	53,146,000	52,761,000
Non-members	1,834,000	768,000
Total unfunded liability	100,290,000	95,885,000

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

21. Employee benifit obligations (continued)

The municipality makes monthly contributions for health care arrangements to the following medical aid schemes:

- Bonitas
- LA Health
- Hosmed
- Keyhealth
- Samwumed

The Current-service cost for the year ending 30 June 2023 is estimated to be R 3 155 000 (2022: R 3 019 000 whereas the interest cost for the same year is estimated to be R 11 582 000 (2022: R 9 348 000).

The principal assumptions used for the purposes of the actuarial valuations were as follows:

i) Rate of interest		
Discount rate	11.81 %	9.97 %
Health care cost inflation rate	8.43 %	6.71 %
Net effective discount rate	3.12 %	3.06 %
Expected retirement age - females	62	62
Expected retirement age - males	62	62

The discount rate used is a composite of all government bonds and is calculated using a technique known as "bootstrapping".

The discount rate was determined by deducing from the yield curve from the Bond Exchange of South Africa after the market closed at the reporting date.

ii) Mortality rates

Pre-retirement:SA 85-90 mortality tablePost-retirement:PA (90) -1 ultimate mortality table

iii) Normal retirement age

It has been assumed that in-service members will retire at age 62, which then implicitly allows for expected rates of early and ill-health retirement.

iv) Actuarial Valuation Method

The Projected Unit Credit Method has been used to value the liabilities.

The amounts recognised in the Statement of Financial Position are as follows:

Present value of unfunded obligations	100,289,999	95,884,999
Amounts recognised in the Statement of Financial Performance are as follows:		
Current Service Cost and reduction in minimum membership transactions Actuarial (Gains)/Losses Interest cost	4,682,000 (5,285,040) 9,348,000	2,706,000 4,813,670 8,417,000
	8,744,960	15,936,670

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022	2021

21. Employee benifit obligations (continued)

The movement in the defined benefit obligation over the year is as follows:

Balance at the end of the year	100,290,000	95,885,000
- Benefits paid	(4,339,960)	(4,049,670)
- Actuarial losses / (gains)	(5,285,040)	4,813,670
- Interest cost	9,348,000	8,417,000
- Current service cost	4,682,000	2,706,000
Balance at the beginning of the year	95,885,000	83,998,000

The table below summarises the accrued liabilities for the current period and the previous four periods.

Liability History	30 June 2018	30 June 2019	30 June 2020		30 June 2022
Accrued liability	91,966,011	91,018,833	83,998,000		100,290,000

2022 2021

21. Employee benifit obligations (continued)

Long service awards

The municipality's obligation for Long Service Awards is a defined benefit plan. This plan is wholly unfunded as no contributions are made by the municipality into funds that are legally separate from the municipality and from which the employee benefits are paid (each subsequent financial year's expected payments of long service bonuses are budgeted for).

The municipality, in substance, underwrites the actuarial and investment risks associated with the plan. Consequently, the expense recognised for the defined benefit plan is the full additional liability accrued due to additional benefit entitlement. The municipality's net obligation in respect of the defined benefit long service allowances is the present value of the defined benefit obligation is determined by discounting the estimated future cash outflows of the benefits that will be paid to employees and using suitable interest rates.

The calculation is performed by registered actuaries using the projected unit credit method. The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 30 June 2022.

At year end, 665 (2021: 671) employees were eligible for Long-services awards.

The future service cost for the ensuing year is estimated to be R 1,476,000 (2022: R 1,389,000), whereas the interest cost for the ensuing year is estimated to be R 1 940 000 (2022: R 1,520,000).

The principal assumptions used for the purposes of the actuarial valuations were as follows:

i) Rate of interest		
Discount rate	11.08 %	9.27 %
General salary inflation (long-term)	7.32 %	5.79 %
Net effective discount rate	3.50 %	3.29 %

The discount rate used is a composite of all government bonds and is calculated using a technique is known as "bootstrapping".

The discount rate was determined by deducing from the yield curve from the Bond Exchange of South Africa after the market closed at the reporting date.

ii) Mortality rates

Pre-retirement: SA 85-90 (mixed) ultimate mortality table

iii) Normal retirement age

It has been assumed that in-service members will retire at the average age of 62.

The amounts recognised in the Statement of Financial Position are as follows:

Unfunded Long-Service Awards obligation	18,556,516	17,446,603
Amounts recognised in the Statement of Financial Performance are as follows: Current service cost Interest cost Actuarial (Gains)/Losses	1,389,000 1,520,000 (26,312)	1,395,000 1,191,000 (274,392)
	2,882,688	2,311,608

Notes to the Annual Financial Statements

2022 2021

21. Employee benifit obligations (continued)

Multi-employer retirement benefit information

Both the Consolidated Retirement Fund for local government and LA Retirement Fund are multi-employer plans. This means that there are multiple local authorities that participate in these funds. In terms of GRAP 25, multi-employer plans are defined as defined benefit plans. GRAP 25 also states that when sufficient information is not available to use defined benefit accounting for a multi-employer plan, an entity will account for the plan as if it were a defined contribution plan.

The Municipality requested detailed employee and pensioner information as well as information on the Municipality's share of the Pension and Retirement Funds' assets from the fund administrator. The fund administrator confirmed that assets of the Pension and Retirement Funds are not split per participating employer. Therefore, the Municipality is unable to determine the value of the plan assets as defined in GRAP 25.

As part of the Municipality's process to value the defined benefit liabilities, the Municipality requested pensioner data from the fund administrator. The fund administrator claims that the pensioner data is confidential and was not willing to share the information with the Municipality. Without detailed pensioner data the Municipality was unable to calculate a reliable estimate of the accrued liability in respect of pensioners who qualify for a defined benefit pension.

Therefore, although the LA Retirement Fund is a Multi Employer fund defined as a defined benefit plan, it will be accounted for as a defined contribution plan.

LA Retirement Fund

The LA Retirement Fund's contribution rate payable is 9% by the members and 18% by Council. The last actuarial valuation performed for the year ended 30 June 2021 revealed that the fund is in a sound financial position with a funding level of 104.9%.

Council Contributions paid recognised in the Statements of Financial Performance	233,168	222,420
Employee Contributions paid recognised in the Statements of Financial Performance	116,584	111,210
	349,752	333,630

Consolidated Retirement Fund for local government

The contribution rate payable is 9% by members and 18% by Council. The last actuarial valuation performed for the year ended 30 June 2021 revealed that the fund is in a sound financial position with a funding level of 133%.

Performance	41.447.820	40.255.907
Performance Employee Contributions paid recognised in the Statements of Financial	13,913,213	13,514,514
Council Contributions paid recognised in the Statements of Financial	27,534,607	26,741,393

Municipal Councillors Pension Fund

Council contribute to the Municipal Council Pension Fund which is a defined contribution fund. The retirement benefit fund is subject to the Pension Fund Act, 1956, with pension being calculated on the pensionable remuneration paid. Current contributions by Council are charged against expenditure on the basis of current service costs.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

 2022	2021

21. Employee benifit obligations (continued)

Performance bonuses

The movement on the performance bonus obligation consist of the following:

Balance at the beginning of the year	3,837,550	3,452,548
Payments Additional performance bonus accrual recognised during the year	(437,316)	(515,233) 900,235
	3,400,234	3,837,550

Performance bonuses are paid to the municipal Manager and section 56 Directors after an evaluation of performance by the council.

Staff annual bonus

The movement on the annual bonus accrual consist of the following:

	7,751,305	7,172,728
Additional bonus accrual recognised during the year	8,255,446	7,775,755
Payments	(7,676,868)	(7,045,988)
Balance at the beginning of the year	7,172,727	6,442,961

Annual bonuses are paid to all staff during November of each year. There is no possibility of reimbursement.

Staff leave

The movement on the leave accrual consist of the following:

Balance at the beginning of the year	21,999,811	22,380,858
Payments	(1,498,521)	(1,871,706)
Additional staff leave accrual recognised during the year	(903,792)	1,490,659
	19,597,498	21,999,811

Staff leave accrues to employees according to a collective agreement. Provision is made for the full cost of accrued leave at reporting date. This provision will be realised as employees take leave or resign. There is no possibility of reimbursement.

Annual Financial Statements for the year ended 30 June 2022

2022	2021

22. Provisions

Reconciliation of provisions - 2022

Landfill site	Opening Balance 19,477,713	Utilised during the year (5,048,741)	Unwinding of discount 2,052,203	iGrap2 Adjustments 1,549,725	Total 18,030,900
Reconciliation of provisions - 2021					
	Opening Balance	Utilised during the year	Unwinding of discount	iGrap2 Adjustments	Total
Landfill site	16,864,028	(444,520)	1,218,478	1,839,727	19,477,713
Non-current liabilities Current liabilities				17,123,560 907,340	18,977,713 500,000

Landfill sites

The provision is for the rehabilitation of 1 landfill sites and 2 refuse transfer stations. The municipality discontinued dumping waste within the municipal area and transport all waste to the Petro SA waste disposal site in Mossel Bay.

Rehabilitation cost was estimated using criteria for closure detailed in the Minimum Requirement for Waste Disposal by Landfill. Provision is made in terms of the municipality's licensing stipulations on the landfill waste sites, for the estimated cost of rehabilitating the waste sites. The provision has been determined on the basis of a recent independent study. The cost factors derived from the study by Zutari (Pty) Ltd have been applied.

It is estimated that the rehabilitation process will be finalised in 2026 for the Old place landfill site. The rehabilitation process was finalised in 2022 for the Brenton on Sea landfill site.

The movement in the provision of the landfill site in the 2022 financial year is due to a new calculation obtained from engineers who calculated the estimate costs to rehabilitate the landfill site. The change in discount rates and estimates also impacted the IGRAP 2 adjustment.

The contribution to the provision is based on the average Consumer Price Index which is calculated at 5.67% (2021: 3.56%).

The cost as at 30 June 2022 has been escalated annually with the average Consumer Price Index until the estimated time of closure and discounted to present value using the relevant South African Government Bond rates. All other adjustments are in line with the provisions of IGRAP 2.

23. Service charges

Sale of electricity	309,278,889	269,644,317
Sale of water	69,373,024	65,113,558
Sewerage and sanitation charges	26,287,400	24,982,508
Refuse removal	23,021,684	23,814,209
	427,960,997	383,554,592

The amounts disclosed above for revenue from service charges are in respect of services rendered which are billed to the consumers on a monthly basis according to the approved tariffs.

		29,563,408	29,419,647

Assessment Rates are levied on the fair market value basis. The last valuation came into effect on 1 July 2017. Revaluations will be undertaken in terms of the Municipal Property Rates Act. Interim valuations are processed to take into account changes in individual property values due to alterations and subdivisions and also to accommodate growth in the rate base due mostly to private development.

A rate in the Rand for domestic properties of R 0.0079743 was charged on the total market value. Businesses were charged at a rate of R 0.0159486 on the total market value.

Properties used for domestic purposes and consisting of both land and improvements are subject to a R 50 000 valuation reduction. There are also different rebates and phased in tariffs for different sectors of the community. Interest on arrear accounts is charged at bank rate plus one percent.

Rates are levied monthly and payable by the last day of the following month. Interest is levied at the prime rate plus one percent on outstanding monthly instalments.

The recoverable amount of the asset impaired was based on its value in use.

The impairment loss / (gain) recognised for Property, Plant and Equipment relates to rehabilitation cost associated with landfill sites capitalised in terms of IGRAP 2. The portion being impaired relates to the fact that all landfill sites in the municipality already reached the end of its useful life. No further economic benefits is expected from these assets.

Notes to the Annual Financial Statements

2022

2021

46. Contingencies (continued)

Contingent assets

It has been unanimously resolved at the council meeting dated 6 August 2020 that the Acting Municipal Manager be instructed to address correspondence to the Garden Route District Municipality to request the transfer of the following properties to the Knysna Municipality estimated to the value of R 64 080 000.

- 1. Portions 1, 2 & 3 of the Farm Walker's point (R20 200 000)
- 2. Erf 2790, Knysna (R2 900 0000)
- 3. Erf 20,21,22 Belvidere (R460 000 ; R460 000; R460 000)
- 4. Portion 22 of the farm Westford (R600 000)
- 5. Portion 0,1 and 2 of the farm 185 George; (R39 000 000)

The contingent assets, as disclosed in Note 46 of the Annual Financial Statements as at 30 June 2021, are continuously assessed by management.

In consideration of the reasons provided hereunder, Knysna Municipality is firmly of the opinion that there is more than a 50% probability of success in the disputed properties being transferred to Knysna Municipality. Based on the legal opinions considered by the Knysna Municipality which were provided by senior counsel to the Garden Route District Municipality and the Knysna Municipality respectively. Based on the user principle, Knysna Municipality manages several of the properties for which income is derived, and therefore provides an economic benefit to the Knysna Municipality. Based on the fact that the Garden Route District Municipality has not raised any objection in an attempt to prevent Knysna Municipality from utilising any of the disputed properties.

On 04 September 2020 a formal notification was provided to the Municipal Manager of the Garden Route District Municipality with regards to the dispute of the abovementioned properties.

The notification was made on the basis that the parties have attempted to negotiate a resolution of the dispute and have not been successful in achieving settlement and have complied with the provisions of the Intergovernmental Relations Framework Act 13 of 2005, in that the parties have conducted various negotiations on the above commencing on or during 20 June 2012, with the last proposed engagement of 15 July 2021 being postponed.

Various unsuccessful consultations and correspondence between the Knysna Municipality and the Garden Route District Municipality has resulted in an intergovernmental dispute being raised, to which the MEC for Local Government was approached to appoint an arbitrator to resolve the contingent asset dispute.

All of the above has been confirmed by council at a council meeting held on the 29th of July 2021.

Annual Financial Statements for the year ended 30 June 2022

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

48. Prior period adjustments (continued)

Availability fees relating to vacant lands were reclassfied from receivables and revenue from exchange transaction to receivables and revenue from non-exchange transactions to correctly reflect the nature thereof.

Inventory adjustments are reclassied to inventory consumed and adjustments to improve the comparrison there-of.

48.1 Corrections to Property, plant and equipment

The following retrospective restatements were made to Property, plant and equipment:

- Operating expenditure incorrectly recognised as capital expenditure in the prior years amounting to R339 424.
- Depreciation incorrectly not recognised on completed projects
- Depreciation incorrectly accounted for in the prior year.
- Derecognition of assets that no longer exists
- Impairment of projects on Erf 1115 and erf 1390 incorrectly not recognised. The projects were cancelled in the prior years.
- Erven incorrectly not recognised in the prior year years.
- Assets incorrectly disposed in the prior years
- Correction on depreciation based on infrastructure indentification and valuation project
- Correction of deprectiation of completed projects in the prior.

48.2 Corrections to Receivables from exchange transaction

The following retrospective restatements were made to Receivables from exchange transactions:

- Revenue adjustments of R 4,573,761 relating to water services were accounted for in the incorrect period.
- Rental income relating to ERF 209, Buffalo Bay overcharged with R49,233.65 (incl VAT) per month for 7 months
- Reversal of incorrect debt write-off relating to prior years
- Scarce skills allowance recovered relating to prior years
- Revenue adjustments relating to electricity, water sewerage and refuse accounted for in the incorrect period

48.3 Corrections to Receivables from non - exchange transactions

- Revenue adjustments accounted for in the incorrect period
- Certain revenue from non-exchange transactions Fines were incorrectly double accounted for in the prior years.

48.4 Corrections to construction contracts

• Revenue recognised on contract costs which are not considered to be recoverable.

48.5 Corrections to unpaid grants

• Unpaid grant relating to the IHHS relating to prior years considered to be not recoverable.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

49. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

Liquidity risk

Liquidity risk is the risk that the municipality will encounter difficulty in raising funds to meet commitments associated with financial liabilities.

Prudent liquidity risk management includes maintaining sufficient cash and marketable securities, the availability of funding from an adequate amount of committed credit facilities.

The financial liabilities of the municipality are backed by appropriate assets and it has adequate liquid resources. The Council monitors the cash projections and ensures that borrowing facilities are available to meet its cash requirements.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances only due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2022	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Long term liabilities: Annuity loans and local registered stock Consumer Deposits	59,759,798 14,572,557	, ,	160,938,896	142,542,915
Trade and other payables Finance lease obligation	156,394,780 3,304,890	-	-	-
At 30 June 2021	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years

Credit risk

Credit risk is the risk that a counter party to a financial asset will fail to discharge an obligation and cause the Municipality to incur financial loss.

Credit risk arises mainly from cash and cash equivalents, instruments and deposits with banks and financial institutions, as well as credit exposures to consumer and grant debtors.

For banks and financial institutions, only reputable independently rated parties are accepted. Grants are receivable from higher order levels of government. In the case of consumer debtors the municipality effectively has the right to terminate services to customers but in practice this is difficult to apply. This increases the credit risk in respect of consumer debtors. The risk of non- payment is managed on an ongoing basis and where practical, services are terminated and procedures applied to recover outstanding amounts owing and an appropriate level of impairment provision for default is maintained.

Credit risk consist mainly of cash deposits, cash equivalents, trade and other receivables and unpaid conditional grants and subsidies.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

49. Risk management (continued)

Trade and other receivables are disclosed net after provisions are made for impairment and bad debts. Trade debtors comprise of a large number of ratepayers, dispersed across different sectors and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Credit risk pertaining to trade and other receivables is considered to be moderate due the diversified nature of debtors and immaterial nature of individual balances. In the case of consumer debtors the municipality effectively has the right to terminate services to customers but in practice this is difficult to apply. In the case of debtors whose accounts become in arrears, Council endeavours to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

All rates and services are payable within 30 days from invoice date. Refer to notes 6 and 5 for all balances outstanding longer than 30 days. These balances represent all debtors at year end which defaulted on their credit terms.

Refer to note 17 for details of securities pledged to the DBSA. No restrictions were placed on the use of the remaining portion of the cash and cash equivalents for the period under review. Although the credit risk pertaining to cash and cash equivalents are considered to be low, the maximum exposure is disclosed below.

The risk pertaining to unpaid conditional grants and subsidies are considered to be very low. Amounts are receivable from national and provincial government and there is no expectation of counter party default.

Other Financial Assets and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The maximum credit and interest risk exposure in respect of the relevant financial instruments are as follows:

Financial instrument	2022	2021 - Restated
Receivables from exchange transactions	55,196,611	49,875,479
Receivables from non-exchange transactions (Availability fees)	2,428,512	6,080,288
Cash and cash equivalents	40,524,393	42,330,361
Long term investments and receivables	2,744,697	4,110,902
Construction contracts and receivables	5,068,369	4,283,751
	105,962,582	106,680,781

Market risk

Interest rate risk

The Municipality is exposed to interest rate risk due to the movements in long-term and short term interest rates.

This risk is managed on an ongoing basis by comparison between current market related rates and historical rates and adjustments made where considered necessary.

As the municipality has significant interest-bearing liabilities, the entity's income and operating cash flows are substantially dependent on changes in market interest rates.

The municipality did not hedge against any interest rate risks during the current year.

The potential impact on the entity's surplus for the year due to changes in interest rates are as follows:

1% (2021: 1%) Increase in interest rates	(2,998,407)	(2,454,587)
1% (2021: 1%) Decrease in interest rates	2,998,407	2,454,587

(3,916,820)

The above unauthorised expenditure relating operating expenditure mainly relates to the increase of debt impairment as a result in the increase of receivables.

Depreciation was under budgeted on corporate services.

All of the above unauthorised expenditure has to do with non-cash transactions.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

52. Irregular expenditure (continued)

Details of additional irregular expenditure as a result of AGSA interpretation

Contracts used from other organs of state in terms of SCM Regulation 32 was classified as irregular expenditure during the audit process by AGSA. In MFMA Circular 96 dated 24 July 2019 the National Treasury made the ruling that a municipality may only piggy-back on the unused portion of the contract awarded by the organs of state. Therefore, actual expenditure incurred by the municipality based on the piggy-back awards will continue to be recognised as irregular expenditure until the contract/s period/s have expired.

SCM Regulation 29(2) requires that a Bid Adjudication Committee (BAC) must consist of at least four senior managers which must include a senior supply chain management practitioner. However, the Auditor-General's interpretation of Regulation 29(2) is that a BAC must consist of four senior managers (directors) plus a senior supply chain management practitioner. Therefore, all awards made by the BAC with four senior managers that included the senior supply chain management practitioner, was deemed to be irregular expenditure.

53. Material losses

Electricity distribution losses		
Units purchased (Mwh)	169,981	171,456
Units Sold (Mwh)	154,691	152,028
Units lost during distribution (Mwh)	15,290	19,428
Percentage lost during distribution	9.00 %	11.33 %
Water distribution losses		
Mega litres purified	4,624	4,160
Mega litres lost during distribution	1,257	1,851
	27.18 %	44.50 %

There is no possibility of recovering any of the material losses.

The current year water loss is not comparable to the prior year due to a change in measurement of the performance indicator.

The equation changed as follows: 2022: (Water purified - water **consumed**)/water purified 2021: (Water purified - water **sold**)/Water purified

Knysna Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

54. Additional disclosure in terms of Municipal Finance Management Act (continued)

55. Private Public Partnerships

Council has not entered into any private public partnerships during the financial year.

56. Events after the reporting date

The following events occurred between the reporting date and the date of the approval of the financial statements:

- A new banking service provider implemented on 01 October 2022;
- A change in Political Leadership:
- The Knysna Municipality / Erf 13193 Thesen Island case relating to zoning regulations was settled in court on 26 September 2022. The attorneys do not anticipate any further legal costs in this matter, and the Court Order/Settlement Agreement has no financial implication for the Municipality.

Except for the above there are no other matter which is material to the financial affairs of the municipality that has occurred between the reporting date and the date of the approval of the financial statements.

57. Going concern

We draw attention to the fact that at 30 June 2022, the municipality had an accumulated surplus of R 1,022,383,163 and that the municipality's total assets exceed its total liabilities by R 1,022,383,163.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. In assessment whether the going concern assumption is appropriate under the current economic climate resulting from the COVID-19 pandemic: management considered a wide range of factors including the current and expected performance of the Municipality, the likelihood of continued government funding and, if necessary, potential sources of replacement funding. Further to that the Municipality has put in place cost containment measures to curb unnecessary spending.

The Municipality has not defaulted on payment of creditors. The Municipality do have the ability to operate as a going concern and to continue rendering services to its community.

38,654,323 37,817,622

2022

2021

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

58. Budget differences

Material differences between budget and actual amounts

Statement of Financial Performance:

58.1 Other Revenue The variance is mainly as a result of Augmentation Fees as well as Building Plan Fees received more than anticipated.

58.2 Depreciation & Impairment Infrastructure assets useful lives were adjusted during the year causing an increase above budget.

58.3 Finance Cost Increase in prime rate during the year and additional borrowings that were taken out during the year.

58.4 Transfers and subsidies The grant from Garden Route District was received late and no expenditure occurred by year end on this grant.

58.5 Transfers and subsidies The grant from Garden Route District was received late and no expenditure occurred by year end on this grant.

58.6 Cash & Cash Equivalents

New borrowings that were obtained close to year end. Call deposits are also included in the balance.

58.7 Consumer Debtors

Rates were classified as consumer debtors on the orginial budget and subsequently moved to other debtors on final budget. Availability fees has also been taken into account and moved to other debtors.

58.8 Other Debtors

Rates were classified as consumer debtors on the orginial budget and subsequently moved to other debtors on final budget. Availability fees has also been taken into account and moved to other debtors.

58.9 Long Terms Receivables Due to budgted under other receivables.

58.10 Investements

The DBSA loan that was held under invenstments was closed during the FY2022.

58.11 Other Assets Due to budgted under long term receivables.

58.12 Borrowings Increase was caused due to two ew loans that were taken up close to year end.

58.13 Trade Payables Large increase in other expenditure that was accured at year end.

58.14 Provisions

An increase in the inflation rate and projected costing on the rehabilitation caused an increase in the provision above budget.

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

58. Budget differences (continued)

Differences between budget and actual amounts basis of preparation and presentation

Differences were identified between the disclosure requirements in terms of GRAP and the reporting requirements in terms of National Treasury budget formats.

The following items are affected by these classification differences:

Statement of Financial Position

Consumer debtors in budget statements consist of service charges (water, sewerage, electricity, refuse and housing rentals)

Other debtors in the budgeted statements consist of other debtors as disclosed in receivables from exchange transactions, receivables from non-exchange transactions, VAT receivable, prepayments and unpaid conditional grants.

The budget formats does not allow for various sundry debtor balances to be disclosed separately. For this reason, afore mentioned are all incorporated under other debtors.

Long Term Receivables in budget statements also includes the Non-Current Operating Lease Asset.

Included in Trade and other payables per budget statement are Payables from Exchange Transactions, Unspent Conditional Government Grants and Receipts and VAT payable (if applicable).

Employee benefits and Provisions (current and non-current) are disclosed separately in the financial statements while these figures are aggregated in the budget statements as provisions.

Long term liabilities, Finance lease obligation and Operating lease liabilities are disclosed separately in the financial statements. The budget formats does not provide for Finance and Operating lease liabilities. Finance and Operating lease liabilities are disclosed as part of Borrowings in the budget statements.

Other non-current assets included the Heritage assets in the budget statement but is separately disclosed in the financial statements.

All other items are disclosed on a comparable basis.

Statement of Financial Performance

The statement of financial performance is comparable on a line by line basis except for the following items:

The budget statements does not provide for all the different revenue classifications per statement of financial performance. For this reason, all line items not specifically catered for is incorporated under the line item Other own revenue in the budget statement. Other own revenue per budget statement consist out of the following line items: Third Party Payments, Sale of goods and rendering of services, rental of facilities and equipment, Agency services, Licences and permits, Fines, penalties and forfeits, profit / loss on disposal of assets inventory adjustments (surplus), interest received - outstanding debtors, construction revenue and Operational revenue.

Depreciation and amortisation, Impairment losses and fair value adjustments on Investment property are disclosed separately in the financial statements while these figures are aggregated in the budget statements.

Debt impairment and bad debt written off are aggregated in the budgeted statements, but disclosed separately in the statement of financial performance.

Services charges and availability fees are aggregated in the budgeted statements, but disclosed separately in the statement of financial performance.

Inventory consumed and bulk purchases as separately disclosed in the statement of financial performance is presented as materials and bulk purchases in the budgeted statements.

TOR-GENERA DUTH AFRICA Auditing to build public confidence

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

58. Budget differences (continued)

The budget statements does not provide for all the different expenditure classifications per statement of financial performance. For this reason, all line items not specifically catered for are incorporated under the line item Other Expenditure in the budget statements. Other Expenditure per budget statement consist of the following line items - Operational costs, Lease rentals on operating leases and inventory adjustments (loss)

All other items are disclosed on a comparable basis.

Cash Flow Statement

The Cash Flow Statement is presented on a comparable basis, except for the following item:

The movement in Consumer deposits are disclosed as part of the financing activities for budget purposes while it is disclosed as part of operating activities in the financial statements.

Changes from the approved budget to the final budget

Revenue

Total adjustments are mainly as a result of the following:

Total operating revenue increased by R 1,362,856. This was mainly due to a new grant allocation from the Garden Route District Municipality for the Greater Knysna Food Security Forum increasing Transfers and Subsidies revenue by R1 million.

Further adjustments occurred as a result of revenue already received in relation to the Skills Development Fund, Valuation Services and Insurance Claims and the VAT portion of the reduced Municipal Infrastructure Grant Allocation from National Treasury.

Expenditure

Total adjustments are mainly as a result of the following:

- An increase in Bulk Purchases of R 11,593,680 due to an Eskom billing error where the incorrect scaling factor was
 applied to the Eastford meter.
- An increase of R 8,344,976 was made to Contracted Services due to insufficient budget allocations and unforeseen expenditure.
- The new grant allocation from the Garden Route District Municipality for the Greater Knysna Food Security Forum increases operating expenses by R 1,000,000.
- Other expenses were increased with R 5,921,541 due to insufficient budget allocations and unforeseen expenditure.
- Other adjustments included adjustments to employee related costs, an adjustment to remuneration of councillors to
 accommodate for increased living costs and inadequate budgeting for water and electricity related items.

Capital budget

Total adjustments are mainly as a result of the following:

• A decrease of R 1,570,000 of the Municipal Infrastructure Grant allocation decreased the budgeted capital expenditure. A further decrease occurred due to IT related capital expenditure not anticipated to be spent at year end.

• The receipt of insurance pay-outs and the correction of errors due to initial misallocations resulted in a slight increase in the capital expenditure budget.

• Capital revenue decreased by R 1,445,219 due to a reduction in the Municipal Infrastructure Grant allocated by National Treasury of R 1,565,219 and a new grant allocation from the Garden Route District Municipality for the purchase of CCTV cameras of R 120,000.

59. Accounting by principals and agents

The entity is a party to a principal-agent arrangement(s).

Municipality as agent

Motor Vehicle Registrations Arrangement

As per Circular R12.1994 the executive committee of the provincial administration of the cape of good hope and the department of state expenditure granter authority that a new agency fee be paid to local authorities who have been appointed as registering authorities in the Cape province for the registration and licensing of motor vehicles in terms of the National Road Traffic Act 93 of 1996.

The municipality is the agent in this binding agreement and uses its own resources in performing the service delivery and capturing the information on the ENATIS (Electronic National Administration Traffic Information System).

Agency Fee Circular R5.2005 further states that all municipalities must perform weekly pay-overs in terms of MFMA 56 of 2003 section 64 (4).

Revenue and expenses from principal-agent transactions:

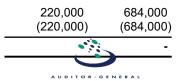

2022	Drivers licences	Vehicle registrations	Total
Revenue received from third parties	4,588,617	23,549,621	28,138,238

Housing arrangements

The Department of Housing has the mandate to provide basic housing to all citizens. The Provincial Department of Housing has entered into arrangements with the municipality in order to provide housing to those in need. In terms of the Guideline: Accounting for Arrangements in respect of the National Housing Programme, each individual transaction and arrangement is carefully considered in order to ensure the correct accounting treatment. Some deliverables meet the requirements of Construction Contracts (as we are considered the principal in these deliverables) (note 4).

Fees received from the Provincial Department of Housing for registering the owner at the deeds office are considered to not be for the benefit of the municipality and is not directly accounted for as part of the construction contracts. To this extent, the municipality is regarded as the agent and expenses are accounted for on a net basis.

Receipts from Provincial Department Payments made o.b.o. beneficiaries

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 2021

59. Accounting by principals and agents (continued)

Municipality as the principal

Distribution of prepaid water and electricity

The municipality entered into an agreement with Ontech Systems (Pty) Ltd to provide the hosting, vending, data management and supplementary support services to the municipality. Ontech Systems (Pty) Ltd distributes the prepaid electricity and water (by way of vendors) to third parties and pays the revenue received over to the municipality. The company does not use any of the municipality's resources.

The fees paid to Ontech Systems (Pty) Ltd during the year was R 11 337 422 (2021: R 10 228 195).

In the event that the arrangement is terminated and the municipality decides to provide the service and not make use of a contractor, the municipality will as a minimum have to procure software, computer infrastructure and additional employees.

60. Segment information

General information

Identification of segments

For management purposes, the municipality is organised and operates in four key functional segments (or business units). To this end, management monitors the operating results of these business units for the purpose of making decisions about resource allocations and assessment of performance. Revenues and expenditures relating to these business units are allocated at a transactional level.

The four key business units comprise of:

- Community and public safety which includes community and social services, sport and recreation, public safety, health and housing services;
- Economic and environmental services which includes planning and development, road transport and environmental protection services;
- Trading services which includes energy sources, water management, waste water management and waste management services;
- Municipal governance and administration which includes executive and council and finance and administration services.

The grouping of these segments is consistent with the functional classification of government activities which considers the nature of the services, the beneficiaries of such services and the fees charged for the services rendered (if any).

Management does monitor performance geographically but does not at present have reliable separate financial information for decision making purposes. Processes have been put in place to generate this information at a transaction level and in the most cost effective manner.

2021

61. COVID-19 Response Expenditure

On 31st December 2019 the government in Wuhan, China, confirmed that health authorities were treating dozens of pneumonia cases of unknown cause. A few days later, Chinese researchers identified a new virus which had infected many people in Asia, but at that point time there was no evidence that the virus was readily spread by humans. The first death in China as a result of the virus was reported on 11th January 2020, shortly before one of China's biggest holidays whereby millions of people travelled across the country. According to the first situation report by World Health Organisation (W.H.O), the first confirmed cases outside China had occurred in Japan, South Korea and Thailand by 20th January 2020. The next day the USA reported their first confirmed case where a man in his 30s developed symptoms after returning from his trip to Wuhan, China.

A "public health emergency of international concern" was officially declared by the W.H.O. on 30th January 2020. On 11th February 2020 the W.H.O. proposed that 'Covid-19' be the official name for the disease that the coronavirus causes, an acronym that stands for coronavirus disease 2019. On 14th February 2020 France announced a death by from coronavirus. This was the fourth death from the virus outside of mainland China. On 23rd February 2020 Italian officials locked down 10 towns after a cluster of cases emerged near Milan. The World Health Organisation declared the COVID-19 outbreak as a global pandemic on 11th March 2020.

Covid-19 in South Africa.

Although the coronavirus was international news since December 2019, it was only on 5th March 2020 that the South African National Institute for Communicable Diseases confirmed that a suspected case of COVID-19 had tested positive. On 23rd March 2020 President Cyril Ramaphosa announced the nationwide lockdown. On 30th March 2020 the Minister of Finance issued a conditional Exemption Notice in terms of section 177(1)(b) of the Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), in order to facilitate and enable the performance of legislative responsibilities by municipalities and municipal entities during the national state of disaster.

The table below indicates the total Covid-19 response expenditure for the period ending 30 June 2022.

Summary per expense objective		
General	-	56,153
Community and Social Services	164,106	529,027
Public Safety	-	36,503
Health	322,478	357,828
